Fred A. Caton, who has successfully filled the position of assistant manager for *Hardware*, with headquarters in New York, will, during the coming year, fill that of Eastern representative, with his office at No. 31 Milk Street, Boston, Mass. Mr. Caton will make it his special business to see that New England is thoroughly represented in the columns of *Hardware*, and will devote to the Hardware interests of that section his best thought and entire attention. He is cordially commended to our Eastern friends as a courteous, energetic and reliable gentleman.

Editorial Trade Review.

The country is closing up the industrial year with a halo of glory crowning a success that is beyond all comparison and of phenomenal brilliancy. Never before in our industrial history has confidence so thoroughly permeated every channel of development. Scarcely an iron and steel manufacturing plant in the country but finds its order books filled with the demands from other countries than our own, and these orders contrary to the usual custom formerly prevailing, have been entered with a margin of profit satisfactory in itself as a business transaction; and for a wonder, our export transactions are now entertained with a view of keeping up a connection so conscientiously established and so encouraging in its importance. It must be extremely gratifying to know that sales can now be made abroad by our productive mills and mines, at quotations bringing in satisfactory returns, not only in England and Germany, but in other parts of Europe and even Asia.

Many prosperous conditions surround our agricultural development, and the railroads whose prosperity depends upon improvements consequently made necessary. The growing traffic demands extraordinary facilities for the handling of our increasing agricultural wealth, and when we realize that this unbounded prosperity is only in its early stages, how little do we understand to what an extent will its ultimate benefits be known or estimated.

The general trade of the country has rarely, if ever, shown such healthy conditions. From every part good reports are made, and the holiday trade especially exceeds in volume any year during the past decade. The people are earning more, steady employment having made it possible; and naturally when the masses have work at good pay, they spend in ample volume and the country knows prosperity. It is only when the working classes have steady employment, is such a state of affairs among the certainties.

The wave of progress so noticeable in our present relations abroad cannot but have a tendency to keep certain lines of manufacture fully employed, and eventually by reflex action, tempt a revision of prices in other analogous lines with a desire to increase net earnings. Everything seems so smooth at the present time, with scarcely more than a ripple apparent in that direction, that one need not be surprised if caught napping, for profits in so many branches of our own industry have been cut so close, it would need but little urging to insist on more profitable employment for some industrial plants, than have been possible in the past. A number of leading lines, notably screws, have already felt this necessity upon them, and have stiffened their lowest quotations perceptibly, and those will be followed during 1899 by many others.

No one at this time doubts the settlement of the sound money question in favor of financial stability and a gold basis. The issue of silver can never again be made one of national significance on the strength of which a presidential canvass can be maintained. The result of this decisive victory has placed every industry in the country on a foundation so solid in reference to our home or foreign relations, that the confidence in our future prosperity on every hand is of world-wide significance. Our manufacturers have not been carried away by the possibilities of this hopeful trend of affairs, and have made generally no high quotations to stifle the growing demand, have been extremely conservative in soliciting and encouraging orders, deeming it wise to have the order books covered with requirements for the future even at a lower rate of profit, than to enjoy a state of idleness waiting for booming conditions. With the condition of affairs in this state of health, it is but just to believe that higher prices will eventually prove the feature of the various markets and in some extreme cases changes in price may seem even radical under ordering conditions of more than the usual importance.

1898—Christmas—1899.

When this copy of *Hardware* falls into the hands of its appointed reader, he will already have given and received those tokens of affection which assist in making this holiday season what it is; will have eaten, we hope, a bounteous Christmas dinner; and is now ready to hopefully turn his face toward the new year, which is rising with promise over the borders just beyond.

We may be permitted the wish that it was his fortune to give much, and to receive much more; that he

Digitized by Google

consumed his well-earned turkey and mince pie with good digestion and a thankful heart; and that the outlook which presents itself before his mental vision is of a roseate hue. May 1899 be even more cheerful than 1898, and its return in moral, mental and material things even greater than those harvested in the twelve months past!

The year 1898 will be remembered as one of history—its twelve months crowded with events that have illuminated the record of our nation's career. The events which have been crowded into this year are far-reaching in their consequences, and in no better way can our country show that it is worthy of the good which the gods have poured upon it than by rising to the opportunities which are now presented. That respectable, but very small, minority of the American people who say that we must not reap the fruits of our labor, and retain those things which come as the natural result of the glorious deeds of our brave defenders on sea and land, have some arguments which look well in print, or sound well from the platform, but which cannot stand for a moment in the face of manifest destiny, and that determination of our people to prove themselves worthy of the high responsibilities which have been thrust upon them.

These United States of ours have always been prepared to meet and conquer every emergency which has thus far presented itself. Graver questions than those now confronting us have been met by our statesmen since the days of Washington, and to say that we should shrink from responsibility now, is to intimate that the quality of American manhood has deteriorated, and that our institutions are not capable of withstanding the strain placed upon them. How many American citizens are prepared to admit any such conclusion?

As our national domains widen, as our influence increases in the politics and policies of the world, as our flag is unfurled to remain for all time in new climes, so should the material interests of our country be advanced with them. Where the battle-ship and the flag have gone, trade must certainly go. Where the soldier and the sailor have opened the way, the trader and the merchant must follow. Among the many blessings which we are to bestow on these children of the Far West and of the Southeast, who have sat in darkness and groaned under Spanish misrule, are the placing within the hands of our new dependents—who are eventually to become citizens—the products of our American shops and factories—those many things which they need, and which we can supply in abundance.

There are indications upon all points of the horizon that the American merchant and the American manufacturer are rising to the high level of their opportunities.

To our many friends in all quarters of the globe, who have assisted us to that increased success which has been a part of the record of *Hardware* for the past year, we extend a most heartfelt, cordial Merry Christmas and Happy New Year!

Frederic G. Wooster, who has been connected with the Simmons Hardware Co., St. Louis, Mo., as a buyer, has become associated with the Peck, Stow & Wilcox Co., New York, as traveler. His many friends will welcome him as a part of one of the great concerns of the East.

Mr. Emery in Indianapolis.

The St. Joseph, Mo., *News* of a recent date, has the following in regard to a gentleman well known to the readers of *Hardware*:

The friends of Charles W. Emery will be sorry to hear that he will leave St. Joseph this week, to take up his residence in Indianapolis, Ind. Mr. Emery, who was for years manager of the traveling men for the Wyeth Hardware & Mfg. Co., of this city, has gained considerable prominence by his papers on the subject of "Salesmen's Departments," which are being published (exclusively) in *Hardware*, the New York publication devoted to the interests of the Hardware trade. The publication of these papers resulted in Mr. Emery's being invited to address the session of the National Hardware Association at Milwaukee last month. The association ordered Mr. Emery's address printed, with the president's address, in advance of their publication in the regular proceedings of the convention.

Mr. Emery has secured an interest in the Van Camp Hardware & Iron Co., of Indianopalis, where he will go to organize a salesmen's department similar to that he organized and maintained so successfully for the Wyeth Co. in this city. The Van Camp Co. occupies a prominent position in the Hardware trade east of the Mississippi River.

Colonel Belknap at Home.

The people of Kentucky are in a very generous frame of mind toward Col. Morris B. Belknap, of Louisville, and also of W. B. Belknap & Co., of that city. He has just returned from Porto Rico, whither he went as a soldier in the service of his country. He performed that service so well, that his native State now talk earnestly of him as fit material out of which a governor could be fashioned. If this idea works out to an accomplished fact, Kentucky will secure a chief magistrate of which she may well be proud. The National Hardware Association, at the recent meeting in Milwaukee, showed its appreciation of the absent soldier, by making him first vice president of that great organization.

One of the handsomest publications of the year comes to us with the word "Bissell's" in gold on a dark background. That is the only thing on the outside cover of this little publication, with the exception of a silver cord and silver eyelets, and of very artistic appearance in every respect. An examination of the contents shows that the Bissell Carpet Sweeper Co., Grand Rapids, Mich., have in their new catalogue for 1899 excelled even themselves in the way of artistic production. Upon very heavy and highly-finished paper appear in colors, upon a drab background, the various sweepers manufactured by them, accompanied by prices, descriptions, etc. There is also shown Bissell's "Single Easel," which displays three sweepers; Bissell's "Display Shield," which is designed for displaying sweepers on counters or in show windows, and Bissell's "Double Easel," with carved oak top, which displays ten carpet sweepers at one time. This little publication is, in short, a compendium in the line of sweepers.

Arthur S. Hobday, who has been connected with the firm of Watters & Martin, wholesale Hardwaremen, Norfolk, Va., for the past twelve years, eight of which have been spent on the road, has formed a connection with the Biddle Hardware Co. of Philadelphia, and during the coming year will travel through the eastern sections of North and South Carolina. Mr. Hobday is a bright and successful business man, and the Biddle Hardware Co. are to be congratulated on this strong accession to their working forces.

Cardenas, Cuba, is 135 miles east of Habana, on the north coast. Population 23,517. Climate pleasant in winter, hot and sultry from May to October.—*Exchange.*

THE SALESMEN'S DEPARTMENT--IV.

THE MANAGER.

The man who has saved money from his earnings is the best man to make and save it for an employer.

Salesmen, like other mortals, will receive suggestions and advice more graciously from a person who has been a success himself.

The successful manager will be found to have been a success as a salesman, and not one of mediocre ability.

Theory will not satisfy the majority of men on the road to-day; they want suggestions only from men who base their counsel on practical experience.

Those who may adopt this key to success in the future, should not blunder by making some old house employe manager, thinking it would be an easy position to fill, and quite suitable for a man of declining years. Rather pension him, he no doubt deserves it, and it will pay better, because he will not accomplish the desired results. The salesmen, while they will appreciate his fatherly advice, and respect his grey hairs, will soon conclude he is not quite up to date, and his influence over them will quickly wane. The work requires all the energy, vigor and force a younger man can muster, and then sometimes he wishes for a double portion.

A man who has been there himself, is the one who appeals to the salesmen, and from whom a letter in reply to one from them, explaining their difficulties and trials, does good like a dose of medicine.

The cause of the downfall of many a salesman through strong drink and strange women, has been because of a feeling, that they had no one on earth, forgetting the One above, to whom to take their discouragements. In their despondency, they allowed themselves to be "caught" by her feigned sympathy, and have tried to drown their troubles in a whiskey glass, or forget them at the card table. No man careth for me; every man's hand is against me; is the cry of many after receiving one of those cutting letters which only some men who lack the experience of the road, can write, and as a consequence, know nothing about, nor can they imagine, a contingency which this action on the part of the salesman was to meet.

Buyers or others who are associated with salesmen or who correspond with them, whose education has been altogether acquired in the house, are unable to put themselves in the salesman's place, and often do not interpret matters as the salesman expects. They should not wonder why the salesman often requests the kindly offices of the salesmen's department in bringing matters to their attention instead of writing them direct.

Seniority should not be considered in the selection of a manager from among salesmen. If the senior salesman happens to be the best fitted for the position, it is indeed fortunate and complimentary to him.

Success as a salesman does not insure success as manager of co-workers. A successful salesman necessarily has many of the qualifications of a successful manager. In selecting one for this peculiar and important position, see to it that your choice is methodical, not averse to details, enterprising, self-possessed, just and sympathetic.

Methodical, for he will be compelled to classify and arrange his work, because of the scope of the department. Anything connected with the sale of goods, by the salesman, which will make dollars for the house and economize the salesmen's time, that he may devote all the time possible to the sale of goods, covers the aim of the department.

Not averse to details, for in no other department in the house are the little things expected to be looked after as here. It is because the department has scrutinized matters which have been passed over by others, that its value is becoming apparent in every progressive jobbing house.

Enterprising, for he must lead—must go ahead beckoning the salesmen to follow. There is no class of men to-day more willing to be led into larger fields of usefulness and on to greater attainments than the Twentieth Century Salesman. The salesmen's department does the picket duty for the house. The buyers realize its efficiency as an aid to increased purchases. It is a power in the hands of the right manager.

Prudent, for he must not give his enterprise too free a hand. He must be wise in branching out into new territories and on new lines. He must be very careful to lead the salesmen aright. It only takes a few errors in judgment on the part of the leader to cause the salesman's confidence to waver. Some buyers feel a salesman can sell anything, regardless of quality or merit. They are correct only to a certain extent. No true salesman, who desires to increase his worth to his employers, will willingly unload trash on his customers.

Self-possessed—for a man who is easily scared is not competent to be at the head of this department where emergencies are of frequent occurrence. Bluffs are numerous, unheard-of prices, baits and rumors of impending troubles which never occur, are every day affairs.

Just, for he must keep the best interests of both his employers and co-workers always in mind. For this reason his position is not an enviable one. To have the entire confidence of both, is the highest compliment which can be paid any manager.

Sagacious, for he must be able to go to the bottom of things, dissect motives, size up applicants, detect schemes, guard against the designs of others, and have the ability to turn failure into success.

Sympathetic, for this is the most important of all qualities. His sympathy must be broad and free. It will be in greater demand than any other attribute, because of its scarcity elsewhere. There is no investment which brings larger returns than a sympathetic interest in others.

New Members of the Hardware Club.

At the regular monthly meeting of the board of governors of the Hardware Club of New York, held on December 15th, the following gentlemen were unanimously elected to membership:

Lucas C. Clark, Plantsville, Conn.

Wilfred Patterson, New York *World* Building.

Edward Payson Call, publisher *Evening Post*, Broadway.

J. S Seymour, publisher *Commercial Advertiser*, No. 29 Park Row.

T. Charles Farrelly, American News Co., No. 39 Chambers Street.

Henry M. B. Williams, Union News Co., No. 13 Park Place.

Edward W. Riker, assistant treasurer Yale & Towne Mfg. Co., No. 9 Murray Street.

Arcade File Works' New Book on Files.

From advance sheets of the new book on files now being prepared by Prof. W. H. Vandervoort, we are permitted to make the extracts which follow. The volume is being prepared under the auspices of the Arcade File Works, Anderson, Ind., and No. 97 Chambers Street, New York, and when completed, will be forwarded to all dealers and users of files, who have requested a copy in advance of

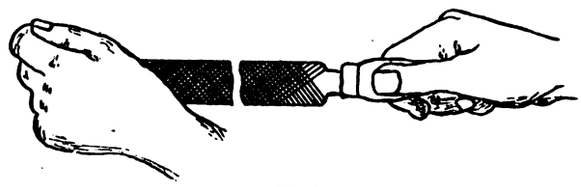

FIG. 1.

publication. As the edition will be a limited one, early application for a copy would be recommended.

ON CROSS FILING.

The term "cross-filing" applies to those filing operations in which the file is pushed endwise across the work. When in cross-filing the character of the work requires a heavy file, it should be held in both hands, as shown in Fig. 1, the end of the handle abutting against the palm of the hand, thus giving a good bearing to receive the thrust on the work stroke. When held in this manner an extremely tight grip is not required, which makes it much easier on the fingers and enables the workman to more readily control the file.

When a very light file is being used on fine work it is usually best to hold it in one hand, as shown in Fig. 2. In this case the thumb rests against the side of the file just

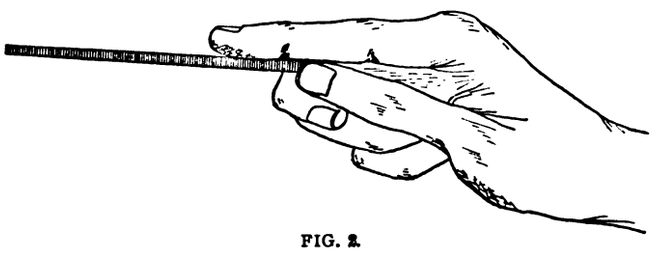

FIG. 2.

ahead of the handle, and the free finger extends along the top, considerable downward pressure being exerted by this finger, as near as possible, over the working surface of the tool.

When the file is of medium size and thin, if held as shown in Fig. 1, the pressure at the ends will bend them down, making the file concave on its under surface, which will cause it to cut away the metal at the edges, as shown in Fig. 3. If, however, it is held as shown in Fig. 4, the downward pressure of the thumb will spring the file at the opposite direction, and thus enable the operator to move it across the work without cutting away the edges. When the thumb becomes tired, the position shown in Fig. 1 can again be taken, the ball of the thumb bearing down hard on the file and the fingers lifting at the point accomplishing the same object. Either of these methods of holding

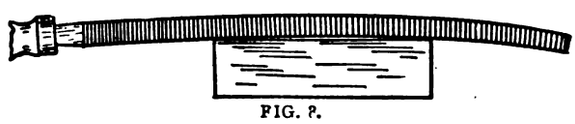

FIG. 3.

are difficult to maintain for more than a few moments at a time, consequently a stiffer file, having considerable belly, is preferable on work of this character.

The value of a good file handle should be appreciated. It should be of good size, well formed, smooth, properly ferruled and, most important of all, so secured to the tang that its center line is parallel with the length of the file. Handles made of soft, tough wood are preferable, as they are lighter and less liable to crack when forced on the tang. The soft wood handle, if provided with a hole for the reception of the tang of a diameter slightly greater than the thickness of the tang, can be driven on without danger of cracking. If of hard wood a good job requires heating the tang red hot and burning the hole in the handle to fit it. Care must be exercised, or the temper of the

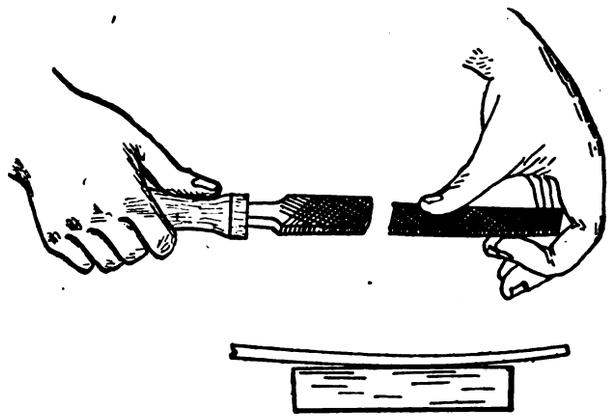

FIG. 4.

teeth near the heel will be drawn. A piece of wet waste wrapped around the heel will prevent this.

When the work surface is so broad that the file cannot be held, as shown in Fig. 1, on account of the handle striking against the edge of the work, a surface file holder must be used. In Fig. 5 is shown such a holder. The bottom of the handle is provided with a tapered, dove-tail slot to receive the tang, the outer point resting on the top of the file. Before applying the handle file the edges of the tang to approximately fit the dove-tail slot, as this may save a jammed set of knuckles. In using a file with this holder, the fingers of the left hand, resting on the top

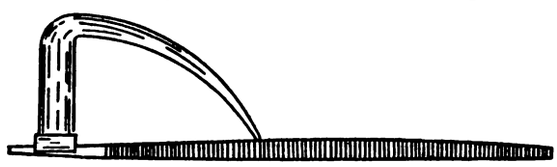

FIG. 5.

of the file, must give nearly all the pressure necessary to make it cut.

The form of surface file holder shown in Fig. 6 possesses the advantage of giving the operator a handle similar in shape and position to that used on ordinary narrow work. The rod enables the left hand to so grasp the point of the file that the downward pressure may be applied with less fatigue to the hand than in the case shown in Fig. 5. When the handle is screwed tight against the shoulder, the rod draws up on the point, thus tending to give the file more curvature, an advantage of considerable moment in filing accurate plane surfaces.

The above "talk" treats of the rudimentary part of file work, and a careful reading will help beginners, but no matter how experienced a workman may be, he cannot get the best results unless he has a good file. In connec-

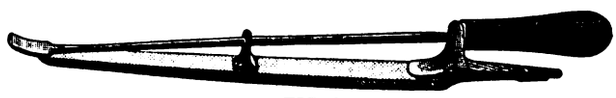

FIG. 6.

tion with this suggestion, reference is made to advertisement on page 37.

The Anthony Wayne Mfg. Co., Fort Wayne, Ind., and St. Louis, Mo., have issued an illustrated catalogue and price list of their washing machines, Cyclone churns, bread-boards, ironing tables and self-measuring oil-pumps. All these articles are thoroughly illustrated and described.

HARDWARE'S "Prices Current" are reliable.

HARDWARE NOTES BY THE WAY.

Editor Hardware: The Milwaukee meeting was generally voted a success. The delegates were not slow in spreading its fame.

If all the clerks read *Hardware*, as many do, instead of getting such up-to-date information as they desire from stray circulars and other inanimate sources, there would be a happier clerkhood. *Hardware* literature in text and ad. will enlighten; enlightenment means advancement. Show your employer that you have anticipated the information he wishes to impart, and if you do it in a manner that will not hurt his pride and prerogative, you will not have to ask for material advancement. The enlightened clerk moves ahead spontaneously.

From an ad.: "Lawn mowers in winter time! How inconsistent in a climate of November snows! But this winter of our discontent, carrying as we do a super-season stock of mowers that ought to make room for snow shovels and other wintry paraphernalia, and our space being worth more to us than the mowers, we offer herewith, to close them out, at prices which will not prevail next summer. At these prices you can afford to carry a mower over the winter. A good mower at a bargain price is a thing of beauty and joy in your garret even in winter time."

Cleveland furnishes many good things in the Hardware line. Specialties and staples now of world wide renown, owe their origin to Cleveland. But the best thing Cleveland ever produced is the N. H. J. A. Even H. H. Bishop says so, and he is modest.

The electrical industry is so vastly expanding and constantly evolving so many articles for modern uses and convenience, that no Hardware dealer can afford to treat the line as an adjunct. Electrical supply houses are not so numerous as formerly; the trade is contracting. Why? Wide-awake Hardware dealers have shown such a live interest in the line and handled it so profitably to the manufacturer, the exclusive supply house has met a competitor worth reckoning with. The Hardware trade of the United States ought to control at least 25 per cent. of the electrical supplies demand for household and petty commercial uses in the cities, and practically all in places not having these supply houses.

Burglaries are so numerous now that the Hardware dealer ought to do a deal in appliances of the anti-burglar description. Since anti-burglar and highwaymen evolutions have proceeded to an extent where a man may feel comfortably safe, if he only knew how to protect himself, the Hardware dealer ought to come out and talk plainly. I know of a Cleveland dealer who sold over 500 revolvers in one week simply by calling the attention of the public to the highwaymen and burglar epidemic, as he termed it.

If you don't believe that prosperity is in the land, at least in the shape of activity, visit the larger agricu tural implement factories. According to inquiries, prospects and movements in this line, the American farmer has prosperity to give away.

Coal is a big item to every comfortably-inclined home owner in the winter time. He tries to economize in this item more than in anything else; it seems to be a chronic characteristic. First he buys a stove that is represented as a fuel saver; then he buys coal that lasts longest. At least he thinks he does. He sometimes isn't aware there are appliances on the market that effectually economize fuel. Make this fact known to the public, and you will sell fuel economizers.

A Western dealer has inaugurated a novel window feature. The window is trimmed up with wintry scenes; the floor of the window is sheeted with glass to represent an ice surface. Over this skim at intervals a bevy of automaton brownies mounted on skates. The exhibition attracts crowds of onlookers, and the store sells skates.

"This is the winter of our content," says a bright dealer in his ad. He claims that so far this season he has sold more stoves, snow shovels and other winter paraphernalia, than all last winter. His claims may be oversanguine, because the pre-season rush overwhelmed his better judgment, but the fact is, nevertheless, that business has not been better in the best years of the '80's, as regards volume at least.

To quote from an ad.: "I am not an expansionist of the imperial order, but I believe in commercial expansion. Since we have several un-American possessions on our hands which we must undertake to civilize at any cost, our old Indian policy will probably be the most effective. Cubans and Filipinos must be good before they can become Americans. We expected the same thing of the Indians whom we had conquered. But it has been our experience that the quickest *modus operandi* was to furnish them with arms and ammunition with which to annihilate themselves. If this policy must come to a new test, we are in the line of purveyors."

Trusts may kill old enterprise, but foster new. The various combines in the Hardware and iron branches have proved this to be the rule rather than the exception.

The new shear combination is not supposed to still further shear off profits. Neither will independent concerns be shorn of their influence. No combine, no matter how powerful, can crush out a commercial individuality which endured by sheer force of merit and achievement. So, the non-trust concerns will kindly shear to the right and left, and let the trust pass in review. When the show is over, you may do business as of yore.

Farming tools, or in a wider sense, agricultural implements, will presumably be a live feature of the trade in advance of the coming season. The farmers have now had two good crop years at good prices on the average. The manner in which they have discharged old obligations proves that. Their minds are no longer burdened with the anxieties which debts and mortgages that fall due after harvest entail. The majority of farmers who are free owners and a large percentage of the tenantry have cleared enough during the past two years to place them within the pale of modernization. Many can afford to pay as they go. The inquiries now had for fencing and tools will stimulate the country merchants to buy liberally. It will once more set the machinery of the correlative factories in motion that since '92 have felt the strain of the agricultural depression. There are great possibilities in this line, and the aggressive factors may expend even premature energy to the best of advantage.

Cleveland, December 15, 1898. J. B. RINDFLEISCH.

The firm of Elie Weill & Co., of Paris, France, will have charge of the big exhibit of the National Cement & Rubber Mfg. Co., for which arrangements have already been made for the entire period covered by the Paris Exposition.

The principal exports from Cuba to the United States are fruits and nuts, iron ore, molasses, sugar, tobacco and wood, valued at $77,000,000 for 1893, and less than $17,000,000 for 1897.—*Exchange.*

Digitized by Google

National Cement & Rubber Mfg. Co.

E. P. Hubbell, secretary, treasurer and general manager of the National Cement & Rubber Mfg. Co., Toledo, Ohio, has tendered his resignation as assistant cashier of the Second National Bank, of that city, which, by the way, is the ranking bank of Ohio, to take effect January 1, 1899, and will thereafter devote his entire time and attention to the rapidly growing business of which he now owns the controlling interest. The original stock of this concern was placed at $25,000, and of this Mr. Hubbell now owns $19,200. Yet the business and capacity of the concern, which occupies the entire five floors of one of the largest buildings in the city of Toledo, is thousands upon thousands beyond its capitalization. Mr. Hubbell has been identified with the Second National Bank of Toledo for ten years, and his resignation was most reluctantly received.

In addition to attending to his business at the bank each day, he has been found at his desk in the factory almost every evening from the close of banking hours up to 10, 11, and often till 12 o'clock.

The National Cement & Rubber Mfg. Co. now have agencies in every city of any consequence between the Atlantic and Pacific, and from the State of Maine to the Gulf. It also has well established trade in South Africa, South America, Sandwich Islands and the principal countries of Europe. A branch house has been established in Paris, which is under the management of Elie Weill & Co., who are regularly authorized agents. An officer of the company says: "This is the only concern of its kind that sells only to jobbers." It has several salesmen on the road, and trade of late has shown a most remarkable increase.

The Arcade Absorbs the Warner.

The Arcade Mfg. Co., Freeport, Ill., have again demonstrated that nothing succeeds like success. They have added to their material possessions, and have increased their opportunities for usefulness, by the purchase of the entire outfit of the Warner Hardware Co., of the same city. In a notice to the trade in announcement of this fact, the Arcade Co. say: "We have just purchased the business of the Warner Hardware Co. of this city, consisting of its entire stock of material and manufactured goods, machinery, tools, forms, fixtures, patterns, patents, good-will, etc. We are now transferring these effects to our factory, and in a few days shall be prepared to supply the trade with all articles formerly made by the Warner Hardware Co. The addition of these articles to those we already have will give us the largest and complete line of light Hardware and patented household novelties ever offered to the public. Our new catalogue, with cuts and descriptions of this extensive line of goods, will be completed early in January, and can be had on application. By adding only superior goods to our line and keeping abreast of the times in quality and finish, we hope to merit a continuance of the liberal patronage accorded in the past."

It may be added that the taking on of this new line will necessitate a large addition to the Arcade plant, and they are planning to build in the spring, as early as the weather will permit, a substantial brick building of two stories, 50 by 120 feet in size, that will be equipped with modern appliances and machinery, which will enable them to take all possible advantages of manufacture in their line, and give the trade prompt service.

The "Graphite."

Under the taking heading of "Graphite," with date of December, 1898, the Jos. Dixon Crucible Co., Jersey City, N. J., have issued a striking little paper, which is headed Vol. 1, No. 1, and which is "issued in the interest of Dixon's graphite productions, and for the purpose of establishing a better understanding in regard to the different forms of graphite, and their respective uses."

In a very taking and cordial salutatory, the editor more fully expresses the purposes of this publication, in the following words: "Our enthusiasm in the possible uses of graphite has not abated even with the knowledge that we now have that graphite, in some form or other, is used by every civilized person on the face of the earth. We fully believe that the uses of graphite will largely increase and that the industry is only in its infancy, and it is for this reason that we hope to regularly issue this publication in order to establish a better understanding in regard to the different forms of graphite and their respective uses; for the fullest success in the use of graphite is due as much to the selection of the proper kind for the work as to its proper preparation."

That same brightness and directness of expression which have been noticeable features of all the literary productions emanating from this great company, are shown in this little publication.

Art on the Mississippi.

Col. James R. Nutting, of Iowa, has a handsome home overlooking the broad Mississippi, and when not engaged in summing up the profits of the Sickels, Preston & Nutting Co., or writing those spicy Davenport letters which give such zest to the correspondence columns of *Hardware*, finds occupation in looking Eastward across the great river, and letting the latent artistic element in his soul find expression in some scheme for the general good. This mood always comes upon him with renewed energy at the Christmas season. For several years past the outcome has been a series of "art studies," which have been sent with the compliments of his house to their many friends and patrons in all parts of the country. We are pleased to note that a new installment of this series has come with the closing days of 1898. The scenes which are depicted are timely; the artists are leaders in their lines, and the half-dozen pictures enclosed are fine enough to keep as they are or to frame—and the whole thing shows that art flourishes as finely upon the banks of the Mississippi as in other and older sections of our beloved land.

Ives' New Catalogue.

Hobart B. Ives & Co., New Haven, Conn., have just issued to the trade their Catalogue No. 10, designed for the business of 1899. It forms a very attractive pamphlet of thirty pages, well printed, with excellent illustrations, and with a description of the goods specified that is at once concise, plain and easily understood. The contents cover his complete line of window Hardware specialties, to which the "trade mark" name of "Ives" has for many years given due significance. This line includes window ventilating bolts, Ives' sash locks in the greatest variety possible, embracing over 100 different styles and finishes, Ives' window stop adjusters, for windows and sliding doors, surface and flush sash lifts, shutter bars and mortise door bolts. In connection with this larger catalogue is published a smaller one with similar contents, intended for distribution generally by the trade, being of the proper size to go in an envelope to perform its mission of enlightenment. Those of the trade not in receipt of these 1899 catalogues would do well to request the forwarding of the same.

The National Cement & Rubber Mfg. Co. are to have 100 feet of floor space at the Paris Exposition. They will also occupy Space No. 169 at the New York show, and have space at Philadelphia and Chicago shows. At each of these places will be given an exhibit, showing as near as possible something from every line of goods made by the company.

NEW GOODS AND SPECIALTIES.

High Pressure Brazers.

The High Pressure Brazers of the National Cement & Rubber Mfg. Co., Toledo, Ohio, here illustrated, with the new improved adjustable hydro-carbon burners, have all the points of a strictly high grade brazer, and are practical in every way. The burners are a late invention, and embody new principles in the generation of heat. The tank is made of boiler steel, galvanized, and tested to 150

pounds pressure. The piping is extra heavy, and the brazer head and tray are adjustable to any height, making altogether the ideal machine for the repair shop. It is claimed that the "High Pressure" Brazer can be operated by inexperienced hands and requires less time and less fuel than any other brazer to accomplish the same amount of work. Gasoline is the fuel used. A gauge, large floor pump, fire brick and full directions how to operate, accompany each brazer. Send for catalogue.

New Departure Bells.

If all the bells made by the New Departure Bell Co., Bristol, Conn., were set jingling at once, the music would fitly ring in the new cycling year of 1899. Their line is remarkable, both in extent and character, and the truth of this statement will be realized by an examination of the various illustrations here shown. In describing these articles, the company say: "In addition to the well known lines of New Departure and Bristol bells there is this year a distinct 'New Departure,' both in conception of design and in carrying out the design to its logical conclusion in the complete bell. Fig. 1 represents the Dragon Bell, which has upon the gong a perfect representation of the Dragon of mythology in high relief, the gong being finished in matte or velvet surface so that the figure stands out bold and plain, forming a handsome and ornate bell. In this same line there is the Turtle (Fig 2) modeled upon the same lines as the Dragon, also the Lion. In the Lion Bell the whole gong is formed by the head and mane of a

FIG. 1.

Lion, the features at the top standing out in high relief and making a very attractive representation of an African Lion (Fig. 3). Another unique design is the Serpent, the gong representing a rattlesnake coiled and on guard, and around the rim of the gong rises the marsh grass and weeds through which the snake is seen coiled. These designs are handsomely modeled, hand chased and finished in a rich antique statuary bronze with base and clamp to match. In this line of bells the New Departure lock clamp only is used, and the gongs are all of the square beaded pattern, which is this year enriched by a rope fillet at the junction of the gong and bead. Another novelty which the New Departure Co. is placing upon the market is the Push Button Flag Bell (Fig. 4) illustrated herewith. On a rich matte background appears the American flag surrounded by a

FIG. 2.

FIG. .

highly polished and finished gong. The stars are silver on blue field, and stripes are alternate red and silver, the colors being of the correct shade and in hard enamel which will not crack or peel off under exposure to weather or wear. In this bell, instead of having the thumb lever for making the alarm, it is operated by a push button, and when the button is pressed the bell will ring. Turning the gong to the right with the hand re-winds the bell, which, however, is only required at long intervals. Illustrated herewith also is the L. A. W. Emblem Bell (Fig 5). which for beauty of finish and appropriateness of design is unsurpassed by any yet brought out. In this bell the wheel, spokes, wings and initials are perfect and unbroken, in high relief and finished in the finest nickel plate, highly polished and finished. In the centre appears the star which forms a component part of the emblem of the League. This bell is also furnished with large, finely cut and brilliant imitation amethyst set into the centre in place of the star, thus giving the colors of the League and at the same time an exceedingly handsome, rich and chaste emblematic bell. The League Bell is furnished with lock clamp or plain clamp, with dark oxidized background below the emblem or natural velvet nickel finished as desired. The Lion and Turtle bells have handsomely jeweled ruby eyes. The Snake and Dragon have emerald eyes. These jewels are finely cut and polished, and very brilliant." Full particulars can be obtained from

the New Departure Bell Co., Bristol, Conn., or John H. Graham & Co,, No. 113 Chambers Street, New York.

"Invincible" Ice Scale.

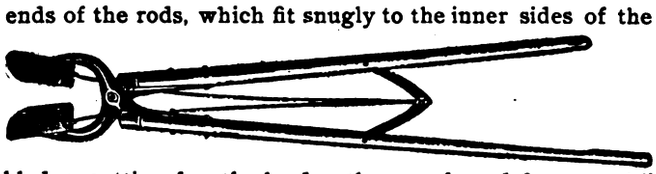
The Pelouze Scale & Mfg. Co., Nos. 133-139 South Clinton Street, Chicago, are placing upon the market the "Invincible" Ice Scale, which they inform us, is meeting with considerable success with the large ice companies and Hardware jobbers. It is designed for use on ice wagons

Digitized by Google

principally, but will be of general service in large manufactories, packing houses and all places where large quantities of ice are handled. In describing this article the manufacturers say: "The new Invincible Ice Scale contains all the good points of other scales, and in addition, comes nearer meeting the requirements demanded by the ice trade than any other scale on the market. It is accurate, unbreakable;

is so constructed as to relieve all strain; both the ring at the top and hook are swivel; the dial is aluminum, with distinct black figures; owing to its construction, when a weight is hung on the scale, together with the usual momentum of rough handling, the index is not retarded, but is allowed to go the full distance of combined weight and force, after which it will immediately adjust itself to exact weight. If for any reason the index should ever register below zero, it can be quickly adjusted by removing cap at bottom and raising index arm, thus insuring a permanent scale; is recommended and highly endorsed by the largest ice companies. Write for prices."

Horseshoeing in Winter.



Every horse owner knows how horses are strained, when they lose their foothold on slippery roads. This evil, and the accidents arising therefrom, are now done away with, through a most important invention, viz.: the "Horseshoe-H-Stud (Neuss' Patent.") These studs have the shape of an H, of which the edges always remain sharp. Great saving of horses is thereby obtained, they having a sure footing

even on the most slippery roads. This invention in horseshoeing has given general satisfaction. In order to meet the enormous demand, Leonhardt & Co., Berlin, Germany, the patentees and manufacturers, have been obliged to enlarge their premises, and having lately built a large factory at Schoeneberg, near Berlin, which they have fitted out with special machinery and all modern improvements, they are now turning out such quantities that they have been enabled to materially reduce their prices, so that their H-studs are now not only one of the best studs, but also the cheapest in the market.

Ryan's Post-Hole Digger.

In this connection is shown Ryan's Post-Hole Digger, manufactured by John S. Bolton, successor to C. Peterson & Co., Moline, Ill. The manufacturer points out the fact that the main improvement consists in the cleaning attachment. He adds: "The digger is used with the handles closed; spreading the handles forces the rods downward. The cleaners, made of malleable iron, are riveted to the ends of the rods, which fit snugly to the inner sides of the

blades, cutting free the load as they are forced downward." He further says: "This digger will dig a seven-inch hole three feet deep in one minute. Is warranted to work perfectly in any soil, from sticky mud to dry sand. The load is cut free from the blades and forced out by simply spreading handles. The digger stands five feet high. When required we use extra long handles for holes from four to ten feet deep. All castings are malleable iron; blades best crucible cast steel; cleaner rods spring steel, and handles second to none."

Evils of Long Dating.

Notwithstanding the agitation of the question during recent years, the pernicious custom of giving extended dating on the sales, far ahead of deliveries, is showing scarcely any decrease in the leading lines of trade. A few large houses in certain branches, which some time ago gave long dates, have indeed plucked up courage and taken a bold stand. They are refusing all orders except on a thirty days' and sometimes even on a fifteen days' dating. The exceptionally hard times through which we have recently passed and the fierce competition existing are mainly responsible for yielding to the sixty days', ninety days' and even four months' extra time, which is often demanded by the buyers. It is certainly becoming a very serious question where long dating will end.

The custom of extended datings becomes a very severe tax on the wholesaler, necessitating as it does earlier placing of orders and the using of large sums of money for manufacturing long before actual requirements. It makes a demand for additional capital and consequently greatly increases the interest account. It obliges salesmen to be on the road many weeks earlier than formerly, thus paving the way for more frequent cancellations. This causes additional expense in selling the goods. The cost of all these items must be included in the price of the goods, and therefore in the end is paid for by the retailer.

Is long dating then an actual benefit to the retailer? By constantly demanding the largest possible dating and the most liberal terms, retailers injure their credit and at the same time give cause for suspicion. Their purchases in nearly all cases are far beyond their actual needs. Their stock is not in nearly so good condition or so well in hand as though their purchases were governed by their actual necessities, and as if their goods were bought with an eye single to what they could positively sell.

Those who insist upon receiving the furthest dating and the longest time find one season's accounts leaping into the next. Their limit thus being reached, they are frequently met with refusals to further increase the account. This sometimes happens in the very dullest months of the year, when it is impossible for them to realize from sales. Accordingly, it is oftentimes the cause of failure. Again, by grasping for a certain date, instead of distributing their maturities, too many obligations come due at the same time. This is very apt to seriously cramp them.

What is the real reason for giving datings? It is simply to permit the customer to avail himself of all the benefits of cash settlements and to allow him to realize so far as possible on the sales of the goods.

With the prospects of improving trade and a healthier condition of business, and in full view of the slight advantage which is really gained by long datings, it is to be hoped that business will soon be brought to a thirty days' basis. This result would greatly add to the prosperity of both wholesaler and retailer. C. H. ARNOLD.

Good Bookkeeping.

The bookkeeping of a business is its historical record. The record to be of real value must not only be correct in details, but must also be scientific in arrangement. The foundation upon which bookkeeping rests is the science of accounts. Scientific bookkeeping, therefore, is the only kind of bookkeeping which the progressive business man can tolerate. Bookkeeping as an art may be defined as the practical application of the principles of accounts to the records of business. Whatever methods embody the correct application of these principles constitute good bookkeeping. On the other hand, those methods which neglect or violate the principles of accounts serve to illustrate poor or inadequate bookkeeping. WALTON DAY.

THE NEWS FROM NEW ENGLAND.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The sixth anniversary of the New England Hardware Dealers' Association was celebrated in the United States Hotel, Boston, on the evening of December 14th, by their annual reception and dinner. The fact that this yearly feature of the monthly meetings of the Association is devoted to purely social enjoyment, gives the ever-gallant Hardwareman the opportunity to entertain the ladies, and the function is announced as "Ladies' Night." Certainly, no one after attending this gathering will entertain any future doubt as to the good taste of the Hardwaremen of New England in matters more directly connected with sentiment than a thorough knowledge of bolts, saws, locks and spring hinges is popularly supposed to induce.

The brilliantly lighted parlors of the hotel were a fit setting to the tastefully-gowned guests of honor, and one instinctively felt that, despite cut prices and ruinous quotations, it was good to be a Hardwareman. Very appropriately, it seemed to your representative, the music of the evening was provided by the Ladies' Royal Orchestra, and the soft strains of sweet music went far to complete the general feeling of friendship and good-fellowship for which this organization is well known.

The guests began to arrive promptly at 4:30 P. M., and kept the reception committee busy for another hour. The latter, composed of Wm. H. Warren, Boston; Austin H. Decatur, Boston; Elisha J. Neale, Lowell; Edward H. Mansfield, Boston; J. Carleton Nichols, South Boston; Geo. W. Burditt, Cambridgeport, and James A. Farless, Boston, discharged the onerous duties in a manner that made everyone feel at home, presenting the guests upon their arrival to President Loomis, Ex-President Thompson and Mrs. Thompson, Chaplain Crawford and Mrs. Crawford, Major Frye and Mrs. Frye, and others. The remainder of the time before dinner was spent in renewing old acquaintances and forming new ones.

Dinner was served promptly at 5:30 P. M. The large banqueting hall of the hotel was taxed to its full capacity. Two large American flags, significant of the sentiment of the Association, formed the sole draping of the room. After the guests were seated, a short and appropriate grace was said by Chaplain Crawford, U. S. N., and the following excellent *menu* was discussed:

MENU.

Oysters on half shell.

Green Turtle. Consomme Princess.

Olives.

Filets of Bass, Normandie.

Celery. Duchesse Potatoes

Turkey, Cranberry Sauce. Saddle of Mutton, Financiere.

Creamed Potatoes. Green Peas.

Vol au Vent of Oysters, Sauce Supreme.

Timbales of Chicken, Toulouse.

Charlotte Russe. Fruit Meringue.

Milk Punch. Kirschwasser Jelly.

Vanilla Ice Cream. Frozen Pudding

Assorted Cakes.

Apples. Pears. Grapes. Bananas.

Oranges.

Water Wafers. Edam Cheese.

Coffee.

After some two hours occupied in satisfying material wants, the intellectual necessities received attention. President Loomis, in a most happy speech of welcome, stated that at one period of his life he had doubted the wisdom of attempting to interest the ladies in an association whose object was the discussion of business, but that his conversion was rapid, and occurred immediately upon the first experiment; for since its introduction, Ladies' Night had been a pronounced success, and was a feature to which every member looks forward with keenest appreciation. The influence of woman in the world was all-powerful. Modern instances of this were cited in Queen Victoria, whose realm comprised one-sixth of the world's area, and whose subjects numbered over two hundred and fifty millions; in Queen Wilhelmina, of Holland, whose promise of a great future was bright, and even with the Queen of Spain, whose bad advisers had gotten her into such a troublesome mess. The speaker ventured to prophesy that should the monarchy ever be restored to France, a woman's hand would be found to be the potent cause. Returning to our own country, he called attention to the American brand of royalty. Despite the Republican form of government, we have many queens here; for every American woman is the queen of her household whom her subjects delight to serve. Reference was made to the noble work of the Red Cross Society in the recent war, and to its head, Miss Clara Barton, in particular, whose indefatigable labor had evoked the commendation of President McKinley in his recent message. Referring to woman's association with the Hardware trade, he said that until he discovered an establishment in New York City run by a very shrewd member of her sex, he had been under the impression that the business was too dull to attract the gentler ones; but that even then he had before him an announcement that a Hardware dealers' club was being formed in Illinois by a woman. President Loomis concluded his remarks by welcoming very heartily the ladies present, and added that it was just possible that at the 106th Anniversary the ladies would be the hostesses instead of the guests.

A reading by Miss Caroline Belle Howe, entitled "The Wind," followed, and was met with much favor; an encore being demanded and given.

In response to the toast: "Our Government," Hon. Henry A. Thomas, postmaster of Boston, riveted the attention of his audience and elicited much applause. Mr. Thomas prefaced his remarks by an apology for his late arrival, but added that of the two hundred tons of matter handled in his office daily, no small part was Hardware bills; therefore his hosts were in some part to blame. Before proceeding to answer the toast, Col. Thomas paid his devoirs to the lady guests, whom he said always made an audience more sympathetic and easier to speak to. The night before he had attended a banquet of the Boot & Shoe Club, at which all the speakers, with one exception, were ladies. The speaker, after referring with pride to a nation which numbered seventy millions of people, and which added ten millions more to its number almost in a day, spoke at some length of the unifying effect of the recent war; how the different racial and territorial prejudices had been sunk until every color and creed had its representatives side by side in the trenches of Santiago. He considered it the duty of the Government to give liberty to Cuba, and to extend to Puerto Rico the advantages of our own glorious institutions. Regarding the Philippines he was in some doubt, but his confidence was complete in the wisdom of the President, who, in waiting for the sentiment of the people, was following the rule established by all of his greatest predecessors. He felt that this was one of the fundamental principles of free government, and that the outcome would be an added honor to

Digitized by Google

President McKinley, whose decision would be based on the popular wish, regardless of party, politics or religion. In concluding his remarks by a glowing eulogy on the soldiers of this country, and those of New England in particular, the speaker evoked a storm of applause and added another laurel to the wreath of esteem with which Boston has crowned one of her most popular after-dinner speakers.

The first singer of the evening was Mrs. G. W. Barber, whose rich mezzo-soprano voice of excellent range and most pleasing quality, won unstinted applause, which was rewarded by an encore.

Major James A. Frye, U. S. V., followed in response to "Our Army," and most successfully demonstrated the fact that, besides being a soldier, he was eminently qualified to win his spurs at the bar of oratory, both humorous and grave.

Major Frye is a son of the head of Frye, Phipps & Co., and has seen service in the recent war. In opening, he stated that he was glad for many reasons to be there: and not the least was to be convinced of what he had long suspected, that there was a soft side to the Hardware business. Besides, he had learned something from his friend, Colonel Thomas, that would result to his own profit. The latter had informed him that a certain benevolent old gentleman made it his yearly practice to call upon the postmaster and get all letters addressed to Santa Claus containing requests for dolls, sleds, skates, etc., and to surreptitiously fill these orders in Santa's name. The Major wished to announce his intention of immediately applying for a box of cigars, a dozen of Apollinaris, and, in fact, a general Christmas outfit. One statement in the preceding speaker's remarks which he wished to correct was wherein the latter had stated, that owing to the frequency with which he had had to reply to the toast, "Our Government," he feared the press representatives would announce that "Colonel Thomas made his usual patriotic speech, and was followed by Major Frye, who spoke as follows." The report would probably read: "Colonel Thomas was followed by others." Major Frye then called attention to a sentiment voiced by Wm. Lloyd Garrison at a recent public function. This was "that the military camps were schools of iniquity, in which the pupils were taught to be professional murderers." As the head of a small school of this kind, the speaker wondered whether he would receive a welcome at the present gathering. If this sentiment were true, how were we to regard Standish, Winthrop and Bradford, who secured for us a foothold here; or Washington and Lafayette, who struggled for, and won liberty for this great nation; or the murderers of '61, who perpetuated the integrity of the nation as a unit? Heaven help the country when such "professional murderers" were needed and lacking. The speaker believed that such training made better men and citizens, and called attention to the fact that many veterans of the civil war had risen to prominence in every trade, profession or calling. As to the future policy of the national defense, he believes in a strong regular army, a National Guard under government supervision, and, as a last resource, the volunteer. He called attention to months of wasted time, lost in teaching the recruit to take care of himself during the recent war; and the loss of life incurred before this was accomplished, and argued that this might nearly all be avoided by the building up of a regular army of sufficient and commensurate size. In conclusion, he stated that while he hoped for international arbitration to take the place of appeal to arms, and would gladly give his every effort to that end, he deemed it impracticable, and it therefore behooved us as a great nation to prepare. Major Frye's speech was followed by the warmest applause, the audience clearly showing their sympathy with his earnest and able appeal to their patriotism.

Miss Howe again favored the guests with a reading, and met with a second and third recall, making these alleged hardened business men run the gaunt of emotion from sentiment evoked by the troubles and joys of an eloping Quaker maiden, to the humor of a representation of a village gossip, and the dismay of the little one who discovered that as no liars could enter heaven, it would be very lonely with only George Washington and God.

The last speaker of the evening was Chaplain Geo. A. Crawford, U.S.N., whose response to the toast "Our Navy" was characteristic of the "Fighting Chaplain," who has so endeared himself to the American public in the recent war. With nothing of bombast or vaunting in his words or manner, Chaplain Crawford made perfectly clear to his hearers in his vigorous, terse style that, while his office was a non-combatant member of the fighting branch of the government, he was able to see the stern necessity for such work. "God can settle accounts with individuals hereafter," he remarked, "but He must deal with the sins of nations in this world." The many offenses of our opponents in the recent war before the Almighty had demanded redress; and this nation was the only one who could afford to give the much-needed chastisement. He expressed pride in his own branch of the service, inasmuch as it was the one that had never required an apology. He ventured to predict that if the stories of the victories of Dewey, Sampson and Schley were in the Bible, no one would believe a word of it, and that in five hundred years from now, some learned historical critic would demonstrate that such havoc, with such trifling damage to the victors, was an impossibility. Referring to Bob Ingersoll's criticism of the action of Captain Phillips in thanking God instead of the gunners, he preferred the judgment of the captain, who was nearer to both God and the gunners. The *personnel* of the American navy, he had found, compared more than favorably with that of any navy afloat—excepting the Swiss, which was a pleasure in store for him to meet. The men behind the guns were, in many cases, men whom a slight chance would have placed in much more conspicuous places; and the officers recognizing the fact that the whim of fate, which was responsible for this, might just as easily have reversed their positions, treated their subordinates as men and not as dogs. This was the basis of Spain's complaint of "lack of discipline" on our ships. The spirit of Americanism was nowhere stronger than on board the American men-of-war. The press was fond of satirically referring to the "good times" of our naval officers, whose cruises in times of peace were subject for comment; but this was the necessary preparation for sterner duties. In regard to the engineers of the service, he wished to say that they stood out by comparison with those of any other nation, from the fact that they were officers and gentlemen. It was customary in the navies of the old world to regard these men merely as mechanics; but the system of government which recognized them properly had made possible the marvellous record of the *Oregon*. Nine times out of ten these men were native Americans, and the tenth one was usually a Scotchman. Referring to American industries, the speaker said that the best ordnance in the world was produced here. No other nation could make twelve-inch and thirteen-inch guns capable of being fired more than one hundred times without "drooping," while ours had already been discharged over two hundred times and were still good. Speaking of our new possessions, the speaker expressed his confidence in the nation who produced such fighters and diplomats to deal righteously with each of these new dependencies, realizing that they were responsible to every other nation on earth to establish peace and stable governments in place of the former chaos. Everybody was interested—no class could claim indifference. Even the Hardware trade was involved, for the Filipinos would soon wear shoes, get corns, and consequently require knives and razors. He believed that the day was not far distant when the only great powers on earth would be the Russian, the Anglo-Saxon races, and

Digitized by Google

those Eastern Yankees—the Japanese. Our present need was an army of one hundred thousand men and the second navy in the world. Chaplain Crawford's remarks ended in a hearty laugh, occasioned by his announcement that he intended continuing praying for both Democrats and Republicans, and, if possible, even for the poor Mugwump.

The social part of the evening was terminated by Mr. Robert L. Van Buskirk, of the firm of Chandler & Barber, Boston, whose fine baritone elicited much applause and occasioned an encore.

President Loomis, apologizing for the necessity of introducing business matters on Ladies' Night, announced the appointment of Ex-Presidents Hiram G. Janvrin, Boston; Samuel H. Thompson, Lowell, and D. Fletcher Barber, Boston, as a committee on nominations, and dismissed the meeting informally.

This annual reunion of the Association was regarded by all as the most successful from every point of view yet held, and the free representation from different parts of New England speaks eloquently of the esteem in which these yearly functions are held by the members. The one regrettable feature of the evening was the absence of D. Fletcher Barber, who has been confined to his house for several days by a severe cold.

The warm applause which constantly greeted the patriotic utterances of the speakers shows unmistakably that whatever section of the country may be open to the criticism of lukewarm endorsement of the public policy of expansion, certainly New England is free from such taint, as she has always been in matters of national import.

WHAT THEY DO WITH "HARDWARE."

A common remark among trade-paper critics is that such publications receive only a cursory examination, and are then relegated to the W. P. B. This may be true of that class of merchant whose windows are receptacles of last year's cobwebs, aud who is constantly assuring those who have time to listen to his tale of woe that the Hardware business has gone to the "demnition bow-wows;" but that it is not the case with the merchant who keeps abreast of the times was evidenced to the writer very recently. Having occasion to refer to an 1897 issue of *Hardware*, I called, in passing, upon a prominent Boston jobbing house—Frye, Phipps & Co., and asked if it were possible to obtain the issue needed. Without a moment's hesitation the copy was produced from a file, accompanied by the laughing assurance that if not there it would have been at the speaker's home; though he admitted rather ruefully that his wife did not regard such visitors with a friendly eye, as they were very likely to occupy too much of his evening.

The merchant who can find no benefit from a paper devoted exclusively to the interest of his trade. must either have an astonishingly poor paper, or be unable to read.

There are, doubtless, a few of the very old school left, who regard the printer's art as the invention of the Evil One, as will witness a letter recently received by a prominent manufacturer of Massachusetts. He had written a number of his customers, asking which trade-paper, in their opinion, was the most useful for a line which he intended to push. One reply—from the South—stated that the writer did not take any such paper, as he could see no good in them. The recipient regarded it as such a curiosity as to be worth publishing.

This reminds me of the arrest of a notorious swindler recently. When asked how he discovered so gullible a victim, he replied that on visiting the scene of his operations he went to the local paper agent and in the course of conversation, discovered that there was a man in town whose antipathy to papers was so great that he would not allow one in his house. Here was his man; and his arrest, after securing several thousand dollars, was as great a surprise to the victim as it was embarrassing to the swindler. The only matter for comment in this is how this mildewed relic of a pre-archaic age happened to have those aforesaid dollars. Some people can keep what they would never have the sense to get.

But the swindler's knowledge of human nature was all right; and the same reasoning will apply in a large measure to the merchant who is blessed with a good paper devoted to his trade, and who is too busy to study it. He will gradually notice his competitors making innovations for which he has no precedent; and taking advantage of opportunities of which he was in blissful ignorance. Then in the winter of his discontent he exclaims against all innovations; and sighing for the "good old times," assigns or sells out to some one who has time to keep abreast of his period.

One of the most pleasing improvements noticeable in the retail trade this year is the additional attention paid to window-dressing throughout New England. This does not apply to the holiday season only, but has become a part of the business of late. In Boston and many of the smaller cities and towns, the windows of the Hardware stores compare most favorably with those of any other industry. An attractively and tastefully dressed window will often persuade a passer-by that he really needs something therein displayed, of whose pressing necessity he had before been in blissful ignorance.

A recent editorial of the Boston *Herald* calls attention to the peculiar fitness of this city as a site for the proposed gigantic steel shipbuilding plant to be established on the Atlantic coast.

Boston is to have the largest and finest rope manufacturing plant in this country. This is especially interesting, now that we are about to annex the hemp market of the world.

A visitor to the recent dinner of the New England Hardware Dealers' Association would wonder how this section of the country had obtained the reputation of being anti-expansionists. Patriotic speeches were in order and every hint at annexation was roundly applauded.

The Paint & Oil Club of New England gave a dinner at the Parker House, Boston, on the 14th inst. The attendance was large, and among the speakers was W. H. Andrews, of New York, who described the old days of this industry in Boston.

Manchester, N. H., was visited with a large fire on December 16th which destroyed two large business blocks. Among the sufferers was the Hardware store of J. H. Wilson, whose loss is estimated at $4000, partially covered by insurance.

The works of the Merchants' Foundry & Machine Co.—formerly the Eagle Stove Co.—Fall River, Mass., were partially destroyed on the 17th inst. by fire supposed to be of incendiary origin. The company had been operating less than a month.

F. A. CATON.
No. 31 Milk Street, Boston.

The Harrington & Richardson Arms Co., Worcester, Mass., have aided in making pleasant the Christmas holidays by sending their friends a handsome wall calendar. It is not only all that a record of the year 1899 should be, but also contains a fine hunting scene, where a man, a dog and a bird are having a great deal of fun by themselves (all but the bird) in proving that a Harrington & Richardson gun is made for business.

Jones: "It's surprising how impractical some very learned men are."

Smith: "Yes; there's Professor Lingwist, for instance. He spent over half his life in acquiring fluency in nine or ten different languages, and then went and married a wife who never gives him a chance to get in a word edgeways."
—*Exchange.*

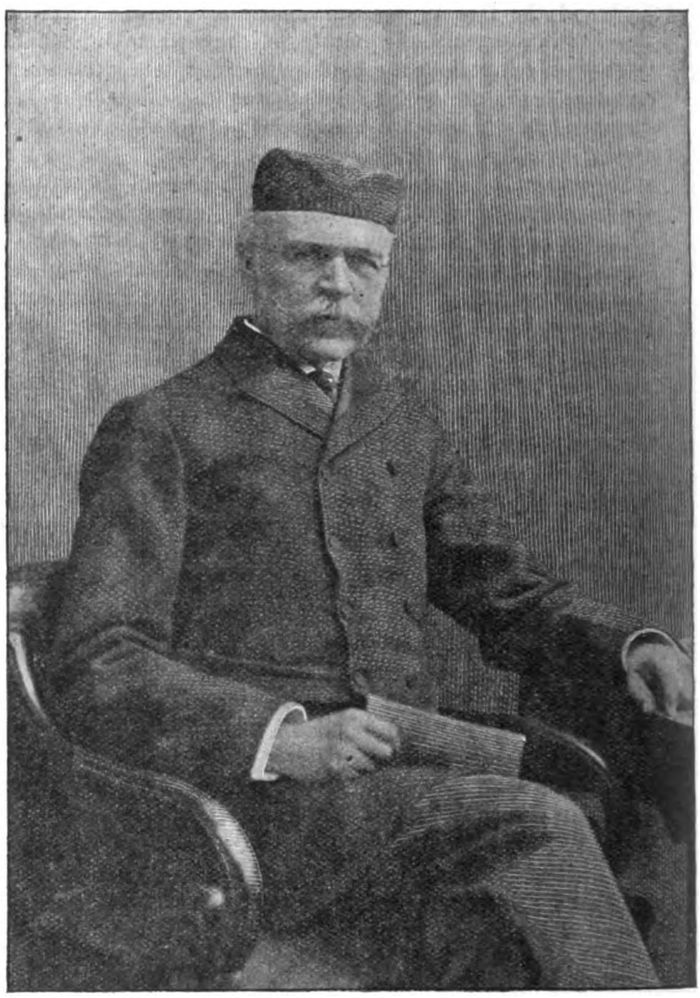
Henry Robinson Towne.

In the December issue of *Cassier's Magazine*, New York, here appeared an excellent sketch and portrait of Henry R. Towne, president of the Yale & Towne Mfg. Co. The editor of that magazine correctly felt that an adequate review of the life of this busy and active man would be of interest to the public, and therefore took steps for the compilation and publication of the same. It is by the editor's permission that we reproduce herewith the sketch and portrait which accompanies it:

To create, develop and successfully conduct a great and complex manufacturing industry which, in its special line, leads the progress of the world and sets the standards of utility, excellence and beauty, will be held by many to confer a higher title to greatness in engineering than identification with showy achievements which command a larger measure of public attention and invite popular applause. There has never been a time since history began when any one of many men, under favoring conditions of opportunity and financial support, could not have linked his name with a work entitled to be classed with the seven world-wonders.



No engineering feat within the possibilities of human achievement could now be proposed which any one of thousands of living men could not carry to successful completion. It is probable, however, that not one in a thousand, and perhaps not more than one in ten thousand, of those who are capable and qualified engineers, could conduct a great industrial development from inception to finish, organise its intricate productive and distributive systems, and keep it for a quarter of a century the leading establishment of its kind in the world. To do this requires a rare combination of the best qualities of the engineer, the merchant and the man of affairs; a still more rare capacity for infinite detail, which finds nothing too small for critical attention, and a patience and persistency of concentration which few men of genius and imagination possess. In these respects Mr. Henry R. Towne may properly be recognized as one of the greatest manufacturing engineers of the United States.

The subject of this sketch was born in Philadelphia in 1844, and had the advantage of an inheritance, through both branches of his ancestry, of the best English characteristics. His father and grandfather were successful men of affairs, with a strong mechanical bent, prominently identified with the successful industries of their day. His father, Mr. John Henry Towne, was a partner of I. P. Morris, Towne & Co., owning and operating the Port Richmond Iron Works. Henry R. Towne's youthful environment was well calculated to inculcate independence of thought and the courage of conviction. The intimate associations of his childhood and youth with Rev. William Henry Furness, D D., of Philadelphia, a man of the highest intellectuality and a leader of the anti-slavery sentiment at a time when such leadership demanded great courage and devotion to principle, had much to do with developing his natural characteristics and inherited traits.

After completing an academic course, he entered the University of Pennsylvania, and remained there through the college year 1861-1862. The outbreak of the American Civil War had the natural effect of unsettling the boy, who wanted to enter the army; but, parental opposition forbidding, he insisted upon getting to work, and was taken into the drawing room of the Port Richmond Iron Works, where he remained nearly two years at the drawing board. Having shown fitness for more responsible employment, he was, in 1863, put in charge of the Government work in the shops connected with repairs of the gunboat *Massachusetts*.

The Port Richmond Iron Works had meanwhile taken a contract to furnish the engines for the monitor *Monadnock*, and in 1864 Henry R. Towne, then only about 20 years old, was sent to assemble and erect them in the ships at the Charlestown, Mass., Navy Yard. This work was done so well that he was subsequently sent to the Portsmouth, N. H., Navy Yard, in sole charge of erecting and testing the machinery of the monitor *Agamenticus* (now the *Terror*), and later of the cruiser *Pushmataha*, at the Philadelphia Navy Yard. At the age of 21 he was put in general charge of the shops of the Port Richmond Iron Works as acting superintendent. Boys developed rapidly during the great national upheaval which followed secession, and those equal to great responsibilities found the opportunity to show what was in them.

When the strain was relieved by the restoration of peace, Mr. Towne realized the need of exact knowledge in many lines of study which the war had interrupted. He became a close and industrious student under the guidance and instruction of the late Robert Briggs, and accompanied him on an engineering tour of Great Britain, Belgium and France. Before returning he took a special course in

HENRY R. TOWNE.

physics at the Sorbonne, in Paris. During this time his father had disposed of his manufacturing interests and retired from business. After returning to the United States the young man spent a year in further study with Robert Briggs, and in experimental work with him. During this association he gained a reputatiou by experiments with leather belting, the results of which were accepted as standard for 20 years. For further education in the designing and use of special machinery, Mr. Towne entered the shop of William Sellers & Co., of Philadelphia, devoted to the production of Giffard injectors, where he had a most valuable experience.

In the summer of 1868 a mutual friend introduced Mr. Towne to Linus Yale, Jr., a talented and ingenious inventor of locks, whose business, chiefly in bank locks, then employed about 30 men. Foreseeing great possibilities in the then recent invention by Mr. Yale of the lock with small flat key, now universally known as the "Yale lock," Mr.

Digitized by Google

Towne proposed a partnership in which he should undertake the manufacturing management, and which resulted, in October, 1868, in the organisation at Stamford, Conn., of what is now the Yale & Towne Manufacturing Co. The association thus formed lasted but three months, being terminated by the premature death of Mr. Yale in December, 1868. Since then Mr. Towne, as president, has controlled and directed the enterprise thus begun.

Mr. Yale's legacy to the new concern was one of brilliant ideas, which have since revolutionised American practice in lock-designing, but which could be made commercially valuable only if reduced to practice by just such work as Mr. Towne had undertaken to perform. This work occupied the succeeding ten years, and forms the basis on which has been reared a great industry, which is still in process of vigorous development. Starting with Mr. Yale's radical departure from previous types of lock construction, Mr. Towne's work has greatly amplified these original features, and has embodied with them equally radical departures in design and workmanship, and especially in methods of production which have become the accepted standards of the trade.

In the brief space at the writer's command it would be impossible to give even an idea of the variety and perfection of the special machinery employed at Stamford in the production of locks, or of the steps of growth from small beginnings in 1869, when Mr. Towne became president of the Yale & Towne Manufacturing Co,, to the present daily output of 25,000 locks, and an organisation employing under normal conditions, 1,500 men. During these thirty years almost every important improvement in locks and lock-making machinery, and in kindred lines of Hardware, has emanated from the Stamford works, and the Yale & Towne Manufacturing Co.'s name and trade mark have everywhere been accepted as establishing for the goods which bear them the highest standard of excellence in design, workmanship and finish.

In the production of art hardware in great variety and the application of pure art to a class of work which, since the middle ages, had been neglected, Mr. Towne has been conspicuously successful. Of greater professional interest, however, is his work in providing machinery for every process of manufacture, and in organising an industrial system which is considered a model by experts in this line. What this work has accomplished in useful results is shown in the thirteen volumes of the Yale & Towne Manufacturing Co.'s catalogue, in which more than ten thousand separate articles of manufacture are illustrated and described. It is to be regretted that so little of the exact data at the writer's command touching the details of Mr. Towne's work as a manufacturer can be even referred to in this article.

Mr. Towne has been prominently identified with the great engineering societies, and has filled with dignity and grace many positions of honor and responsibility. One of the early members of the American Society of Mechanical Engineers, he became its president in 1888, and was made chairman of the large party of American Society of American engineers, representing the three great American engineering societies, which visited Europe in 1889. His contributions to technical literature, standard and current, though mainly relating to his own work in the creation of the plant and business of the Yale & Towne Manufacturing Co., have been brilliant and valuable, showing a sholarly mind, a rare breadth of culture, and a clear appreciation of the relation of theory to practice in successful undertakings.

JAMES C. BAYLES.

The soil in Cuba is marvelously rich; in some instances the same crops have been grown on the same land for a hundred years. Fertilizers are seldom used, except for tobacco.—*Exchange.*

Review of the Markets.

Hardware: Inventory taking is now the order of the day, and quite frequently extends into the night. It is believed the showing will be much more favorable in the way of profits than any year in the past five. More economical methods of distribution have been applied with vigor, a greater degree of hustling backed up by an increasing volume of trade, has assisted materially, but above all other visible forces, perhaps, is the fact that few declines have occurred, and that several satisfactory advances will strengthen the stock sheet, which can be allowed to benefit by such changes when there is prospect of others just ahead to help out the approaching year. Business is reported in every direction as being in a healthy and satisfactory condition, with numerous stock orders already in factory hands, at prices stiffer than a year ago, and yet with sure indications of being sold at a profit.

Wire Nails: An increasing demand caused by the low quotations recently prevailing, and the fear of a possible advance at an early date, have so braced up the market that it is impossible to purchase at the lowest rates of the past month, and orders for future delivery are booked at an advance. There has been no necessity for any specified agreement to keep prices in this healthy condition, as the steady demand has been of the utmost importance, lending strength to the markets, and giving encouragement to the future. We quote for jobbers of carload lots, $1.30, f. o. b. Pittsburg, for immediate delivery; single carloads, $1.35; with the usual differentials for delivery at other points, already prevailing. New York prices may be quoted: Carload lots on dock, $1.45; smaller lots from store, $1.50 to $1 55.

Cut Nails: The increasing demand for wire nails has caused some sympathetic movement in cut nails, but no greatly increased demand is evident, and prices remain about as previously quoted, as far as local trade is concerned. We quote New York prices: Carload lots on dock, $1.28 to $1.30; smaller lots from store, $1.33 to $1.35.

Wire Cloth and Poultry Netting: A very active business has been done in these lines of late, and the principal orders for future delivery have undoubtedly been booked. The competition has been stronger than ever and very low prices have been named, which have caused the retailers to book their wants as early as the jobbers' own specifications have been entered. It is felt as though higher prices would prevail when the season for regular sales open. We quote as extreme prices: Galvanized wire netting, 85 to 85 & 5 per cent. discount from list prices; painted screen wire cloth, 90 to 95 cents per 100 square feet.

Cordage: Some weakness in prices having been developed in the cordage market, there has been less activity manifested, and business, doubtless, will remain dull until the close of the year. The few changes that have taken place are indicated in the following quotations by the manufacturers for carload lots:

Manila, 7-16 inch and larger	per pound,	8	cents
" ⅜ inch	"	8½	"
" ¼ and 5-16 inch	"	9	"
Sisal, 7-16 inch and larger	"	7¼	"
" ⅜ inch	"	7½	"
" ¼ and 5-16 inch	"	8¼	"

Sash Locks: From the new catalogue of Hobart B. Ives & Co., referred to in another column, the following discounts apply:

To the Hardware Trade: December 10, 1898.

Until further notice, our discounts and terms on Mortise Door Bolts, Sash Locks and other Hardware shown in Catalogue No. 10, 1899, will be as follows:

Pages 4 to 7, Window Ventilating and Mortise Door Bolts	Discount,	66⅔%
" 8 to 9, Sash Locks. Wrought Metal	"	66⅔%
" 11 to 17, Sash Locks, Cast Goods	"	70%
" 18, Window Stop Adjusters	"	40%
" 19 to 27, Sash Lifts and Shutter Bars	"	55%

Terms, 60 days net. less 2 per cent. for cash in ten days. Prices and discounts subject to change without notice.

ELECTRIC SPIRAL SCREWDRIVERS.

No. 01, Large	per dozen,	$12.00
No. 02, Small	"	10 00

JONES' REVERSIBLE SPIRAL NIPPLE SCREWDRIVERS.

No. 2, S. B	per dozen,	$24.00

Water Filters,	No. 4	per dozen,	.75,	per gross,	$ 8.00
" "	No. 3	"	$1.50,	"	15.00
" "	No. 2	"	2.50,	"	25.00
" "	A. No. 1	"	4.50,	"	48.00

Trade Discounts according to quantity.
3-gross lots, 10 per cent. off list.
2 per cent. off 10 days, or 30 days net.

Lane Bros. Co. Specialties: The following discounts are announced as the selling prices on the goods named for 1899:

Parlor Door Hangers,		Standard	40&10%
" " "		New Model	40&5%
Barn " "		Standard	60&10%
" " "		Covered	60&10%
" " "		No. 50	60&5%
Cycle Hangers			33⅓&5%

Corn Poppers: The Quincy Hardware Mfg. Co., Quincy, Ill., announce the following as their latest prices on corn poppers:

Climax, one quart	per gross,	$ 5.50
" three pints	"	6.50
" half gallon	"	8.00
Quincy, one quart	"	15.00
" three pints	"	17.00
" half gallon	"	20.00

Nested and packed, one dozen in a box, F. o. b. Quincy 60 days, 2 per cent. for cash in ten days from date of invoice.

Pump Tubing: The Quincy Hardware Mfg. Co., Quincy, Ill., quote as follows: Galvanized steel chain pump tubing, per foot, 10 cents; couplings, 25 cents each; 100 foot lots, subject to discount of 50 per cent.; 200 foot lots, 50 and 5 per cent.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 38 cents per gallon; in lots of 5 barrels or more, 37 cents per gallon. The 5 barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE DAVENPORT TRADE.

The Iowa Hardware Jobbers held their regular quarterly meeting in Des Moines on the 14th inst. Ten firms of the fourteen members were represented; peace and harmony prevailed. It was decided to make Des Moines the permanent place for holding meetings in future.

Dividends would have been four per cent. greater on the capital stocks of the wholesale Hardware trade in 1898, if the time-honored custom of charging cost for packing and carting had continued. We have never heard a dealer express any thanks for, or appreciation of, such gifts as dray tickets and second-hand packing boxes. Forcing such undesirable presents on our customers when we cannot afford to pay the expense simply proves "What fools these mortals be."

A new book just published entitled "Rock Island Arsenal in Peace and in War," by B. F. Tillinghast, of Davenport, should be read and preserved for reference by every reader of *Hardware*.

The Bettendorf Axle Co. are increasing their capital stock on account of the rapidly increasing business. Their farm wagons are manufactured of steel, except the boxes and wheels. Even the seats, including lazy back, are of one piece sheet steel. The tongues are of one piece sheet steel, including the hounds. They do not weigh any more than wood, are much stronger; being free from knots, etc., are more durable. In fact, it would seem that they are indestructible, except by accident. They make railway freight car brake beams in two pieces of sheet steel, and also trucks and body bolsters in I beam sections. Their trucks and body bolsters are now in use on thirty-five different railroads. They not only make all of these articles under their own patent, but invent and make the machines to make them.

Barb wire will probably advance two to four points after January 1st. The demand for screen wire is heavy, but both cloth and profit continue light. Poultry netting is so low that chickens can easily fly over it. Binder twine manufacturers are getting many buyers on the string. There is a sharp trade in axes, meat cutters and butcher knives. Skates are going swiftly. Tool makers are attempting to chisel out more profit. Manufacturers of wire, copper and fork handles have withdrawn outstanding quotations. Ammunition comes in slowly, but goes off with alacrity.

Davenport may not be very rapid, but we, for once, want to be the first of your correspondents to announce to the readers of *Hardware* the surprising fact that the year of 1898 is drawing to a close, and—

That profits are much smaller,
Every year.
Expense accounts grow taller,
Every year.
Old methods changing, vex us,
New systems more perplex us,
Every year.
But cold blasts give less rigor,
Every year.
We work with greater vigor,
Every year.
Learn better how to figure,
Are quicker on the trigger,
And bank accounts grow bigger
Every year!

SICKELS, PRESTON & NUTTING CO.

THE OMAHA TRADE.

Trade for the past week or ten days has been considerably above the average, both in activity and volume, not only in the Hardware trade, but in other lines. The weather has been unusually cold for the season of the year, and this has stimulated trade in all seasonable goods to an unusual extent, and the results have been a very satisfactory increase in sales. Demoralization in freight rates, while always to be deplored, as in the end resulting to the disadvantage of all concerned, the railroad companies not being excepted, has materially increased the sales of staple goods, such as barbed wire and nails, and many orders for these goods, which under ordinary circumstances would not have been placed until spring, have been bunched into the last month of the year, which will make a material increase in the sales record, if not much addition to the profit account.

Collections are all that could be desired. The feeling among the trade is very hopeful, no complaints made either in regard to the volume of business or collections, and the outlook is for a pleasant ending of a prosperous 1898, and the hope of equally good results for the coming year. RECTOR & WILHELMY CO.

THE BALTIMORE TRADE.

The earth's revolutions or time-beats for 1898 will soon cease; another memorable year will be chronicled, and the pages of history illuminated by deeds of great valor of both navy and army. Coincident with national events, the year about closing marks the retirement from business of such respected and honored firms as W. N. Wyeth's Sons, R. B. Porter & Sons, Reuter & Mallory, and our esteemed friends and competitors, the Tabb & Jenkins Hardware Co. The business handled by these respective firms will doubless be distributed among our other jobbers, who have long since distinguished themselves for honest dealings, low prices, and the courtesy and consideration extended their customers.

We review with great satisfaction the large volume of business of the past twelve months, and, whilst the orders were principally small, they have been so numerous and

Digitized by Google

constant as to keep us hustling and working more hours overtime than has ever been our experience in previous years. The demand for cultivators, grain cradles, snaths, steel traps, oyster knives of certain brands and cross-cut saws has been far in excess of the supply. Messrs. Henry Disston & Sons advise us that they are thirty days behind in their cross-cut saw department, and Blake, Lamb & Co., of Waterbury, Conn., are evidently so buried with jump trap orders that letters and telegrams fail to reach them. We understand that one jobber of good standing having placed an order for traps, and not receiving acknowledgment of order or answers to several letters regarding shipment, sent thirteen telegrams in about as many days, C. O. D., but the answer cometh not. The jobber can console himself, however, with the knowledge that jump traps are made by the Peck, Stow & Wilcox and Oneida Community Co.'s.

The demand for skates is good, as there has been excellent skating on the ponds and many streams in this section. House cleaning and stock taking time is now on, and work in this line is being vigorously pushed, so that spring orders which begin coming in early in January, can be dispatched promptly. Collections are good, but a few merchants are still in evidence who forget that Hardware is sold strictly on sixty days, or less 2 per cent. for payment in ten days. The reports received from different sections of our territory indicate a good spring business, with increased demand for building Hardware, poultry netting, fencing wires, etc. H. W. WEBB & SONS.

THE CLEVELAND TRADE.

Wealth consists in an abundant possession of things which other people want. Desire and demand for things give them value, but at the rate we are pressing nature's forces into service creates overproduction. The laborer relieved by machinery cannot turn to agriculture without driving out those now engaged in it, and there is limit in ability to eat.

Automatic machinery compels the use of air, and hunger enforces eating, for the protection of our physical wants. The higher needs are not so manifest until culture creates a desire for them.

If the one-thousand millions of wealth said to be accumulated annually in this country is to minister to human happiness, our study of economics must be widened.

We have become so materialized by our occupations that the vast field of incorporeal needs have been ignored. The increase of the wealthy unproductive class invites attention, to the necessity of creating a demand for the higher productions. The heavy, hard drudgery now done by nature's forces brings a leisure that should be utilized to develop needs, desires and aspirations for beauty and art.

Parks, boulevards, architecture and art ought to be encouraged. We cannot always continue to seek new fields, but an endless one exists in our own borders and invites cultivation. Road improvement, tree culture, beautiful homes and lawns, art schools and music to cultivate taste, lectures and libraries to feed the intellect, we need. We must cultivate the fine arts to prevent our people from lapsing into the condition of the European peasantry. We need a lifting-up socialism, not the leveling-down kind.

Unproductive consumers denounced in other lands can be utilized as a benefit in ours if they can be made patronizers of art. Time will modify all the serious dangers and cure the evils in a country that has committed to it the problem of providing liberty under law to mankind. It is a Divine mission, and only a lack of co-operation can make failure possible.

Business men like Carnegie and Rockefeller are setting an example that is sure to be followed, and the altruistic tone that religion is assuming gives reason to hope that great wealth may not bring degradation.

All the prophecies of prosperity are being fulfilled. Christmas trade is enormous. Telegraph and express are being utilized to get supplies, as stocks are inadequate to meet the demand.

'99 is coming with bright promises. If intelligence, sobriety, manliness and integrity keep pace with our material prosperity, we shall be the kingliest nation on the globe.

LOCKWOOD-TAYLOR HARDWARE CO.

THE ALBANY TRADE.

"Merry Christmas" and "Happy New Year" are the salutations heard in all quarters, and in view of the excitement of the past few months, these greetings are especially welcome, as "Peace on Earth" is now an assured fact, so far as the United States is concerned.

As each succeeding year draws towards its close, quietude usually prevails, and the volume of business in a jobbing way dwindles down to small proportions, but we think '98 goes from the calendar with unusual vigor, and the last few laps still show considerable vitality.

Sales for early spring thus far have exceeded the last few years. Merchants are disposed to place orders in fair quantities, and the general belief prevails that prices somewhat higher rather than below the present, will rule when the time to distribute these purchases arrives.

Bookings for several leading lines at present prices are generally limited for December delivery, with slight advances for later shipments.

The consolidations among the manufacturers of some staple products, representing such large capitalization, must indicate the need of larger returns for the labor and money invested, and necessary advances in prices to accomplish the end sought seems inevitable.

The market in most of the metals that enter so largely into the composition of many articles continues strong. With copper, lead, tin, spelter, zinc, etc., ruling high, slow-

Digitized by Google

ly but surely this must have a bearing on costs of a large variety of Hardware and specialties that in the past have been sold at surprisingly low prices.

The present activity is thus accounted for, and a good, strong market for spring may safely be expected, in our opinion. The recent cold weather has closed our navigable waters, and with the scarcity of ice last year, the rivers, lakes and ponds will be active scenes of ice harvesting, and create a good demand for the tools and implements employed.

Skates and sleighs have had excellent sale, and holiday trade has carried off the surplus of stock, leaving but few goods in these lines to be inventoried.

An excellent business has recently been done in table and pocket cutlery, razors and scissors. Medium grades have had the call, the finer qualities going rather slowly.

The actual result of the year's business to be determined by inventory, is naturally awaited with anxious expectations, and the steady increase of sales during the last half of the year no doubt presages a fair showing for '98.

ALBANY HARDWARE & IRON CO.

THE CHICAGO TRADE.

In the year that is drawing to a close we have much to feel thankful for.

Since 1892, each inventory has shown a marked decline in the price of goods (in some instances amounting to over ten per cent), while the present December's estimate will not average a shrinkage of over 2½ per cent.

Then, too, the bulk of our business has wonderfully increased through the entire year, and while profits are indeed quite small and we have entered into what is usually termed "the dull season," orders are of a magnitude that compares most favorably with early fall months.

In the recent advances of lead, copper, tin-plate, steel billets and screws, we can most clearly see indications of advances early in the new year of finished products, and a demand that we feel now will keep our already large force and splendid equipment advantageously employed through the early months of 1899.

An extremely gratifying feature of our business is the fact that our traveling salesmen are bringing us the most complimentary messages from customers because of our marked promptness over many competitors in our methods of quick shipments of mail orders and our full supply, when many jobbers were out, during the year, of such seasonable goods as refrigerators, poultry netting, wire cloth, loaded shells, stove boards, etc., etc.

In conclusion we desire to state that we are most hopeful of the future, and extend to the editorial department of your most excellent journal, and our many good friends elsewhere, a very Merry Christmas and Happy New Year.

WELLS & NELLEGAR CO.

THE PITTSBURG TRADE.

"Peace on earth, good will to men," is the sentiment for the world upon this joyous holiday. The entrance into our world of a Saviour, and His wondrous teachings nineteen hundred years ago, have transformed all human thought and action. Progress toward the ideals has not been so rapid as could be wished, and yet comparison of the present feeling of man for his fellow-man, with that displayed one thousand, five hundred, or even one hundred years ago, shows steady advance and growth of the Christian influence over the lives and conduct of men.

Our recent war for humanity, marred though it may be by some selfish grasping, is a distinct advance upon anything the world has yet seen.

This is a good time and a fitting occasion to greet each other in our business houses with good will, each wishing his competitor a successful year and good prospects for the future. Good feeling of this kind softens many hard corners and makes the daily grind of business run more smoothly, certainly a desirable end.

Holiday trade has been very good in cutlery, skates, sleds, etc. More people have steady employment than for years, and the money to buy these comparative luxuries is more plentiful. Collections are good and the year closes with all busy and a bright outlook for the future.

LOGAN-GREGG HARDWARE CO.

THE PHILADELPHIA TRADE.

At this time of the year, trade is naturally drawing to a close, as salesmen are home for the Christmas holidays and taking of stock, and the pricing of salesmen's catalogues are in order for the coming season. This year is no exception to the rule, and our thoughts turn to a retrospection of the year.

The year 1898 will long be remembered as a critical year in the financial history of our country. Opening with a future greatly clouded by the prospect of war with Spain, and with the currency question demanding settlement, while echoes of the old free silver controversy were still to be heard, the future did not show many signs of promise.

This year, however, has witnessed a marvelous change in this respect. The war with Spain has resulted most satisfactorily; the free silver controversy has been forgotten; the era of prosperity in the West, which has led to the public burning of cartloads of mortgage papers on Western farms, and in the general prosperity the currency question does not seem to press for immediate settlement.

Our exports have increased enormously, and our foreign market promises to be permanently enlarged by our new foreign possessions, as well as by the increased hold we have lately secured in friendly foreign markets.

While the West has felt this prosperity to a marked degree, it has not been so fully realized in the East, but unless all signs fail, 1899 should be a prosperous year for the East as well as for the West.

It is a most noteworthy fact that, with but few excep-

tions, prices still remain at the lowest level, despite the fact that manufacturers have been extraordinarily busy; whether these low prices can continue seems very problematical, and reports seem to indicate that prudent buyers throughout the country are ordering rather more freely in anticipation of better demand for goods and higher prices.

BIDDLE HARDWARE CO.

THE COLUMBUS TRADE.

We have had ideal winter weather for the past two weeks, and in most of the Northern territory the sleighing has been excellent. Trade in all lines has been away above the average, and we find our city merchants are doing a very large holiday business, and the class of goods sold is of better quality. This indicates more money among the shoppers. The usual dropping off in the Hardware business in the early part of December has not been apparent so far, and the demand for goods seems to be as large as in October and November. Orders for spring goods are coming in more freely than usual, but prices are simply ruinous. You take an order and guarantee prices, and then trouble begins. Some salesmen think it a smart thing when they find a merchant has placed an order, to cut the price below what his house would want to accept the order at, but he does it to keep the man who has the order from making any profit. There are not many such men on the road, but any is too many. It is an unprincipled thing to do.

We hope the correspondent of the Gille Hardware Co. will fare well in the Kansas City lottery. We suggest that in case he draws the jackass, he can use it for an emblem in the Hardware business, and believe that most jobbers of Hardware would find such an emblem very fitting, judging by the profits we sell goods at.

SMITH BROS. HARDWARE CO.

The W. H. Sweeney Mfg. Co., Brooklyn, N. Y., are at work on a new catalogue that will cover their entire line, and they hope to have it in readiness for distribution among the trade early in January. This will be one of the most important catalogues they have issued, and well worth the attention of the dealers interested in their lines of manufacture.

"A genial old Chief of Police,
For a joke, once arrested his niece
For patching his pants
With a quilt of her aunt's
Which he said made them
"Breeches of piece."

H. H. MAYHEW CO.,

SHELBURNE FALLS, MASS., U. S. A.

President McCartee in Crayon.

Peter McCartee, president of the Hardware Club of New York, was the most thoroughly surprised man in the United States, on Friday of last week.

Some time since, a number of his closest friends in the club, instigated and led on by Charles Putzel, Esq., a prominent member of the city bar, gave an order to artist R. Wilhelm, No. 624 Madison Avenue, for a life-size portrait in crayon, of Mr. McCartee, and the order was filled to the complete satisfaction of all. The portrait is to the very life, and when fitted in a handsome gilt frame, and hung in a good light, as it was at 4 P. M., of Friday, it seemed almost as though the president was there in person.

He was there, a few moments later, won to the spot by a good "fish-story," well told. Ushered into the library he found the little circle of donors gathered, and when he realized what was up, and caught a glimpse of the portrait, he would have sold his gift of speech for a farthing, as it was utterly useless.

Mr. Putzel filled in the breach, and with a few simple, but eloquent and heart-felt words, told Mr. McCartee how his friends loved him, and had expressed that love in this gift.

Mr. McCartee rallied. He was equal to the occasion—his face, and the tone of his voice told as much as his words. His response was touching, and went to the heart of everyone present.

The portrait to-day hangs in a conspicuous place on the club walls, the admired of all who see it.

There is only one Peter McCartee!

Here's a "Merry Christmas" to him!

HARDWARE costs only One Dollar a year.

Some Parts That Young Men Have Played in History.

Jefferson, at thirty-three, drafted the Declaration of Independence.

General Sheridan was thirty-four at the close of the war.

Napoleon was Emperor of France at thirty-five.

Commodore Perry fought the battle of Lake Erie at twenty-eight, and died at thirty-four.

Nelson was forty at the battle of Aboukir.

Hamilton was thirty at the close of the War of the Revolution.

Fulton was thirty-eight when he launched his first steamboat.

John Hancock was thirty-eight when president of the Continental Congress.

Henry Clay at thirty-seven was United States Commissioner to negotiate the Treaty of Ghent.

William Pitt was Prime Minister at twenty-seven.

Robert Bruce at forty defeated the English at Bannockburn.

Daniel Webster at thirty-six was the leading lawyer in the United States.—*Exchange.*

The National Cement & Rubber Mfg. Co., Toledo, Ohio, have recently added a number of features to the concern's already elaborate line, and at the present time manufacture and carry the largest line of goods of its kind in the world. The famous "High Pressure" brand of cements, vulcanizers, brazers, etc., is known the world over.

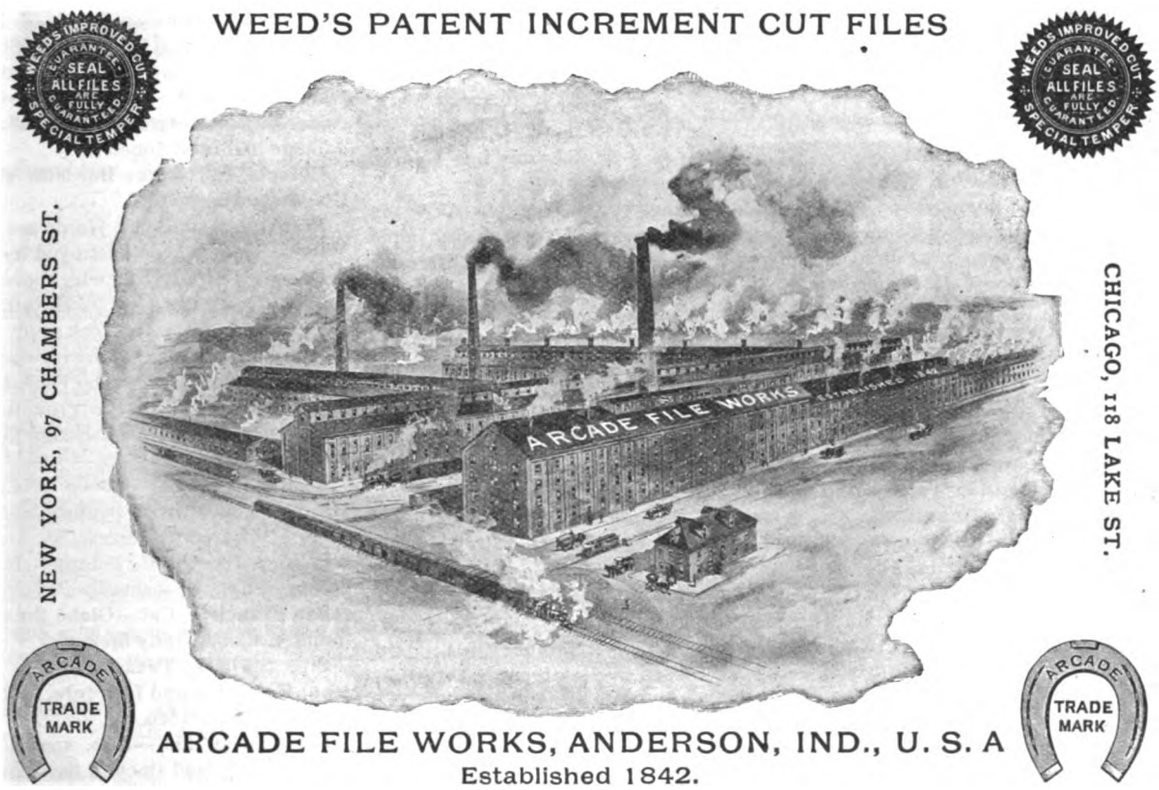
Sagua la Grande, Cuba, on the Sagua river, 11 miles from the port, has a population of 18,000, and a superior climate and sanitary arrangements.—*Exchange.*

"SCIOTO" for R. R. or Canal Work.

A thoroughly first class bolted barrow. Full sized Tray. Well planed, cleated, braced and bolted. Legs and cross pieces gained. Knocks down for shipping and is easily set up.

THE KILBOURNE & JACOBS MFG. CO.,

COLUMBUS, OHIO.



Producers of BARROWS, SCRAPERS, ROAD MAKING MACHINERY, STEEL SHAPES, Etc., Etc.

IF IT'S AN ARCADE, IT'S THE DEST.

That the ARCADE FILE WORKS at Anderson, Indiana, is the largest and most completely equipped plant for the manufacture of files in the world, is a minor point. Its product is what you are interested in and the Arcade product stands at the head of file production for the common-sense reason that their methods and facilities are ahead of their competitors'.

Mr. Alfred Weed, who is the superintendent and mechanical head of the company, is one of the oldest file makers in the United States, and has probably taken out more patents on file machinery than any other living manufacturer. The entire plant at Anderson is the product of his skill and practical experience, comprising machinery especially designed for turning out every detail of the work, not only by the most careful and systematic methods, but with the greatest possible saving of time and money. Fifty cents goes as far here as a Dollar in many of the old-fashioned plants. Then, too,

the company owns a tract of natural gas land from which their fuel supply is drawn—the cheapest fuel in the world; and buyers of ARCADE files get the advantage of all these economies by the increased value of the product.

These facts show why it is safe for us to sell files under our guarantee that **THEY WILL CUT FASTER AND WEAR LONGER THAN ANY OTHER FILE ON THE MARKET, OR WE WILL MAKE NO CHARGE.** All our files have Weed's Improved Increment Cut, which equals the best English Hand Cut.

If you use files take advantage of this offer on a trial order, however small. There's absolutely no risk to you in the trial.

IF IT'S AN ARCADE, IT'S THE DEST.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements. etc, will be gladly received, and promptly published.

New Companies, Etc.

Bridgeport, Conn.—The Bridgeport Brass Co., with a capital stock of $150 000, has been licensed to do business in Illinois, with a capital of $4500.

Buffalo, N. Y.—The Buffalo Mfg. Co., to manufacture metal water coolers, filters, etc. Authorized capital, $20,000; paid in, $13,000. Incorporators: P. Heinz, W. J. D. Most, Frank Tralles, Edward Bullett, Buffalo.

Chicago, Ill.—The Niles Mfg. Co. has been incorporated by S. S. Niles, T. Gardner and D. P. Flannery, to manufacture brass and iron castings. Capital stock, $15,000.

Chicago, Ill.—The Richardson Ball Bearing Skate Co., capital stock, $15,000. Incorporators: Robert M. Miller, Charles S. Weaver and Donald L. Morrill.

Detroit, Mich.—The Star Corundum Co., to make and sell Corundum, emery and stone wheels. Authorized capital, $10,000; subscribed capital, $10,000; paid in, $10.000. Incorporators: John Heffron, John G. Downie, John Winklemeyer, Jr., Dennis B. Hayes, Benj. H. Scranton.

Durand, Mich.—The Durand Harrow & Mfg. Co., with a capital stock of $20,000, will start factory in operation in about ten days.

Evansville, Ind.—The Randall Filter Co., to manufacture water filters. Capital, $5,000. Directors: E. B. Larch, E. P. Hahn, W. H. Randall.

Indianapolis, Ind.—The George Baldwin Plow Co., capital, $10.000. Incorporators: William E. Mendenhall, D. O. Porter, E. D. Porter and George Baldwin.

Lawrence, Kan.—The Olsted Stove Mfg. Co. has been incorporated by C. Olsted, S. Kelsall, J. M. Spencer, E. T. Van Voorhis and O. L. Turner, to manufacture stoves, furnaces and stove utensils. Capital stock, $800,000.

Newark, N. J.—The International Railway Sash Lock Co., has been incorporated with a capital stock of $100,000, of which $3000 is paid up. Bernard Biglin, Timothy J. Campbell, Edward V. Skinner, Walter D. Birdsall and James Jackson, of New York, and Edward L. Price, of this city, are incorporators.

New York, N. Y.—Kinsey, Rainier & Thomson has been incorporated by J. T. Rainier and T. A. Thomson, to deal in safes, locks, etc. Capital stock, $30,000.

New York, N. Y.—The Law Co., to deal in emery wheels and machinery. Authorized capital, $20,000; paid in, $500. Incorporators: J. S. Law, Jr., C. W. Law, M. V. Cook.

Niles, Ohio.—The Thomas Furnace Co. has been incorporated to manufacture iron and steel. Capital stock, $10,000.

Portland, Me.—The International Automatic Weighing Machine Co., capital, $1,000,000. Incorporators: Frederick Hall, and C. A. Hight.

Salt Lake City, Utah.—The Utah Rubber & Mfg. Co. have filed articles of incorporation with the County Clerk. The incorporators are A. G. Wigglesworth, president; L. Bentley, treasurer; L. Wigglesworth, F. A. Utter, secretary, and A. M. Bentley, all of Salt Lake City. The amount of capital stock is $3000, in shares of $10 each. Of this stock $2000 is paid up. The company is an extension of the Utah Rubber Mfg. Co., and will engage in the manufacture of packing and deal in engineers' supplies.

Windsor, Ont.—The Standard Paint & Varnish Works Co., with a capital of $12,000, and John Davis, J. A. Straith, O. E. Fleming, R. L. Dunn and Albert Stoll as incorporators.

Worcester, Mass.—Prentice Bros. have been incorporated by W. E. Prentice and E. W. Whitmore, to manufacture machinery and tools. Capital stock, $100,000.

Changes and Improvements.

Chicago, Ill.—The Chicago Hardware Foundry Co. will erect a foundry at North Chicago, adjacent to the factory of the Chicago Hardware Co.

Cuyahoga Falls, Ohio.—Howe & Co. have been awarded the contract for the erection of a brick building for the Falls Rivet & Machinery Co. on the property occupied by the rivet department of their works. The new building will be 38 by 48 feet, 20 feet high, and will be used as a tinning room. This step has been made necessary to make more room in that department, which has been crowded for some time past with the large orders the firm have received for their superior rivets.

Ironton, Ohio.—The Kelley Nail & Iron Co., of this city, will expend over $100,000 on improvements to their works. Already over $60,000 has been spent for machinery for the new wire-drawing plant. Sixty new wire nail machines that will cut nails from 1 to 7 inches in length have been purchased and are being put in position. By reason of these improvements the works, which give employment to 300 men, will add 100 men to the payroll.

Norwich, Conn.—The entire property and assets of the Hopkins & Allen Mfg. Co., manufacturers of fire arms, a concern capitalized at $225,000, and when running on full time employing about 350 hands, has been purchased by a syndicate headed by Charles P. Cogswell, president of the Second National Bank, of Norwich.

Norwich, N. Y. — The negotiations for the purchase of the sled factory by Don A. Gilbert & Son have closed and workmen are busy making the repairs necessary to put the plant in shape for use. Work on the sleds will not be transferred to the newly acquired plant at present as the season is so far advanced that the time required for the removal cannot be spared.

Rushville, Ind.—The Star Drill Works Co. is being reorganized with $30.000 capital. The company will embark on a large scale in the manufacture of corn and wheat drills.

Recent Embarrassments.

Middletown, Conn.—The Cutaway Harrow Co., of Higganum, have assigned to Clement S. Hubbard, as trustee.

Toledo, Ohio.—Isaac D. Smead, manufacturer of heating apparatus, filed petition in bankruptcy. Liabilities are about $900,000.

Recent Fires.

Cincinnati, Ohio.—A still alarm called the department to the Globe File Works, in Eighth Street, near Harriet, a few nights ago, where an overheated furnace caused a small blaze that was extinguished with trifling loss.

Erie, Pa.—Fire has caused $10.000 damage to the Chicago & Erie Stove Co.'s works. The loss is partly covered by insurance.

Milton, Pa.—A fire broke out in the nail works of the F. A. Godcharles Co. a few nights since, destroying the main buildings, in which were situated a large number of nail making machines, as well as hundreds of kegs of the manufactured product. This is one of the largest nail factories in Central Pennsylvania, and employs about 200 hands. The loss is estimated at about $100,000. The insurance is about one-fourth.

Pinole, Cal.—Two acres of frame buildings, comprising the gun-cotton manufacturing plant of the California Powder Works, have been destroyed by fire, involving a loss to the company which is variously estimated at anything between $7000 and $12,000.

Racine, Wis.—Fire in the shops of the Belle City Malleable Iron Co., situated between Albert and Kewaunee Streets, along the Chicago & Northwestern track, has entirely destroyed the entire molding shop and a part of the machine shop.

Miscellaneous.

Knoxville, Tenn.—The Knoxville Iron Co. have just received an order from a Hardware firm in Santiago to ship a large order of bar iron. The order will be started to the island of Cuba at once. The order amounts to $500 or more.

Syracuse, N. Y.—Col. A. C. Chase, as president of the Syracuse Chilled Plow Co., reports an order for 1000 plows from Australia and another order for 500 plows from South America, just received by the company.

Worcester, Mass.—Owing to special heavy orders recently received, the Harrington & Richardson Arms Co., at their large and capacious plant on Chandler Street, are now compelled to work night and day to meet the demand in the firearms department. The company, which are now employing about 250 hands in all their departments, are working their shifts until 9 o'clock each evening in the week, with the exception of Saturdays.

Augusta, Ga.—G. W. Simmons, bicycles, etc., destroyed by fire; insured.

Kingston, Ont.—F. A. Parent, bicycles, etc., destroyed by fire.

How to Make a Fortune.

The following are extracts taken from a letter written by Henry Ward Beecher to his son:

"You must not go into debt. Avoid debts as you would the devil. Make it a fundamental rule: No debt—cash or nothing."

"Make few promises. Religiously observe the smallest. A man who means to keep his promises can't afford to make many."

"Be scrupulously careful in all statements. Accuracy and perfect frankness, no guess work. Either nothing or accurate truth."

"Make yourself necessary to those who employ you by industry, fidelity and scrupulous integrity. Selfishness is fatal."

"Hold yourself responsible for a higher standard than anybody else expects of you. Demand more of yourself than anybody expects of you. Keep your own standard high. Never excuse yourself to yourself. Never pity yourself. Be a hard master to yourself, but lenient to everybody else."

"Concentrate yonr force on your own business; do not turn off. Be constant, steadfast, persevering."

"Do not speculate or gamble. Steady, patient industry is both the surest and safest way. Greediness and haste are two devils that destroy thousands every year."

"The art of making one's fortune is to spend nothing. In this country any intelligent young man may become rich if he stops all leaks and is not in a hurry. Do not make haste; be patient."—*Exchange.*

The new bridge just erected for the town of Bridgeton, Me., has a clear span of 36 feet, a roadway 22 feet wide and a sidewalk six feet wide. It is of steel throughout, except the floor plank, having latticed girder trusses and steel beams for the floor. The Berlin Iron Bridge Co., of East Berlin, Conn., were the contractors for furnishing and erecting the bridge.

HOLIDAY GOODS.

Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment and Rubber Blower will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

BUTCHER KNIVES.

You can't make good Butcher Knives any more than good bread without the right material to work with, and even if you have the proper material you can't make good Knives if you don't know how to manipulate that material. . . . . .

The Steel that goes into Goodell Butcher Knives is made for Goodell Butcher Knives and is found in no others. It is the same we have used for years. . . . . .

A Quarter Century experience has taught us how to manipulate that steel to produce the best results.

No. 46.

5, 5½, 6, 6½, 7, 8, 9, 10, 11, 12, 13 and 14 inches.

Goodell Knives have a reputation and are Warranted.

SOMETHING NEW.

BARNEY & BERRY'S LOCK LEVER.

This skate can be adjusted to the proper position sideways upon the shoe, whatever the style or shape, by means of inside toe clamp, which is made in two parts connected by right and left threaded screw, "B," which shortens or lengthens clamp.

When skate is adjusted to the desired position and set for use the rotary movement of main adjusting screw is locked by small set screw in stud at "A," which prevents loosening of skate in use and keeps it ready to attach to the same shoe without readjustment.

For various grades and all sizes send for FREE CATALOGUE.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

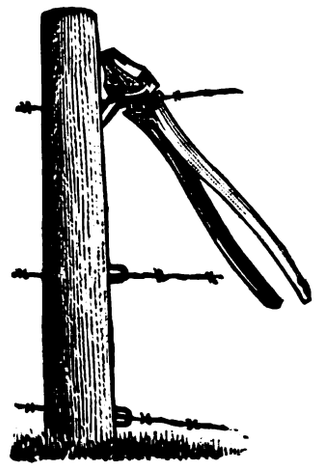
Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.

CHAMPION MODEL.



This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. List, per doz., Enameled, $30.00; Full Nickel, $42.00.

HARDWARE

VOL. XVIII. JANUARY 10, 1899. NO. 7.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.

EASTERN MANAGER:
FRED A. CATON, - - 31 Milk St, Boston.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Fred A. Caton, who has successfully filled the position of assistant manager for *Hardware*, with headquarters in New York, will, during the coming year, fill that of Eastern representative, with his office at No. 31 Milk Street Boston, Mass. Mr. Caton will make it his special business to see that New England is thoroughly represented in the columns of *Hardware*, and will devote to the Hardware interests of that section his best thought and entire attention. He is cordially commended to our Eastern friends as a courteous, energetic and reliable gentleman.

Editorial Trade Review.

The year opens with no seriously enhanced quotations to check the desire to give regular stock orders in greater volume than has been the case for years. There is a natural fear that all these various consolidations of capital, combinations of business plants under one controlling head, and other forms of what are considered as trust conditions, after business is firmly established on the new basis of economical manufacturing, and running in the easy grooves possible with such new methods, will become possessed of the commercial ambition that a little larger rate of profit can become established, without stimulating a corresponding outside competition. It is thought the prices in 1899 will have a stiffness, a rigidity of confidence that have been absent from similar commercial transactions for a long time, until very recently.

There are also natural advances to be apprehended from the rising quotations on the metals other than iron and steel, forming the base of so many goods used coming under the head of Hardware. Copper, Spelter, Lead, Tin, Antimony and Nickel come under this head as affecting Brass and Bronze goods, with their various alloys. This is not surprising when it is stated that, compared with prices ruling a twelvemonth since, Copper is now 20 per cent. higher in price, Spelter and Antimony 25 per cent., and Tin over 40 per cent.

The increasing prosperity which seems plainly to be the portion designed by fate for our enterprising merchants and progressive manufacturers, can only be made possible by preparing to share in the distribution of good things, especially by being able to fill orders when received without unreasonable delay, and thus complete the sale, with what profit there may be in it conserved by the firm to whom it may be originally sent. There is a strong belief prevalent that the demand for goods in general, after having once become established, will be found continuous and productive throughout the year, preventing any large over stocks either in the hands of the dealer or the manufacturer. The disposition to create a boom either by abnormal purchases with speculative tendencies, is nowhere noticeable. Regular and legitimate wants for specified conditions of trade alone are catered for, and stock accumulations are only encouraged based on the volume of business already ascertained, allowing for a normal increase from more prosperous conditions.

There is scarcely a wholesale house in the country but will prepare for the business already developing for the coming season, with a feeling of greater confidence in possible success, than has been the feeling for some time. They will be devoid of the fear previously so characteristic, that under existing conditions it is impossible to predict character or volume of current sales. Let us hope nothing will interrupt the certainty of a permanent prosperity, which was inaugurated in 1898 and will be the prevailing principle underlying the progressive business filling out the five years that follow.

The spirit of hopefulness as to the future prosperity of the industry, is all pervading, and inspires every buyer with the feeling that it will be plain sailing during the season as far as the shoals and quicksands of lower quotations are concerned, for they are more apt to run up against the icebergs of advances and inability to furnish stock promptly. The situation is regarded by the trade as a very satisfactory one, and unless "the unexpected" hoodoos the pleasing prospect with new problems of uncertainty, we shall have a traffic this year that will encourage the pessimist and justify the sanguine views of his optimistic brother, who will be more apt to garner the golden grain.

Bearing the Palm.

We find the year 1898 closing under such improved conditions, that most of the nations of the commercial world are cognizant of the amply demonstrated fact that iron and steel can be produced in the United States more cheaply and of more uniform quality than in any other country on the globe. When the whole world becomes fully impressed with this important knowledge, the increased prestige arising from our ability, will bear continuously the fruit of prosperity for many years to come.

The annually increasing uses for which iron and steel products are made necessary, create manifold wants, and extend over a wide field of usefulness,

Digitized by Google

certainly double the requirements of a decade ago. As the supplies of ores and the fuel required for their proper treatment annually decreases abroad, or become more and more difficult to obtain, with each recurring year, in our own country new mines and metal deposits come to the front at short intervals of time, each new discovery creating an almost exhaustless deposit of mineral wealth which seemingly defies anything like foreign competition.

In every department of industry we are setting a pace that startles the old world from its conventional propriety. Even in the handling of the munificent productiveness of our mineral wealth as it comes from the bowels of the earth, we are the admiration of the world, especially in the labor-saving economies of handling phenomenal outputs, by which hundreds of tons are munipulated from one point to another by the aid of mechanical appliances, with the same total expense as single tons by the hand-labor methods prevailing not so long ago, that have passed away forever.

Conditions like these show a detail of progressiveness which becomes a barometer whereby we gauge the prosperity of the future, and are most opportune and gratifying, for they are in sympathy with and affect with unerring certainty every analogous business with which iron and steel products bear close relation. They materially assist in giving promise of an augmented development in all such lines that is as sure to follow, "even as the day follows the night."

Now is the Accepted Time.

At this time of the year the aggregated industries of the country, through advertising, find special opportunities for exploiting the advantages of their respective products. Advertising appeals more strongly to those having something to say, or meritorious goods to push the introduction of, for without its aid, which distributes the sunshine of intelligence regarding such products throughout the trade centres of the world, any other method seems like trying to reach the eye of the public through a London fog by aid of a lantern, with a very limited area of enlightenment.

When such an awakening of trade development presents itself, as is now apparent, it behooves the old-fashioned concern whose exploiting energies have been long dormant for fear of spending a few dollars, to get in the swim for the purpose of letting the Hardware dealer know he is still alive and prepared to hustle.

Even on a fishing excursion when the fish are plentiful, hundreds of lines are overboard in double-quick time, and the advertising lines, at a time like the present, command the attention of those interested, if carefully baited and properly placed.

When a manufacturer has a factory producing goods, for the sale of which the Hardware dealer is the choicest medium, he should certainly incline his views to the selection of a well-known trade journal distributed to his customers; that this is a self-evident fact, the columns of *Hardware* in the present issue present irrefutable evidence.

The land in Cuba is not suited to cereals, and flour mills are unknown; $2,821,557 worth of wheat flour and $582,050 worth of corn were imported from the United States in 1893.—*Exchange.*

Quality and Value in Retail Trade.

The demand for low priced merchandise, East, West, North and South, has been especially intensified during the last few years of business depression. Price has been made the keynote of all transactions between buyer and seller. The shelves of the retail merchant have been filled with trashy merchandise, which has given little real service and still less satisfaction to the consumer. The excuse for this has been that the supply offered was selected in view of the actual demand. This was probably true. At the present time, however, it must be admitted that there is a vast improvement in the financial condition of the mass of the people of the land. With this improvement there has already come, in some sections, a marked change in the character of the demand.

A larger percentage of the better grades in all classes of merchandise is being called for by the consumer. Therefore, it behooves every retailer to give to the selection of his stock most careful consideration. It is to his interest to adjust his purchases in accordance with the changed condition. He can, with very little effort, and without enlarging the number of transactions, considerably increase the volume of his sales by presenting to the trade articles in which quality rather than price is shown to be the chief merit, and by advocating the purchase of such goods by reason of the advantages to the consumer which follow. The opportunity for pursuing this plan is presented in nearly all lines of merchandise. It is particularly available in every kind of wearing apparel for both sexes. A difference of 10 per cent., and in some instances as much as 20 per cent., can readily be borne, the result affording a special satisfaction to the buyer.

It is well worth while for the merchant to study the temper of the times. With the turn of the tide that has set in, all should endeavor to reach the high water mark of success and improvement in the quality and price of merchandise sold, which will result in a corresponding increase in gross sales with no greater cost of doing business.

CHARLES BIGGS.

Barber & Ross, corner of Eleventh and G streets, N.W., Washington, D. C., announce that in consequence of a disastrous fire on the night of the 29th of December, their stock of Hardware, mantels and gas fixtures was entirely destroyed. They say: "We intend buying an entire new stock and resuming business at the earliest practicable moment. The building occupied by us was materially damaged by fire, and it is not thought that the same can be placed in condition for occupancy much before February 1st. Pending occupation of our old store we have leased temporary offices, and may from time to time send you orders to cover special sales, for which if we do, we solicit your earliest and best attention. Please mail us your complete catalogue and discount sheet."

Browne & Mansfield, Manufacturers' Agents, No. 245 Broadway, New York, are on the lookout for special and job lots of merchandise, which about this season of the year are apt to loom up in the manufacturer's stocks, and he is usually in a frame of mind to let some one else have the disposal of the same at a nominal price. Browne & Mansfield are looking for just such chances, and any of our patrons having a lot of specialties they are willing to make "job lots" of, will find them ready for a deal that may be mutually advantageous.

The Berlin Iron Bridge Co., East Berlin, Conn., are furnishing for the Laflin & Rand Powder Co., Pompton, N. J., the steel roof for one of their storehouses. The building is 45 feet wide and 150 feet long. The roof trusses are of steel, and the roof trusses are corrugated iron supported on steel purlins.

Digitized by Google

THE SALESMEN'S DEPARTMENT---V.

THE ORDERS.

The foundation upon which the manager builds his structure and establishes the department is the Orders. Upon the orders depends the success, the very life, of both the jobber and the manufacturer. The orders must pass through the salesmen's department. It is not necessary that the manager see them before they are filled, billed and charged, unless the scope of the department includes the oversight of the filling of the orders, but from them he draws his inspiration and the House its income, and they must shortly come to his hands.

In houses where all orders, passed by the credit department before noon of the day they are received, are shipped the same day, the fewer hands they pass through before being shipped the better. In most houses the preceding day's billings are placed on the ledger by noon of the next day, which is soon enough for them to be placed at the disposal of this department. They should then be given to the cheapest person in the department, who can do the work properly, and a list of all items scratched or not filled complete, should be made in duplicate or triplicate and sent to the buyers of the different departments for their inspection and as a check against the forgetfulness of floor managers and ignorance of order clerks. These lists should be returned to the salesmen's department as soon as possible, with notations attached to each item stating whether ordered in transit, due to arrive, in stock or don't carry. Now the day's sales are ready for the manager's inspection.

If any items, not completely filled, are of enough moment, the salesman should be advised of same so he will be able to anticipate any criticism his customer is liable to register at the time of his next call; also that he may endeavor to include it again, if the mail order department has not already secured a shipment from him in which this item was included.

The manager in scanning the orders is not expected to scrutinize each item, but is expected to glance over them that he may form an estimate of the day's business and may know who of the salesmen have been heard from and who have failed to show tangible results of their efforts. By seeing all orders billed by the house, the manager gets ideas and secures information of value, among which might be mentioned the noticing of a good sized mail order from a customer on whom the salesman was expected to call the preceding week, or to whom he sold but a few items.

While all jobbers pride themselves on their mail order business, they must remember that in a well regulated business, the salesmen, if they be salesmen in the true sense of the word, secure when they call enough more profitable goods, as well as all of the customer's wants, to render the result of their efforts quite as valuable to the jobber as are the mail orders. Where this condition of affairs does not exist, something is lacking and is badly needed, i. e. an up to date Salesmen's Department.

If the jobber and manufacturer employ salesmen to increase their business, they should, by all means, give them all the assistance and encouragement they possibly can, and take all the work which can be done by low priced help in the house off the salesmen's minds and shoulders that they may study these things and have time to grow along these lines.

All orders when they reach the manager should be so arranged that the mail orders from a salesman's territory appear with his orders, the miscellaneous mail orders preceding or following. This is easily done where ledgers are arranged as they should be, i. e., by territories. The profit clerks to whom the orders go from the manager will scrutinize each item during their labors and, when through with each day's business, will call the manager's attention to all errors in billing, also in pricing whether done in the house or by the salesman. In this and other ways this department acts as a check on everybody through whose hands the orders have passed.

That all benefits possible may be gained, the profits on all orders should be figured whether city, mail or salesmen's orders. In the majority of establishments and even factories, the amount saved by this will pay for the time spent, twice over.

The manager's attention as he looks over the orders should be attracted by the following matters: Such items scratched as have already been referred to; the sale of unusual quantities of any line of goods; if a salesman has succeeded in selling a larger order than usual to a customer; if a salesman failed to sell a regular customer, or only sold him a very small order; if a salesman has disobeyed positive instructions regarding prices; if one salesman is not getting as much for an articie as his neighbor in an adjacent territory.

At such points he will place slips, and when he has gone through the day's business he can refer to them and in a few minutes dictate "Salesmen's Department letters" giving the salesman information of value, complimenting him upon clever deeds or asking him for a short explanation regarding such matters as he deems advisable.

Formerly, St. Joseph, Mo.; CHARLES W. EMERY.
Now of the Van Camp Hardware & Iron Co., Indianapolis, Ind.

[Any jobber or salesman who is particularly interested in these articles who is not receiving "Advance Copy," should write the author to this effect.—*Editor Hardware*]

Stewart Iron Works.

The Stewart Iron Works, Third and Culvert Streets, Cincinnati, Ohio, who are everywhere known as extensive manufacturers of iron fencing, iron and steel jail work, and various forms of architectural and structural iron work, inform a representative of *Hardware* that their business is rapidly increasing, and that they have, in consequence, been compelled to make many improvements in the way of machinery. In addition to their enormous fence and architectural iron work trade, they expect to also do an immense business in constructing jails, and are satisfied, that with their locking device and other patents, they will more than hold their own. Some suggestions that will be of interest to Hardware dealers, will be found in their attractive card on page 18 of this issue.

The 1899 catalogue of the Wire Goods Co, Worcester, Mass., is at hand, and shows a large and attractive line of general wire Hardware, bright wire and house-furnishing goods. The book is of a size convenient for office use, is bound in boards and contains 166 pages. These are filled with so many descriptions and illustrations, that the publishers of the catalogue are justified in speaking of them as "novelties and an endless variety of specialties in wire." A half-dozen pages of index are required for their enumeration.

HARDWARE'S "Prices Current" are reliable.

Interesting Work on Files.

We are permitted to make the following extracts from the forthcoming publication now in course of preparation by the Arcade File Works, Anderson, Ind., and No. 97 Chambers Street, New York. It is written by Prof W. H. Vandevoort, the expert on technical mechanics, and under the name of "Practical Talks on File Work," will soon be issued in book form, to be distributed gratuitously among file users and dealers, who have requested a copy from the above company.

ARTICLE III.

Ordinarily the surface of the work on which the file is to be used should be held at the height of the work-

FIG. 7.

man's elbow, thus allowing the direction of motion of his forearm to be in a line parallel with the plane of the work surface. This position of the work allows the workman's arm to swing freely at the shoulder with the least possible amount of motion at the wrist and elbow. If the work surface is broad it should be held somewhat lower than the elbow, thus enabling the workman to more easily reach over the entire surface. If, on the other hand, the work is of a fine nature, depending largely on the eye and a delicate touch, it should be held much higher. For work of this character ths file is usually held in one hand and the high position of the work prevents the fatigue incident to a bent position over fine work.

For heavy cross-filing, which requires a considerable amount of pressure on the file, the workman should stand slightly back from the work with one foot considerably in advance of the other. On the forward, or work stroke, the pressure exerted on the file should relieve the weight on the forward foot, the rear foot bracing against the stroke. On the return stroke the forward foot should again take its portion of the weight, and the file should be relieved from all pressure, but not raised from the surface of the work. Only at such times as it is necessary to examine the condition of the surface being operated upon should the file be taken from the work, its removal for cleaning, however, being excepted.

The workman's body should, in heavy cross-filing, move back and forward with the strokes, thus making the back and legs do a part of the work that would otherwise come entirely on the arms. When the work is of a lighter character and the quality of the finished surface rather than the quantity of metal removed must be considered, the workman should stand in an upright position, doing most of the work with his arms.

In cross-filing, and more especially where much metal is to be removed, the direction of the strokes should be varied frequently. This not only enables the production of truer work, but faster reduction of the metal. The file when pushed endwise produces small grooves or channels in the

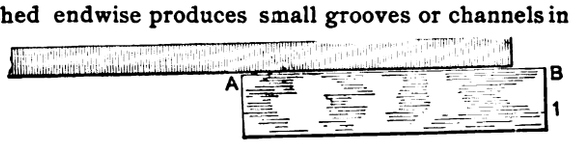

FIG. 8.

direction of the stroke, and when the direction of the stroke is changed the file teeth come in contact with the tops of the ridges between the grooves, thus diminishing the area of tooth contact with the work surface, and consequently increasing the bite; that is, for equal pressures.

The selection of a good file for nice cross-filing is important, only a file with considerable belly being suitable. As most files are cut on tapered blanks they should have a uniform amount of curvature on each side. The process of tempering, however, frequently so distorts the tool that one side may be concave rather than convex. In choosing the file the workman sights his eye along its length and spots the high points with which he does the fine work. In Fig. 7 is shown a file having no belly applied to a flat piece of work. If a workman would move this file in an absolutely straight line, flat work would probably result, but as this is practically impossible, we must expect to find the work rounded at the edges A and B. If, however, the file shown in Fig. 8 is used, its belly will allow a slight variation from a straight line motion, and if carried completely across the work a straight surface will result. As only a comparatively small portion of the file's surface is suitable for this class of work, the mechanic should so plan that the balance will be worn out on round work in the lathe, draw-filing, narrow surfaces, etc.

In cross-filing the file should be held at quite an angle with the direction of the stroke, which has the effect of giving the file a side motion as it is swept forward. This improves the condition of the surface filed, prevents to a marked degree deep groovings and brings the file under more perfect control.

When the surface is narrow and a large amount of metal is to be removed quickly, the angle at which the file is held may be changed, as shown in Fig. 9. As the contact area is small in this case the bite is free. A new file should never be used for this purpose, as the teeth will take hold so freely that they will break off or at least lose their keen cutting edges very quickly. This is much more disastrous

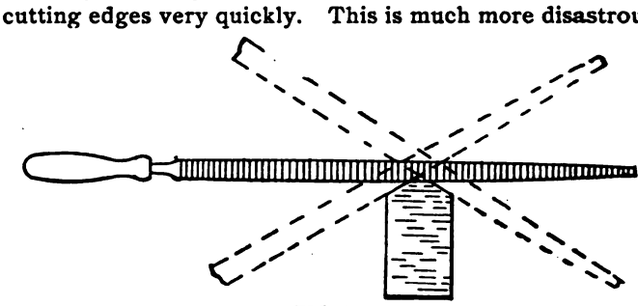

FIG. 9.

on the delicate points of the double cut than the long teeth of the single-cut files. Work of this character should be held close down to the top of the vise jaws, thus preventing chattering.

The attention of our readers is called to the advertisement of the Arcade File Works on page 49. Those of our readers who wish a copy of the publication above quoted from, should apply at once, as the demand already indicates an increasing interest taken in this important line of manufactures.

The L. M. Jones Co.

Among the manufacturers of bicycle grips, the above named firm, of Winsted, Conn., have established a reputation for high grade goods, and having advanced this line beyond the state of experiment, are now turning out some very fine specimens of plain and inlaid grips. Some of the best trade of the country are now fitting out their wheels with the goods of this firm.

They also announce that they are the sole licensees for the East for the manufacture and sale of the well known Diamond Cycle Stand. This handy article is made from cherry and oak, with coppered and nickel plated steel spring supports. Among the qualifications claimed for it are that it is light, strong, handsome and cheap; folds into small compass; fits all sizes of wheels, and is the only folding bicycle floor stand made.

Another specialty of the company is that of small wood turnings to order, and having a full stock of foreign and domestic woods are prepared to execute the highest class of work in this line. Full information as to prices and discounts will be supplied cheerfully on application.

THE NEWS FROM NEW ENGLAND.

The going out of the old year, while not accompanied by a flourish of trumpets, still contained many pleasing features. The jobbing trade of Boston without exception find much in a retrospective glance over the past three months to cause them satisfaction; and the feeling is equally general that 1899 will be productive of a still greater cause for self-congratulation.

The holiday trade is reported to have been particularly gratifying, showing a decided increase over the past several years. In seasonable goods, such as snow-shovels, skates, sleds, etc., the output has been very large. In fact, the supply of snow-shovels was entirely exhausted at one time, and almost so a second, while at present the factories producing the wooden article are unable to catch up with the demand.

M. C. Warren & Co. note, among other things, a marked increase in the sales of boys' tool chests this year. For the past few years the demand for these useful Christmas presents has been light, but the practical value of them has again revived interest in them.

An interesting comparison in old and new methods is to be found in the rapid progress made by some firms in stock-taking. A representative of the firm of Baldwin & Robbins, Boston, speaking of this necessary and somewhat irksome detail, states that in former years the time occupied in stock-taking was from four to five weeks. This was necessarily objectionable in many ways, and efforts were made to reduce the time. In the present year the process was completed in six days. The full staff, as well as all the road salesmen, were called into requisition, and worked incessantly, letting all other business stand. The result is a quick and accurate settlement of the past year's business and the fiscal year, leaving the firm free to devote their entire energies to the new season.

The firm of Bigelow & Dowse, Boston, on December 28th, inaugurated the first of what is designed to be yearly features henceforth. The heads of the firm, with their heads of departments and travelling representatives, met on the evening mentioned at the Exchange Club, and after a dinner, discussed the various questions of interest that had come up during the past year from each individual's point of view, as well as the best methods to deal with such matters in the future. Mr. Bigelow states that the experiment proved most satisfactory, and will undoubtedly be continued in the future. Every man is given an opportunity to place before the others the matters which he has contended with, and is benefited by the advice and assistance of his confreres, who are equally glad to learn the difficulties of the other's position. This is a direct result of a suggestion from the National Convention, and its beneficial features should commend themselves to all firms employing a large staff of assistants.

Among the various questions brought up for discussion was: "Is it good for one salesman to see a competitor's invoice, even if possible?" It was contended by some that no good was to be derived from such information, as the result was likely to demoralize one's business principles. A story was told by one of the travelling men of a call he made years ago on a Frenchman in Aroostook County, Maine. After the usual introduction, the question of business was brought up and the Gaul replied: "Oh! I buy Jim Hayne. You sall cheep as heem?" Of course the Boston man said he thought he could. "Well!" continued the Frenchman, producing Mr. Hayne's invoice, "here ees ze figgaire. You sell cheeper as heem, I buy you." History fails to relate whether or not the order was booked.

The event of the week in Boston has been the opening of the new South Station, which in appointment, accommodation and magnitude is claimed to be the finest railway station in the world.

The hardware used in its construction, from the first shovel to break the ground to the last lock to break the burglar's heart, has been supplied by the well-known firm of Burditt & Williams. Mr. Burditt states that the order will total in the neighborhood of $25,000, whole car loads of bolts being shipped at a time. The builder's Hardware used was specially designed by the P. & F. Corbin Co., and is exceptionally fine.

At the recent Mechanics' Fair the only exhibit of Hardware was that of the firm of Burditt & Williams. Among the attractions in this exhibit was a machine for the manufacture of corkscrews, in operation. Some 40,000 of these handy companions were distributed to the public, the screw being encased in a wooden sheath with the advertisement of the firm on it.

The Elastic Tip Co. desire to announce that the company is now in a state of reorganization, which will be completed in the course of a few days. The company will continue, as heretofore, doing a general jobbing business in all kinds of bicycle parts and sundries. There will be no change in the management, and all the old travelling men will be retained. Their '99 catalogue is being pushed rapidly toward completion, and a copy of it will be mailed to all bicycle dealers as soon as it is received from the printer. The new organization say it is their intention to push harder than ever before to get their full share of orders for all goods in their line.

The keen competition in builder's Hardware was evidenced recently in a suburb of Boston. A small contract was to be let, and at the request of a friend of the builder a Boston house sent a man to estimate on it. He returned and reported that he was one of four, and that the whole amount of the job was about $150. This set the Boston house thinking, and estimating their representative's expenses, time, etc., at $20, and the other three at the same amount, they were somewhat surprised to find that there was $75 or $80 being expended to secure a contract for not more than double that amount. If this proportion of expense were kept up there would be few houses in the business at the end of the year.

The researches in the direction of perfecting the mysterious Keely Motor are to be continued by a Boston expert, T. B. Kinraide, who is said to have been closer to the late inventor than any other living man.

THE GOURMET HARDWAREMAN.

The Hardwareman sat alone in his store,
And the pages of *Hardware* did scan;
And he said: "Here's a menu that never before
Has been eaten by mortal man."

"For a waitress I have a young WAGON-WENCH,
And if she's not enough, a DUMB WAITER
Will load up my board (otherwise a TOOL-BENCH)
With fit food for GAS-GOVERNOR or GRATER."

"My table with clean WIRE-CLOTH shall be laid,
And TIN-PLATE and PIN-TUMBLERS will serve
For china and glass; and I'm not much afraid
Of a SKATE, for I've got a steel nerve."

Digitized by Google

Now this jolly man had VISES galore;
In fact he was known as a RAKE.
And he rang the DUMB-BELL, as loudly he swore
To BRACE up, a NAIL PUNCH he'd take.

He received a DOOR-CHECK from the TAMPING-BAR;
And tightening his TANNED-OAK BELT.
He tucked a STEAM-BIB underneath his GRATE chin,
As the pangs of hunger he felt.

The first course of TACK-HAMMER CLAWS was brought,
And then came fried MOVABLE CRANE;
A BRASS-COCK he turned from, but his DEAD-EYE sought
A morsel of stewed RABBET-PLANE.

He threw a CHUCK steak to the BICYCLE KIT,
To the DOG-CLAMP a piece of CHILLED ROLL;
From a SAW-BUCK raw a big chunk he BIT,
And swallowed a CLAY-PIGEON whole.

The BAND-SAW, meanwhile, attracted his ear,
With strains that compelled his CUT-SOLE to ring;
And with pleasure he SAW on his tab'e appear,
A draught from an OIL-TEMPERED SPRING.

ORNAMENTAL GRILLE chop next came to his lap;
And, as SOLDERING SALT he lets fall
He says: "If this isn't a CHAMPION SNAP
I'm no judge of the matter, that's AWL."

So this Hardwareman gay, as the sun he SAW-SET,
Finished up the last BITS on his table.
With STEAM-GAGES, PLUMBS and RASP berries he met,
Every pang of which hunger was able.

Then on his BOLT-HEAD he fitted with care,
A PERCUSSION CAP—waterproof;
And he made TROLLEY TRACKS for the next world; where,
From such victuals he'll hold aloof.

BOSTON, January, 1899. FRED A. CATON.

General Cycle Sundries.

Under the above caption the New Departure Bell Co., Bristol, Conn., have published a striking and attractive catalogue of the goods they manufacture, and also those of Jos. Lucas & Son Co., of which they are the American representatives. The pages are filled with illustrated descriptions of their various lines, including the bells for 1899, shown in the last preceding issue of *Hardware*. They make their announcement for 1899 in these words:

"In presenting to the trade our line for the coming season, we desire to express our appreciation of the cordial reception and courteous treatment accorded our products, and the assurance that on our part no effort will be spared to maintain the high grade of materials and workmanship which have ever been distinguishing features of the New Departures. The new models presented this season are unique, and mark a complete departure from existing practice both in conception of design and method of treatment and finish, while the immense facilities at our command enable us to produce goods of the highest quality at prices which render competition impossible. While there is always better satisfaction both to dealer and purchaser in the best grade of goods, we offer the Bristol Bells where there is a demand for low first cost. Made of good materials and well finished, they form an admirable complement to the higher grade of products, and enable low prices to be met without sacrifice of quality. Our entire product is marketed by Messrs. John H. Graham & Co., No. 113 Chambers Street, New York. They are at all times prepared to give every possible advantage of close quotations and prompt shipments, while their high standing in the trade is sufficient guaranty for liberal and conscientious treatment of every customer."

The Berlin Iron Bridge Co., East Berlin, Conn., are erecting for the Seamless Metal Co., Sing Sing, N. Y., across the railroad tracks connecting the different parts of their plant, a steel foot bridge. The bridge consists of lattice trusses about sixty-eight feet long, supported on steel trestle bents on either end. Underneath the bridge is a substantial trolley beam designed to carry loads from the adjoining building to the switch track of the railroad underneath the bridge.

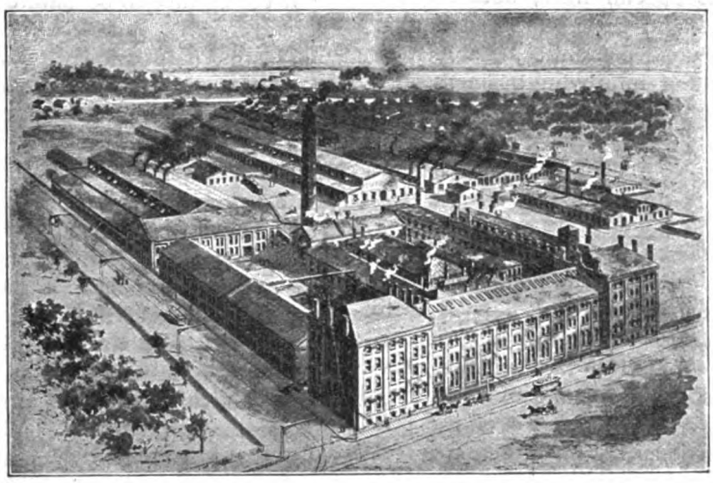
1812—Bruce & Cook—1899.

One of the most pleasant events in connection with each recurring holiday season is the cheerful "Happy New Year" greeting which comes from the headquarters of Bruce & Cook, New York. It is, as usual, accompanied by the Annual Calendar, which aids so many to keep run of the days as they come, and be punctual to the needs and appointments of each day. We take pleasure in quoting from the "greeting" of 1899 the following points of information touching various articles of the trade:

"We enclose Calendar 1899, and with it we tender our best wishes for a prosperous and Happy New Year. Our facilities for doing business and serving our friends are better than ever. Our stock of goods is larger and well-assorted to meet the requirements of the trade in the several lines as noted. Business of the country during 1898 was larger in almost every line than ever before in its history, and the fact that manufactures have been exported to foreign countries at the rate of about one million dollars per day, or over three hundred million for the year, shows that our merchants and manufacturers are reaching out in an energetic way for larger fields, and also shows that we can compete successfully with other countries for the world's needs, owing to our improved methods and consequent low prices at which goods can be produced.

"Tin Plate. The early part of the year showed a very slight decline, but the last few weeks prices have stiffened and may be expected to rule higher for some time to come. Galvanized Sheets. We are prepared to furnish you with the Genuine Apollo BB Sheets in quantities as you may require. Prices for galvanized sheets have been very low during the year, but with the firm market for steel billets and bars, which now obtains, we look for advanced prices in the near future. Black Sheets. Prices for these have not changed materially, but with the very firm market for iron and steel products, they may be expected to advance at an early date.

"Tin, Lead, Spelter and Copper. Prices for these metals are all considerably higher than a year ago and apparently present or higher prices will rule for some time to come. Solder. This has advanced proportionately with tin and lead, and naturally follows these articles very closely in price. Conductor, Eave Trough, Etc. These will follow the prices of galvanized sheets very closely and higher prices may be looked for when the Spring trade opens, if not before. We shall hope by careful attention in prices, prompt shipment and quality of goods to merit your patronage, and trust you will favor us when in need of anything we have to offer."



Although on the market but a few months, the recognized suitability of the "Toler" Liquid Door Check and Spring, has caused their being specified in the construction of many of the new schoolhouses now in the course of erection in Manhattan Borough and rapidly hurried to completion. In many of the older buildings devoted to educational advancement, they have also been selected to replace others less modern in constructive excellence. W. H. Quinn, of No. 103 Chambers Street, the New York City representative of John Toler's Sons Co., reports an excellent and growing demand for the "Toler" Door Check and Spring from all parts of the country. Where they have been introduced they seem to have won their way by intrinsic merit, backed by patience, push and perseverance.

The Gray & Dudley Hardware Co., Nashville, Tenn., are sending their friends a calendar in the shape of a "Clipper" Axe, and when the axe is opened, book-fashion, one finds portraits of the many salesmen who travel through the country in behalf of this house. It is a neat idea, well carried out.

WORKS OF THE YALE & TOWNE MFG. CO.

The American traveler in England, or on the continent of Europe, looking about their crowded marts for something to remind him of home—some familiar American product to gratify his national pride by its evidence that American industrial enterprise and ingenuity have won some recognition even among the busy and ingenious States of Europe—will be likely to find what he is looking for more frequently in evidence by the legend "Yale Locks" conspicuously on the fronts of Hardware stores, than in anything else meeting his casual glances in the streets of a foreign city. He is thus reminded of an industry whose unique distinction it has been not alone to have contributed its share to the mass of manufactured goods in certain given lines, but to have developed and given to the world of trade a distinctly new, and obviously valuable, adjunct in the economies of modern life. The huge key which served the mediæval jailor not only to secure his prisoner behind the iron bars, but also as a formidable weapon of defense in case of sudden attack, had its relative counterpart in the keys carried by the merchant, the banker, the jeweler, the janitor, the housekeeper and the butler, while the occasional and incidental key in Hogarth's pictures looks proportionately big enough to batter in the door instead of opening the lock of the same.

WORKS OF THE YALE & TOWNE MFG. CO

To put the argument in another way, and in general terms, there is scarcely anything one can think of in the line of everyday mechanics which more sharply illustrates the difference between the antique and old fashioned and the modern and new than the contrast between the door and other locks, of even half a century ago, and that of the type prevailing at present. The tendency towards neater lock-mechanism and smaller and therefore more conveniently-carried keys, had already become notable in the march of modern improvements; but it remained for the Yale lock to give an emphasis to this tendency amounting to a revolution in this branch of mechanics.

This is the world-recognized achievement which has given the history of the Yale & Towne Mfg. Co.'s growth and development its unique distinction. It has been the chief agency in an accomplished industrial revolution affecting a line of products scarcely second in importance to any other that can be named in the Hardware trade.

In 1868, Linus Yale, Jr., was engaged at Shelburne Falls, Mass., in conducting, on a modest scale, a lock-making industry, which had been established by his father, and in whose products were represented certain peculiar improvements evolved from the family inventive genius, especially as relating to bank and key locks. He was perfecting the flat-keyed lock with which his name is now so universally associated, when Henry R. Towne, then of Philadelphia, made his acquaintance. Mr. Towne had already spent some years in his native city following the bent of his natural taste for mechanical and engineering problems and operations, and he was quick to perceive that Yale's new flat-keyed lock was a strikingly original and meritorious device, and probably had in it the potency and promise of developing an important industry. In addition to contributing fresh capital, he undertook the management of the manufacturing department of the new enterprise. His first important step, after this arrangement had been entered into, was to secure a new location near the metropolitan market. A piece of ground—part of the present premises—was purchased in Stamford, and the erection of a building begun. Its exterior walls and roof were completed, when suddenly, on Christmas day, 1868, Mr. Yale, while on a visit to New York, was stricken with heart disease and died. This was felt to be a severe blow to the infant enterprise, but it was carried forward according to the original plans by Mr. Towne and J. B. Yale, a son of the lamented inventor. Early in the spring of 1869, the concern at Shelburne Falls was abandoned, and the new factory in Stamford began operations with a force of about thirty employees.

Such was the inception of an industrial enterprise whose subsequent growth and expansion to its present proportions constitutes an important chapter in the industrial history of Stamford for the last quarter of a century. In 1870, Mr. Towne became practically the sole owner by the purchase of the interest of the Yale estate. The corporate name and form were retained, however, and, after ten years' steady progress, the capital stock was increased to half a million, and some years later to one million dollars. The extension of the works themselves and the scope of manufacturing operations and products correspondingly increased.

The story of this expansion, from a small factory building, sheltering thirty employees, in the spring of 1869, to

Digitized by Google

the mammoth group of buildings covering, with their yards and offices, some twenty-one acres of ground in 1897, cannot be told in detail within the limits assigned for this article. The addition, from time to time, of new departments for the manufacture of products other than the endless variety of locks, which continued from first to last to be the characteristic and leading line in the company's varied output; the change of title, in 1884, from "The Yale Lock Mfg. Co." to the present designation, "The Yale & Towne Mfg. Co.;" the establishment of branch houses in New York, Chicago, Philadelphia, Boston and San Francisco; the purchase of the Branford Lock Works in 1892, and the various methods and channels by and through which the great industry grew to its present proportions and importance, are facts and features that must here be passed with the briefest reference. Nor could there be any adequate history of these years of advance and progress that would fail to take appreciative account of the men in the operative, administrative and commercial staffs of the concern, whose services were indispensable to the successful conduct of the company's affairs on the scale to which they had advanced under Mr. Towne's sole management during the concern's earlier years.

These men—capable business men and captains of industry—comprise not less than a score of names whose long identification with the concern, as chief officers and heads of departments, have given them honorable and conspicuous association with the successful development of a manufacturing industry whose experience and resources—whose commanding facilities in its special lines, both for the manufacture of its products and their wide distribution through the channels of trade and commerce, enable it to look out over the present field of improving business with confident expectations of obtaining its full share in the benefits of that revival of general trade which we all hope is at hand.

A Good Year for Blocks.

The Boston & Lockport Block Co., No. 142 Commercial Street, Boston, inform a representative of *Hardware* that the results of the year's business have been such as to greatly encourage them, and that the time of long depression has passed, and that we are all fast entering into better and prosperous times. The volume of their business has been increased at least 25 per cent. over the previous year, and although there has not been the expected, and what would have been welcome, advance in values, increased volume has come to the rescue, and their December balance will make a satisfactory showing, making due allowances for all the special conditions. One of the most encouraging features is the increase of special work, such as is required by contractors and large business enterprises. This indicates clearly, not only a renewal on their part, but an enlargement. They are also pleased to note encouraging signs in regard to the foreign trade, which, with them, is comparatively new and undeveloped. They add: "Unless all good indications fail, the year upon which we are soon to enter will go into history as a remarkable one for volume of domestic business and especially for export business."

The National Cement & Rubber Mfg. Co., Toledo, Ohio, have issued a handsome and comprehensive little catalogue illustrating and describing their full line of bicycle supplies, cements, oils, graphites, vulcanizers, brazers, enameling ovens, etc. Thirty-six pages are filled with illustrations and descriptions, and there seems nothing to be desired, or that has been left out, in the bicycle line. The catalogue will be sent on application.

Baracoa, Cuba, at the extreme eastern part of the island, has about 7000 people, normally. The climate is pleasant, the average temperature being 78 degrees.—*Exchange.*

Some Old Paints.

Considerable has been written lately about an old sign in possession of the Western Society of Engineers at Chicago. The words "Harper's Ferry," painted in black, stand out as boldly as when they were first formed by the artist's brush, while the wood around the letters, which was painted with white paint, has worn away about one sixteenth of an inch. It is asserted by the writers that no paint manufactured nowadays is equal in durability to that which was applied on the old sign.

Mr. Wm. Hooper, of Ticonderoga, N. Y., does not see anything specially remarkable in the preservation of the old sign, and claims that there is just as good a paint made nowadays as then. He adds: "I have seen signs that have been painted with black paint directly on the clapboard of the building. The lettering was good after the paint on the balance of the building had disappeared, and after this the whole building was painted over, lettering and all, and the lettering obliterated; yet within ten years afterwards the old black lettering appeared again quite freshly to view. I suppose the paint for the lettering was made of linseed oil and lamp black. I believe, however, that finely ground graphite mixed with pure linseed oil, will last as long, or longer, than any other paint ever known of or used. I had a large iron casting which laid in my mill yard for over thirty years. It was painted with only one coat. The old casting was broken up and sold for old iron last month, and I noticed that the paint on the pieces of casting, even after being broken up, looked quite fresh.

"If the surface to be painted is perfectly dry when the finely ground graphite is applied, the paint will prove the most lasting paint known, because if time eliminates all of the oil, the graphite seems to adhere to the surface painted just the same as a piece of paper or wood will appear after it has been rubbed with a lead pencil or a piece of graphite. No other pigment known to me will remain on the surface painted after the oil has been thoroughly destroyed. With the experience I have had with graphite paint, I thoroughly believe that if any dry surface be covered with graphite paint and left untouched for a period of thirty years—by which time the oil will have disappeared—no doubt a letter could be written plainly on the surface by using a piece of large wire or nail after smoothing the end of the wire or nail which is to be used as a pencil. I have done all this and shown it up to others. Writing with the piece of wire, polishes the graphite which adheres to the surface, showing that it is there still."

Among the batch of ads. received by the Bissell Carpet Sweeper Co. in response to their offer of three prizes which they made about a month ago to those writing the most intelligent "ad." on Bissell Carpet Sweepers, comes quite a unique "ad." from a ladies' church society in Ogden, Iowa, which reads as follows:

"And when they had brought him unto the palace of the king they showed unto him that which had swept and made clean the floors of all the nations of the earth, and when he had looked upon it he knew that it was good, and he cried out with an exceedingly great cry, saying: 'I will issue a decree that shall be read and proclaimed unto all the kingdoms of the world, and this decree shall read in this wise: 'Condemnation be upon any, and great and woeful disgust to all who shall be guilty of buying, advertising or using any carpet sweeper other than this self-same Bissell's of the great city of Grand Rapids, Mich.'"

Edw. K. Tryon, Jr. & Co., Philadelphia, Pa., who have been long known as among the most enterprising sellers of wheels, have become the distributing agents for Philadelphia and surrounding counties, of the Stormer and Pennant bicycles. They also have the Apollo, Vesper and Devon wheels, besides juveniles and bicycle sundries.

A Good Thing in Carpet Sweepers.

One of the most attractive exhibits at the Mechanics' Fair, held by the Massachusetts Charitable Mechanic Association, in Boston, this year, is that of the Bissell Carpet Sweeper Co. photograph of which we produce. In connection with their celebrated line of sweepers great significance is added to the exhibit by an exact production of the famous Ferris Wheel, which flashes out the name Bissell Carpet Sweepers in more than five hundred different colored lights. Nineteen different combinations and changes are shown by this wheel. The Bissell Sweepers take the place of the cars on this wheel, and the effect is very interesting.

The Bissell Carpet Sweeper Co , who are the pioneers in their line of business, are very progressive people, and are constantly aiming to produce improvements that will lighten the labor of the housewife.

Their department of invention is one of the most important in connection with their immense plant at Grand Rapids, Mich., where their output is about one hundred and twenty-five dozen sweepers per day, with a capacity of

three thousand sweepers per day. This plant at Grand Rapids, Mich , is one of the most interesting of its kind in the world.

Their Eastern and export department is located at No. 103 Chambers Street, New York City, and their celebrated sweepers are to be found in every civilized country on the face of the globe.

Their exhibit at the Mechanics' Fair is one of the most attractive there, and the practical demonstrator in charge shows up to advantage the latest improved Bissell Sweepers, the more recent of which contain the following valuable features: "Bissell's 'Cyco' Bearings;" "Bissell's Dust Proof Axle Tubes;" "Bissell's Anti-Raveling Collector Device;" "Bissell's Reversible Bail."

In the educational department of the Bissell Carpet Sweeper Co., at this season of the year, they are very busy in catering to the little ones, and Bissell's toy sweepers have now become a household word.

"Cyco" bearings used in the Bissell Carpet Sweepers are small wheels located between the hub and rim of the carpet sweeper wheels. They make a sweeper wear longer and run much easier. They make no noise. They need no oiling. Dust proof axle tubes in this sweeper are metal tubes which extend through the sweeper case, enclosing the axle rods and thus preventing all hair, threads, ravelings, etc., from winding around them and clogging the action of the sweeper. An anti-raveling collector is a small circular concave disc, fitted at the ends of the sweeper, operating in a groove in the brush pulley to prevent all hair, threads and ravelings from winding on the ends of the brush, thus preserving the free action of the sweeper, and sparing the user a great amount of labor and annoyance. If you send your name and address to this company's Eastern department, No. 103 Chambers Street, New York, you will receive a unique booklet finely illustrated.

The Harrington & Richardson Arms Co., Worcester, Mass., have issued a bright little monograph under the title "Firearms," which speaks for itself. Bright, not only in the cheerful red of its cover, but also as to contents, which tell the whole firearm story in a few words. All the goods they manufacture are pictured and described. In a note to their friends, headed "Multum in Parvo," they say: "In presenting our catalogue for 1899 we desire to extend our thanks to the dealers who have handled our goods, and the public at large for their generous patronage, and we expect by fair dealing and reliable goods to increase the former and to supply the latter with more H. & R. revolvers this year than ever before. Our revolvers are as safe and their construction is as simple as any, and only the best material is used in their manufacture. We guarantee all goods to be in perfect working order and well finished when they leave our factory. We will replace, without charge, any parts which may prove defective in actual use, when such parts are returned to us, with explanations, and have not been tampered with. Our system of inspection warrants our doing this. Our make of revolvers is for sale by the leading dealers in firearms, sporting goods and Hardware. When your dealer does not carry them and will not get them for you, write us and we will put you in the way to get them at satisfactory prices. Catalogue sent to any address upon application."

The "Round Oak Guards" is the title of a stirring march which reaches us, with the compliments of the P.D. Beckwith stove establishment, of Dowagiac, Mich. It shows that they not only make good stoves up in the great North west, but know how to set them to music.

Spalding's New Method of Distributing Goods.

A. G. Spalding & Bros. have announced a very radical change in their mode of distributing their celebrated and well-known line of athletic and sporting goods, which will not only interest retailers of this particular line of goods, but the whole mercantile and manufacturing world.

Heretofore they have depended largely on the regular jobbing trade to distribute their goods, but now they boldly announce their determination of going direct to the retail dealer and not selling the jobber at all for jobbing purposes. In other words, they will aim to reach the consumer through the medium of the retail dealer and do away with all intermediate jobbers' profits, commissions to agents, etc., which will enable them to reduce prices to both consumers and retail dealers.

Furthermore, as a condition of purchase of Spalding's trade marked line of base ball, athletic and sporting goods, the retail dealer will be required to sell these goods at uniform and regular established prices—no more and no less—thus protecting the consumer from being overcharged, and at the same time protect the retailer in the fair profit he is justly entitled to.

A representative called on Mr. A. G. Spalding relative to this radical move, and he expressed himself somewhat as follows: "Yes, it is true that on and after January 1, 1899, the business of A. G. Spalding & Bros. will be conducted on entirely different lines than heretofore, that is, so far as the distribution of our goods is concerned. The reasons for this move and what we hope to accomplish may be stated in a few words, as follows:

"First, to satisfy the consumer, who will be able to get standard goods at fixed prices.

"Second, to insure a fair profit to the legitimate retail dealer.

"Third, to maintain the quality of Spalding's Trade Marked Goods.

"To accomplish this, it is necessary that one and the same retail price shall prevail throughout the United States—no more and no less; consequently we must require the dealer to observe these conditions.

"The retail dealer is entitled to a fair profit on his sales, but in the present demoralized condition of general merchandising, he is often prevented from making any profit at all on account of the 'price-cutting' methods adopted by a comparatively few piratical dealers, and in order to prevent these concerns from successfully carrying on their demoralizing tactics so far as our goods are concerned, we have decided to confine our business to the legitimate and responsible retail dealers, who, we believe, will appreciate the efforts we are making in their behalf to secure for them a satisfactory profit on our goods.

"There will be only two prices on our trade marked line of goods—one price to the consumer and one price to the retail dealer, regardless of quantity. The large store in the large cities ordering in large quantities will be required to pay exactly the same price as the small dealer in small towns ordering in small quantities. There will be no favorites, no rebates and no special prices or concessions made to one dealer that will not be made to another, and no dealer, no matter how large or important he may be, can obtain any of our goods from us at any price if he persists in 'cutting' the established retail prices.

"In order to successfully carry out this new method of merchandising, it is absolutely necessary that we control the source from which the dealer draws his supplies, and for this reason, and this reason only, we have found it necsary to cut off the jobber and go direct to the retail trade. It is much easier, more simple and possibly more profitable to us to sell the jobber and to depend upon him to distribute our goods, but the keen competition among jobbers prevents him from making any money on our goods, and for the same reason unrestricted retail prices prevent the retailer from making a fair profit, to which he is justly entitled; all of which reacts on the manufacturer, who is continually called upon to reduce prices, which in effect simply tends to degrade quality.

"The Eastern and Southern trade will be supplied from our New York store, the Middle West from our Chicago store, and the Rocky Mountain States from our Denver branch.

"We will put out the necessary traveling salesmen to cover the territory thoroughly, and dealers will serve their best interests by not placing any orders for base ball, athlethic and sporting goods until they have seen our new samples and prices for 1899.

"Our new catalogue will be issued early in January, and this catalogue, together with our net trade prices, will be sent, upon application only, to such dealers as may be entitled to them."—*Sporting Goods Gazette.*

Insisted on a K & F. File.

Martin Kunkel conducts a successful Hardware store in Davenport, Iowa. Some days since, he encountered an experience that has led him to the conclusion that a little fun can now and then be got out of even that prosaic occupation.

Two women entered his store one afternoon, and submitted for inspection a Kearney & Foot six-inch Slim Taper File. They wished to purchase two of this brand and style only, and would hear to nothing else.

The files were sold them, and they departed in an apparently happy frame of mind.

A few days afterwards, Mr. Kunkel was visited by the sheriff of an adjoining county. He was compelled to make the trip to the seat of that county, and tell what he knew about the sale of these files. The women had smuggled them into the jail to a couple of friends inside, who promptly filed away the bars and escaped.

The women evidently knew a good article when they saw it.

Foreign Mercantile Agency.

The Foreign Mercantile Agency, Nos. 256–257 Broadway, New York, has been established by men of reliability and experience, for the purpose of furnishing detailed information upon the nature of business and credit of merchants and others, in all foreign markets. The growing export trade of this country demands an agency of this character, and the Hardware trade especially is in need of the assistance and advice of a reliable and disinterested foreign credit agency. The management is in the hands of Ross M. Turner, who has had several years of careful and practical experience in this very field. He has associated with him other men of like character and experience, making one of the strongest combinations yet formed in connection with our foreign trade.

An exhibit of the "Perfect" Pocket Oiler will be made at booth No. 47 at the Chicago Cycle Show and booth No. 59 at the New York Show. The Perfect Oiler for 1899 is handsomer than ever. The workmanship and finish are beautiful, and manufacturers who are not giving a Perfect Oiler with their wheels, should value the good impression that is created in favor of their product, by an inexpensive, but important, sundry of this kind.

The Waterbury Brass Co., Waterbury, Conn., and No. 60 Centre Street, New York, are sending their friends a handsome wall calendar for 1899, finished in rich colors, and containing much astronomical and trade information of value. A fine picture of a canine from Newfoundland and a kid from Connecticut, add a very attractive feature.

E. S. Hulbert & Co.'s Cutlery.

E. S. Hulbert & Co., Bernardston, Mass., is one of the oldest firms in the United States engaged in the manufacture of cutlery, having been established as far back as 1846. We present herewith the portrait of the founder and a cut of one of the lines on the excellence of which their

reputation has been too long established to be disputed. With Fall River for their power, thus enabling them to run at a minimum rate of expense, they are manufacturing a class of goods the quality of which must be first-class to obtain distinction, being intended for abattoirs, butchers, packers, marketmen, hotel and restaurant chefs, grocerymen, etc., each of which class of workmen know when they have a good thing and cling to it with hooks of steel. The Hardware and house-furnishing goods dealers, who once become familiar with a brand of excellence in tools of this sort find but little temptation in being asked to try a substitute. Messrs. Hulbert & Co. have workmen in their employ who have been with them over a quarter of a century, thus possessing an experience and skill that make them invaluable in the production of a reputable product; manufacturing the blades from the best quality of English double shear steel, every one of which being hammer forged, is guaranteed in all respects. Among the knives now included in the assortment manufactured by E. S. Hulbert & Co. may be mentioned the following: Butcher, cimeter steak; regular steak; sticking, skinning, boning, pork, splitting, ripping, Sandusky fish, Royal slicers, ham and hotel slicers, bread and carving knives; paring, cooks' cleaning knives and tinned plated cheese and butter knives; butter and lard spades and trowels. They also catalogue butchers' steels in great variety from horn to stag handles, and in length from 10-inch to 16-inch blades. Mr. Alonzo Alford, well-known in New York as the president for ten years of the

Alford & Berkele Co., and previously New York manager for E. Remington & Sons, is now associated with E. S. Hulbert & Co., having charge of the office and sales department, his long familiarity with the business making him a valuable and desirable manager for this important department.

Things are very lively in Farmer, N. Y., in this the beginning of a new year. Covert's Saddlery Works are in evidence in support of that statement. They have greatly increased capacity by adding more machinery, an electric lighting system for the entire plant, and are now working fourteen hours a day, to keep up with orders. This is an indication that a fine class of goods are making sure of a wide market.

An Old Firm in a New Place.

From the new quarters of Butts & Ordway, No. 190 High Street, Boston, we have received an artistic folder announcing that they are now settled in their new home, where they are prepared to welcome old friends and new.

Their former quarters on Atlantic Avenue were found to be inadequate to their growing business, and the present premises were built expressly for them; particular attention being paid to have every facility of the most approved design for handling stock and prompt delivery of orders.

Fort Hill Square, on which this part of High Street fronts, is the centre of the heavy Hardware district of

BUTTS & ORDWAY'S NEW HOME

Boston, and this fact was given due consideration in choosing their new location.

The firm has now in course of preparation the first of a series of artistic circulars to the trade, which will be issued monthly through the coming year. Their 1899 Bicycle Catalogue is also nearly ready for circulation. Among the souvenirs distributed by the firm during the holiday season are a neat and useful morocco-bound stamp holder and an equally useful paper wallet.

A new corporation has been organized at Rochester, N. Y., to manufacture steel baskets and measures of every description and a general line of small galvanized iron and steel novelties and household utensils. It is called the Metallic Basket Co., having bought the patents, good will and other property of the Metallic Basket Co., of Cedar Rapids, Iowa. Its specialty will be a corrugated and galvanized steel basket, light and strong, of various grades and sizes and already patented. The corrugations extend from the top to the bottom of the basket and even around the curved edge of the bottom, thus giving the basket great rigidity and strength without adding to its weight, as in the iron and steel baskets commonly made.

Cuban iron ore is about the richest in the world; from 62 to 67 per cent. pure iron, and very low in sulphur and phosphorus.—*Exchange.*

The Making of Forks.

Tubal Cain is said to have been the first agricultural tool maker, but that gentleman would doubtless stand in open-eyed amazement in the forge room of the Ashtabula Tool Co., unless, perchance, the din and racket there did so frighten him that he would gather his fig leaf garments about him and betake himself to flight. Of the thousands of Hardwaremen who are daily selling hay and manure forks and garden rakes, very many, doubtless, know as little about the different processes which they undergo in manufacture, as would Tubal. Our readers may, therefore, be interested in the following description and illustrations of the work as carried on in the shops of the above mentioned company at Ashtabula, Ohio, where the "Diamond" brand of farming tools is made.

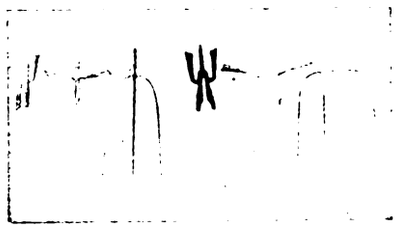

FIG. 1.

The steel comes to the factory in bars of the proper size to cut out blanks as shown in the first illustration. This cutting out is done with the steel at white heat under a heavy stamping out press, and the hot blanks or pattern is passed to a second press, where the fork to be undergoes the process of "heading" or bending the parts which are to be tines so that they can be drawn out in the rolls as shown in the second picture. The large picture shows the next process in the making of a fork, i.e., the drawing of the tines. Here the workman at the rolls and his helper perform one of the most interesting operations of the entire process. The blanks are placed in the fire (by the way, it should be explained that the fire is simply a blaze of crude petroleum which is sprayed into the furnace by air pressure), and when they have acquired a white heat the helper passes one to the roller, who at the proper moment introduces it between the swiftly moving rolls, and it immediately seems to grow in length, while three or four more passes or revolutions of the rolls, each time in a smaller groove, finishes the tine, and the pattern is returned to the helper to be placed in the fire and reheated for the drawing of another tine. The helper has meanwhile taken out a white hot pattern, and the roller takes it when he surrenders the first. So the process continues, each roller in his trick of eight hours making about eighteen hundred tines, or six hundred and three tine hay forks.

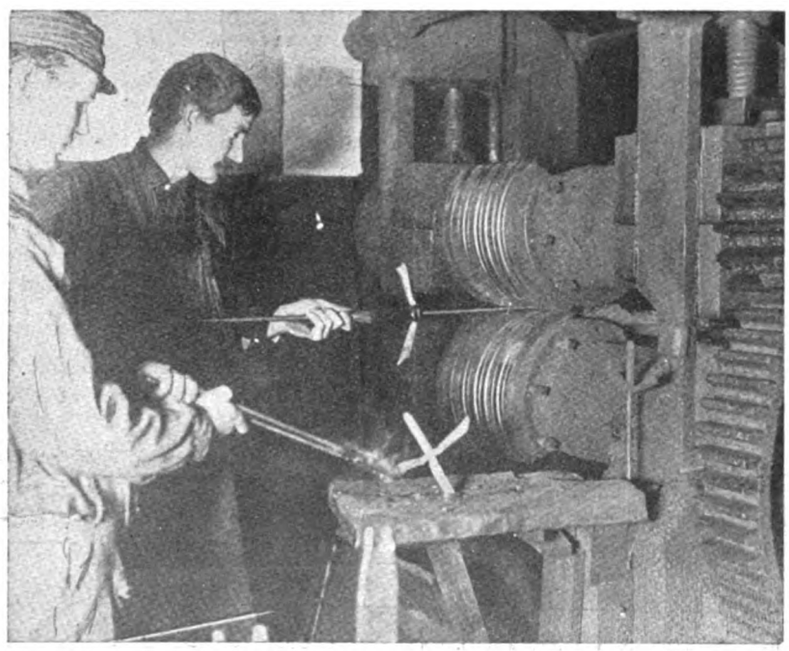

FIG. 2.

The fork is passed along next to a machine which rounds the head and straightens the tines, after the tines are cut to the proper length and pointed on a swiftly running emery belt. As each is pressed against the belt there flies from it minute particles of white hot steel dust, making for a minute a comet-like flame which illumines the shop—fading as the fork is lifted from the belt.

Now the fork undergoes its last baptism of fire and oil, as, brought to a white heat in an enclosed fire of anthracite, it is rolled quickly over a form which gives it the right dish, and quenched in an inky vat of fish oil, beneath whose surface it disappears with a spluttering flame of protest, to arise into a new life of usefulness as a tool for men.

It is not necessary to describe in detail the process of making the other three of the four parts composing a finished fork; suffice to say that the fork is introduced to the turned and seasoned white ash handle, polished ferrule and cap, by a machine which turns forth seven complete forks a minute. The final polishing and waxing of the handles, and the bronzing, painting and labeling bring the complete tool to the warehouse, where it is even now laying in store ready for shipment.

The making of a "Diamond" bow rake is very similar. The drawing of the teeth, however, is done under a trip hammer as shown in the illustration. The bows are rolled out; they are then bent around to meet and are welded together, after which the rake goes over a form which gives the teeth and shank the proper curvature. There are also four pieces in the complete rake—head, handle, ferrule and cap.

FIG. 3.

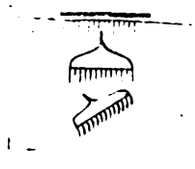

FIG. 4.

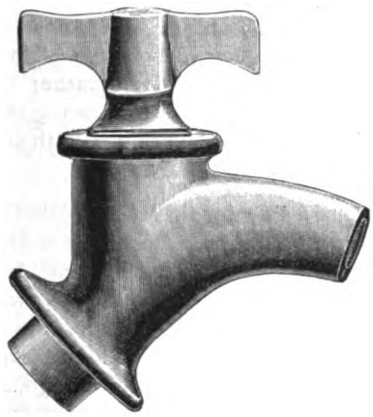
These tools are all like men, in that they have to be tested and tried to see if the temper is true, and that there are no flaws.

"Diamond" farming tools have a reputation which is nearly world-wide, and in addition to a full line of forks for handling hay, straw, manure, barley, alfalfa, bunch grass, etc., the Ashtabula Tool Co. make forks for coke, coal, ore, stone, cinders, shavings, pulp, sugar-beets, cotton-seed and vegetables.



Mention should also be made of their hoes and rakes. The "Diamond" bow rake is one of the most popular sold, while the new brace rake shown in their advertisement on page 50 is of the latest and best things of its kind, and is so well made and reasonably sold that it is a "sure winner."

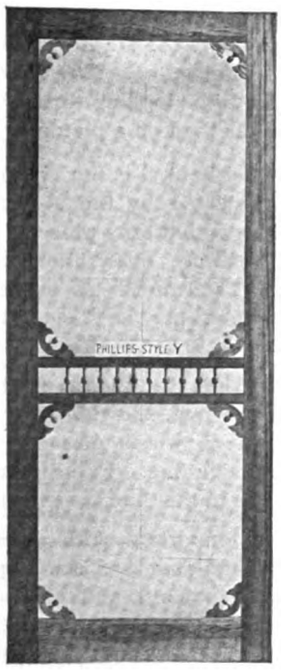
NEW GOODS AND SPECIALTIES.

A Can Faucet.

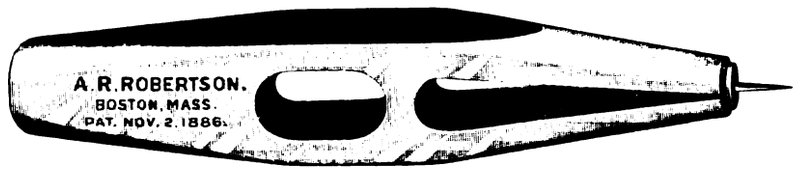


The accompanying illustration is the exact size of a 5-16 inch can faucet that is being sold in large quantities all over the world by J. M. Litchfield, No. 458 Quincy

Street, Brooklyn, N. Y. The maker says: The special feature of this article is that it is the cheapest faucet on the market, and is made like, and every bit as good, as the most costly. Its construction is simple and its appearance so neat and handsome as to cause surprise that it is "sold so cheaply." Sample and prices will be furnished free upon application to the manufacturer, at address given above.

Phillips' Y-Screen Door.

The A. J. Phillips Co., Fenton, Mich., who are always devising something new for the good of their fellow men, have added to their already extensive line the new style Y-Screen Door, shown in connection herewith. This will be made up in pine, either natural finish or painted with two coats of good paint. It will be made with either three inch or four inch stiles, and seven-eighths or one and one-



STYLE Y.

eighth inches thick. There are turned beads in the maple spindle balls, and in the turned "drops" set in each of the eight corner brackets. The makers say: "Among our new patterns for the year this design is especially pleasing, and we have many words of commendation from those who have seen it." They have patented the design.

Horseshoe Magnet Hammer.

The utility of magnetism as applied to hammers or other tools, has never, we believe, been more successfully demonstrated than in the Horseshoe Magnet Hammer invented and patented by Arthur R. Robertson, of Boston,

Mass. In this tool, magnetism has been brought to a high degree of efficiency and the horseshoe magnet made to serve a most useful purpose. This hammer is deservedly popular among bill-posters and traveling advertisers, "who can do more rapid and effective work with it than with any other implement ever devised for tacking up advertising cards and signs." The long plain and sectional handles also made by Mr. Robertson are, in their way, equal in quality to the hammer, and help to make the tool complete for the purpose for which it was originally devised. Springs are affixed to the long handles to assist in raising a card to the desired position and setting the first tack. While the advertiser is especially benefited by this invention, the hammer is also useful to the upholsterer, casket trimmer, and the makers of wire screens, fruit boxes, etc. The patent covering this hammer secures to the inventor the sole right to make hammers of any size and shape embodying the principle of the horseshoe magnet. We present a cut showing the full size and shape of a regular hammer head weighing five ounces. Price lists can be had by addressing A. R. Robertson, No. 185 Summer Street, Boston, Mass.

The Berlin Iron Bridge Co., East Berlin, Conn., are erecting for the Waterbury Mfg. Co., Waterbury, Conn., a new blacksmith shop two stories high. The building is to be of fireproof construction throughout. The floor consists of concrete on corrugated iron arches, carried by steel beams and columns. The roof has steel trusses supporting the covering of corrugated iron lined with the Berlin Iron Bridge Co.'s patent anti-condensation lining. The building is about forty feet square.

Copper in Cuba is abundant, and copper mines have been successful. One near Santiago shipped between two and three million dollars worth annually from 1828 to 1840.—*Exchange.*

Habana, Cuba, is the seat of the general government and the residence of all the administrative officers of the island, civil, military, maritime, judicial and economic.—*Exchange.*

The chief articles of import into Cuba in 1896 were beer, butter, coal, cheese, flour, lard, maize, potatoes, rice and salt fish, amounting to $14,000,000 in value.—*Exchange.*

Tommy—Paw, how did lead get its name?

Mr. Figg—They tried to make nails of it, but found that it could not be driven.—*Indianapolis Journal.*

Recent Trade Publications.

The Stanley Rule & Level Co., New Britain, Conn., and No. 107 Chambers Street, New York, under date of January 1, 1899, issue a revised discount sheet, applying to their price list of January, 1898.

Advanced quotations are given on plumbs and levels and ivory rules, but otherwise discounts remain substantially the same as previously announced. Accompanying the discount sheet sent out is a new catalogue leaf of Bailey's Adjustable Planes, having corrugated faces, and Bailey's Block Planes, having the "handy" features, forming pages 32½ and 32¾ of their catalogue, when inserted. A handy condensed price list of all the planes made by the company is furnished, printed on stiff cardboard and designed to be hung up in the tool department for ready reference in pricing and taking orders. This will be found very convenient. In a circular distributed with the above the Stanley Rule & Level Co. give their views on "expansion" in the following: "In most of the older States expansion has been the order of the day, until every progressive carpenter or other skilled wood worker must have a Stanley Rule, Bevel, Try Square and Gauge; a 'Handy' Level, with proved glasses, and a set of 'Bailey's Adjustable Planes,' with or without corrugated bottoms, before his kit of tools is at all complete. The new year promises to furnish a demand for constructive implements, rather than for destructive; and those dealers are wise who put in a good stock of Stanley's improved carpenters' tools."

The J. D. Warren Mfg. Co., Masonic Temple, Chicago, have certainly presented one of the most effective object lessons possible, in a leaflet which they have just addressed to the trade. On one page is a photographic reproduction of the old-fashioned Hardware store, showing the old-time method of presenting goods, which gave to the store the appearance of having been filled up by the after-effects of a cyclone, which caused each article to lodge wherever it happened to strike. On another page is a photograph showing the same store as it appeared thirty days later, when arranged with Warren shelving. In this latter picture, everything is as nicely housed and arranged, and as carefully put away and labeled as could be possible in the highest class of jewelry stores. Accompanying these photographs is considerable reading matter of an effective nature, showing the methods of arranging the stock according to the Warren system, and samples of the chests, drawers, etc, which are made available under this new system. Mr. Warren has certainly made most effective use ot his opportunities, and the Hardware merchant who is not influenced by this object lesson, to a greater or less degree, is so constituted that he would not be moved by a stroke of lightning.

The refrigerators manufactured by the Baldwin Refrigerator Co., of Burlington, Vt., under the title of "The Baldwin," are shown in an artistic little publication, which has just come to hand. An enumeration of the lines which have made a notable public record for this article shown on the second page, speaks in the highest terms of its quality, and this is followed by an explanation of the principles of circulation which give to the Baldwin Dry Air Refrigerator its distinctive quality. It takes quite a number of pages to illustrate and describe all of the articles made by them, from the smallest household refrigerator to that used in the grocery or the butcher shop. This catalogue will be sent to any who desire.

The Ausable Horse Nail Co., No. 10 Murray Street, New York, have sent their artist to the most striking point on New York's new Speedway, where the two great bridges, the Harlem River and the wooded hills of Washington Heights all lie under the vision—and he has proved that he is an artist indeed by making a picture full of life and color. In the centre are two fast steeds, neck-to-neck, each shod by the assistance of the Ausable Hot Forged and Hammer-Pointed Horse Nails; and this is a guarantee that no other horse on the road can pass them. This pleasing picture is a part of a handsome calendar for 1899 that the company are sending their friends.

F. E. Myers & Bro., Ashland, Ohio, have again complimented their friends in this holiday season, by sending them a handsome hanger, in rich and artistic colors, which shows, by birdseye view as it were, the large and important line of goods which they manufacture. It takes a great deal of space to do this, and it would be hard to discover anything needed in the pump line, short of an ocean liner, that they do not make in first-class shape. The upper portion of the hanger is devoted to art rather than utility, showing a Western farm scene with watering trough, where man and beast are regaling themselves with the real temperance fluid by aid of a Myers' Pump.

The Laflin & Rand Powder Co., New York, Chicago, etc., have made their calendar for 1899 striking in its suggestiveness and historical in its features. A "Jackie" from the *Oregon* is bearing upon his shoulder a bundle of ammunition that suggests good aiming and effective results, while on a shield beside him are the words: "The best men, the best munitions, gave this result—Manila, Santiago, Porto Rico." Following these words are the terse statements: "Calendar good only for the year 1899. Laflin & Rand Smokeless Powder, good always, year in and year out." The calendar makes an adornment for any office.

The Eclipse Refrigerator Works, Burlington, Vt, have sent us an illustrated catalogue, descriptive of the Eclipse Cleanable Dry Air Refrigerator, which they say possesses merit and novelty combined. The circulation and cleanable features of this article are shown both by illustration and description, the method of insulation is explained, while full description is given of the outside and interior finishes, large cooling surfaces, etc., etc. This little publication will be sent on application.

We have received from E. I. Du Pont de Nemours & Co., Wilmington, Del., one of the most attractive and handsome calendars even of this prolific year. It is in the shape of a hanger, and presents several scenes in the forest and on the mountains, where the Du Pont powders are aiding the hunter to secure his game. The coloring is very effective, and one seems to be looking through a window upon the real scene, rather than on a picture.

"The Yankee Tool Book" is the title of a very attractive monograph published by the North Bros. Mfg. Co., Philadelphia, Pa., in which they present in colors, and by illustration and reading description, their well-known "Yankee" tools. Their motto as expressed on the title page is: "Other tools are very good tools, but Yankee tools *are better*."

The Monarch Refrigerator Works, Burlington, Vt., have issued a small catalogue, showing their line of Monarch Dry Air Refrigerators, which certainly comprise a very extensive and attractive line. Full illustrated descriptions of each article made in this line are given.

Robinson & Fox, exporters, with offices in New York, Boston and Newfoundland, are sending their friends a handsome calendar, in white and blue. It is an artistic piece of work.

"Saw a man undertake to eat four pounds of sponge cake on a wager."

"Did he succeed?"

"No. When he had eaten about half of it he was compelled to throw up the sponge."—*Ohio State Journal.*

Review of the Markets.

The season opens with a confident air. Salesmen are engaged in making preparations for spring orders that they feel will be far-reaching; they will go on the warpath strong in the conviction that a good business will be the result. Little straws show a willingness on the part of the manufacturers to make advances on some special lines that have been quoted altogether too low for any profit, among which may be noted plumbs and levels, ivory rules, etc. The notice of withdrawals of quotations from Fayette R. Plumb, Inc., is also significant. The early buyer may catch the low quotations, and delays may possibly entail a more or less voluminous correspondence.

Wire Nails: Since stocktaking and the ascertaining of possible wants in the above staple, a good inquiry has existed with a view to future business, and the market is held in firm conditions, no special effort being made to obtain orders with a date for delivery in the future, only those for immediate delivery being worthy of acceptance at the present ruling rate. On a basis of this character the present price is $1.35 to jobbers in carload lots, f. o. b. Pittsburg. Single carload lots are held at an advance of 5 cents. The usual differentials for other points of delivery still obtain, Cleveland 2½ cents; Chicago, Cincinnati and Louisville 7½ cents, St. Louis 12½ cents. New York prices are quoted as follows: Carload lots on dock, $1.50; smaller lots from store, $1.60.

Cut Nails: The cut nail market does not present the encouraging prospect so noticeable with wire nails, the conservative character of its business showing no special change. While it is anticipated that a brisker demand is among the early possibilities, the New York market remains about as previously reported: Carload lots on dock, $1.25@$1.28; smaller lots from store, $1.30@$1.35.

Agateware and Specialties: Lalance & Grosjean Mfg. Co., New York, under date of January 4, 1899, reaffirm for the present quotations on their goods previously announced:

Agate Nickel-Steel Ware	40&10%
Pearl-Agate Ware	40&10%
Blue and White Ware	40&10%
White and White Ware	33⅓&10%
Peerless Ware	70%
Flint E ameled Ware	Net
Sinks	55%
Potato Friers	25%

Terms, 60 days or 2 per cent. cash 10 days.

Rubber Belting, Hose, etc.: The Boston Belting Co., Nos. 256–260 Devonshire Street, Boston, Mass., under date of January 2, 1899, make the following quotations for current business:

Belting, "Boston"	50&10%
" "Imperial," Stitched	40&5%
Hose, "Boston"	50&10%
" "Niagara"	60&10%
Packing, Rubber, "Boston"	60&5%
" S. V. "Excelsior," pure, 70 cents per pound	30&5%

Prices, subject to change without notice.

Shot: Increasing advances on lead compel the Eastern manufacturers of shot, under date of December 28, 1898, to return to prices previously prevailing, as follows:

Drop Shot, sizes smaller than B,	25	lb. bags,	$1.25	per bag;	5	lb. bags,	30c. per bag
" B and larger sizes,	"	"	1.50	"	"	"	35c. "
Buck Shot,	"	"	1.50	"	"	"	35c. "
Chilled Shot,	"	"	1.53	"	"	"	35c. "
Dust Shot,	"	"	2.00	"	"	"	50c. "

Terms—Net cash, 30 days, or 2 per cent. discount will be allowed for cash remitted within 10 days of invoice date. Discounts on ton lots as usual. Freight equalized with Philadelphia and Baltimore.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of December 29, 1898, quote as follows: In lots of less than 5 barrels, 42 cents per gallon; in lots of 5 barrels or more, 41 cents per gallon. The 5 barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

Hammers and Edge Tools: Fayette R. Plumb, Inc., Philadelphia, Pa., under date of January 2, 1899, are sending the following notice to the trade:

Owing to the recent advances in Iron, Steel, Grindstones, Fuel, Oil and other supplies, we are compelled to withdraw all outstanding quotations.

Our new discount sheet will be ready for distribution about January 10th.

Trusting to have the pleasure of receiving your future favors, we remain Yours, very truly,

FAYETTE R. PLUMB, INCORPORATED.
Fayette R. Plumb, President.

THE PITTSBURG TRADE.

Inventories have been taken, and in a few days the figures will show the result of last year's business. Whatever it may be, we look forward to the coming year as an improvement on the past. The optimist is the only business prophet tolerated at present, and certainly the signs are all on the side of good business for 1899. As is usually the case, the smaller amount of business to be had during the depression was sought for the more eagerly, and prices already low enough were cut still lower in hope of inducing orders. That time is past. Demand will be large this year, and manufacturer, jobber and retailer, each being entitled to a fair remuneration for the part he takes in the economy of business, will ask and receive a fair profit.

If there are any merchants who have been in business during the past five years who do not take advantage of the opportunity afforded them this year, experience, generally accredited as a good teacher, has had no influence on them.

Two of our prominent manufacturers, John W. Chalfant and W. Dewees Wood, have passed away within the last few days; they were both active and influential men in our community and will be missed. Both have had long and honorable careers as Pittsburg manufacturers.

Traveling men are posting up and will take the road in a few days. From applications for situations made within the past month by travelers in rival cities, we feel satisfied Pittsburg is holding her own in competition, the stocks carried and service given in quick execution of orders being appreciated by the trade.

LOGAN GREGG HARDWARE CO.

THE KANSAS CITY TRADE.

With clean shirt and collar, an annual event; shoes shined, face shaved, desk dusted, cleaned and straightened out; 1898 files all removed to the vault, with no error so far in writing it 1899, we enter upon the future which is before us, having left the past, which is behind us.

Permit us to greet one and all with sympathetic cordiality. We love our friends and admire our enemies'—nerve. We enter the new year hopefully indeed. None of us are seventh sons of any son, born with a veil or smoking jacket, hence we are not competent to venture upon prophecy.

Unless, commercially speaking, we have that "dry weather," in which it is said all signs fail, the new year at our doors will cross the portals into 1900 as the best of its past seven or eight predecessors. We are cordial enough in our sense of fellowship to embrace all our esteemed competitors in a general round of felicitations, and trust that our respective businesses may assume colossal proportions in profit, volume and satisfaction. And, so it would we think, if only our esteemed (?) competitors from Cutthroat and Giveitaway and Dontcareacuss would only exercise in their business the same common sense we try to put in ours!

But there's the rub. Perhaps they think, too, if only those infernally low-down, miserably equipped pirates and brigands down there in Kansas City would exercise the sense sufficient to tell a man to get in out of the wet, that all of us could increase our profits at least .00750 per cent. and venture upon a trip to Paris in 1900, despite the fact that the people who manufacture tin plates, screws,

Digitized by Google

shovels, coal oil, matches, porous plasters, beer, tobacco, ice cream, shirts and collars, "sox" and "crax," and so on down a line of the necessities of life, seemingly propose to gather up the earth and foreclose upon their various equities. In principle these people are "expansionists" of the radical sort. Any "expansion" of profit which our combined wealth can earn with the restrictions of competion and natural trade laws, hampered or eliminated, is perfectly justifiable so long as it is legal, and when it becomes outlawed it is still dominant through evasions which law cannot touch, and which only can be affected by a change in the moral, temporal, spiritual ethics which go to make up trade civilization.

This writer is an optimist. His convictions on questions of morals, legislation, etc., are firm, yet flexible; pronounced to a degree touching the right, as he sees it, yet anxiously willing to be freed from error. Matters of grave import come up in the details of this life, and few have more concern in them than the business interests of the world.

In the judgment of this writer, the thought of restraining by *law* that which concerns the realm of heart and mind life, the moral sensibilities, is practically a fallacy.

We can never expect a political revolution, and this involves the features of government to which I refer, until we have passed from glory unto glory, as St. Paul spoke of, up through successive moral reformations. In other words, politically, just laws are the growth of morally just conceptions.

We are the school masters of the future. We ought to know by this time that the proper age at which to commence educating our children is fully fifty years before their birth.

Shakespeare makes a character in King Lear say:

"To wilful men, the injuries that they themselves procure, must be their own schoolmasters."

The Psalmist has said that "Fools, because of their transgressions and iniquities, are afflicted."

The poet has said:

"Evil is wrought by want of thought
As well as by want of heart."

The world needs expansionists. From the tone of some of the public press you would imagine an epoch of disaster was about to confront us, and we would better give way to ignorance than to assume "imperialism." Let ravishment of mental, religious, physical, industrial attributes and acquirements under the fostering care of Spain or Russia or France or anybody on earth *except ourselves*, continue. We are not to concern ourselves with our brothers' welfare. Reason, righteousness, judgment, government—let these matters be attended to by nations farther advanced than are we. Let it be said right here that the surest road to moral darkness is through the neglect of moral convictions. A people or an individual pursuing such a course will soon be led to an admiration of their own indifferent wickedness, because the cause and effect are both relics of barbarism.

Down here in Kansas City we hear some say that for the United States to have freed a lot of "niggers' and "savages" and then to assume any moral obligation for their betterment, is a suicidal policy, and dire disaster and ruin can be the only result. Bosh! Students of history and everyday economics know better. Freeing "niggers" and "savages" may not be an exalted occupation, forsooth, since it cost us about two hundred millions to do it. What was the cost of the Rebellion? Did it pay? Could it have been done cheaper—could it have been averted?

These anti-expansionists are not deep thinkers along the line of providential dealings or events of the world's history.

They glory in Abraham Lincoln, the Republican party; they laud Grant, Sherman, *et al*, as the liberators of the slaves, the preservers of the Union. Yes, they were connected with such events just as thunder follows the frenzied course of the thunderbolt. Neither Abraham Lincoln nor the Republican party freed the negroes. It was Progress. Born with the morning stars, she has always been at work in the world, and as if only yesterday she came with moral convictions into enlightened, convicted hearts, and Liberty has three more stars to glisten in her crown. The poet who sang,

"Out of the darkness of the night, the world rolls into light,
It is daylight everywhere,"

was premature, but princely.

Not long since, a speaker in Kansas City, reviewing the events since February 15, 1898, said: "This is God's year. It was a striking thought. Men by the million may assail Progress. More millions may seek to hinder the "Coming Day;" to all such, this sentiment may be the rock on which they can defiantly hurl their anathemas, ecclesiastical, political, social, financial:

"Hammer away, ye hostile bands;
Your hammer breaks, God's anvil stands."

GILLE HARDWARE & IRON CO.

THE INDIANAPOLIS TRADE.

Our salesmen begin the year full of enthusiasm, and with the determination that they will not be outdone by their competitors in endeavoring to serve their friends, i. e., their customers, more acceptably than ever before.

Our bicycle department is receiving especial attention. While we expect to sell many low priced wheels, we anticipate a large demand for our Ben-Hur. Our opinion is based upon the idea that the rider of a low-grade wheel will not purchase a second one. Not only because he can to-day buy the best at the price of the lower grade two or three years ago, but because he realizes he was extravagant in attempting to save money in the first cost of his former purchase. VAN CAMP HARDWARE & IRON CO.

THE ST. PAUL TRADE.

The business for the year 1898 is now closed, and whatever the results are, we must accept them. If mistakes have been made, it is useless to consider them except so far as we can profit in the future by the experience gained, in trying to avoid their repetition. If success has crowned our efforts, we have already experienced the satisfaction derived from it, and can only look forward to "fresh fields to conquer."

We believe the general expression is that the past year has been a satisfactory one in its results. We believe that the general feeling now is one of hopefulness for the coming year. We have experienced so many years of weakness in prices and a continually declining market, that it is hard to realize that any other condition can exist, but certainly the indications now are that the reverse may be expected. A firm market means improvement, and an advancing market means prosperity.

C. W. HACKETT HARDWARE CO.

THE CLEVELAND TRADE.

One of the most serious difficulties that prevents successful organizations among retailers, is the unfriendly feeling among competitors. The feeling that exists in many places is a real menace to business interests. Friendship between those engaged in the same line of business, is a benefit to all.

Honorable men stoop to detestable acts against their competitors, and justify themselves with the supposition that business is war.

Anyone who has observed the effect of such action, easily sees that it is suicidal. Many men fail to secure respect for themselves in the community, because of their treatment of their competitors. Everybody understands the motive, and it results in a benefit to the one it is intended to injure.

The Canadian Tariff.

The new Canadian tariff does not appear to have affected exports from the United States to the Dominion. That measure, enacted in 1897, provided that goods entering Canada from Great Britain and her colonies should enjoy a tariff rate 25 per cent. less than that collected on goods from other countries, one-half of that reduction going into effect on August 1, 1897, and the remainder on August 1, 1898. The exportation from the United States to Canada has, therefore, since August 1, 1898, been made under whatever of disadvantage the new discriminating rates of that tariff afford. It is therefore interesting to compare the figures of the exports to Canada since that date, both with those of the corresponding months of 1897 in which only one-half of the discriminating rate was in operation, and with those of 1896 in which no discriminatiug rate existed. The figures of the Treasury Bureau of Statistics, covering the details of the export trade are now available for the months of August, September and October. They show that during those three months of 1898 in which the full 25 per cent. tariff reduction in favor of Great Britain and her colonies was in operation, exports from the United States to Canada were larger than in any corresponding three months in the history of our commerce with that country. In fact the exports from the United States to Canada have never shown more rapid gains than since the enactment of the new Canadian tariff, giving to imports from Great Britain and her colonies advantages over those from the United States.

In the first three months of its operation in 1897, in which the discrimination in favor of goods from Great Britain was but 12½ per cent., exports from the United States to Canada increased nearly $4,000,000 compared with the corresponding months of 1896, against an average gain of $2,500,000 in corresponding periods of earlier years. In August, September and October, 1898, however, which were under the full operation of the new law, the increase over the corresponding months of 1897 is more than $5,000,000. The total exports from the United States to Canada in August, September and October of the present year under whatever of disadvantage the new law in its full operation affords, are nearly 50 per cent. in excess of the corresponding months of 1896, and practically double those of the corresponding months of 1894.

"Export" English as "She is Wrote."

Manufacturers who wish to do an export business must have their circulars and catalogues translated into foreign languages, but care should be taken that the translator is not only a good linguist, but also an expert in the particular business to which the documents to be translated refer. Otherwise the translation is apt to be a matter of ridicule to those to whom it is sent. We cannot well give an instance to show how an English circular might be translated into bad German, for example, but the London *Engineer* gives us the following illustration of a translation from another language into English, which is probably no worse than many translations from English:

"We pique ourselves," says the circular, "on making you known that the sale of the ——— has, by us, undertaken. This preparated, exclusively arranged by some vegetables, is entirely spoiled about something hurtful to the steam boiler blades. By our preparated every calcareous substances in neutralized, reduced it to power, and at the same time steam boiler blades are conserved from the usual corrosion, not only, but the ebullition is totally avoided, as it appears about some very interesting experiments, which have been made in several establishments." In conclusion the circular adds: "To be willing, this preparated may be decomposed."—*Engineering News.*

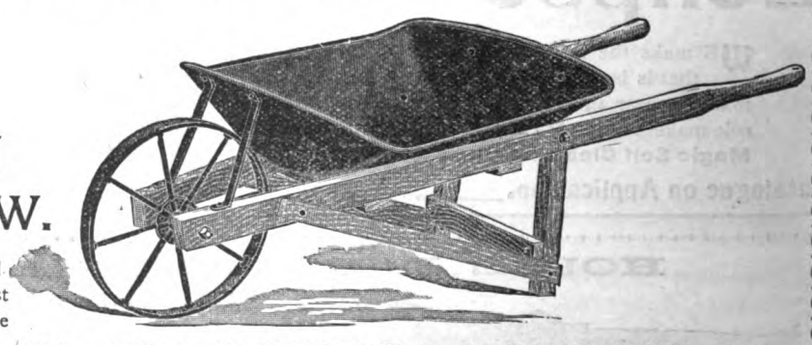
Plated Sheet Aluminum.

Wachwitz has invented a process for plating sheet aluminum, which is said to remove the difficulties heretofore connected with the working up of aluminum. Copper-plated sheet aluminum can be worked up like copper plate, and can be soldered, folded, tinned, nickel-plated, etc. The copper adheres in a thin layer on the aluminum, so, hardly any increase in weight is caused, and the coherence of the two metals is such that no separation ensues on rolling or stretching. The plating also renders the aluminum more resisting to bending, to blows and knocks. Copper-plated aluminum wires, which can be readily silvered and gilded, are likely, under the above suppositions, to gain importance in the wire industry and electrotechnics. As regards the latter, it is very important that aluminum is non-magnetic and possesses great conducting power for heat and electricity.—*Dampf.*



Trade with Cuba.

Now that the chief ports of Cuba are again open to the commerce of the United States and under conditions in which discriminations in duties and otherwise in favor of Spanish products and merchandise no longer exist, interest is revived in the new market which these conditions offer to the producers and manufacturers of the United States.

The tables prepared by the Treasury Bureau of Statistics, relating to the commerce of Cuba, are of especial interest in this connection. One of these shows the imports from Spain into Cuba by leading articles in 1893, the year of Cuba's greatest prosperity and greatest imports, and in 1896, the latest available data. The other shows the imports from the United States into Cuba in 1893, the year in which, under reciprocity, our greatest sales to that island were made, and in 1897. The imports into Cuba during the decade have ranged from 45 million dollars in 1890 upward to nearly 65 million dollars in 1893, then downward again until they nearly touched 40 million dollars in 1897, and omitting the imports for the Spanish army doubtless fell materially below those in 1898. About four-fifths of these imports were from Spain and the United States, and of that four-fifths, a little more than one-half came from Spain owing to the heavy discriminations in favor of Spanish products in the customs duties imposed at the ports.

Cutlery for the Angola market must be cheap, plain, strong goods. In English goods the handles are rounded off, while in German and French makes they are almost rectangular. In pocket knives there is a large demand for a big knife with a single blade. Articles of the best possible quality only are required. In dessert knives the only brand is that with a black handle and a blade terminating in a triangular point. Short broad-bladed sheath knives are especially intended for sale to the natives.—*Ex.*

If you sell Files

you naturally want the kind that you can guarantee will cut fastest and wear longest.

The Arcade File

is just that kind. Don't take our word for it but send your dealer a sample order, no matter how small, and if they don't cut faster and wear longer than any other, send them back.

The Arcade Files are the only files in the market with Weed's Improved Patented Increment Cut, and are made in the best equipped file works in the world. We've been making files fifty-seven years and certainly know how.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Ambler, Fla.—The Ambler Asbestos Air Cell Covering Co. has been incorporated by E. W. Phillips, H. V. Eversham, R. V. Mattison, F. J. Gast and G. R. Wallace; to manufacture heat-saving and fireproof coverings. Capital stock, $25,000.

Camden, N. J.—The Greger Mfg. Co. has been incorporated; principal office, New Jersey Corporation Guarantee & Trust Co.'s Building; to manufacture agricultural implements. Capital, $500,000. Incorporators: John S. Knight, Walter E. Maxwell, George H. B. Martin, Camden.

Clarksville, Tenn.—The Clarksville Furnace Co. has been incorporated by M. H. Smith, W. H. Bruce, C. Quarrier, W. D. Hines and others. Capital stock, $100,000.

Detroit, Mich.— Articles of association have been filed of the A. P. Wagner Tool Co., with a capital of $150,000. The plant is to be located on the Michigan Central Railroad, Townline Avenue, Springwells. The company will have its offices and warerooms in Detroit. This plant has been in operation for some years at Sidney, Ohio. It has a large established trade, extending all over the United States and foreign countries. It will manufacture a complete line of machine tools and all kinds of machinery, and will give employment to about 150 men, adding to Detroit's suburbs another large and valuable manufacturing concern. It is expected to commence building operations in a few weeks and to have the work fully completed and in operation by early spring.

Detroit, Mich.—The Detroit Fence Co. has been incorporated; to manufacture woven wire, fences, gates, etc. Authorized capital, $9500. Paid in, $9500. Incorporators: J. J. Mulkeron, R. E. Raseman, O. W. Hesselbacher, B. C. Mulkeron, Emma Raseman, Louise McDermott, Detroit.

Greenfield, Mass.—The E. F. Reece Co. has been incorporated to manufacture screw cutting tools. The officers are: E. F. Reece, president; Edward Wilbur, treasurer. Capital, $20,000.

Hartford, Conn.—A certificate of the organization of the Champion Mfg. Co. has been filed in the State secretary's office. The company is to manufacture agricultural tools at Rocky Hill. The capital is $5000 in 200 shares of $25 each, $1000 paid in. The subscribers are: F. C. Warner and Frank E. Holmes, of Rocky Hill; Milton S. Tracy, of Glastonbury, and Henry J. Cuthbert, of New York, each of whom subscribed for fifty shares.

Lima, Ohio.—The Sinclair & Morrison Co. has been incorporated by P. E. Spellacy, J. P. Kerr, D. J. Cable, W. L. Parmenter and Henry W. Neff, with $50,000 capital, to manufacture and repair all kinds of drilling machinery.

Louisville, Ky.—Chester Buneley is building an axe and hatchet handle factory at Sandy, in the heart of the timber region.

Marshall, Mich.—The Marshall Mfg. Co. has been incorporated; to manufacture Hardware specialties. Succeeds to business of W. E. Bosley & Son. Authorized capital, $5000. Paid in, $500. Incorporators: W. E. Bosley, D. W. Bosley, E. S. Harnden, Marshall.

Newark, N. J.—The International Needle Co. has filed articles of incorporation. It will manufacture needles, pins, wire and wire rod of all descriptions. The incorporators are: O. K. Story, of New York; Eugene Fountain, of Detroit, Mich.; A. T. Sweeney, of this city.

New York, N. Y.—The Bronx Granite Co. has been incorporated by F. H. E. Zimmerman, C. Zimmerman, Jr., and J. P. Powers; to manufacture plumbers' supplies. Capital stock, $10,000.

New York, N. Y.—The Manhattan Show Case Co. has been incorporated by W. F. Fiero, E. J. Reid and S. B. Ballou; to manufacture show cases and office fixtures. Capital stock, $3000.

Pittsburg, Pa.—The Cable Coin Case Co. has been incorporated by F. J. Kleber, L. P. Kleber, O. L. Kleber, C. J. Kleber and D. J. Cable; to manufacture iron and steel. Capital stock, $500.

Rochester, N. Y.—The Robeson Cutlery Co. has been incorporated; to manufacture tools and Hardware. Authorized capital, $100,000. Paid in, $80,000. Incorporators: M. F. Robeson, G. W. Robeson, C. W. Silcox, Rochester; I. S. Robeson, M. H. Olin, Perry; W. H. Tuttle, Conandaigua.

Rochester, N. Y.— The Metallic Basket Co. has been incorporated; to manufacture household and farming utensils. Authorized capital, $10,000. Paid in, $5000. Incorporators: C. C. Prescott, C. S. Lunt, S. C. Cobb, Rochester.

Washington, D. C.—Articles of incorporation of the Columbia Seal Lock Co. have been placed on record. The purpose of the company is to procure, purchase and manufacture locks and like articles and devices for use on railroads and steamboats. The capital stock is $3000, divided into sixty shares. The incorporators are: John A. Baker, Sherley Cuter and Franklin W. Brook, of New York City.

Changes and Improvements.

Cincinnati, Ohio.—The name of the Fosdick Machine Tool Co. has been changed by the court to the Fosdick-Holloway Machine Tool Co.

Cortland, N. Y.—The large addition to the immense wire mill of the Wickwire Bros. has been completed and 100 additional men and boys have been given employment.

Detroit, Mich.—The Deering Water Tube Boiler Co., increased capital stock from $2500 to $10,000.

Detroit, Mich.—The Detroit Copper & Brass Rolling Mills have increased capital stock from $500,00 to $1,000,000.

Ellwood City, Pa.—Clark Bros., chief owners of the American Lamp & Brass Co., Trenton, N. J., contemplate the removal of their Western factory from Blairsville, Pa., to this city.

Kansas City, Mo.—The Kingman-Moore Implement Co. will erect a five-story and basement addition to farm machinery works to cost about $10,000.

Leonardsville, N. Y.— A branch of the Eureka Mower Co. of Utica is soon to be established at this place. The works will be located in the shops recently conducted by H. D. Babcock.

New Castle, Pa.—A shovel factory will be located at this place, which will have a capacity of 250 dozen shovels per day.

Newark, N. Y.—The plant of the Hunt Mfg. Co. of Cato will soon be removed to this village, where it will employ over forty men in the manufacture of cream separators.

South Portland, Me.—Two additions are soon to be made to the Lovell cycle factory, one for the manufacture of revolvers, police goods, etc., and the other to hold its typewriting plant, all of which, with the work already going on, is likely to give employment to 800 or 1000 persons, including many girls.

St. Paul, Minn.—Joesting & Schilling, stove manufacturers, will erect a factory building, 50 feet wide and 100 feet long, on West side levee. When the new factory is completed they expect to employ between ten and thirty men.

Recent Embarrassments.

Cincinnati, Ohio.—Judge Rufus B. Smith has appointed John R. Holmes receiver of the property and stock of the Bucket Pump Co. on Plum Street, and required him to give a $15,000 bond.

Ottawa, Canada. — The Ottawa Steel Range Co. have made an assignment to T. W. McDermott for the benefit of their creditors.

Recent Fires.

Cincinnati, Ohio.—A fire on the third floor of the W. C. Rodgers Scale Co.'s store at No. 212 Walnut Street, has caused $500 loss.

Mechanicsburg, Ohio.—Fire has destroyed the Central Whip Co.'s works.

Taunton, Mass.—The plant of the Lincoln & Wood Co., occupying a wooden building at No. 12 Purchase Street, for the manufacture of twist drills and Hardware specialties, has been damaged by fire. The blaze originated from some oil that became ignited and spread rapidly to other parts of the building.

Miscellaneous.

Knoxville, Tenn.—At a meeting of the Plow Handle Mfg. Association of the Southern and Central States, held here, the following officers were elected for the ensuing year: President, J. W. Boring, of Johnson City, Tenn.; vice-president, Thomas C. Shaw, of Warsaw, Ind.; secretary, W. A. Rockwell, of Harriman, Tenn.; directors, G. M. Robeson, Farmville, Va.; C. C. Lincoln, Marion, Va.; W. C. Shaw, Harriman, Tenn.

Wilmington, N. C.—The Carolina Bicycle Co., damaged by fire.

Wilmington, N. C.—C. H. O'Berry, bicycle sundries, destroyed by fire; insured.

English View of American Methods.

For the difference between building machinery and manufacturing it, probably few better illustrations can be found than those afforded by the steam engine industries of Europe and the United States. American steam engines, and water-wheels, too, are turned out in quantity, like shelf Hardware, and can be bought at almost a moment's notice, much as one would buy barrels of flour, with a large range of sizes available for choice, while the preponderating rule in Great Britain and on the Continent is to build them to order and after special designs, so that there is a marked absence of uniformity of product. One reason for this variety of designs, which we do not remember having ever seen stated before, is that for British mills and factories, for example, often of venerable age, new engines, when required, must be built to fit in particular places—places previously occupied by engines of earlier, and, mayhap, historic make—and curious shapes and combinations are, therefore, made compulsory to the builder of the new outfit. Out of twenty mill engines, for example, recently ordered in the Lancashire district, only two, it was stated, were intended for new mill buildings; all the others were to replace engines of the past generations, and had to be fitted into the old quarters of these. That with such conditions there cannot well be an underlying standard of designs is obvious, and odd features of construction will, doubtless, therefore continue indefinitely. In the United States, the factory, one might almost say, is built with special reference to the engines carried in stock. Designs of extraordinary character are not often needed, nor are they wanted, and with a study of a comparatively few types one is familiar with the current steam engine practice of the country.—*Cassier's Magazine.*

Chinaman and Business.

The extract given below from a recent report sent by a British consul in China to his government throws a very favorable light upon the business integrity of the Chinese. It seems that in point of honesty in business the "heathen Chinee" compares very favorably with some of his civilized Western competitors. The consul, speaking of the Chinese business man, says: "He is as honorable in mercantile affairs as his colleagues in Christian lands. The great merchants are the soul of honor, and foreigners prefer transacting business with them. The native sometimes makes contracts with foreigners which subsequent events prove will be disastrous, yet he fulfils his part. Fraudulent failures are never known. The merchant cannot make over his property to his wife, for in the event of failure his whole family must aid in settling with the creditors. The son is responsible for the debts of his father, and vice versa; and where, as is often the case, the family estates have not been divided, but held in common, the whole family is responsible for the debts of each of its members. In China debts can hardly be classified as debts of honor and legal debts. Although all debts may not be legal, they are all, in the eyes of the Chinese, debts of honor. For a Chinese not to pay his debts is a disgrace felt so keenly that he will commit suicide rather than face the reproaches of his friends. The rich do not contract debts unless they are reasonably sure that they can pay, for in the event of failure they would lose respect, and the possibility of a suicide's grave stares them in the face. The poor do not contract debts because credit is not accorded them; they must pay cash down."

HARDWARE costs only One Dollar a year.

The

Blount Door Check

is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.

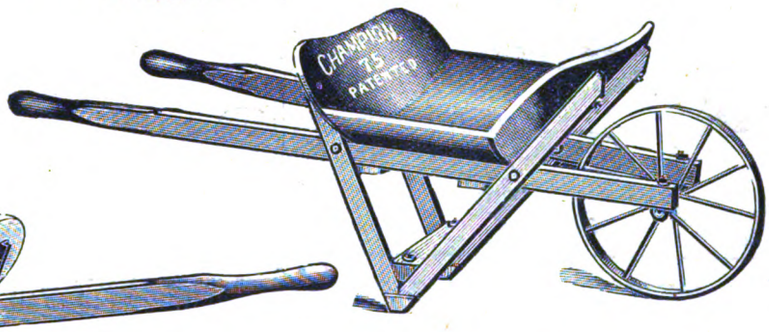
Thirty-two Years of exclusive Barrow Making should be the best evidence that the Celebrated

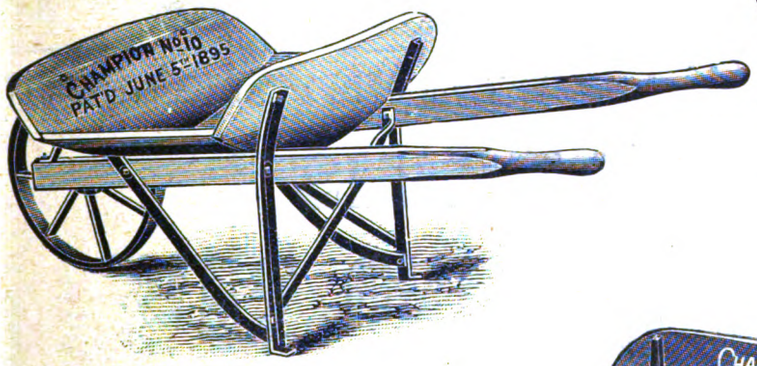
CHAMPION BARROWS

Stand Without an Equal.

The . . .



WORLD'S BEST



is our Motto, and we shall keep the line up to that high standard of perfection of . . . .

QUALITY, DURABILITY and FINISH

they have so long enjoyed.

WHY not sell a perfect, up-to-date line of barrows that cost no more than others. . . . . .

Your Time is Money.

Have your money's worth while you are about it.

Folding Steel Frame Barrows

That are NEAT AND STRONG.

It's to Your Interest to handle the **CHAMPION LINE** and have the Best. Figure with us, and you will be pleased.

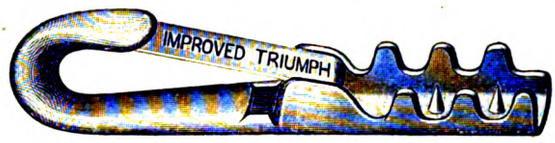
1875.

COVERT'S



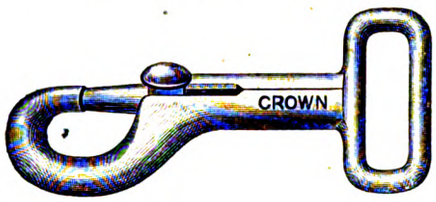
UP-TO-DATE SNAPS.

1899.

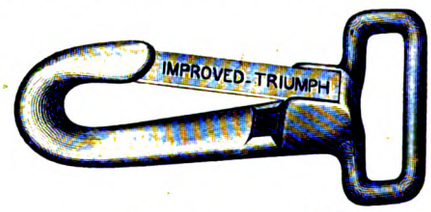
Made in sizes for 5-16, 3-8, 7-16 and 9-16 in. Rope.

Made in sizes for 1-4, 5-16, 3-8 and 1-2 in. Rope.

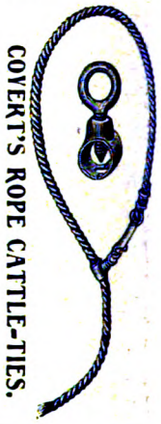
"TRIUMPH" BIT SNAP.



COVERT'S ROPE HORSE-TIES.



MINIATURE.



FARMER, NEW YORK, U. S. A.

COVERT'S ROPE CATTLE-TIES.

"THE ATKINS"

SEGMENT GROUND SAWS

14 Gauge on Tooth Edge. 16 Gauge on Ends on Back Edge. 19 Gauge at Center on Back Edge.

MADE WITH ANY TOOTH DESIRED.

These saws are ground on a **segment of a circle, the only true and practical method of grinding saws whereby a substantially uniform gauge can be given to the toothed edge, and a true segment taper imparted to the blade, from tooth edge to back edge.** By examining the engraving shown above, it will be noted that this process leaves the blades, on toothed edge, **14 GAUGE,** at both ends, and **14 GAUGE** at center. On the back edge, at both ends, **16 GAUGE,** and at center **19 GAUGE.** . . . Saws so constructed do not require as much set to the teeth. All the bearing teeth being of uniform thickness, each tooth does its share of the work, and the saw being thinner in the center of back, does not bind in the log. **Will do 25 per cent. more work without filing than other saws.**

Write for Prices. **E. C. ATKINS & CO., INDIANAPOLIS, IND.**

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

1041 Miles in Ten Hours.

WITH each returning season we show something new and desirable in bicycle construction. . . . This season finds us with more good things than ever. . . . One of these good things is the

BURWELL BALL AND ROLLER BEARING.

Examine the illustration—notice particularly that the little steel roller between the balls transfers the motion without interruption and the balls cannot grind together as in ordinary bearings.

CLEVELAND CYCLES
HONEST VALUE
CLEVELAND CYCLES

We have been running the spindles of our cup and cone grinding machines mounted in **Burwell Ball and Roller Bearings** at a speed of 35,000 turns per minute, 10 hours per day for many weeks and the bearings are ***RIGHT.*** The circumferential travel of these spindles is ***1041 Miles in Ten Hours***—a greater test for endurance than the bearing would be subjected to when used in a bicycle for an ordinary lifetime . . . Ordinary bearings under the same conditions cannot be run at more speed than 12,000 turns per minute. There is nothing "ordinary" about **Cleveland Bicycles.** Every piece of material and every hour of labor is the best money can buy. We cater to a trade that wants the best and knows the best.

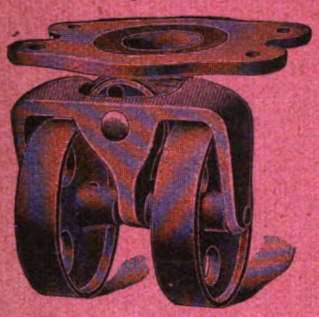
"I. X. L." SPECIALTIES.



The dealer and consumer are saved much time and trouble in handling the **I X. L.** Improved Ratchet, as it is so constructed that all the parts are held together as one piece, which avoids the losing of PAWLS, and it will not fall to pieces when the wire slackens after being adjusted to the fence. It has a quick action, positive catch and no keys to fall out.

Chain Pumps have always been in favor on account of the many advantages they have over others, and the objection to the wood curb and tubing is overcome in the I. X. L. Galvanized Steel Curb and Steel Tubing, making it the best and most beautiful pump on the market.

We especially call attention to its superiority over the old Wooden Suction and Iron Pitcher Pumps, as there are no valves to get out of order or dry out, and it will always throw a larger stream of water than any other Pump on the Market.

It Throws More Water and Pumps Easier than any other pump in existence.
It Keeps the Water Pure and Fresh.

"HERCULES CASTERS"

Are the Strongest and Best in the market, having all the advantages of other casters, and Special Features of their own, namely, a larger anti-friction wheel, being one-half the diameter of the floor wheel, which makes it revolve easier, its long stem giving sufficient side motion so as to let the floor wheels adjust themselves to uneven surfaces.

Why You Should Use the I. X. L. Galvanized Steel Tubing.

It does not make the water taste as wood tubing does.
It will not rust, being made out of No. 24 Gauge Best Galvanized Steel.
It will not rot or accumulate filth, and leaves the water clear and pure.
It is anti freezing, as the reservoir piece has a small hole in same, which allows the water to run out.
It only weighs ½ lb. to the foot, while wood tubing soaked with water weighs 6 lbs. or more per foot.
It can be used in wells as deep as 40 feet.

The I. X. L. Galvanized Steel Tubing can also be used on any make of wood curbs, as the stirrup on all other curbs will fit the square reservoir box on the Galvanized Tubing.

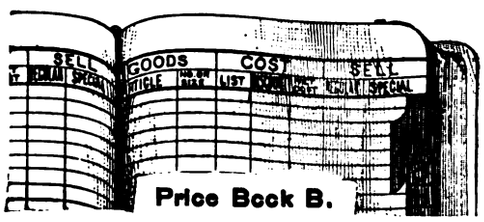
HARDWARE PRICE BOOKS.

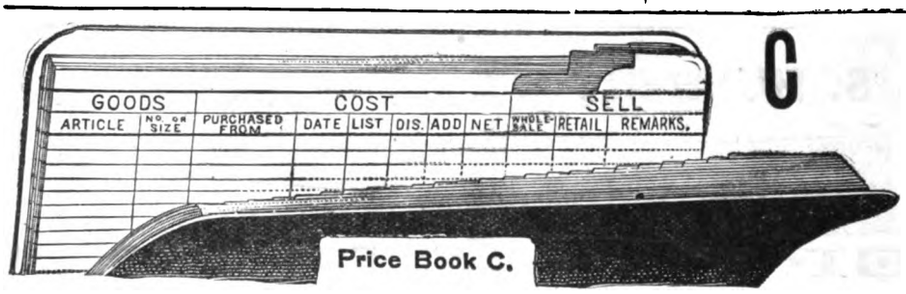
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:



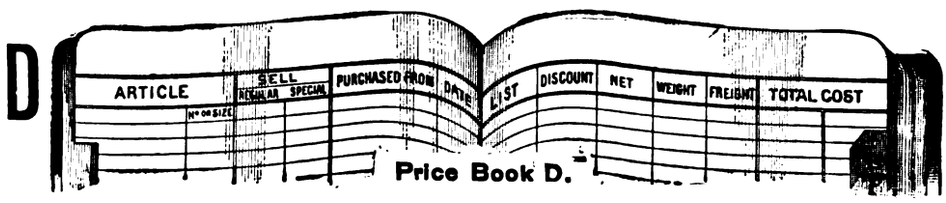
A, 200 pages,	$1.00	**A 2**, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2**, 400 pages with flap,	1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages,	$1.00	**B 2**, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2**, 400 pages with flap,	1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



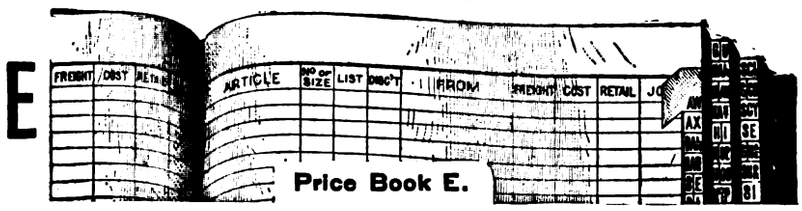
FOUR EDITIONS:

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

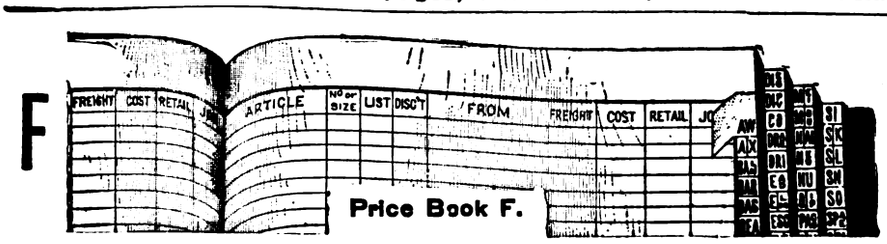
D, 200 pages,	$2.00
D F, 200 pages with flap,	2 50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to	AU	For Chisels,	turn to	CHI	For Iron,	turn to IRO
" Parers, Apple	"	PAP	" Cutlery,	"	CUT	" Irons,	" IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

HIT THE PIPE

as hard as you like with chisel or mallet and observe that the surface finished with simply one coat of our

ELASTIC IRON ENAMEL

is scarcely marred. It also withstands a high degree of heat; in truth it is as nearly indestructible as it is possible to make a varnish. For smoke-stacks, fire-place casings and stove-pipes

ELASTIC IRON ENAMEL has no equal.

The accompanying cut represents a miniature stove-pipe finished with one coat of

ELASTIC IRON ENAMEL.

We send these display pipes with dealer's orders for this specialty. Pints, half pints and quarts are its most salable packages.

HARDWARE

VOL. XVIII. JANUARY 25, 1899. NO. 8.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.

EASTERN MANAGER:
FRED A. CATON, - - 31 Milk St, Boston.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

In Honor of William W. Supplee.

The members of the National Hardware Association, and those of the Hardware Merchants' & Manufacturers' Association of Philadelphia, have shown their appreciation of a magnificent service well performed, in the testimonial banquet tendered William W. Supplee, at Philadelphia, on Wednesday evening of last week, and in the presentation of a memorial and a testimonial which, as President Bishop well expressed it in his communication, is to be looked upon not as a *measure* of appreciation and affection, but as a *token*.

Elsewhere in this issue, we reproduce in full the speeches eulogistic of Mr. Supplee, and the other exercises of that memorable evening.

In his years of service to the National Hardware Association as its first president, Mr. Supplee made for himself a record which will live forever in the memory of the trade. It is in no wise beyond the mark to say, that he is practically the foundation on which this great edifice was built, and to him more than to any other one man, is due the fact that the Hardware Jobber of to-day has become a permanent and recognized part of the Hardware trade,—to remain, we believe, as a useful and honored part of that trade. Nothing that we can add in this connection, can give extra force and meaning to the magnificent tribute of last week. That event will remain as a monument to Mr. Supplee's labors and endeavors in connection with the great work he has had in hand, and will also stand as a perpetual testimonial to the fact that the Hardware trade of this country can discern and appreciate, and remember with credit, the patriotic effort and the noble devotion of years of labor, to an object in which all had an equal interest.

Editorial Trade Review.

The business of the year has commenced in good and favorable shape. Samples have been overhauled and replenished; catalogues and close quotations have been gone over and commented upon; the travelers have laid out their routes, advance letters have been written, and every step now taken has business as the objective point, toward which the footsteps are wending in no uncertain manner.

No season in many years has opened with such an atmosphere of confidence pervading everywhere, in which the spirits are energized, hopes elevated and the hard working members of this great industry so filled with ardor for the future conquests on the lines of traffic, as to make every hustler eager for the fray and anxious to bear the heat and burden of the busy day.

Trust conditions seem in every direction to be the order of the day, and while the early purchases are stimulated by advances, apparently slight in character, they indicate only too well the character of the years' business now approaching, which will be gradually strengthened in its profit-sharing possibilities as the order books are ornamented with orders for future delivery, and the hearts of the directors are made glad by prospects of a full year's continuous industry, with definite results.

Everything so far indicates an increasing consumption; a steady and growing demand and advancing tendency toward price conditions, which it is likely will at no time this year receive a set back.

While the iron and steel producers lead the van in prosperity and volume attending recent production, the unsurpassed activity everywhere noted, and the increasing volume of traffic, affects many other important lines as well, in some of which consumption is already recorded as in excess of the productive energies so vital to prosperity.

With our extraordinary foreign trade showing the greatest balance in our favor of any period in our history, in which the relatively large demand for products of our skilled labor presents no insignificent portion; the several large items in steel rails and iron which have become important features of our foreign trade, have not advanced in price to a prohibitive degree as yet, which conditions foster a continuance of the favor shown us by foreign purchasers in making our trade balance exceed in amount every record previously established. Especially as it is noted from abroad the price of pig iron quoted last week from Glasgow, shows a higher price than in many years past; this would indicate the strength of the iron market in parts of the world where price records were formerly established.

Other indications show conditions of prosperity that are unmistakable. Bank clearings last week reached the unparalled volume of $1,996,541,190; which is 36 per cent. in excess of the phenomenal clearings of 1893. Failures in business are materially less and show by

Digitized by Google

comparison with the same week for five previous years, the certain turn of the tide.

Death of Marcus C. Hawley.

Marcus C. Hawley died at his residence in Newtown, near Bridgeport, Conn., on Sunday, January 15, at the completion of his sixty-fifth year, having been born in Bridgeport, Conn., January 9, 1834. At fifteen years of age he entered the Hardware business already established by his father, Thomas Hawley, in 1826, and which is still in existence under the name of T. Hawley & Co. On the discovery of gold in California in 1849, Thomas Hawley established a house in San Francisco. This, the pioneer Hardware house on the Pacific Coast, began its existence in 1849 under the name of Hawley & Co., and on January 1, 1867, was succeeded by M. C. Hawley & Co., which firm on July 1, 1882, incorporated the business under the name of the Hawley Bros. Hardware Company. Mr. Hawley was the president of the company, his brother, George T. Hawley, being the vice-president and treasurer. The parent house has since established branches at Los Angeles, Cal., known as Hawley, King & Co., and at San Diego, Cal., as Todd & Hawley.

Mr. Hawley for a number of years had given his entire time in New York to the interests of his company, coming from his suburban home near Bridgeport every morning and returning in the afternoon, really passing more hours on the road than he was compelled to devote to his business. In fact, Mr. Hawley was regarded as the oldest continuous commuter on the New York & New Haven Railroad, having reached that distinction by commuting for forty-seven years. He possessed an active temperament and loved to travel.

The details of the extensive business have been left entirely in the hands of Oliver Bros., who in late years have been the New York representatives of the company, with Mr. Hawley at their elbows, thus relieving him entirely from the drudgery inseparable from the care of such extensive interests in this market.

Having always been a large purchaser of nails, the buying of this particular line in the old days usually claimed his personal attention; he was noted in having been a party to some of the largest transactions of this kind in the past that have become Hardware history. In one instance he bought up all the stocks of nails and wire to be obtained in New York city, which, in a purchase of 40,000 kegs of nails in a week, included one order alone of 25,000 kegs. Single transactions like these would, even at this date, be considered very large specifications.

As a buyer many instances might be given of his decision of character and business thoroughness, frequently giving the appearance of "plunging." One instance may be cited, where a change of terms of transportation was announced to take place the succeeding day. As he had a freight rate contract of 22 cents per 100 pounds from Worcester, Mass., to San Francisco, he immediately telegraphed to Washburn & Moen to "ship to-day all the barbed wire possible to find transportation for." On this order twenty-two carloads went forward, and as the new rate was 30 cents to Chicago, the gain by this prompt action can easily be figured.

Mr. Hawley was noted for the conscientious fidelity with which he regarded the fulfilment of every business contract. If he made an agreement to purchase a certain quantity of goods at a price ruling on the day of purchase, and a day or two later an unexpected decline affected the market, he didn't expect the manufacturer to change or modify an agreement already "signed, sealed and delivered."

As an illustration of this fidelity to honest convictions it is stated that in the days gone by, on a contract for 20,000 kegs of nails, a loss was experienced by a decline in the market of 25 to 50 cents a keg, which Mr. Hawley bore with equanimity and settled in accordance with agreement without a murmur.

He might well be called a strict constructionist, for in his active business life he was governed by the firm and stanch principles that formed the dominant virtues of the buyers of a past generation.

Recent Trade Publications.

John H. Graham & Co., No. 113 Chambers Street, New York, have just issued their special catalogue for 1899, constituting a pamphlet of forty pages, and covering the line of bicycle sundries and parts, which includes all such goods manufactured by the following firms, for whom they are sole agents: The New Departure Bell Co., the Joseph Lucas & Son Co., the Slaymaker-Barry Co., Chantrell Tool Co., G. W. Cole & Co., P. Lowentraut, Downey Bros., Glines Liquid Rubber Co. and Max Gessler. This useful catalogue covers a large assortment of the more desirable specialties for the Hardware trade to handle, from New Departure and Bristol cycle bells, pumps, etc., to lamps, locks and lubricants, holders, carriers and saddles of the associated manufacturers whose various products are found between its covers. The Hardware dealer who has not already received this pamphlet should write for one.

The W. H. Chapman Co., Middletown, Conn., Allerton-Clarke Co., No. 97 Chambers Street, New York, selling agents, have just issued a complete catalogue of the wrought and cast iron padlocks which constitute their product. It forms a handy pamphlet of ninety pages, neatly printed, and with full-size engravings of every padlock made by them, with full descriptions and list prices, printed throughout. It makes a very desirable catalogue for the traveling salesman, being of a handy size for the pocket.

The Keyser Mfg. Co., Chattanooga, Tenn., have issued a new catalogue of their new Odorless Refrigerators, which are described as "a scientific preserver of food." It is filled with information in regard to this well-known refrigerator, and the text is accompanied by numerous illustrations, among which is that of the award received by them at the Tennessee Centennial Exposition.

The Hollands Mfg. Co., Erie, Pa., manufacturers of machinists' and plumbers' tools, natural gas burners, etc., have provided for the trade a new price list, which shows their goods with prices and brief descriptions. It is well printed in two colors, and makes a neat and attractive volume.

The Ferracute Machine Co., Bridgeton, N. J., have issued, under date of December 20, 1898, "Sheet 32," which illustrates in a most attractive manner the large number of presses manufactured by them. It will certainly be a useful guide to any who are contemplating purchasing articles of this character.

The Jos. Dixon Crucible Co., Jersey City, N. J., have published a large and attractive monograph entitled "Pencils," which is illustrated in a very artistic manner, showing the various artistic and other uses to which the lead pencils manufactured by that great concern can be put. Several of the illustrations are printed in colors, and the little work is certainly an attractive guide to those interested in the pencil question.

We have received from the National Cycle Mfg. Co., of Bay City, Mich., a catalogue illustrating and describing the National bicycles manufactured by them.

Whipping the overloaded team is a poor way of trying to overcome the faults of a bad road.—*L. A. W. Bulletin.*

THE SALESMEN'S DEPARTMENT---VI.

PROFIT SLIPS—SALESMEN'S DEPARTMENT CORRESPONDENCE.

In looking over the orders, the manager also stamps certain orders "Profit Slips," to notify the profit clerks to leave their record slip sticking out of the mass at the top, and to turn the day's business, when through with it, over to the office boy that he may make out a profit slip which will pass through the manager's hands on to the salesman. If the profit slip shows a good margin has been made, the salesman is complimented tersely on the back of the slip. If the profit slip is not satisfactory, the manager refers to the order and tells the salesman what items caused the deficiency.

A large quantity of ammunition too often accounts for the lack of profit. Sometimes it is because the order is made up largely of heavy goods or too low a price has been made on a line of goods to influence the order where a good quantity was wanted.

Another idea which influences the manager in asking for profit slips on certain orders, is that if the larger orders sold by the salesmen show a satisfactory margin, the smaller ones will naturally take care of themselves. It is on the larger orders the salesmen are most liable to cut the margins too close. They are so anxious to please their customers and thus secure a larger portion of their patronage, that they often forget all about their employer, and overlook the cost attached to doing business.

It is not at all necessary that the salesmen's department in its correspondence with the salesmen, should assume the dignity of other departments of the house, by using lithographed letter-heads. Experience has demonstrated that the salesmen, busy men that they are, desire the absence of all formality in correspondence. They prefer a recitation of the bare facts only. In other words, they want "Salesmen's Department Letters" which are letters cut short at both ends and divided up into sections, if it pertains to more than one matter. One advantage of such a letter, is when they have read it, they can discard what they do not wish to refer to again, and thereby have a smaller accumulation of paper.

The dividing of the correspondence is especially helpful to the salesmen where a reply is expected by either party, as many words and some time can be saved by noting the reply on the same sheet. The salesmen's time is expected to be largely spent in selling goods and educating customers.

In the course of years, many dollars are saved to the house, by the use of small sheets of plain paper in salesmen's correspondence. Besides this, there is to be considered the time saved the salesmen and the amount of valuable information received by the house, for which the salesmen would not have taken the time necessary, from other duties, had a formal letter been expected in reply.

Letters from salesmen to the various departments in the house and also any replies to letters from different departments, should be sent simply folded in the envelopes which the salesmen send to the house each day containing their orders. Even the postage on the paper wasted in a few letters a day back and forth between the salesmen and the house, is not an unimportant item. Postage has been saved and all departments have been benefited by having the correspondence of all departments to the salesmen, pass through this department and sent to them in numbered envelopes; the keeping of the record of the destination of all such envelopes being among the duties of the office boy. The idea of having all correspondence not personal to and from the salesmen pass through this department, is not to discourage other departments from making suggestions and keeping in touch with the salesmen, nor to make the salesmen feel isolated from other departments, but that the salesmen's department may keep in close touch with both the departments and the salesmen, and support and co-operate with both along all lines. Where this is not done, the result is that salesmen are often written twice regarding the same matter, and the letters do not always agree.

CHARLES W. EMERY.
Formerly, St. Joseph, Mo.;
Now of the Van Camp Hardware & Iron Co., Indianapolis, Ind.

The Planet Mfg. Co.

The Planet Mfg. Co., No. 89 Dwight Street, Springfield, Mass., in pushing their line of Planet Leather Dust Beaters, are offering prizes for the best advertisements enumerating the good qualities of their line. This offer, which will be found in our advertising columns, should serve a double purpose. Not only will it call attention to the goods, but it should stimulate a desire among the employees of Hardware houses to excel in this important branch of every modern business—that of writing good advertising.

The unsuccessful competitor cannot help receiving benefit from the effort, inasmuch as his simple endeavor will improve him.

This company also desire to call attention to their line of feed and coal bags. These are made of the best material and possess all improvements. The firm is represented throughout the United States and for export, as follows: Wm. H. Quinn & Co., No. 103 Chambers Street, New York; Wm. E. Peck & Co., No. 100 William Street, New York, for export only; Frederick & L. M. Parker, Chicago; John C. Funck, Jr., Philadelphia; Southern Expanded Metal Co., Washington; Philip M. Gaffey, San Francisco; Geo. S. Tivy & Co., St. Louis, and R. Flaws & Son, Toronto, Can.

New Members of the Hardware Club.

The Myers Bulldozer Power Pump.

We are permitted to show in this connection the 1899 pattern of the Myers Bulldozer Power Pump, manufactured by F. E. Myers & Bro., Ashland, Ohio. This is one of their latest improved productions, and is described by the makers as "entitled to a seat in the front row in the line of unique, compact, powerful power pumps." In Fig. 1 is shown a side view, and in Fig. 2 a rear view. It is described as specially adapted to meet the requirements for a compact power pump, to be operated with a gas or gasoline engine, electric motor or belt power. In further description, the makers say: "The entire arrangement of the pump is such that it is self-contained, and the power applied to the piston in such a manner that it gives great power in forcing water against an extremely heavy pressure. The geared movement that operates the piston is the same as is familiarly known in the construction of bulldozers, and the tendency while at work under heavy pressure is such that the working parts cannot be injured, sprung or thrown out of line under the most extreme pressure. The cylinder head through which the piston operates, also carries the front guide, which is provided with a bush to take up wear. The crank shaft and pinion shaft run in parted boxes babbited, a construction that can easily be renewed in case of wear. The packing box head and the gear head are both held to the main body of the cylinder by large flanges having six strong machine bolts in each head. The entire pump is constructed so that the working parts line with the bore of the cylinder, which is utilized as the main frame and bedplate of the pump, and is made with base which carries the entire construction. The pump is self-contained and arranged so that the working parts are accessible; has a 5-inch brass lined cylinder with valve metal seats and ground bronze valves; has brass piston rod and brass packing box, large air chamber attached to pump with flange; has 5-inch stroke, 2-inch suction and discharge, is fitted with tight and loose pulley 16 inches in diameter and 3½-inch face. End box and floor hanger to support end of pulley shaft (not shown in illustration) furnished with each pump. We recommend this pump to do good service under heavy pressure. It is guaranteed to elevate water 125 feet perpendicularly, when properly piped, and not restricted, or an equivalent pressure, has a capacity of thirty gallons per minute; should be run thirty to thirty-five strokes per minute. Each pump is run and tested with water under a pressure of 125 pounds, before leaving our factory. Its compact construction, great power and wide range of work especially recommend it for general and export trade for the reason that it can be packed in smaller space than any other pump of the capacity known to the trade."

The Hardware Associations.

The meeting of the Wisconsin Retail Hardware Association, which will take place in Milwaukee on February 1st and 2nd, promises to be very interesting, and a number of papers have been prepared for presentation. The question of a national association, and also that concerning special work in the Northwest, will be taken up.

An association is being formed among the retail Hardware dealers of northern California.

The San Francisco members of the Pacific Coast Hardware and Metal Association, gave a complimentary banquet to their traveling salesmen some nights since in the rooms of the Merchants Club. Brace Hayden, president of the Association, presided.

The annual meeting of the Minnesota Hardware Dealers' Association will be held in St. Paul, Minn., on February 8th and 9th. Steps will be taken at this meeting toward the formation of a national association, the Minnesota dealers acting in conjunction with other associations.

The Iowa State Association will hold its annual meeting at Des Moines on February 8th and 9th. The membership consists now of 115 members, and a large number of others are expected to be present. A paper will be presented by the secretary of the Minnesota Retail Hardware Dealers Association, on what their Association has done for its members. Another paper will be presented on "How to drive out the range peddlers," and, "What is the best way to meet Catalogue House and Department Store competition." The second day will be devoted to a question box.

Gregg & Barrell, Standard Buildings, Joubert Street, P. O. Box 938, Johannesburg, South African Republic, desire to receive catalogues from American manufacturers with quotations of prices, f.o.b., New York City. This includes not only the Hardware line, but all kinds of goods of American manufacture. We would suggest that American manufacturers forward their catalogues immediately, and thus further the interests of the export trade.

HARDWARE costs but One Dollar per year.

A DEVELOPMENT OF THE TOOL TRADE.

To a beneficent policy of public education, this country owes much. A cursory glance at the history of nations will convince the least observant of us that the nation whose educational principles are the broadest is bound to forge to the front, even when other conditions are not equal. In our own system, which demands everything that the world's experience has taught to be best, we are perhaps inclined to be self-satisfied. Nor do we lack excuse. Already the stage of "free" and "compulsory" education has been left behind; and the effort now is, not only to see that every embryo citizen receives the elements of an education, but that every available means tending to broaden and strengthen the faculties of the pupil shall be employed.

Investigation along these lines has proven indubitably that frequently the use of what may appear to the lay mind as outside means has the most beneficial effect upon the mind of the young student. With this in view, we have had all forms of physical exercises—drill, calisthenics, gymnastics—and now the subject in hand, most frequently referred to, but wrongly, as manual training.

The latter expression, while conveying the means, does not denote the end in view. The use of tools in wood working, iron working and kindred branches, in our educational institutions, is not, as many suppose, for the purpose of teaching the pupil to make articles which may or may not be useful to him; it is not for the purpose of making him a mechanic or artisan. This is simply a detail in the scheme, the real purpose being to give him perfect control of the several functions of the body thus brought into play, and by making him master of himself in this direction, go so much further towards perfecting to its utmost possibility the intellectual structure. For in this work, not only are the hands and muscles educated and taught control, but the power of thought and calculation are equally exercised.

For the past ten years, Mrs. Quincy A. Shaw, a public-spirited woman, who has already spent over half a million dollars in introducing the kindergarten system in America, has maintained at her own expense a Teachers' Training School at No. 39 North Bennett Street, Boston. This school, under the management of Gustaf Larssen, is devoted to the training of those who are already teachers, in the use of tools as required by the Sloyd system. The term "Sloyd" is derived from the Swedish adjective "slog," meaning handy or deft; and the system, while originating in Sweden, has been adapted in all essential respects to the conditions obtaining in this country. American models taken from domestic life, and American tools, have been substituted for the Swedish; and in the latter, while the consumption is of no mean proportions at present, it promises to become a most important one in the future. The steady growth into popular favor of this educational branch is fully evi-

denced by the large number of schools to which this feature has been added. In Boston alone there are no less than twenty-three of these schools: while at the last report the number of pupils studying the Sloyd system alone in the United States was placed at twenty thousand. Besides these, are the advocates of the Russian system, which has many adherents. The limit of equipment in these schools is governed only by the purse and desire of the ruling powers. The following list of hand tools is considered to be absolutely necessary to the full course: Knife, sandpaper, splitting saw, jack plane, try-square, drill-bit, bit-brace, back saw, marking gauge, block plane, bench-hook, auger-bit, turning saw, spokeshave, brad-awl, cutting-off saw, winding sticks, firmer chisel, flat file, divider, hammer, nail set, countersink, screwdriver, smoothing plane, half-round file, cabinet scraper, bevel, veining tool, skew chisel, round file, carver's punch, centre-bit, mortise gauge, mallet, firmer gouge, compass saw, rabbet plane, firmer gouge (beveled inside), drawing knife, jointer plane, matching

Digitized by Google

plane, cabinetmaker's clamp, parting-tool, mitre-box, framing chisel, plow plane.

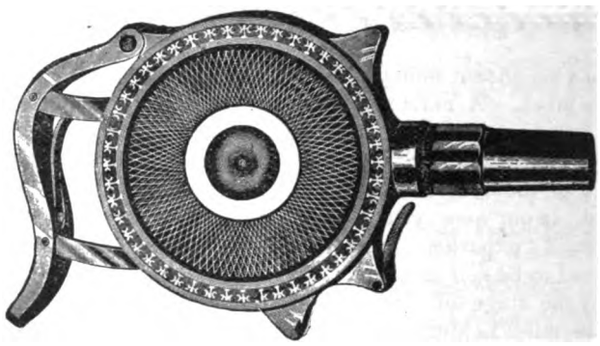
In the case of some of these tools, one will do for the use of half a dozen pupils; but in the majority of cases individual tools are required. To this equipment must be added tool-benches, grinding and oilstones for sharpening purposes, lathes for turning, and, as before stated, as much else as the appropriation will permit. The list given above numbers forty-seven tools. Approximating less than half that number—say twenty—as required per individual, would give us with twenty thousand pupils four hundred thousand tools now in use. And yet the system is in its infancy. With the millions of school children as possibilities, and the favor with which this line of education is constantly progressing, it ought in a few years to make the present number of twenty thousand look small in comparison.

The graduates of the Teachers' Training School already number one hundred and thirty, and are, as the records show, now scattered from Maine to California.

An attractive catalogue, covering the whole line of tools necessary for this purpose, is issued by the firm of Chandler & Barber, Boston, who have been quick to recognize and cater to this growing feature. Special attention is given by them to grouping sets of tools adapted to the different requirements and to the packing of these tool-chests especially designed for the purpose. FRED A. CATON.

Boston, January, 1899.

The Ames Sword Co.



It is not every line of manufacture that is surrounded with a spirit of romance, that takes one back to the days of the Crusaders or a thousand years before them. But with the making of swords one involuntarily goes back in memory to the time when the venturesome knight placed, if necessary, a goodly portion of his patrimony in his blade, upon whose absolute perfection of temper and quality so often depended his very life. It was then that cunning artificers of Toledo gained a world-wide reputation for their handiwork, until a Toledo blade became a synonym for a perfect one.

And even to-day, when the sword is for the most part turned into a pruning-hook, and ranks second to the pen and the typewriter, this glamour of sentiment is not wholly

removed. A representative of *Hardware*, in visiting the Ames Sword Co., of Chicopee, Mass., was shown a large display case covering the entire side of a large room in which were displayed one thousand different samples of swords, ranging from the regulation non-commissioned officers, to the handsome gold-mounted presentation sword, with chased and hand-carved belt and scabbard, and ornaments of solid gold and silver. The prices were as wide of range as the quality; running from six dollars for the plain regulation, to five hundred for a presentation weapon.

As an instance of the work entailed in the latter, the sword recently given to Capt. Dyer, of the Brooklyn, may be quoted. The blade of this handsome gift required to be reduced in size, and it took one man ten days of con-

stant filing to eat away the necessary amount of the hardened metal.

Besides making blades for the purposes of war, this company produce those needed for Masonic and other society orders, as well as the metal trimmings and accoutrements for all uniforms.

Another branch of their production is that of bicycle front and rear forks, rear stays, handle bars, seat posts, bicycle revolvers, bicycle padlocks, and a specialty of endless silk sewed polishing belts. All of these lines are being pushed for 1899, and correspondence is solicited. Prices will be cheerfully furnished on application.

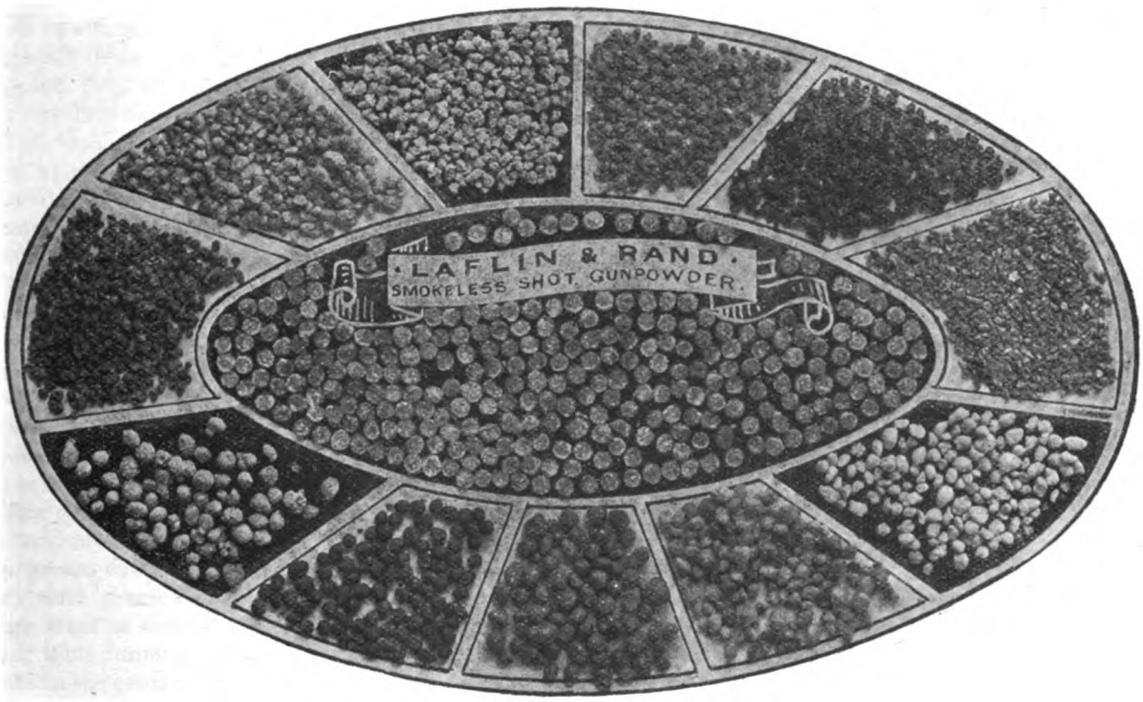
The Ferracute Co. Up to Date.

The Ferracute Machine Co., manufacturers of presses and dies, Bridgeton, N. J., are constantly watching the Hardware trade, and wherever they see any articles which are now cast, and which could be produced to good advantage in sheet metals, they take up the matter and invent suitable presses and dies for the work. They have recently turned out some very interesting samples of work in their machinery, in the way of door knobs, which are formed from sheet metal, at three operations complete. The door knob is made in two halves, and the halves are forced together in dies so closely that they look like one piece of metal when finished, and can scarcely be distinguished from the cast door knobs, while they are spoken of as "cheaper, lighter and better in every way." They have also succeeded in drawing the knobs with the stems in one piece with the bottom of the knob, instead of going to the expense of inserting separate stems.

They make a very large variety of presses, dies and other machinery, which are described in their new circulars recently issued.

An Irish priest had labored hard with one of his flock to induce him to give up whiskey. "I tell you, Michael," said the priest, "whiskey is your worst enemy, and you should keep as far away from it as you can." "Me enemy, is it, Father?" responded Michael, "and it was your reverence's self that was tellin' us in the pulpit only last Sunday to love our enemies?" "So I was, Michael," rejoined the priest, "but I didn't tell you to swallow them."—*Exchange.*

It is figured that in 1884, according to the *Wall Street Journal*, the total investment in electrical appliances throughout the United States did not aggregate much over $1,000,000, while to-day the capitalization of all the electrical concerns of the country is fully $1,900,000,000.



The modern girl don't need a beau
To take her where she'd like,
For now she paddles her own canoe
Since she's learned to pedal a bike.

THE AGE OF SMOKELESS POWDER.

From a beautifully illustrated and extremely interesting booklet on the subject, we make the following extract, having reference to the Smokeless Powder manufactured by the Laflin & Rand Powder Co.:

Since the first appearance of the so-called "Smokeless" (Nitro) Powders a few years ago, the attention of powder makers as well as consumers, has been attracted more and more to explosive agents which seem to offer for sporting and military purposes pronounced advantages over the old and well-known black powder. Possessing in the "Orange" a very popular black powder, the Laflin & Rand Powder Co. has been ambitious to produce also, an equally popular smokeless powder. The erection a few years ago of the Pompton Mills, one of the most complete plants to be found in the industry, is claimed as evidence of the belief held by the company that this ambition has been realized.

The especial qualities sought for in smokeless powder are:

First—Safety in handling and in use.

Second—High velocities, great penetration and slight recoil, accomplishing these results by the use of a compound having greater force than black powder, but regulated so as to burn more slowly, and consequently to impart greater energy to the projectile on leaving the muzzle of the gun. The products of combustion in smokeless powder are all gaseous, while only about 43 per cent. are gaseous in black powder.

Third—In shotguns, excellence of patterns, uniform distribution of pellets, with high percentage, in a given circle; in rifles and military weapons, accuracy and uniform velocities.

Fourth—Stability, to undergo no change by reason of exposure to heat, cold or dampness, or when subjected to the vicissitudes of widely differing climates.

Fifth—Uniformity, that equal charges shall give practically the same results under all circumstances.

Sixth—A maximum pressure in the chamber and bore of the gun not in excess of that produced by black powder, while giving higher velocities.

Seventh—Freedom from noxious or offensive gases, the products of combustion.

Eighth—Absence of smoke.

Ninth—Minimum of fouling in the bore of the gun.

That perfection has been attained in any of the nitro or smokeless powders, in all of the above particulars, cannot be justly claimed, but the Laflin & Rand Powder Co. claim that they present in the Laflin & Rand Smokeless for sporting and military use, one more nearly fulfilling all the conditions than any other, and one of the most satisfactory smokeless powders yet produced.

In the element of safety it is claimed to be beyond criticism. It will not explode unless confined (as in the bore of a gun.) Ignited in the air, it burns freely with a brilliant flame, but without explosive indications. Seven hundred (700) pounds in a single heap, have been set fire to at one time, in the open air, and burned away quietly without any sign of explosion. In its velocity and penetration it would be difficult to excel while the recoil, being more in the nature of a push than a blow, lacks the violence of a sudden shock, and produces no unpleasant effect, even after long continued shooting. Illustrations of a few patterns made in the usual course of testing the powder at the works, are here shown as evidence of its good performance.

It is one of the most stable of all nitro powders, being absolutely unaffected by the heat of summer or the cold of winter, by moisture or by any atmospheric conditions. It has been soaked in water over night and fired next day, after taking off the surface water with blotting paper, with the same high results as dry powder. Sportsmen who use Laflin & Rand Smokeless Powder on the coast of Florida and in humid climates, need no longer give any care to the condition of their ammunition, as they find that it shows its usual good qualities under all conditions.

It is thoroughly uniform; the careful proportioning and incorporating of the ingredients, and the special method of granulation, securing a uniformity not equailed by others. The grains are hard, but possess a certain degree of elas-

Digitized by Google

ticity, and it is almost impossible to break them up even with pestle and mortar. This ensures a clean powder and freedom from dust or small pieces, which cause unequal burning and consequent lack of uniformity in velocity and pressure.

The illustration given herewith show grains of Laflin & Rand and also of other smokeless powders, enlarged to twice natural size. By comparison, a great uniformity of the grains of the Laflin & Rand Smokeless will be readily observed.

The many advantages of dense powders must be patent to all, and though but recently introduced to the public, and within a very short time in the United States, they are rapidly gaining in favor. With the new Laflin & Rand Smokeless (dense) Powder there are the advantages of small charges, producing the highest results, non-susceptibility to moisture or dampness, uniformity, accuracy, diminished force of recoil, wonderfully good patterns, and it will not pit or corrode the barrel of the gun.

For measuring the charges, use the measures of the B.G. I. Co. (Bridgeport Gun Implement Co.), graduated in grains for this powder and which will correctly measure it. In order that the equivalent bulk may be understood by those who have been accustomed to measure in drams, it is stated that fifty grains of the new Laflin & Rand Smokeless will fill a two (2) dram measure.

In loading, use U. M. C. "Acme" or "High Base," or Winchester "Leader" ¾ base, or "Repeater" ¾ base, or other similar shells adapted for dense nitro powders. In a 10 gauge shell, load from 45 to 55 grains with 1⅛ or 1¼ ounces of shot. In a 12 gauge shell, from 37 to 45 grains, with 1⅛ or 1¼ ounces of shot. In a 16 gauge shell, from 30 to 35 grains, with 1 ounce of shot.

Wads which fit tight in the shell should be used and care taken to seat them firmly and squarely. The best results are obtained by using, over the powder: First, a "Trap," "Field" or Card Wad, then sufficient black-edge or pink-edge wads to fill the shell, leaving space for required quantity of shot, and about ⅛ to ¼ inch crimp.

The Laflin & Rand Smokeless Powder for rifles possesses all the good qualities and many of the advantages of the powders for shotguns. It has been thoroughly tested by the Government of the United States and accepted by it. It is now being used in the U. S. .30 calibre magazine rifle. The official tests have shown it to be remarkably uniform and unaffected by any climatic changes, moisture, heat or cold, and with keeping qualities equal to any powder, black or nitro.

The company also manufactures smokeless powders suitable for .22, .30, .32, .38, .45 calibre and other sporting rifles, with which equally good results have been shown.

In addition to the handsome booklet from which the above was taken, the Laflin & Rand Powder Co. also publish an illustrated catalogue descriptive of Orange sporting powder, blasting and mining powder, high explosives, electric blasting apparatus and blasting supplies, method of blasting by electricity, etc., which may be obtained at any of the offices or agencies of the company, where, also, information on the subject of explosives will be cheerfully given, prices quoted and orders received.

A complete descriptive catalogue, profusely illustrated, is also published in the Spanish language, for use in Central and South American countries.

The new Laflin & Rand Smokeless Powder for shotguns, which is now produced for the first time, is a dense powder; that is to say, it requires a less quantity by either measure or weight, to obtain high velocities than do some smokeless powders which load "bulk for bulk" with black powder. This will be more readily understood when it is explained that forty grains will do more work than eighty grains of black powder. It is, of course, dangerous to use excessive charges, as it is with any other powder, and it must be remembered that a full charge occupies only about one-half the space required for black or bulk-loading powders. Under no circumstances should a heavier charge than forty-five grains, by weight, be used in a twelve gauge gun. This is all that is necessary to obtain good results, and more will cause poorer patterns without giving any increase in velocity or penetration.

The Waterbury Farrel Foundry & Machine Co., Waterbury, Conn., have published a little volume entitled "Machinery Miniatures," the purpose of which is described as calling attention to a few of the sheet-metal working machines, shown more fully in their catalogues. Some sixty of these articles are illustrated and described.

The man who sits behind the car door and hence is in the best position to shut it, seldom does so because he doesn't feel the draught.—*L. A. W. Bulletin.*

IN HONOR OF WILLIAM W. SUPPLEE.

At the fourth annual convention of the National Hardware Association, held in Milwaukee, Wis., in November last, it was the universal wish of the members that some action should be taken in recognition of the eminent services rendered by William W. Supplee, of Philadelphia, who had acceptably and ably filled the office of president, from the beginning of the Association.

This action was crystallized in the appointment of a committee especially charged with the drafting of a suitable memorial expressive of this feeling, and the selection of a suitable testimonial to accompany the same. The committee appointed for the accomplishment of this pleasant task consisted of George J. Laighton, New York, chairman; Alfred D. Clinch, New York; Charles H. Turner, Albany, and John R. Griffith, Philadelphia.

As the time approached for the annual meeting of the Hardware Merchants & Manufacturers' Association of Philadelphia, it occurred to the gentlemen having that Association in official charge that it would be a pleasant and appropriate thing to give their annual dinner in honor of Mr. Supplee, thus affording an opportunity for the committee to carry into action the will of the National Association.

The idea, once suggested, was taken up with enthusiasm, and arrangements were made for an occasion which proved itself to be one of the most entertaining and interesting of any of the many Hardware gatherings which have occurred in this country during the past years.

This complimentary dinner was given at the Union League, Philadelphia, on the evening of Wednesday, January 18. About a hundred and twenty gentlemen were present, comprising in their numbers not only the members of the local association, but visitors from other points. An admirable programme had been arranged, and the exercises as previously arranged were carried to a very successful termination.

The gentlemen gathered at the Union League at six P. M., and the dinner was announced at about seven P. M. As the guests entered the main dining room of the League they were greeted with a scene of beauty, there being two large circular tables set at each end of the room, with a third table running lengthwise from the centre of the one table to the centre of the other, making a very harmonious and artistic arrangement and bringing the entire audience into view from the guest table, which occupied the further end of the room. The tables were elegantly decorated with flowers, with nature's green hangings covering the central chandelier, while an orchestra in one corner of the room furnished delightful music at intervals during the entire evening. The gentlemen who were present were as follows:

Clarence E. Sharpless,
C. W. Hubbard, Jr.,
Wm. Chamberlain,
Winfield D. Walkley,
Thaddeus Smith,
S. Hudson Kinney,
Edwin Gilbert,
James B. Wilson,
J. H. Van Newkirk,
David H. Reddie,
R. R. Williams,
James H. Kennedy,
Geo. E. Bartol,
A. D. Clinch,
T. James Fernley,
Samuel B. Huey,
David S. Cann,
Geo. E. Saul,
Chas. B. Adamson,
Rob't W. Mallon,
Samuel A. Bigelow,
Emil P. Albrecht,
Geo. Reuter, Jr.,
L. H. Pease,
W. H. Stubbs,
Louis V. Wolf,
A. A. Rogers,
Clarke Merchant,
Wm. C. Peters,
Henry Barnett,
Alfred W. Barnett,
Geo. F. Barnett,
Henry W. Scattergood,
Henry J. Gosling,
Tom Almgill,
Fayette R. Plumb,
Nathan A. Taylor,
S. G. North,
Ralph H. North,
J. L. B. Holme,
A. C. Albrecht,
Joseph B. Weed,
Paul A. Griffith,
John R. Griffith,
Edw. E. Perry,
T. B. Hendrickson,
Harry S. Hendrickson,
Daniel W. Hertzog,
John Braun, Sr.,
E. K. Tryon, Jr.
Edw. B. Mears, Jr.,
Evan D. Chandler,
Chas. Z. Tryon,

Edw. Darby, Sr.,
Edwin S. Rowland.
Rush Rowland,
Samuel Disston,
Rob't J. Johnson,
Harry C. Disston,
Jacob M. Vogdes,
Edw. L. Hand,
Elmer E. Brown, M. D.
Nicholas A. Petry,
I. V. Rarick,
John W. Owen,
H. Beilefeldt,
W. B. Parker,
H. G. Kraft,
W. B. Munroe,
Chas. E Grange,
Chas. S. Forsyth,
Chas. W. Gause,
Chas. M. Biddle,
James H. Ritter,
Edward Knight,
William D. Supplee,
Stephen W. Tener,
N. F. Cressman,
Frank W. Huff,
Walter S. Cook,
E. W. Whitehead,
E. S. Fogg,
John Cook Brown,
James S. Bonbright,
James D. Green,
Chas. A. Huff,
A. N. Diller,
John F. Braun,
William P. M. Braun,
Joseph Clarke,
William W. Supplee,
William Waterall,
J. Wesley Supplee,
Joel J. Bailey,
Frank G. Drew,
T. Henry Asbury,
L. W. Klahr,
A. S. Kille,
J. R. Seltzer,
S. Spencer Scott,
C. M. Ghriskey,
H. C Ghriskey,
Smith Harper,
Daniel Stern,
W. C. Krider,
E. A. Scott,
James M. Bermett,
Job I. Pugh,
Wm. Hallen,
E. B. Pike.

At the centre of the main table sat James H. Ritter, the president of the Philadelphia Hardware Merchants' & Manufacturers' Association, while at his right side sat Mr. Supplee, the honored guest of the evening. The other speakers and special guests were grouped to the right and left of these gentlemen.

The subjoined elaborate menu was then discussed:

Blue Points.
Green Turtle. Fresh Kennebec Salmon, Sauce Hollandaise.
Pate of Sweetbread and Fresh Mushrooms.
Filet de Bœuf Sauce Italienne. Bermuda Potatoes.
Green Peas.
Punch.
Mallard Duck. Hominy.
Lettuce and Tomato Salad.
Camembert. Roquefort. Ices.
Cafe.
Apollinaris. Schuylkill Red Label.
Cigarettes. Delaware Brown Label. Cigars.

At each plate were souvenirs which showed the generosity of the Hardware manufacturers of Philadelphia, who gave each guest something to take home with him in remembrance of the occasion. Among these were "Yankee" screw drivers, presented by the North Bros. Mfg. Co.; files from the establishment of the McCaffrey File Co.; miniature meat axes from the establishment of Fayette R. Plumb; paper cutters and small saws from that of Henry Disston & Sons; meat cutters, coffee mills, etc., etc. from the works of the Enterprise Mfg. Co. of Pa., etc., etc. It is needless to say that each guest, on departure, resembled a small traveling Hardware store.

THE PROGRAMME.

It is appropriate here to speak of the very artistic and

Digitized by Google

elaborate programme which had been prepared for the evening. It was bound in Wedgwood blue, on the outside cover of which appeared the words:

TESTIMONIAL BANQUET

TENDERED

W. W. SUPPLEE,

BY THE

Hardware Merchants' & Manufacturers' Ass'n

OF PHILADELPHIA.

UNION LEAGUE, JANUARY 18th, 1899.

On the first page inside, was a handsome portrait of Mr. Supplee, which is reproduced in this connection.

Following the menu and programme of toasts, was a list of the committee having the entertainment in charge consisting of the following gentlemen: J. H. Van Newkirk, chairman; T. James Fernley, Henry W. Scattergood, Ellicott Fisher, Fayette R. Plumb. On the outside back cover was a portrait of the Union League Building.

The full literary programme of the evening was as follows:

Greeting, - - - - James H. Ritter.
To thee and thy company, I bid
A hearty welcome.—Shakespeare.

Our Honored Guest - - - - H. H. Bishop.
Let lips do what hands do.—Shakespeare.

Testimonial Address, - - - A. D. Clinch.
I pretended not fully to state, much less demonstrate, the truth contained in the text.—Atterbury.

Acceptance and Retrospective Remarks, - W. W. Supplee.
Easy in words thy style,
In sense, sublime.—Prior.

Song, - - - - - - John F. Braun.
Perhaps it may turn out a song;
Perhaps turn out a sermon.—Burns.

Our Trades League, - - - William Waterall.
We are forced to take sides on it, either as progressives or conservatives.—S. Thurber.

The Future of Our Country, - - - George E Bartol.
Nothing succeeds like success.—Greeley.

Song, - - - - - Supplee Quartette.
The bird does not betray the secret springs
Whence note on note his music sweetly pours.—Jones Very.

Our Manufacturers, - - - Fayette R. Plumb.
Know how sublime a thing it is
To suffer and be strong.—Longfellow.

The Relation of Our Editors to Merchants and Manufacturers, - - R. R. Williams.
I chose to write the thing I durst not speak.—Prior.

The Social Side of the Hardware Man, - James H. Kennedy.
Proper words in proper places,
Make the true definition of a style.—Swift.

Chairman Ritter called the meeting to order, at about nine o'clock. His opening speech, and his various introductions during the evening, were happy and to the point, showing that Mr. Ritter was in perfect harmony with his environment. In the course of the evening he read letters of regret from a number of gentlemen who had been invited, and who were unable to be present. Among these were R. A. Kirk, St. Paul; Brace Hayden, San Francisco; Charles H. Turner, Albany; John C. Koch, Milwaukee; Peter McCartee, president Hardware Club of New York, and R. W. Shapleigh, St. Louis.

PRESIDENT RITTER'S OPENING ADDRESS.

In calling the meeting to order, President Ritter spoke as follows:

Guests and fellow members: One of our wisest men once wrote an essay on "Compensations"—it was not a treatise on salaries—in which he made it clear that all things have their compensations—heat balances cold, rest balances labor—and, in looking at our suspense accounts, I sometimes wish that credit always balanced debt. But, as I rise tonight to the pleasant duty of giving you a heartfelt welcome to our social feast, it seems to me that in this gracious task even the Hardware business has its compensations, and Heaven knows it needs them. And, in welcoming those who are here, in fancy my voice goes farther and sends a welcome from the East to the West, from the Lakes to the Gulf, to all those absent members of our National Association who are here tonight by their delegates.

For now, laying aside the cares and rivalries of trade, and the interesting (?) results of stock taking, we meet as fellow members of our Philadelphia Association, with guests from other trade organizations, and friends from distant cities, to do honor to one of our number, Mr. Wm. W. Supplee, who, by diligence and unremitting industry, and even self-sacrifice, has made for himself an honored name in the long and distinguished roll of Philadelphia merchants.

At present there is a revival of interest in the life of one of our most noted merchants—a man who is justly called the "many sided," and for whom our University of Pennsylvania, the Pennsylvania Hospital, our Philadelphia Library and the Philosophical Society are only some of his memorials—I refer to that Philadelphian by adoption, Benjamin Franklin. In a certain part of his frank and ingenious biography, he dwells with pardonable pride on the proverb, which was taught him in his youth by his mother, "Seest thou a man diligent in his business? He shall stand before kings." Said Franklin, "I never expected to see this word of Solomon literally fulfilled, and yet I have stood before several kings, and even dined socially with one." So, as in Franklin's case, we have as our chief guest tonight one of our number, who, by his own proving of this wise saying, now comes to be honored with our well-earned praise and thanks.

To Mr. Wm. W. Sueplee I, therefore, give a special word of welcome, pausing to add only a few words which I feel sure will be almost superfluous by reason of the eloquence which is to follow me.

And, if the occasion is a rare one, what shall be said of this historic room in which so many of the noted men of our nation have been entertained, and from whose walls there gaze upon us now the inspiring faces of those typical Americans, George Washington and Ulysses S. Grant. Never shall I forget that evening several years ago, when one of our Irish members—I need hardly say it was not Mr. Supplee—moved to more than eloquence by the associations of this room, drew a picture of a barefooted boy playing in rags and poverty on the hills of Ireland—later coming to this, his adopted country, with no capital but honest hands and an industrious spirit, and then, by the advantages afforded by this fair country, rising step by step, through sheer merit, until his voice rang out clearly in this room, where the once barefooted boy at last stood a man among men, a peer among his peers. All honor to the flag which waves over a country where such progress is possible. All honor to the man, whoever he is, who, by diligence and worth, rises to preeminence among his fellows.

Among these is our guest of the evening, and, perhaps, I may pause in my greeting to say a few words in regard to Mr. Supplee's career, leaving others, who have known him longer, to relate details more fully.

Mr. Supplee made two mistakes in his life—one was being born in Norristown—I cannot tell when—perhaps he will, if you ask him. Like Benjamin Franklin, he soon saw his mistake and early came to Philadelphia where he was in business for some years. Then came his second error, for, in 1859, he left Philadelphia—this, of course, as old Philadelphians know, is always a mistake. Mr. Supplee anticipated Horace Greeley's advice and went West to what

Digitized by Google

was, at that time, the frontier town of La Crosse in Wisconsin. I do not doubt he could give us harrowing tales of Indian escapes and perilous adventures, but his natural modesty has always kept these suppressed. Soon he repented and so we forgive him, for, in 1867, he came back to Philadelphia, and entered the old business which, at that time, was known by the firm name of Conrad & Walton. Since then his life has been an open book, known and read of all men. Philadelphians know and appreciate the interest he has taken in civic affairs, freely sacrificing his own large business interests for the public good. His recent work in behalf of the Bourse is known to you all, and, if the Bourse is to realize all the worthy ideas of its projectors, such will be due to the aid of Mr. Supplee, who nobly came to its help in the hour of need, and spared neither time nor health in its behalf.

Perhaps Mr. Supplee wonders where I got some of these details of his early life, and that brings me to a story of that prince of preachers—Phillips Brooks. It seems that a friend of his had a little daughter who, in some unaccountable way, and greatly to her mother's distress, had picked up a number of naughty words which she used with shocking freedom. One day the mother appealed to Phillips Brooks for aid and so, taking the little girl on his knee, he told her he had heard very bad things about her and that she used naughty words. "Who told you?" asked the child. "Oh! a little bird told me," said Brooks. "Who told you?" repeated the child. "A little bird," said Brooks. "Oh!" replied the youngster, "it must have been one of those darned little English sparrows." Perhaps, I got my facts the same way.

But Mr. Supplee's work in the National Hardware Association is not so well known. This Association was started in 1894 and Mr. Supplee was elected its first president and held the position until his peremptory resignation last year made it necessary to elect a successor. Every business man knows the discouragements and trials of these four years—the many new problems to be faced, requiring careful and often anxious thought, the increasing detail and complexity of business and the burdens entailed by narrowing margins and increasing expenses. It has taken brave men to stand the stress and strain of their own business, but Mr. Supplee, at the call of duty, did not hesitate to assume the presidency of the National Hardware Association, and no one fully knows the amount of work which he cheerfully did in that position. Small wonder, then that our National Association should deem it fitting to take some action in testimony of his services, and among our guests to-night are their representatives who are charged to voice the feeling of its members toward Mr. Supplee and their appreciation of the work he has done.

Among the games of classic Greece, there comes to our mind that of the runners who ran their races with lighted torches. Fleet and sure-footed, they ran swiftly and straight on the course, until, through relays of graceful runners, the lighted torches went on to the goal and victory. Even so is example, and may Mr. Supplee's example spur others on to earnest effort in carrying the torch of our National Association on to a still grander future and a more glorious realization, and Mr. Supplee is fortunate in having a son, Wm. D. Supplee, who, I know, will nobly carry forward in his business the torch which his father lighted.

But Mr. Supplee's work did not end in efforts to gain a selfish advantage for his fellow jobbers—he was broad-minded enough to clearly see justice demanded manufacturers should have their due, and so the policy was early outlined that the work undertaken by the National Association was to be done in a spirit of fairness to both jobbers and manufacturers. At first, manufacturers viewed the National Association with suspicion, regarding it, in more ways than one, as a club which would be used in pounding out further advantages and concessions for jobbers only. Now this misconception is almost entirely removed. Manufacturers realize that the Association regard manufacturing interests as existing side by side with those of jobbers, and so, largely through Mr. Supplee's efforts, many of the warmest friends of the National Association are to be found among manufacturers.

And I cannot let this occasion pass without alluding to his work in our local Association, where, for two years, as president, and for many more, as an active member, his counsel and his acts have been for the common good. And what greater argument can be found for the maintenance of our local Association than the spectacle afforded to-night where we—once kept apart by jealous and envious competition—now gladly meet to honor one of our members for his efforts in behalf of all?

And, even if Mr. Supplee had not been active in public affairs—had not toiled and planned for the National Association—had not taken part in our Philadelphia Association—is it nothing that he now stands among us after forty years of successful business life? All this time his hand has been at the helm of business, and, through fair weather and foul, the good ship has kept steadily on her course, surviving all the storms and cyclones of financial disaster which have strown our commercial coasts with the wrecks of so many fair enterprises and buried amid the sands of time so many cargoes of buoyant hopes. So, now, the good ship is before us, having weathered safely all the gales and with all sails spread, still standing on her course, and may the breezes of promise, now gently fanning us, waft it and all of us to the golden sea of prosperity.

And, as Mr. Supplee now reviews the toilsome years that are gone and reflects upon their cares and responsibilities, well may he say with the poet:

Gray distance hid each shining sail;
By ruthless breezes borne from me;
And lessening, fading, faint and pale.
My ships went forth to sea.

Where misty breakers rose and fell,
I stood and sorrowed hopelessly;
For every wave had tales to tell
Of wrecks far out at sea.

To-day, a song is on my lips;
Earth seems a paradise to me;
For God is good, and lo! my ships
Are coming home from sea.

And now, gentlemen, in the name of the Hardware Merchants' & Manufacturers' Association of Philadelphia, I again bid you welcome, and to our chief guest, Mr. Wm. W. Supplee, I add my hearty congratulations and the hope that he may be favored with many years in which to reap the fruits of his labor and to enjoy the priceless possession of an honored name.

It was expected that H. H. Bishop, of Cleveland, the president of the National Hardware Association, would be present to respond to the toast, "Our Honored Guest," but much to his own regret, and that of the gentlemen present, he was unable to attend the meeting, because of important business which detained him at home. He did not feel, however, that he could let the occasion pass by without speaking in behalf of the Association of which he is the head, and he therefore forwarded the address he had prepared to Samuel A. Bigelow, of Boston, a member of the executive committee of the National Hardware Association, with a request that he should read it at the meeting. Mr. Bigelow did so, and premised the paper of Mr. Bishop by the following remarks:

"It seems appropriate that some special recognition should be had of the kindness shown by the Hardware Merchants' & Manufacturers' Association of Philadelphia, in enabling the committee of the National Hardware Association to complete the duties assigned to them in securing and presenting to William W. Supplee a suitable tes-

Digitized by Google

timonial, containing the high esteem and appreciation of his arduous and valuable labors in its behalf. It is also a high mark of honor that many manufacturers have joined to show their appreciation of the good work that has been done under Mr. Supplee's guidance, in bringing about more fraternal relations between them and their customers. He has worked faithfully and constantly for the organization he represented. and many of us who best know the severe strain upon his health, and the sacrifice of his personal interests, can most fully appreciate the feelings that must ever be present of a work well done, and an association well founded on brotherly love and business methods. Mr. Supplee has given good service, and his work has been delegated to one of his most able assistants, whose interest in the Association is known, and who will continue to build on the safe foundation so ably commenced by its first president."

At the conclusion of these remarks Mr. Bigelow read Mr. Bishop's paper, as follows:

GOOD WORDS FROM PRESIDENT BISHOP.

Is it not a great pleasure and satisfaction to you, and to all present, to consider for a moment the circumstances that make a gathering of this kind possible? Here are assembled those who are engaged in daily competition, one with the other, each endeavoring to obtain that for which his neighbor is striving, and yet retaining for one another the friendship that induces meeting around this festive board, to do honor to one of their own number, who has most signally deserved *all* honors that can be heaped upon him. You may well be proud, Mr. Supplee, of the record which makes this possible, and we, in turn, can look with hope into the future, now just dawning, to a time when the era of good feeling and brotherly affection will have reached a zenith, and its sunshine will have dissipated all the fogs and mists of doubt, penetrated into all the dark places, dried up all the pools of foul business methods, purified and cleansed the hearts and minds of those in our chosen business, so that the wholesale Hardware trade of the United States may stand before the world, an example of purity, integrity and usefulness which cannot fail to command admiration, respect and imitation.

We may, with profit and interest, recall some of the happenings of the past four years. I can well remember some of the first occurrences in connection with the formation of our organization. There were brought together many men who had never before met each other. They came from all parts of this great land and were animated by different motives in attending. Whatever may have been the motive then, they have, through their wise action at that time, in forming themselves into an association with the avowed intention of fostering and encouraging friendly relations amongst themselves, and in selecting you as their executive head, builded wiser than they knew. Like all similar bodies from the commencement of time, its existence or demise depended upon a competent pilot. Its membership at the commencement was small—only twenty-eight, if I remember rightly. Now it can claim one hundred and seventy, with others knocking at its doors, and it has the satisfaction of knowing that it embraces nearly all in the country that are entitled to membership. It has, therefore, gained the confidence and support of those directly interested, but it has done even more than this, for it has gained the respect and good will of manufacturers, as is strongly evidenced by the kindly expressions of several upon a very recent occasion. It has given to many members improvements in their methods, through the unselfishness of others, who had given these matters thought and study for years. It has raised the standard of business integrity, and, in many directions, has pressed forward to the goal of a "high standard of business methods," which you have so earnestly and persistently advocated. It has protected the interests of its weakest member as well as that of its strongest. It has pointed out ways in which its individual members could benefit themselves by following the precepts laid down. It has proven itself a welcome adviser to intelligent manufacturers, and it has carefully avoided undertaking tasks that were not within its province. In all this, yours, Mr. Supplee, has been the guiding hand, yours the mind to plan. yours the brain to think. You have given unselfishly of your time and thought. You have made personal sacrifices. You have honestly administered the trust reposed in you. You have been weighed and not found wanting. Can we do less than honor you?

It may be a source of satisfaction to you to consider a moment the possibilities of the future for this infant that you have cared for, and which you have safely brought to a point where it may stand alone. I think I see in its future only continued progress and success. The object of its creation was the promulgation of the Gospel of Friendship among business competitions. The attainment of this object must now be the care of those in whose charge it has been placed. In preaching the gospel of good tidings a wise course is pursued, by impressing it upon the mind when immature. It is absorbed as a part of the daily training and eventually becomes a fixed principle at maturity. The same course must be pursued with the gospel that we have to preach. We must work, not only for the present, but for future generations. Those of us who are to-day active men of affairs will, in time, and many of us in a short time, be relegated to obscurity and the grave. Therefore, the principles which we believe to be right, should be carefully impressed upon the minds of all connected with us, no matter in what capacity. We can gain much by making a belief in, and adherence to, the principles of the National Hardware Association, a part of the education of everyone connected with our establishments. The order boy of to-day may be the proprietor ten years hence. What better heritage can we give him than an education to a high standard of business methods? An admiration for all that is honest and upright, a contempt for dishonesty, low trickery, and actions sometimes accounted smart? May we not rightfully hope for progress in this direction?

Whatever the outcome of the future may be, Mr. Supplee, you must have a feeling of satisfaction with yourself that partially compensates for the time and thought that you have given to the service of the trade. To a high-minded man this is a greater reward than money compensation or honeyed phrases of admiration.

Our Association, however, is not willing that you should pass from the position that you have occupied so honorably for the past four years, without some slight token of appreciation of those services. A committee was appointed at Milwaukee to procure a suitable testimonial with which they desire to present you on this occasion. I trust you will accept it as intended, not as a *measure*, but as a *token* of the esteem in which you are held by your associates of many years, your competitors and yet your friends. It carries with it our belief in you as a capable, honorable, broad-minded, manly man.

MR. CLINCH MAKES THE PRESENTATION.

The chief event of the evening was next in order, when Alfred D. Clineh of New York, was introduced, and, in a few well chosen words, recounted the steps that had been taken in preparation of the testimonial address, and its accompanying gift on behalf of the National Hardware Association by the above named committee having the matter in charge.

Mr. Clinch held in his hand an album which was 12x9 inches in size, handsomely bound in seal, with gilt edges, handsomely tooled. The inside covers were lined in crimson watered silk, while a number of pages of heavy cardboard, drab in color, made up the body of the work. On the first page was a photograph of Mr. Supplee, painted in life colors, while on the three pages that followed, was the

Digitized by Google

address in old-style illuminated letters. The first of these pages contained an illuminated border of oak leaves, typifying the strength of the National Association; the next page had an illuminated portrait of mediæval arabesques, while the third page was illuminated in red, white and blue, testifying that there is strength in union, and typifying the patriotism of the members of the Association. The fourth page contained mediæval arabesques, while on the fifth were the names of the committee in autograph, with the date "January 18, 1899." The inscription upon the album was as follows:

WILLIAM W. SUPPLEE,

OF

SUPPLEE HARDWARE CO.

PHILADELPHIA, PA.

The address which Mr. Clinch read was as follows:

To William W. Supplee
Of
Supplee Hardware Company,
Philadelphia, Pennsylvania.

Sir:—A meeting of Hardware Jobbers assembled in the city of Cleveland, Ohio, on December 14, 1894, because of the strong and growing competition between themselves, intensified by the tendency of the manufacturers to sell direct to the retail dealers and consumers. At this meeting it was the unanimous opinion that the best means to correct the evils growing from these causes would be a National Hardware Association of the United States, which should embrace within its membership all Hardware jobbers in the country, and that if such a membership could be obtained, it would command the respect of all and be a strong lever in negotiating with the manufacturers.

Such an organization was formed and incorporated, and its first honors were conferred upon you by a unanimous election to the office of president. To you all had turned as the embodiment of that persistent energy, which, combined with executive ability, makes for success. You accepted the office and at once entered upon the discharge of its duties, and gave your personal attention to the various details of the large amount of work necessary during the formative period of such an Association. This work proved of an exhaustive character, but with that intense interest and good judgment so characteristic of your life, you still continued so to guide its affairs that the National Hardware Association was brought to its present position, so exalted in the estimation of all having dealings with it.

After three years of service, and against your wishes and protests, you were re-elected president in 1897, because new and important questions had arisen which called for a sound and conservative judgment. It was with deep regret that the Association learned from you at the annual convention held in Milwaukee, Wisconsin, November 16, 1898, that the pressing necessities of your business made it obligatory upon you to no longer continue its president.

The Association, desiring to testify to the love and esteem in which you are held by it, appointed a committee to present in some tangible form a testimonial which should be a token to the present and coming generations of that love and esteem which are cherished by all, but are procurable only by merit, and in the discharge of that duty the committee, in behalf of the National Hardware Association, present to you the accompanying service of silver.

The committee take advantage of, to them, the welcome opportunity offered by the duty imposed to express to you their personal sincere regard and respect.

GEORGE J. LAIGHTON, (Chairman).
CHARLES H. TURNER,
JOHN R. GRIFFITH,
ALFRED D. CLINCH,
Committee.

At the conclusion of the reading, Mr. Clinch handed the album to Mr. Supplee, while at the same time two men bore from the rear of the room a handsome case, which was opened, disclosing a magnificent silver platter, a silver tray and a large silver bowl, upon which was the following inscription:

Presented to

William W. Supplee,

by

The National Hardware Association.

President,

1894 1898.

The interest of the gentlemen present was such that they would not be satisfied until the case with its contents was borne around the room, so that each might have a personal inspection of the same. When quiet was somewhat restored, Mr. Supplee arose, and in a manner showing that he was deeply touched by the evidence which had been given of the appreciation on behalf of the Association members of his labors, voiced his thanks in the following eloquent manner:

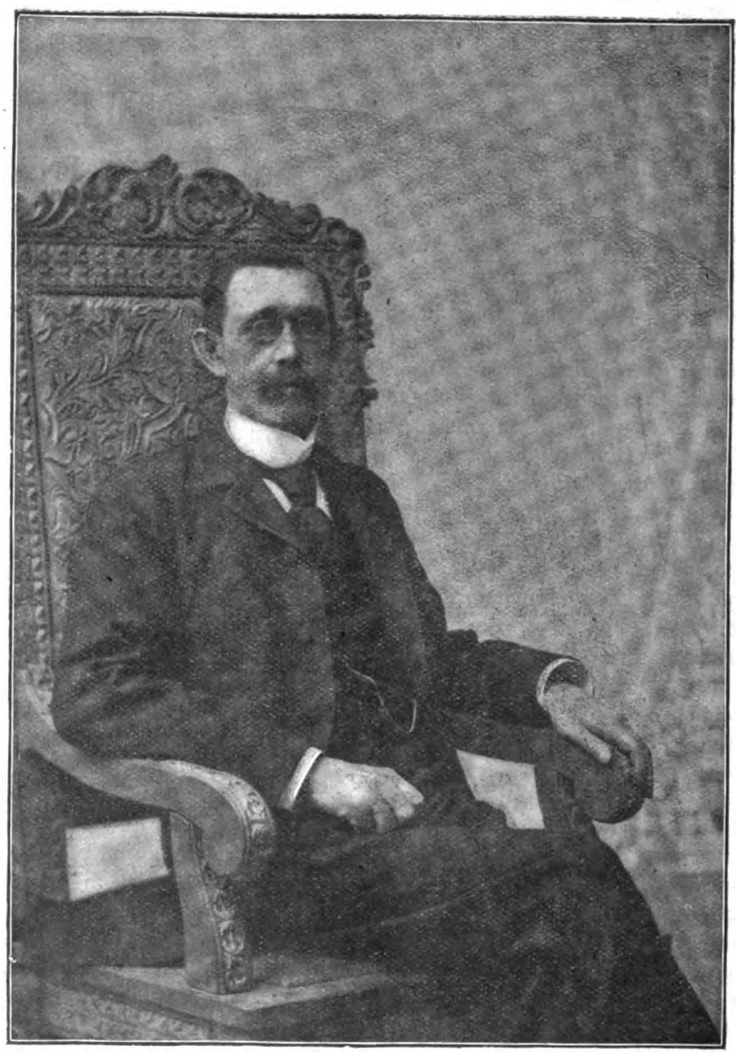
RESPONSE OF MR. SUPPLEE.

Mr. President, Gentlemen of the Hardware Merchants' & Manufacturers' Association and Guests: I thank your efficient president and toast master, Mr. Ritter, for his kind and complimentary words, and no one can regret more than myself that it has not been possible for President Bishop, of the National Hardware Association, to be present on this occasion.

This banquet, so generously tendered by members of your Association, and which you have so thoughtfully arranged to have extend beyond the limits of our members, is indeed most gratifying, and I sincerely thank you. Your gracious act of courtesy to the members of the committee from the National Hardware Association, with which my name is so indelibly connected, has given them the opportunity amidst these delightful surroundings, and in the presence of my many friends, to fulfill a mission entrusted to them of making this presentation, and places me in a position where no adjectives can be collected and arranged in a chain of thought which can express my appreciation of your combined kindness.

And, gentlemen of the committee of the National Hardware Association, I thank you for the kind words and sentiments expressed, and I appreciate the friendly motives that inspired them, and wish it were within my limited powers of oratory to respond in equally eloquent form, for you have touched a chord of intensity which in its vibrations reaches and includes all the officers and members of our association.

And, gentlemen of the committee, please say to the members of our Association that I accept this commendatory address and this exquisite and beautiful present of silver with sincere and heartfelt thanks, and further say to them that I will, through my whole life, cherish with an



Digitized by Google

intensity of feeling and appreciation this gift, as a further mark of the good-will, confidence and esteem which have always been shown me both personally and as president of the Association.

It was not without much reflection and anxiety that I accepted the position so recently vacated, and while I may not at first have realized the full extent of the responsibilities, I did realize the fact that without the cordial support and full cooperation of our members the work undertaken could never reach the beneficial results desired and expressed in the text of our constitution and by-laws, which reads as follows:

"The object of the Association shall be the promotion of more friendly business relations, and mutual confidence and good will with each other, and with manufacturers."

We found the untrodden paths of friendship tangled with a wild overgrowth of local jealousies; we found it

WILLIAM W. SUPPLEE.

necessary to unlearn the lesson that competitors in trade were necessarily enemies; we found that traditional jealousies and enmeties should be harmonized. Nor would it have been possible for your president, or any other president, to have harmonized these conflicting elements without the hearty and full cooperation of both the officers and members of the Association. In this the members have worked shoulder to shoulder together until almost the last semblance of jealousy and suspicion has been removed.

Governor Roosevelt, colonel of the Rough Riders, was called upon after his return to New York by a committee from the Rough Riders, who complimented him highly upon his bravery at the battles of El Caney, and especially on the thorny slopes of San Juan. He answered by saying it was in self-defense, for had he halted, he would have been trampled under foot by the perfect cyclone of enthusiastic followers in his regiment of Rough Riders. So the aid and support given by our members to your president and officers has spurred them forward in the noble work that was undertaken, and which our President Bishop, will continue, for I predict that in him you have found a leader who will add lustre to our Association.

The broad principles we advocate are equity, justice and liberality. We do not offer the fascinating allurements of allotments, combinations or trusts, nor have we the binding conditions which hamper individuality. Each member or firm have equal rights, equal benefits, and reserve the right to conduct their own business. We also fully recognize the right of manufacturers to establish their own prices to both the wholesale merchant and the retail dealer, and we feel that in justice to manufacturers, jobbers should maintain these established prices for an equal quantity of goods. And through this policy we have not only cemented together our members, but all liberal and progressive manufacturers are uniting in the golden links of the chain of friendship, and joining in the effort to maintain a high standard of trade ethics.

Looking back over one hundred and twenty-two years, we were a nation of three million people. The system of our liberal immigration laws during the intervening period has had the effect of bringing to our shores many millions of deserving, intelligent and capable people; these, with the descendants of all, have given us an estimated population of seventy-five millions, so to-day we have the capacity to produce, and are producing, from our varied and productive soil, and from our various manufacturing industries, far more than can possibly within ourselves be consumed. And it is eminently fitting at this time to refer to

Digitized by Google

the manufacturers' influence in aiding the nation's development, for the extent to which they have contributed to our nation's happiness, its wealth and prosperity, are of no small dimensions.

We must not overlook the fact that with this increase of population there are millions less fortunate than those engaged in agricultural pursuits, who, in order to make a united and contented people must in some way be provided with employment. That problem can only be solved through the capabilities of our manufacturers, who, during the last few years especially, with their characteristic energy, intelligence and ingenuity, have, through improved machinery, and with other modern appliances, reached results which place them as formidable and successful competitors with any nation in the world. It is a true saying that when our farmers reap the full reward of their labors, and when our iron industries are fully employed, our nation is always prosperous.

Statistics are always dry reading to the average man, and the gigantic and amazing figures during the past few years have been but flippantly read and thrown aside. They read that the excess of exports over all imports for the year 1896 was about three hundred million dollars; in 1897 we had increased this to three hundred and forty million dollars, and for the calendar year 1898, to over six hundred and fifteen million dollars!

But what does all this mean? It means that we have exported during the past year some two hundred million bushels of wheat, over two hundred millions bushels of corn, over seven million bales of cotton, and that our manufacturers have exported an average of one million dollars' worth of their products for every working day of the calendar year, making a grand total of one thousand two hundred and fifty million dollars, which is over two hundred million dollars greater than in the banner year of 1892, and far in excess of any other period in our history.

The last available census returns show that there were over five million employees engaged in manufacturing establishments. After these manufactured goods leave the factory doors or warerooms they percolate through half a million small to large trading concerns seattered all over the United States, in which it is estimated there are employed over two and a half million people, and in the language of the Queen of Sheba as she stood before Solomon in all his glory, "The half has never been told."

The past year has been a memorable one in the history of our nation, and surprising changes and startling events have taken place with kaleidoscopic rapidity.

Occasional amusing incidents are related in connection with the war. The wife of a returned soldier, embracing her husband, said: "Camp life wasn't a bit like home, was it husband dear?" "Well dearie, *the cooking was about the same*, but we didn't have any actual warfare you know.' They were then interrupted by a tramp, who entered and asked for supper. "Well, I am willing to give you something to eat," said the woman, "but it does seem to me that a great, strong, healthy man like you ought to have been fighting for his country as my dear husband was." "Well, mum, if you'd walked over this country as much as I have, and know'd how big it was, you wouldn't want to add no islands to it. I've kept out of this war on principle."

General Sherman said in his emphatic and forcible language "War is hell." I have always been willing to believe him without looking for further proof, having had no experience in either, and I find the older I grow the more inclined I am to keep out of both of them.

General George Washington, without whom our poor and feeble colonies might, perhaps, have never gained their freedom, after untold sufferings, hardships and sorrows of the six years' campaign, in his farewell address, said: "It will be worthy of a free, enlightened, and at no distant period a great nation, to give to mankind the magnanimous example of a people always guided by an exalted justice." Washington, it would appear, had a good conception of what might, indeed, has recently occurred to this nation. Nor does it follow that exact duplicates of what have been in the past must always be in the future. While history and experience are guides by which to direct our footsteps, they should not be manacles to chain us to an immovable past.

General Andrew Jackson, the hero of his day, and Thomas Jefferson, the eminent statesman, both presidents of the United States and of one political belief, ex-President Benjamin Harrison and President McKinley, differing from the first two politically, all believed that we had outgrown the swaddling clothes of thirteen States and three millions of people, and all have favored extension of territory. In fact, Mr. President and gentlemen, with the exception of England we have been the greatest colonizing nation and the greatest expansionists in the world. If this be not so, what mean these forty-four stars where but thirteen existed in the banner of liberty, the emblem of our nation, the American flag, and what mean the three million, six hundred thousand square miles of territory where three hundred and twenty-five thousand originally existed, or the two thousand, two hundred million acres of land where two hundred million originally existed?

We obtained Louisiana and Alaska by purchase, first occupied Florida by force, took California and New Mexico, including in our grasp Nevada, Utah and Arizona, as spoils of war; annexed Texas and Hawaii by joint resolution, and Porto Rico and the Philippines, which we now occupy as colonies, come to us jointly by conquest and the spoils of war. Nor was this the first time in the history of nations, that the simple reply, yes or no, has changed the map of the world.

Expansion is not imperialism. Expansion opens the doors for manufacturing and commercial outlets. Great Britain has always recognized this fact, and every opportunity finds ready response with the British Houses of Parliament, but recently the manufacturers appealed to Lord Salisbury to intercede with the United States that their commercial tradings in the Philippines might be protected. Germany kept her men-of-war at the very doors of Manila, hoping for some excuse or opportunity to gain ascendancy whereby she could secure a foothold for the purpose of commercial and manufacturing supremacy.

For many years, and through several administrations, this nation tried to avert a war with Spain; all efforts in diplomacy failed, war became inevitable. The destruction of the battleship *Maine*, through which two hundred and sixty of our brave men lost their lives, was but one of the distressing incidents in the course of events, and the three hundred millions cost of the war for the fiscal year is but one of the results. And while it is no new theme for foreign countries to both write and talk the theories of humanity, the war with Spain was the first and only one in the history of the world where a nation offered up the lives of their brave men and their hard-earned treasures solely in the interests of humanity.

In obedience to the laws of neutrality, Commodore Dewey was ordered by the Chinese Empire to leave Hong Kong. He cabled for instructions. The secretary of the navy replied as follows: "Proceed to the Philippines, take or destroy the Spanish fleet." In obedience to orders, he reached the Philippines, passed unharmed the forts of Manila Bay, and captured and destroyed thirteen Spanish men-of-war, without the loss of a single man, in less than three hours. In process of time Cervera's bottled fleet, in their effort to escape from the harbor of Santiago, were attacked by Commodore Schley with Admiral Sampson's

Digitized by Google

well ordered fleet, and destroyed the entire Spanish fleet in less than one hour.

Our army showed no less courage; they landed in Cuba with but one-fourth of the force of the Spanish soldiers on the island, and against the odds of Spain's smokeless powder, better arms, and their poisonous copper cartridges, suffering from the hot rays of a tropical sun, fought on the hills of San Juan with an inspiration of courage which gained the admiration of the world, and in forty days from the day our army landed in Cuba, compelled the surrender of Santiago, and thus that campaign passes into history challenging in comparison the battle of Waterloo, in which all of Napoleon's former reputation was annihilated. And after the fleets of the Spaniards were destroyed and the guns of Manila and Santiago had ceased fire, some ten million souls were released from perpetual bondage.

The echoes of our late Peace Jubilee are still ringing in our ears, the effects of the National anthems sung by over three thousand of our public school children, and the huzzas from the throats of a million enthusiastic people, who did honor to the heros of the navy and army, are still tingling through our veins. And while the mission of the United States was for the sake of humanity and civilization, there is no other alternative than for us to accept the responsibilities and the inexorable results which the war has brought upon us, and while citizens may at the present moment differ as to the benefit of these islands, I believe that future generations will applaud the wise diplomacy of our President and peace commissioners, who secured a treaty which takes the sovereignty from Spain and prevents the possible scramble of other nations, and enables us to exert and extend our influence and authority over one hundred and fifty thousand square miles of territory, and seven thousand straight miles to the gates of Asia, the scene of the present European contest for ascendancy for commercial purposes, all conscious of the fact that the opening of the Chinese and Eastern markets will give almost unlimited opportunities.

The average American loves bravery and brave men, and the war with Spain ended with new names in the galaxy of heroes. The names of Dewey, Schley, Sampson, Miles, Merritt, Shafter, and the always popular Major General, called the "Fighting Cock of the South," Joseph Wheeler, with many others who cannot be mentioned in these few moments, including Hobson (whose bravery was not diminished by his stolen kisses), will always stand conspicuously dear in the hearts of all true Americans.

And, gentlemen, when the sun passed out of sight below the horizon December 31st, and the hands of the new clock upon the tower of our City Hall pointed to the hour of midnight, the clock for the first time struck the hour of twelve, and a thousand bells of our city rang out the old year, the books of our nation for the year were closed, but the pages will show that the golden harvests from our productive soil, the yearly radiant glow of our Southern cotton fields, the hidden and untold wealth of our gold, silver and copper mines, the vast areas of coal and iron ore beds, the spouting oil from the bowels of the earth, the wonderful and successful achievements of our manufacturers, the abundant available and ample capital to develop and promote manufacturing and commercial enterprises, place us before the world as the greatest and most favored nation of God's grand universe.

On the conclusion of Mr. Supplee's remarks, a song was acceptably rendered by John F. Braun.

The next number upon the programme was "Our Trades League," which, in the absence of W. W. Foulkrod, who had been unavoidably detained, was responded to by William Waterall, a prominent paint manufacturer of Philadelphia. The subjects upon which he specially touched were environment and character, ending with reference to the good work which had been done in Philadelphia through the trade organization concerning which he spoke.

The next number upon the programme was "The Future of Our Country," which was most ably responded to by George E. Bartol, president of the Philadelphia Bourse. He spoke as follows:

ADDRESS OF GEORGE E. BARTOL.

Mr. Chairman and Gentlemen:—In these days, history is being made. The action of this republic, in relation to the islands acquired through the late war with Spain, will have an influence not only upon the future of the republic, but upon the world. The destiny of nations depends, perhaps, upon our decision. Will our decision be wise or unwise? Time alone can tell, and the effect upon our own future can only be guessed at by the wisest, for no conditions of the past can guide us at the present juncture.

It is difficult to arrive at the true feelings of the majority of our people on the subject of territorial expansion, and perhaps it is as well, for so shrewd an observer of humanity as Benjamin Franklin held the opinion that popular majorities were usually wrong, and that the saving good sense of the community was to be found among the minority. *Vox Populi Vox Dei*, is more beautiful in precept than in example.

If one can be guided by the public journals, there are many men of many minds, expansionists, anti-expansionists, and neutrals, who either don't know or don't care. The expansionists are sub-divided into two main groups: first, those who believe in annexation, pure and simple; and second, those who advocate a protectorate so far as the Philippines are concerned.

It is not my intention this evening to go into an exhaustive study ot this subject, which would be better suited to the lecture platform than to an after-dinner speech, but rather to touch lightly on some phases of the matter, and to take a glance at what we have done in the past in the direction of expansion, and incidently to note what views were expressed by our representatives and senators in Congress when the questions were under discussion.

Expansionists, from the foundation of the republic, have been, they are to-day, regarded as visionary people, almost crazy, engaged in an earnest effort to undermine and destroy the republic. In the very hot controversy, which occurred over the ratification of the Louisiana purchase in 1803, Senator Tracy of Connecticut said: "We can hold territory: but to admit the inhabitants into the Union and make citizens of them, and States, by treaty, we cannot constitutionally do; and no subsequent act of legislation, or even ordinary amendment to our constitution, can legalize such measures. If done at all, they must be done by universal consent of all the States or partners of our political association."

Representative Griswold said: "It is not consistent with the spirit of a republican government that its territory should be exceedingly large; for, as you extend your limits, you increase the difficulties arising from a want of the similarity of customs, habits, and manners so essential for its support;" and Senator James White of Delaware said: "But as to Louisiana—this new, immense, unbounded world—if it should ever be incorporated into the Union, of which I have no idea, it can only be done by amending the Constitution. I believe it will be the greatest curse that could at present befall us. It may be productive of innumerable evils. Our citizens will be removed to the immense distance of two or three thousand miles from the capitol of the Union." Sixty-four years later, when the ratification of the Alaska purchase was before Congress, Representative Ferris of New York said: "The people of this country do not want these Russian possessions. If submitted to them, they would reject the treaty by a majority of millions. Alaska, with the Aleutian Islands, is an inhospitable, wretched and God-forsaken region, worth

Digitized by Google

nothing, but a positive injury and incumbrance as a colony of the United States." Representative Price of Iowa said: "Now that we have got it, and cannot give it away or lose it, I hope we will keep it under military rule and get along with as little expense as possible. It is a dead loss to us anyway, and the more expense we incur the worse it is for the country and the people."

Mr. Ferris of New York, previously quoted, offered a resolution to strike out all after the enacting clause, and to insert the following: "That the President be authorized to bind the United States by treaty to pay the sum of $7,200,000 to any respectable European, Asiatic, or African power which will accept a cession of the territory of Alaska."

Thus the views expressed to-day by the anti-expansionists are not new, but have all the merit of antiquity.

The question of constitutionality has been so well threshed out that it seems strange it should be again brought forward. I suppose, like Banquo's ghost and the "Crime of 1873," it will not down, and the precedents established during one hundred years are ignored.

The total cost of our annexation and purchases, excluding the Philippines, has been $52,200,000; certainly most profitable purchases, the gold output of California in the year 1853 alone amounting to $65,000,000. The "God-forsaken" Alaska has paid directly to the government for the seal fisheries an amount equal to its original cost, and has yielded in gold alone to the end of 1897 nearly $15,000,000.

While the annexation of the Hawaiian Islands was in contemplation, there was great contention made by the anti-expansionists that a vote of the people should be taken as to whether or not they desired us to govern them. This point is also being vigorously pressed in regard to the Philippines, and our venerable and revered Declaration of Independence is quoted as reading "That governments must derive their just powers from the consent of the governed." It is very like the original in sound, but very different in fact. The Declaration reads: "We hold these truths to be self-evident—that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty and the pursuit of happiness. That to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that when any form of government becomes destructive of these ends, etc." But, my hearers, we must remember that the Declaration of Independence was written by *white* men for *white* men only, and that to-day there are thousands of men living in this country, some in our very midst, who are barred by law from citizenship, and some are nevertheless children of the oldest civilization known to man.

I do not mean to argue as to the justice or injustice of our position, but assert that it is nonsense to talk of only taking up the reins of government by the consent of the governed. Does any one suppose for one minute that we consulted the aborigines of this land when we made laws for them to move on, and to keep moving on, or that we consulted the French and Spanish residents in Louisiana and the Spaniards in Florida, or the Mexicans in California, or the Aleuts of Alaska? Certainly not. We saw the land, we liked it, we paid the owner to vacate, and we took possession and governed the inhabitants, and gave them the chance to enjoy the privileges of the Declaration of Independence, by securing to them life, liberty and the right to pursue happiness in their own way, and we will do the same with any other territory that we acquire, and we will govern it until such time as the people show that they can govern themselves, and then we will take them in as partners, if we want them, but not otherwise; but, if we are strong enough to hold the territory, we will keep on governing them just the same.

Gentlemen, the future of the republic is not to be made or unmade by acquisition of territory, whether on this continent or across the seas; neither the ice fields of Alaska, nor the palms of the tropics will determine our destiny, but the character of our people. I care not whether they be white or black, yellow or brown, if they are honest, the republic will endure and grow: if they are dishonest, it will disintegrate and die. The fall of the Roman Republic and Empire, which endured for nine hundred years, was not due to expansion, but to corruption, not of the officials alone, but of the mass of the people. In a republic, the people are the source of government. When the people themselves are corrupt, nothing good can be expected from their government. A stream cannot rise higher than its source.

Governor Roosevelt, in his inaugural address, said: "Under no form of government is it so necessary thus to combine efficiency and morality, high principle and rough common sense, justice and the sturdiest physical and moral courage, as in a republic. It is absolutely impossible for a republic long to endure if it becomes either corrupt or cowardly; if its public men, no less than its private men, lose the indispensable virtue of honesty."

My friends, we are gathered here this evening to do honor to one who, I believe, and I know you will agree with me, fills in a large measure the ideal of a virtuous, honest and patriotic citizen, one whom we are proud to know and have as our friend and advisor. It has been my good fortune to know Mr. Supplee for a number of years, but only in the last few months have I been thrown into that close touch, which is necessary to show up all of a man's good qualities. At a time when the Philadelphia Bourse was in sore need of friends and assistance, and when many were shy about coming forward, he came promptly to the front, and, despite ill-health and the pressure of private business, he has never looked backward since putting his hand to the plough, and will not turn back until he achieves success. It is the same in all his other public work, patient, cheerful, patriotic, always punctual, and habitually self-sacrificing, he is a high type of the American citizen needed now and always, if our republic is to endure. If succeeding generations are composed in large part of men like him, honest, efficient, moral, just, men of high principle and good common sense, we need not fear expansion, even if we should acquire the earth. The future of the republic will be safe.

Let us then face the future with courage; let us train our sons in honesty and patriotism; take what the fortune of war and destiny has placed in our hands, and where the God of Battles has planted our flag, there let it stay. Who will dare haul it down?

A song was next acceptably rendered by the Supplee Quartette, consisting of John F. Braun, William P. M. Braun, Frank W. Huff and Charles A. Huff.

THE MANUFACTURERS AND MR. SUPPLEE.

"Our Manufacturers" was the subject on which Fayette R. Plumb was appointed to speak, but his address contained a surprise to most of the gentlemen present, and another knock-out blow so far as Mr. Supplee was concerned. Mr. Plumb said very little about the manufacturers as such, devoting the greater portion of his remarks to the honored guest of the evening. He spoke as follows:

REMARKS OF FAYETTE R. PLUMB.

Mr. Chairman and Gentlemen: It is a great compliment to be selected by the members of this great organization to respond for "The Manufacturers." It has a double meaning to-night, because of the one whom we have chosen to honor.

During a business experience of nearly thirty years, it has been my greatest pleasure to be intimately associated with him, not only in the relation of manufacturer and merchant, but as my employer, my adviser and my friend.

His keen business judgment, coupled with his warm

Digitized by Google

heart, have enabled me to confer with him without constraint, and it has always been a comfort to know that the advice sought would be able and thoroughly trustworthy.

Like all successful men who have hewn their way to fame and fortune, his early life was full of trials and vicissitudes. Leaving Philadelphia a mere boy, he emigrated to the great West to commence his business career, and settled on the banks of the Mississippi at what was then a frontier town. The city of La Crosse was a mere village, and the Hardware establishment started by Lloyd & Supplee was one of six others in that growing town. This place was made up of progressive business men, and Lloyd & Supplee soon took rank with the foremost. This was fully demonstrated by the fact that during the first few years there, they absorbed the stocks of most of their competitors, and when they left Wisconsin to take up their residence in our city, they had next to the largest business of any house in the State.

When Mr. Supplee was selected president of the National Hardware Association, I felt, therefore, perfectly confident that its affairs would be in the hands of one whom the members would be proud of, and one whose management would be marked with conservatism, and whose direction would be resourceful and masterful.

It is a source of pride and gratification to know that my judgment of him has been more than realized. He has not only handled the affairs directly pertaining to his association, with great executive ability, but he has also endeared himself to the manufacturers by the course pursued toward them. The feeling of antagonism that existed during the first year of his presidency, has given way to one of respect and esteem, as they have learned to realize that it has been his idea to work in harmony with them.

Under the circumstances, it is only natural that they should not allow an occasion like this to pass without recognizing his services.

I have the honor, then, Mr. Supplee, to present, on behalf of the manufacturers, this souvenir as a token of their high regard, appreciation and respect for your wise counsel and friendly help so graciously extended to them.

It is their sincere desire that the balance of your life may be made up of all the comforts and pleasures vouchsafed to those whose works have entitled them to days of restfulness and peace, and that you may carry in your heart kind remembrances of the givers.

Just as Mr. Plumb concluded his remarks, a large object which had stood heavily veiled beneath the portrait of Washington just behind the president's chair, suddenly came to light, consisting of a magnificent astronomical clock, which had been provided by the manufacturers belonging to the Hardware Merchants' & Manufacturers' Association of Philadelphia.

Mr. Supplee rallied as best he could, and in a heartfelt manner expressed with such eloquence as a man could summon under such circumstances, his appreciation of this magnificent gift. He said:

MR. SUPPLEE'S RESPONSE.

Mr. President and Mr. Fayette R. Plumb, representing the manufacturers: If the manufacturers have made any mistake in the man to whom they have given this elegant and beautiful present, they certainly have made no mistake in the oratory of the gentleman delegated to make the presentation speech, and I thank him.

Prince Bismarck, who was Germany's greatest statesman, and who has the credit of having founded the German Empire, spoke fluently seven languages, but, it is stated, that at a banquet he was able to keep silent in all of them. But, if Prince Bismarck were now alive, with all due respect to his memory, I would challenge him or any other prince to keep silence on an occasion like this. But, Mr. Plumb, what can I have you say to the manufacturers you represent beyond the few simple words that, "from the bottom of my heart, I thank them?" In this historic banqueting hall many Presidents of the United States have been feasted and many army and navy officers in gilded uniforms, and eminent statesmen have responded to toasts. Oh! that their echoes were still clinging to these walls that I might gather inspiration from their flow of eloquence and wit suitable to the occasion.

But, Mr. Plumb, you will please say further to these gentlemen that during my thirty-five years of intercourse with manufacturers this is the first time when a debt became due that I felt it could not be paid in full; but in this instance I cannot fully liquidate the obligation, for I am bankrupt in words, and, while my heart is full, it would require the eloquence of Demosthenes or Cicero to analyze and announce the contents.

This beautiful clock gives the record of time, but kindness like this cannot be paid in time promises, and, while its delicate machinery goes on tick, thankfulness and gratitude cannot be repaid on tick, and as the world revolves on its axis the clock indicates the day of the month; but good fellowship cannot be repaid in monthly instalments. But whether its melodious chimes chant the passing hours of the bright days of spring or during the cold blasts of winter or during the dark hours of night, the sound will always be to me a reminder of the harmony created between the members of the National Hardware Association and the manufacturers you represent.

This timepiece, with the delightful history attached, is one that will be handed down to future generations, and I feel it will always be held by them, as it will be by myself, in kind remembrance of the givers to one who but stood at the helm in the work and welfare of our Association, and in behalf of our officers and members, as well as myself, I again thank you.

These gentlemen and friends who have during the evening (since I before spoke) responded to toasts and spoke in such laudatory and eulogistic terms of myself (many of which virtues I had never heard of before) remind me of a friend who, at a banquet, once requested that if there were any manufacturers or jobbers present who were fully satisfied with their lot to please hold up their right hands; but there was not a hand to be seen. Now this evening I feel that I could hold up both hands, but before doing so I would like that a committee of one be appointed to investigate some of these complimentary and eulogistic remarks and see if these gentlemen are not mistaken in the man—besides, there may be two sides to the question. The committee can report at a later hour; until that time, gentlemen, I thank you.

The clock bore the following inscription: "Presented to William W. Supplee, by the Manufacturers, January 18, 1899."

"The Relation of our Editors to Merchants and Manufacturers" was the subject upon which R. R. Williams, Hardware editor of the *Iron Age*, had been appointed to speak, but because of the lateness of the hour, he omitted his set address on the subject named, and merely echoed and endorsed the sentiments of fraternity and good will which had been so eloquently uttered during the evening.

"The Social Side of the Hardwareman" was the subject which had been assigned to James H. Kennedy, editor of *Hardware*, New York, but he also declined to discuss the question at that late hour, and contented himself with a few words of greeting, and several anecdotes illustrating the social side of the Hardwaremen of Philadelphia.

Brief remarks were made by Hugh McCaffrey, vice-president of the Philadelphia Association, and by William C. Peters of the James M. Vance Co., one of the oldest Hardware houses of Philadelphia.

It was a few minutes before midnight when the exercises of the evening came to an end.

Too much cannot be said of the generous hospitality of Philadelphia on this occasion.

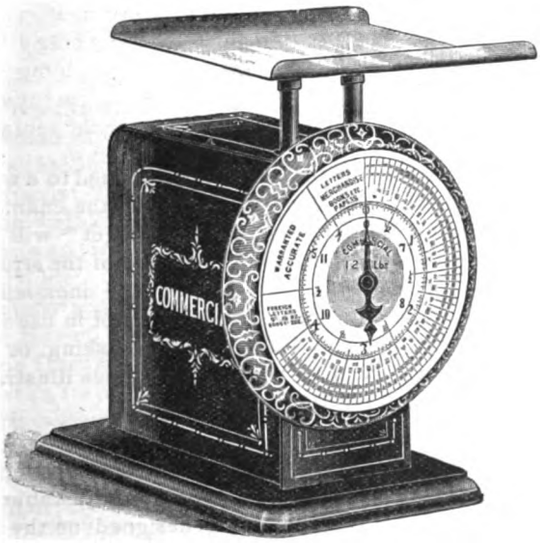
NEW GOODS AND SPECIALTIES.

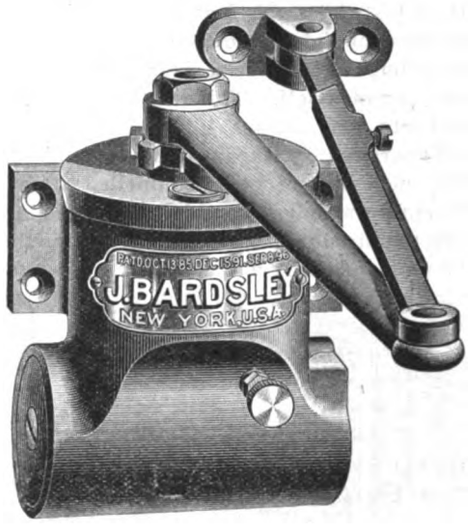
C. E. Jennings & Co.'s New Auger Bit.



C. E. Jennings & Co., No. 79 Reade Street, New York, are placing upon the market a new pattern single twist auger bit, an illustration of which we give herewith. They

are known by being numbered "No. 1½," and are furnished to the trade packed in boxes of "one half dozen" each; they are made in all sizes, by sixteenths, from 3-16 to 20-16, and are assorted in sets of 6, 9 and 13 bits. They will be delivered to the trade, without extra charge, put up in the upright model bit box, No. 500, or in the flexible canvas bit roll. The manufacturers claim for these bits that "they are especially adapted for hard wood and end boring, but are said to bore equally as well in soft wood. Having but one lip and one spur, they offer very little resistance in working; they will lead into the end of hard wood without being forced, and have an excellent clearance." Every bit, it is stated, is tested before leaving the factory, and is fully warranted.

Pelouze "Commercial" Scale.



The "Commercial" Scale is an article of decided merit which is being newly placed upon the market by the Pelouze Scale & Mfg. Co., Nos. 133 to 139 South Clinton Street, Chicago. It is a postal scale, designed especially for offices; indicates the exact cost of postage, in cents, on letters, books, merchandise and newspapers, up to four pounds. It weighs packages by one-half ounces up to 12 pounds; is made of steel, beautifully japanned and striped;

has square six inch, nickel-plated top plate; a beautifully enameled dial, very distinct, easily read, and double steel upright supports distribute the weight, insuring accuracy.

The Bardsley Oil Door Check and Spring.

Joseph Bardsley, No. 149 Baxter Street, New York, has placed upon the market recently the Bardsley Oil Door Check and Spring. This device in its improved form embodies this season some new and valuable features that have been suggested by the experience of several years of manufacture of this class of goods. Among these may be mentioned the following: As it is made without packing in its working parts, it is one of the few door checks that are entirely free from friction. The spring used in its construction cannot be placed the wrong way up, which avoids the frequent accidental bending out of shape and breakage so noticeable in similar devices. If such an attempt is made in this door check, the engaging parts will slip by each other harmlessly. A frequent source of annoyance in door checks has been the breaking of springs, as the breaks almost inevitably occur near the inner diameter where the coils are small. In the Bardsley Door Check, the diameter has been enlarged so as to dispense with the small inner coil. A lighter, longer and more elastic spring is used, giving greater durability, this being permitted by the greater movement given by the larger interior diameter. The checking power cannot be lost through the liquid being forced from the liquid chamber into the spring chamber, as the two are connected by openings. A reserve chamber is provided between the spring chamber and checking cylinder, holding a supply of oil sufficient to last many a year. A screw hole is provided in the cap so that at any time more oil can be added without removing the check from the door. It is provided with a releasing device, which is an important feature, by means of which the checking power is removed when the door is nearly

closed, the spring thus exerting full force to latch the door. This feature is brought into play by an adjustment of the arms, and if not desired, need not be used. It is claimed that it may be readily taken entirely apart, as, after removing the arm, it is only necessary to take out three screws. This enables a broken or worn part to be procured and put in by anyone, instead of the customary expense and delay of sending to the factory for repairs. It is placed upon the market at the following prices, subject to a trade discount, and catalogues containing further information, will be furnished by the manufacturer on application.

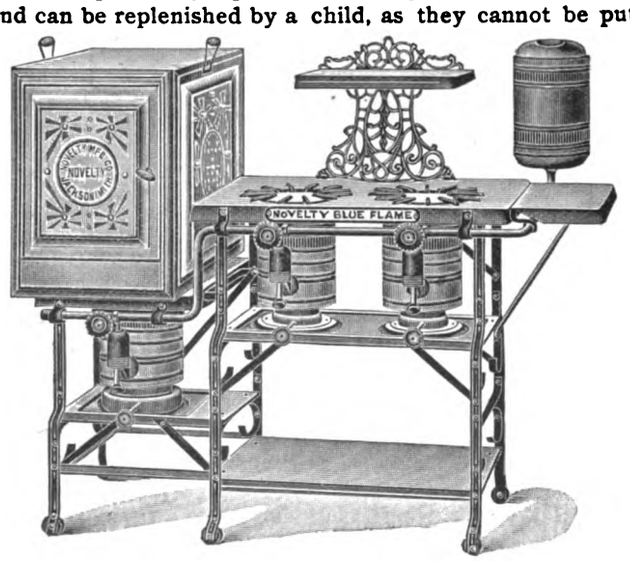
Size A.	For light inside doors not over 2 ft. 9 in. wide	$3.50
Size B.	For narrow vestibule doors or inside doors not over 3 ft. wide	4.00
Size C.	For outside doors not over 2 ft. 9 in. wide	5.00
Size D.	For outside doors not over 3 ft. 3 in. wide	6.00
Size E.	For extra large and heavy doors	7.00

Checks are finished regularly in gold bronze; in dead black at same price, and in any special finish at an additional price.

A Telephone Shelf.

Taking notes at the telephone is a nuisance without some kind of a table or shelf for the purpose. The Sheehan Mfg. Co., Salem, Ohio, have filled the bill for such an article, arranged to swing out of the way under the tele-

Digitized by Google



phone when not in use, and will market it through the light Hardware trade. As shown in the illustration, it is designed to fasten in the most convenient position for

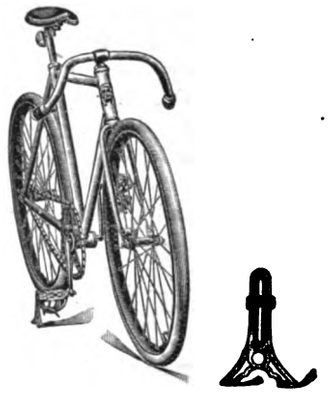
writing. It can be lifted off the hooks and used in any part of the office. Catalogue for the asking, or sample sent for fifty cents.

Wickless Blue Flame Oil Stove.

The Novelty Mfg. Co., Jackson, Mich., are cataloguing the trade for their line of Wickless Blue Flame Oil Stoves, for which they claim superior merits. Among the improvements in this line, they note the following: Sight feed that is practical and all that the name implies. Auxiliary tank for quick lighting, which is found in no other stove. Student lamp device in fount governing pressure perfectly. An important feature is the fact that the oil is measured for the purpose of lighting, consequently an overflow of the burner is impossible. The simplicity of the lighting ring also commends itself. This ring is composed of sheet asbestos cut into strips about ¾ inches wide, and can be obtained of nearly every Hardware dealer in the land, thus avoiding the necessity of being compelled to send to the manufacturers for supplies, especially if one is in a hurry. These strips readily slip into a narrow groove in the burner, and can be replenished by a child, as they cannot be put

in any way but the right way. Their line comprises seven distinct sizes. The ovens are large and handsome, and the whole line has a superior finish characteristic of this company's product, and which has made their goods notably rapid and easy sellers.

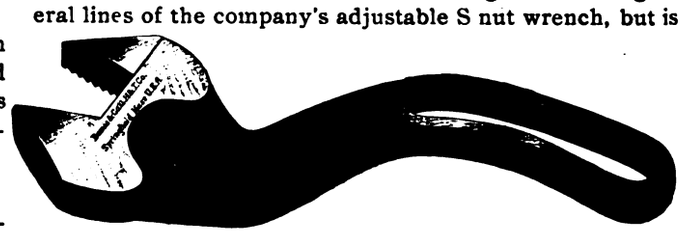
The Carpenter Grass Hook.



F. E. Carpenter, No. 105 Park Place, New York, is placing upon the market this season the Carpenter Grass Hook, an illustration of which we give herewith. This useful agricultural tool has been greatly improved upon over any previous season, making it one of the most practical of its kind that has been brought to our attention. The blades are tempered in oil and ground with extra wide bevel; the handles are hardwood, with strong malleable iron ferrules; tangs are securely riveted through the handles and shank of blade is so set in handle as to prevent any possible twist-

ing or turning when in use. Combining, as it does, all the advantages of the old style sickle, edger and weeder, its utility is at once apparent, and the various purposes for which it can be used make it a most valuable tool for florists and gardeners. Samples and quotations will be promptly furnished by the manufacturer to the jobbing Hardware trade, and up-to-date dealers will find this novel and practical Grass Hook will make a valuable addition to their line for spring sales.

Midget Bicycle Support.



The Sheehan Mfg. Co., Salem, Ohio, have brought out a little article that ought to sell on sight to cyclists.

It is a bicycle rest or support, that, once attached to a wheel, is always ready for use. Instead of rubbing the enamel off the wheel against the curb-stone, the "Midget" will hold it securely, whether it stands in the middle of the street or at the edge of the walk. It is neat and inexpensive, weighing less than four ounces, and when not in use is out of the way of the rider. Catalogue for the asking, or sample sent on receipt of fifty cents. The above illustration shows the Midget in position on the wheel.

Adjustable S Pipe Wrench No. 50.

The Bemis & Call Hardware & Tool Co., Springfield, Mass., have put on the market an improved adjustable pipe wrench, which is here shown. It is designed on the general lines of the company's adjustable S nut wrench, but is

adapted to turning pipe. The operating nut is of steel and the sliding jaw a steel drop forging, provided with teeth for engaging the pipe. It is explained that the tool is thoroughly made, all parts carefully hardened and tempered, and that they are interchangeable. The wrench

Digitized by Google

will be found useful in turning pipes in confined places, such as in corners and against walls, and that it will not lock on pipe.

Death of Charles Daly.

Charles Daly, senior member of the firm of Schoverling, Daly & Gales, died on January 11th, at his home in Summit, N. J. He had remained at his office in New York until the usual hour for leaving, and spent the evening in pleasant association with his family until about 11 o'clock, when an attack of apoplexy proved almost immediately fatal. Mr. Daly had not been a thoroughly well man for a number of months, and although usually able to attend to the duties devolving upon him at his office, still felt the necessity for exercising more than the usual care in the regular routine of his everyday life.

Mr. Daly began his business career about 1858, with the old firm of Tufts & Colley, who were, before the civil war one of the important houses doing a successful Southern trade. He was afterward in the employ of Sargent & Co., and later was associated with Herrman Boker & Co., which house he left in 1865, to join Mr. Schoverling and commence business in firearms on his own account, which the firm did in a modest and conservative way, beginning on

Barclay Street, and moving the following year to No. 52 Beekman Street. Their increasing business compelled them at a subsebuent date to take the larger and more important location at Nos. 84 and 86 Chambers Street, finally locating at the well-known and very convenient building, No. 302 Broadway, where they did the leading business in sporting goods, etc. Mr. Daly was one of the incorporators, and for many years president of the Marlin Fire Arms Co., of New Haven, Conn. He was one of ths active organizers of the Hardware Club, always manifesting the greatest interest in its prosperous career, and enjoyed the pleasure of serving several years on its first board of governors, and as an active member of the House Committee. He was also a member of the Colonial Club, and was connected by membership with the Presbyterian Church. He had been a widower for ten years. A son and a daughter survive him, Charles Howard Daly and Mrs. R. Courtney King.

Mr. Daly was a thoroughly conscientious merchant and was devoted to his chosen vocation. Upright and honorable in all his walks in life, a firm and life-long friend, with a warm heart for those he loved, and even an extended hand for those who might fail to appreciate his uniform kindness of motive and honesty of purpose. To a stranger his natural demeanor seemed diffident and reserved at first, but upon warmer relations springing from acquaintanceship he soon showed the possession of the noble qualities that engender friendship, annihilate selfishness and make life worth possessing. Possessing quiet tastes and domestic habits, he spent his happiest hours in his suburban home surrounded by those he loved. He leaves behind him a large circle of devoted friends who were endeared to him by his sincerity of character and generosity of affectionate impulse.

At a meeting of the trade, held at the office of Hermann Boker & Co., January 16th, for the purpose of taking suitable action in reference to the death of Mr. Daly, the following resolutions, prepared by a committee composed of A. H. Funke, Wm. J. Bruff and Henry Werleman, were unanimously adopted:

Whereas, It has pleased Almighty God, in His inscrutable wisdom and providence, to remove from this earth our friend and fellow member of the sporting goods trade, Charles Daly; and

Whereas, Our friend stood high in the esteem and affection of his business associates and companions, with an honorable record for business probity, coupled with a genial disposition toward all; therefore be it

Resolved, That we extend to his bereaved family, also to his business associates in the firm of which he was the senior member, our fullest sympathy and condolence for their irreparable loss.

Resolved, That we most tenderly convey to his grief-stricken children the sorrow and sadness we feel at parting with their protector and our friend.

Resolved, That a copy of these resolutions, suitably engrossed, be presented to each of his children,

In view of his prominent connection with the Hardware Club as one of its first board of governors, appropriate action was taken in regard to his death and the high appreciation in which he was held, a committee being appointed to prepare suitable resolutions of condolence.

A Good Time in Davenport.

They have good times out in Davenport, Iowa. There occurred, for instance, the annual banquet of the Sickels, Preston & Nutting Co., at the St. James Hotel, on the evening of January 14th. The spirit of the occasion was well voiced in the remarks made by Col. James R. Nutting, who spoke as follows:

On behalf of our company, it gives me great pleasure to welcome you, one and all, to this our annual festive reunion.

During the year some of us have given instructions, while others have received and obeyed them. Without any attempt at flattery as manager, I unhesitatingly say, that each one has tried to do his full duty; that whatever success we have enjoyed in the past has been accomplished by individual effort in the line of duty assigned, and by the perfect harmony that has prevailed and the interest taken by you all in our welfare. It is just as essential to the success of a commercial house, to have goods properly selected, well packed, carefully shipped and hauled to the station, as it is to have them well bought, well sold and accounts accurately kept. To-night we meet upon a level, just as we have been doing at the store for the past three hundred days and for many years before. You all know that there is no rank or caste in the policy of our business, and there never will be until the management is changed.

When any one in our company or in our employ does not desire to do his full duty from loyalty to and interest in the concern, his services are and should be dispensed with. We do not believe in doing what is right for the sake of reward, or refraining from doing wrong for fear of punishment. You all try, as I sincerely believe, to do what is right because it is right to do right.

There can be no better proof of the good feeling that prevails among us than the fact of our remaining so long together. Our worthy president, Mr. Robert Sickels, became identified with the house when he was twenty-one years of age, has been with it continually ever since. Our vice-president, Mr. A. J. Preston, has been here almost as long. Your manager began work the 7th day of

Digitized by Google

August, 1864, for the munificent salary of twenty dollars per month, and Mr. C. A. Mitchell followed only three weeks after for thirty-five dollars a month. He has had a larger salary since, but has earned every dollar that he has received. Mr. Harbeck has been with us thirty years; Mr. Harrison, twenty years; Mr. Neuhaus, seventeen years, and Mr. Small began work here as an errand boy fifteen years ago. Many of you who are now occupying responsible positions came to us when you were kids. It is often said that whoever becomes identified with this house, remains until married, if ladies, and during life if of the opposite sex.

But you hear lectures enough at the store. You are impatiently waiting the pleasures of the dance and informal sociability that follows. You are welcome here to-night. I wish you all a happy new year.

"De trouble wif some men dat knows a heap," said Uncle Eben, "is dat dey hab sech a positive way o' tellin' it dat dey makes folks too mad to listen."—*Exchange.*

The New Price List of Tacks, Etc.

The leading manufacturers, under date of January 15th, have established a new and uniform price list which equalizes the inequalities in prices formerly prevailing, and which for some time, under the discounts ruling the market, have caused many sizes to be sold without profit. It is believed that this new list will be welcomed by the trade generally and continue in use for an indefinite period. The discounts applying to the various lines of goods covered by the new price list, will be found in our Review of the Markets.

A cycling firm in Cologne has patented a new bicycle bell, in which is concealed a kind of revolver, which is to serve the double purpose of frightening away vicious dogs and cheeky tramps. By merely pressing a button attached to the side of the bell, ten cartridges can be fired off in succession, these giving such a loud report that obnoxious persons and animals would beat a hasty retreat.

Review of the Markets.

Hardware: Business starts in with considerable promise. Scarcely a day passes without the announcement of some consolidation of many interests under one controlling organization. This is usually followed by a withdrawal of the prices then current with the largest buyers, and a stiffening of prices along the line soon stimulates the sending of orders that have been held for a while by hesitating hands. The prospects are that changes in quotations will become firmer with every month that passes, for the demand is of a character that indicates a prosperous future.

Wire Nails: At about the time the previous issue of our paper went to press, the Wire Nail situation in Pittsburgh underwent material change, the result of conditions which made an advance of 10 cents a keg immediately available. This movement, strengthening the market so materially, really resulted from the close control obtained by the American Steel & Wire Co. over the wire nail market by their acquisition of additional plants of importance, guaranteeing a regularity to current quotations and giving tone and strength to a market that had been without material change for some time. At the prices now dominant in the Wire Nail market, very large specifications do not seem to prevail; many of the larger buyers in touch with the market having secured fair stocks previous to the advance. Those not being so fortunate are buying with confidence such nails as present business would make desirable without speculative feeling. The market is well sustained at following quotations for this month's deliveries: To jobbers in carload lots $1.45 base f. o. b. Pittsburgh; single carloads, $1.50. New York prices may be quoted as follows: Carload lots on dock, $1.60, smaller lots from store $1.70.

Cut Nails: The strong position which is the present feature of the wire nail market, has had the effect of strengthening the cut nail market to a considerable extent, which has been taken advantage of by the manufacturers, so that in the New York market, quotations may be named as follows: Carload lots on dock, $1.35; smaller lots from store, $1.45.

Smooth Wire: The same conditions governing the strong market on wire nails, namely, the control of the market by the American Steel & Wire Co., has had the effect of advancing the price of smooth wire to $1.30 base, f. o. b., Pittsburg; galvanized, $1.60. Buyers of single carloads are quoted at an advance on these prices of 5 cents, and on less than carloads, 10 cents. It was also determined that when direct shipments are made to jobbers under contract, of less than carload lots, an advance of 2½ cents should be made. As the control of the market is completely in the power of this company, it is natural to anticipate gradually advancing quotations under the prospect of an unusually active demand.

Barb Wire: In sympathy with conditions affecting other markets within the control of the American Steel & Wire Co., the barb wire market is exceptionally strong and with an advancing tendency. Quotations to jobbers of carloads are f. o. b. Pittsburg, $1.55 on painted and $1.90 on galvanized, with an advance of 5 cents on single car load lots. There has been a brisk demand and the prospect for further advances seems probable. New York prices for four point galvanized are as follows: Carload lots on dock, $2. Smaller lots from store, $2.10. Painted 35 cents less.

Shot: Under date of January 10 the Eastern manufacturers announce the following advanced quotations for drop shot:

Drop Shot, sizes smaller than B,	25	lb. bags,	$1.30	per bag;	5	lb. bags,	30c.	per bag
" B and larger sizes,	"	"	1.55	"	"	"	35c.	"
Buck Shot,	"	"	1.55	"	"	"	35c.	"
Chilled Shot,	"	"	1.58	"	"	"	35c.	"
Dust Shot,	"	"	2.00	"	"	"	50c.	"

Terms—Net cash, 30 days, or 2 per cent. discount will be allowed for cash remitted within 10 days of invoice date. Discounts on ton lots as usual.

Tacks, Nails, Brads, etc.: From the new revised price list of tacks, nails, brads, etc., adopted January 15, which we print in full on another page, the following discounts are quoted by the Shelton Company, Derby, Conn.; New York office, Stewart Building, 280 Broadway:

	Per Cent.
American Carpet Tacks, blued and tinned	90 and 40
American Cut Tacks	90 and 25
Swedes Iron Tacks	90 and 40
Upholsterers' Tacks	90 50 and 10
Gimp Tacks	90, 50 and 10
Lace Tacks	85 and 15
Trimmers' Tacks	90 and 33⅓
Looking Glass Tacks	75
Bill Posters' and Railroad Tacks	90 and 50
Hungarian Nails	80 and 25
Common and Patent Brads	75 and 10
Trunk and Clout Nails, blued and tinned	80 and 25

Genuine Lanc. Swedes Iron goods quoted upon application.

Lead Pipe, etc.: On January 19 the following changes were announced on lead pipe, etc., indicating the advancing conditions of the market:

Lead Pipe	6¼ cts. per lb.	Tin-Lined Lead Pipe	12½c. per lb.
Sheet Lead	7¼ " "	Block Tin Pipe	"

Egg Beaters: The Standard Company, No. 29 Haverhill Street, Boston, Mass., quote the following net-quantity prices on their production:

No. 5.	Steel Handle, Dover Egg Beater	$5.25	per gross
" 10.	" " "	5 50	"
" 10.	Cast " " "	5 50	"
" 10n.	Steel " " "	7.50	"
" 15.	Steel Handle Extra Heavy Dover Egg Beater	14.00	"
Rival		12.00	"

Brass Kettles: E. A. Napier, No. 19 Cliff Street, New York, the distributing agent for the "American Brass Kettle Manufacturers," announces the adoption of a new price list, dated January 10, on spun plain brass kettles, which is as follows:

Quarts	2	4	6	8	10	12	16	18	20
Inches	7x4½	8x5	9x6	10x7	11x8	12x9	13x9½	14x10	15x10½
Dozen	$5.13	$7.69	$12.83	$15 39	$17.95	$20.52	$25 65	$29.50	$33.35
Each	.43	.64	1.07	1.28	1.50	1.71	2.14	2 46	2.78
Quarts	24	32	40	48	56		72	100	128

Dozen	$38 47	$46.17	$58.12	$69.74	$92.05		$111 60	$153.42	$192.50
Each	3.21	3.85	4.85	5.81	7 67		9 30	12.78	16.04

This price list is subject to a trade discount of 20 to 25 per cent.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 42 cents per gallon; in lots of 5 barrels or more, 41 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE INDIANAPOLIS TRADE.

Naturally, we are having some trouble in securing the advances which are occurring so rapidly. Some of our good customers intimate to us and call our salesmen's attention to the fact that we probably placed some orders ourselves in anticipation of the advance, and think because of this, we should not charge them the full advance on their needs. We feel the fallacy of their position is this: while they desire to share with us in all advances, we feel quite sure we received no offers of assistance from them during the several years just past, to stand half the declines which have caused the jobbing business to be an unprofitable investment during the period of depression.

The only way we can give them the benefits of all declines promptly, regardless of the quantity of merchandise we have on hand bought at higher prices, is for them to allow us to follow the market in pricing their orders.

VAN CAMP HARDWARE & IRON CO.

THE ST. PAUL TRADE.

The season of 1899 is opening very auspiciously in the Northwest. The weather conditions are all that could be asked for—no great depth of snow, but just enough for comfortable sleighing; clear, crisp, sunshiny days with an atmosphere that furnishes a sufficient tonic so that no other "bracer" is needed.

The early indications of advances in wire and nails, which were later realized by actual advances, induced many dealers to place carload orders, and as they now see that they have "made a good thing" by so doing, they are en-

Digitized by Google

couraged to give further advance orders, thus to some extent anticipating their early wants. The salesman meeting with this class of buyers, has his faith and courage reinforced by their confidence, and confidence being something that is contagious, he in turn, imparts his feelings to his less optimistic customers. This means increasing confidence all along the line, and confidence being the groundwork of success—the former well established, the latter is sure to follow.

A year ago we were facing the unsolved problem of what a war with a foreign country would produce. That question is now substantially settled, a wise Providence giving us victories over our opponents, which looked upon from a human standpoint, seems miraculous. Grave responsibilities incident upon these victories now confront us, and good men are differing widely as to how they shall be met. Can we not trust the same Divine Hand to guide us in discharging these duties before us that we believe has controlled in the past?

There are always new questions arising and the one immediately before the business world is, what will be the effect upon business by the formation of the huge combinations, or trusts that have recently been organized, or are now organizing? This is a question that we shall not attempt to answer, and can only await results. One effect is apparent, and is to be deplored and that is that by these combinations a great many good and competent men are thrown out of employment, and will have to seek new fields to occupy. Whatever may happen, we can expect the business world to soon adapt itself to the new conditions. Altogether, we are looking into the future with great hopefulness, believing that the world neither goes backward nor stands still, but that it grows better as the years roll around. C. W. HACKETT HARDWARE CO.

THE CHICAGO TRADE.

We are too busy with a rapidly increasing business to pay much attention to letter writing, but a few words may not be amiss for the purpose of informing you that our customers "know a good thing when they see it," and are taking advantage of present values to stock up heavily for spring trade.

Not since the boom times of '79 and '80 have retailers manifested such a desire to anticipate their wants, especially on all metals, staple goods of all kinds and seasonable articles for spring trade.

Although some advances have been lately made in tin and terne plates, pig tin, copper, solder, copper rivets, nails, wire, tacks, cartridges, loaded shells, screw and strap hinges, galvanized iron, soldering copper, galvanized eave trough, copper wire, painted wire, cloth poultry netting and several minor lines, Hardware is still very cheap, and present prices are not going to interfere with an extremely active spring business. If trade continues through the spring months at the same rate as at the present, there is going to be a scarcity of goods, whether prices are higher or not.

Our company are all well pleased with prospects for the next sixty or ninety days, and are prepared to work night and day, if need be, to keep up with our orders.

WELLS & NELLEGAR CO.

THE BALTIMORE TRADE.

The results of the past year and the prospects of the present, give rise to serious consideration, and as viewed from the standpoint of the Hardware jobber, present conditions of distrust, uncertainty and mystery.

Events of 1898 have been chronicled, will pass into history and are doubtless familiar to all, but we are startled by the rapidly moving current and wonder where we are drifting, and whether our bark will be thrown upon the rock-bound coast of some desolate isle, or guided into the placid waters of a friendly port, which has escaped the mania for consolidating everything, where our goods can be disposed of profitably.

That we, like others who have large contracts placed at old prices, will be temporarily benefited by recent advances, there is no question; but when these stocks are exhausted, and not until then, will we feel justified in replenishing; what will be the situation of the market? Who can foretell? Through the press and our mail we read of many recent consolidations, some little dreamed of, and realize that an element of atmosphere or peculiar planetary attraction is at work on our manufacturers, producing an insatiate desire to get together, or giving them what might in common parlance be termed trust fever, different from la grippe, although just as prevalent and fatal.

The jobber, at present, is on the *qui-vive*, expecting at any moment a telegram announcing an advance on this or that item, and dreading that it may reach him too late to cover his purchases, as his trade demands, on the article affected.

In balancing our books for last year, we are pleased to state that the P. and L. account shows a substantial addition in our favor, and that merchandise sales indicate a 20 per cent. increase over the year 1897. For this we are very thankful. In view of the favorable conditions for marketing present stocks, the active and increasing demand for all lines of goods, the large volume of unfilled orders in the hands of manufacturers, and the healthy condition of the money market, we predict that the last year of the nineteenth century will be a banner one. The rush of business since January 1st has been all that could be desired. Collections are coming in freely and the average profit is good. H. W. WEBB & SONS.

THE CLEVELAND TRADE.

If a merchant expects to be permanently prosperous in a community, he must as one of the people, aid in promoting the best interests of all. He must not aim at an aristocracy, either social or financial, must not lead in extravagance, as it will create a feeling of envy among his customers who are not able to follow him, and beside extravagant expenses by the merchant are likely to result in serious injury as an example.

Every indication of a feeling of superiority is likely to be looked upon as weakness and hinder success. He should not attempt to convert piety into profit, but should aid in all efforts to better the community, and develop a pride of location, help the unfortunate, ignorant and weak.

Organizing a course of lectures, a loan library, classes in literature and history, making the place a good place to live, is a service sure to be appreciated. Others should be made to appear the promoters, if possible, as "In honor preferring one another" works well in practice.

He should avoid all noisy notoriety, waiting for honor to be conferred rather than assumed.

A country store is a centre of influence for good or evil. Those whose patronize it, have a right to expect that it will aid and not injure the ideal of those who visit it, and the position a merchant will hold in the mind of the community, will be largely fixed by the class of men who gather, and the themes discussed in the leisure hours in his place of business. He can prevent what is unmanly and make it useful if he properly appreciates his responsibilities to the community from whom he expects patronage.

No merchant can afford to devote all his time to money making, and whatever his intention, he can ill afford to have this appear to be his motive. Usefulness is more and more becoming the test of popularity. The advances made on goods so far are moderate and indicate that manufacturers are not favoring a boom. Wire and nails are very low in December and must have advanced independent of any combination. Many other goods must also advance, if manufacturers are to pay the wages that Ameri-

Digitized by Google

can workmen ought to have to make prosperity universal. Good business and good wages go together—prosperity must extend to the workmen if it is to be permanent. The fruition of our hopes during the years of gloom is fulfilled. We are realizing in our balance sheets and on our order books that we have entered the promised land. If our generosity and good will keep pace with our prosperity, the country is safe.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE PHILADELPHIA TRADE.

The jobber's life during the first few weeks of the new year is not altogether an enjoyable one. The rush of stocktaking comes side by side with the visit of salesmen to the city to get posted up for spring trade, while manufacturers are out in force endeavoring to secure early orders.

All of these instances combined make the month of January a very busy one, as far as detail work is concerned, and this year it is more so than usual on account of the many advances which are being reported daily. Not for many years has the market been as firm as in the last few weeks, while advances are coming in on many lines of goods, showing a general disposition to advance prices to more remunerative figures.

It is very noticeable that these advances are not confined to any one line of goods, or even one kind of raw material, but wire, iron, steel, copper, brass, tin, spelter, lead and even cotton are advancing, and most goods made from these materials are much firmer in consequence, and higher prices may reasonably be looked for in the near future.

Owing to the consolidation of the wire nail industries, prices have already advanced heavily and further advances are in sight. Under these circumstances, it is but natural to expect a much more active state of trade, and it is pleasant to report that many of the salesmen who have started out are already reporting a much better feeling in their respective sections, and sending in more liberal orders than have been seen for some time.

While the speculative boom may be deplored, there is every justification for a reaaonable advance in prices, and we think this will probaby be hailed by the trade in general.

BIDDLE HARDWARE CO.

THE DAVENPORT TRADE.

Pools, trusts and combinations; consolidations, concentration and monopoly seem to be the order of the day for manufacturers of Hardware. Is this a good thing? It must be for the stockholders and officers with extravagant salaries. It may be for the owners of factories who have sold out their plants at exorbitant prices, and have received sufficient money to permit them to retire wealthy. It may not be so well for the office assistants and traveling salesmen who are thrown out of positions. It cannot be of any advantage to the operatives whose wages are reduced, or to the consumers who must now pay higher prices. The jobbers cannot be benefited, for there is practically no competition, and the arbitrary prices fixed do not leave enough profit to justify handling goods. Who is to blame? The manufacturers claim they could make no money selling their wares on an open market. Gentlemen's agreements were not always kept; hence consolidations were necessary and justifiable. Changes are not always an improvement; this change may be to the few, but we cannot think it will to the many.

There is much interest just now in the fast mail trains racing. Fortunately we have among other lines the Great Rock Island route, which seems to be in the lead so far.

Our regular annual banquet to the stockholders and employees of this company was given at the St. James Hotel, Saturday evening, January 14th; feasting, short speeches, music and dancing.

If trade continues as good throughout the year of 1899 as it has so far, we promise to close up shop and all go to Paris in 1900. SICKELS, PRESTON & NUTTING CO.

THE PORTLAND TRADE.

The year is opening with very bright prospects, and we can see no reason why the spring trade for 1899 will not be in every way satisfactory.

Prices are firmer all along the line, and as is always the case, the trade buy better on a rising market, we do not see why this year should be any exception to the rule. Certainly we have no fault to find with the outlook. There seems to be a disposition on the part of all dealers to advance their prices as soon as the market will warrant such action, and if possible make good some of the losses they have been obliged to stand while the market was declining.

Maine is having a very prosperous lumbering season, the lumbermen having sufficient snow, without any excess to impede their operations.

Collections are satisfactory, and while the inventories for the past year do not show that the jobbers have made any money, the encouraging outlook is doing much to keep up their courage. THE EMERY-WATERHOUSE CO.

THE BIRMINGHAM TRADE.

The new year starts off well and we are encouraged to look for a record-breaker and a record-maker in 1899. Expansion is the watchword, and it seems inevitable that Uncle Sam will have to change his boundaries, and the commercial world has caught some of the same spirit, and it is expanding, too. In this section we do not expect, as merchants, to send any goods to Cuba, Porto Rico or to Hawaii or the Philippines, but, while others are looking after this, perhaps they will leave us a clearer field at home,

Goodell Brothers Company,

GREENFIELD, MASS., U. S. A.

and we will look after the expansion going on around us. Our coal mines have had more orders offered them than they can take care of promptly, and still the output is unprecedentedly large and offers encouragement to investors to enter the field and open more mines. Our furnaces sold more pig iron last year than they made, and thus largely reduced stocks on hand. The real estate agents all say that there are no houses to rent and plenty people wanting them, so here is encouragement for those who have money to build more houses, and we are sure some one will take advantage of the opportunity. We are, therefore, encouraged to look for good trade in builders' supplies. The success of the American Steel & Wire Co. in gaining control of the rod and nail market, has resulted in a general advance along this line, and had the effect of strengthening all goods in iron and steel. The spirit of the age tends toward concentrating the manufacturing into a few hands, which invariably results in putting up prices. We presume the final result of such action will be to build more factories and bring in fresh competition and still further strengthen the ability to produce more than is needed, and eventually result in extremely low prices, and we thus fear that the trusts will eventually do more harm than good. There is an unwritten law more powerful than the trusts, that will tend to correct any evils they may produce in their haste to be rich. We will wait and see.

MOORE & HANDLEY HARDWARE CO.

THE PITTSBURG TRADE.

A prominent banker said to the writer lately regarding the consolidating of manufacturing interests which is going forward at such a rapid pace: "Put two weak things together and you have one that seems strong and a stock that sells at a good price; but look out—there will be a day of reckoning."

This consolidation movement has gained such impetus that it bids fair to embrace all the large manufacturing interests of the country, and, while it seems to the owners for their present advantage, a look ahead would indicate trouble. Values at time of the sell-out are, of course, inflated, and plants are old, or at best not up to the very latest improvement.

Many of the brightest and most capable managers of the absorbed concerns are thrown out of employment; capital is so abundant that it is seeking investment in any good business. The consolidated concerns having the market in their own hands for the time being will not resist the temptation to advance prices beyond a fair manufacturing profit. Take these together, viz., idle capital, capable men out of employment, a big profit shown, and new up-to-date factories will arise quickly, fully able to compete with the big concerns.

For the present, times are good and the above croak is probably unwelcome. We can see no reason why the present year should not be the best since 1892. Everything runs to big quantities now, and the jobbing house that is not well equipped to handle two or three times the amount of goods handled in the eighties cannot compete.

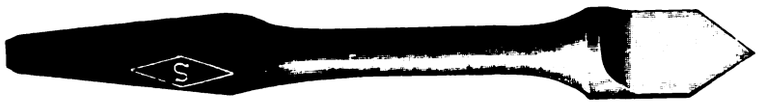
All our industries are actively employed, money plenty and confidence of good times ahead universal.

Sales of wire and nails are quite large, and jobbers who are well supplied at prices before the recent advance are dividing with their customers. The talk is of still further advance soon in these goods.

LOGAN-GREGG HARDWARE CO.

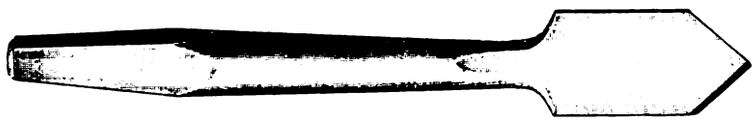
Captured War Relics.

The United States Government sold at auction on January 4 a limited number of Mauser rifles and cartridges, captured from the Spanish at Santiago, Cuba. A few of these have come into the possession of Hartley & Graham, No. 315 Broadway, New York, who offer them for sale at the following prices:



Mauser rifles and carbine (boxed), each $7.50.
Mauser cartridges, per box of fifteen, 75 cents.

A certificate of genuineness, signed by Messrs. Hartley & Graham, will be supplied with each arm. The relic hunters will not let this opportunity go lightly by.



At a recent meeting of the Hardware Merchants' & Manufacturers' Association, of Philadelphia, the following gentlemen were unanimously elected as officers for the coming year: President, James H. Ritter; vice president, Hugh McCaffrey; secretary-treasurer, T. James Fernley.

Among the recent visitors to the Hardware Club of New York was Walter Grose, who represents various Hardware manufactories, at No. 30 St. Dizier Street, Montreal, Can. Among these companies is the Plume & Atwood Mfg. Co., of New York.

New England Notes.

The calm that follows the storm is frequently its precursor; and the generally quiet condition of trade throughout New England, following upon the brisk holiday business, will probably prove the forerunner of still better conditions for the spring and summer demand.

The general advances in prices, and the probability of still further increases, are causing the future to be liberally discounted in the form of orders for future delivery ; but aside from this, trade is reported generally quiet. The labor and worry of stock-taking are about completed ; and with this over, energy is now being directed to the coming spring orders.

Butts & Ordway, Boston, call attention to their 1899 chainless wheel. This is fitted with the Sager gear, for which is claimed all the world's records from a quarter to two miles. This gear is of the roller-pinion variety ; and it is asserted will work as freely from friction when the frame is a quarter of an inch out of alignment, as when perfectly true. Hitherto this firm have been jobbers of wheels ; but this year they are selling their own product. They carry a full line of chain wheels listed from $30 to $50 ; and the chainless listed at $75.

A suggestive sign over the clock in a prominent jobbers' office reads: "We begin business at 8 o'clock." Underneath is a large slate containing the names of all employes with four columns ruled off to the right of them. At the side of the slate is a notice requiring all employes to register the time of their arrival and departure, morning, noon and evening; while another notice sets the lunch hour for each man.

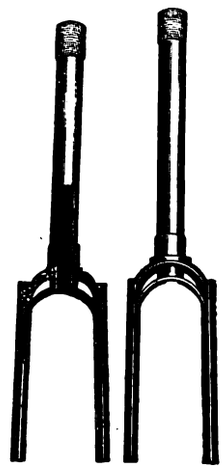
System in all things is the best safeguard against errors; and there is little doubt that the men of this office find this system as satisfactory to them, as it is valuable to their employers.

Dame, Stoddard & Kendall, Boston, call attention to Glidden's Metallic Repair Outfit; of which they are the sole agents. The principle is new; and consists of two metal discs, with screw and socket. The one which is inserted in the tire has a hinged head, which permits its insertion in a much smaller hole than a solid head would allow. The outer disc is then screwed into the other; and by drawing together they effectually form an air-tight plug. The following description is issued by the firm: "This is the smallest, neatest, most compact and practical repair outfit ever offered to the public. It will repair a puncture at once, without the use of cement, and any woman or child can use it. The plug is made of metal with a hinged head, which can be forced into a much smaller opening than one with a stationary head. Two sizes of plugs are furnished with each kit, which will fit ordinary punctures; also a cutter is furnished, to be used when the puncture is too small to admit the plug " F. A. CATON.

Boston, Mass.

Hardware in Malta.

Consul John H. Grout, writing from Malta, says: "American goods are well thought of at Malta; but, unfortunately, the representation is somewhat limited, due to a great extent to a lack of direct communication with the United States. I have had several conversations with the parties referred to, in relation to their procuring American goods for the new buildings, and have explained to them, so far as I have been able, how our flat buildings are constructed and finished and the fittings used.



" The result is that they have become interested to such an extent as to request me to procure for them illustrated catalogues and price lists of goods appertaining to the interior fitting up of buildings of the above class, and especially of door locks, hinges, bolts, window fastenings, and house Hardware in general."

He Wants to Go to Porto Rico.

We have received a communication from an active young business man who propounds the following interesting question: "Is there any way for a Hardware man to learn how to obtain information concerning some Hardware firm which will open, at present or in the near future, a branch at Porto Rico?" He wishes to obtain a position in some establishment contemplating business in the Hardware trade in that recent acquisition to American territory. He has had twenty years' experience and can furnish first class references, and builders' Hardware has been his specialty. We take pleasure in presenting his case to the trade of the country, and if a letter addressed to "T. W." is sent us, we will see that the same is placed in his hands.

"A young lady recently married entered a Hardware store at Corning one day last week," says the *Centralia Journal*, "and inquired in a very modest, unsuspecting manner of the accommodating clerk, if they 'had any jack-pots.' The thunderstruck young man promptly replied that they had coffee-pots, tea-pots, etc., but to his certain knowledge there wasn't a jack-pot in the house. As she turned to go away with downcast look, she remarked to the clerk, who escorted her to the door, that she was so much in hopes they kept them because her husband kept talking so much in his sleep about 'jack-pots,' and if she could purchase one for Christmas she knew it would tickle him to death."

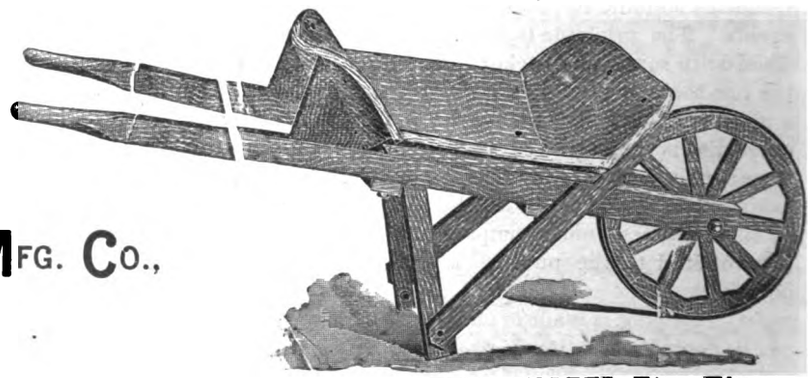
125 Beautiful Varieties in Hard Wood and Soft Wood.

Catalogue for 1899 now ready.

BALDWIN REFRIGERATOR CO.,
BURLINGTON, VERMONT.



On January 10 Wanamaker's New York store recorded the largest daily sales of Bissell carpet sweepers ever made since these famous sweepers made their appearance upon the market. On that day their sales amounted to one hundred and sixty Bissell sweepers, something phenomenal for goods of this character. The Wanamaker New York and Philadelphia stores make a handsome display of sweepers, and their fittings for their sweeper booths are quite in keeping with the refined trade they cater for.

Jim Jackson—"Whad ails yo'r wife, Abe?"
Abe Johnson—"Ingrowin' nails."
Jim Jackson—"Toe-nails?"
Abe Johnson—"No; shingle-nails. She insisted on fixin' de chicken coop hersaif an' fell off de roof wif her mouf full."—*Judge.*

With the view of lessening the labor for the traveling salesmen of jobbing houses who handle Bissell Carpet Sweepers, the Bissell Carpet Sweeper Co. have gotten up a very neat form of order blank bearing the imprint of the jobbing houses, and which would be very neat indeed for the jobbers' salesmen to carry with them when soliciting orders for Bissell sweepers. These order forms are very compact and addressed to the jobbers direct, and calling for a choice assortment of Bissell carpet sweepers which the Bissell Co. are offering for the spring season of 1899. The Bissell Co. will prepare any quantity of these order blanks on application bearing their imprint that may be requested. We should advise that you communicate with the Grand Rapids office of the Bissell Co. in regard to this matter.

Sweeper Co. vs. Sweeping Co.

The Bissell Carpet Sweeper Co. have been often addressed under different titles by people writing them for the first time. They very frequently are addressed as the Bissell Carpet Sweeping Co., and "The Hustler" in his usual monthly write-up in the London "*Hardwareman*" makes a slight reference to the difference between a sweeper company and a sweeping company, as per the following article:

"What is the difference between a sweeper company and a sweeping company? This sounds like a conundrum, but is is only what I imagine the compositor said when he was asked why, in a recent advertisement of the Bissell Co. in the pages of the *Hardwareman*, the termination "ing" appeared in place of "er." 'Tis a little thing, orthographically speaking, but so are most typographical errors, and, doubtless, compositors are often at a loss to account for the consternation their slips occasion. A sweeping company might be a very dignified and important concern, and yet I fancy, the "sweeper" company would not think its rose smelled as sweet if called by the other name. At all events as one or two have noticed the slip I thought I might take the opportunity of assuring Hardwaremen that from my latest observations the Bissell Carpet Sweeper Co. still sell sweepers and confine their own sweeping to conclusive demonstrations of sweepers! I have had a glimpse of the new warehouses into which they are soon to move, simply crowded out of No. 47 Wilson Street, and the space they expect to expand into in the new premises is—but more of that anon."

The Hampshire Cycle Co., Northampton, Mass., has gone into voluntary liquidation. A committee, consisting of C. H. Pierce, Prof. Stoddard, of Smith College, and C. E. Herrick, all of Northampton, was appointed to carry this out on a basis best calculated to protect the interests of all concerned; and the plant and good will have been purchased by Charles E. Herrick, who will continue to manufacture the Nonotuck wheel, for which this factory has become noted.

Two-thirds of all the letters which pass through the post-offices of the world are written by and sent to people who speak English. Only one-quarter of these people, it is said, use English as their native tongue. The curious circumstance is explained by reason of the fact that commercial intercourse is largely in English, even among those who do not speak the language as their native tongue.—*The Manufacturer.*

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Avonmore, Pa.—Wilson Bros.

Delhi, Ia.—E. R. Stone.

Georgetown, Ohio.—A. G. Markley.

Hamilton, Mich.—Dangremond & Son.

Harrison, N. Y.—Wm. N. Slater.

Lamar, Col.—Lamar Hardware Co.

Little Rock, Ark.—The Van Buren Hardware Co. has been incorporated with the following officers: T. W. Edmonson, president; Fred Britt, vice-president; Fred W. Palmtag, secretary and treasurer. The capital stock is $10,000.

Meridian, Tex.—Finch & Son.

New York, N. Y.—The C. M. Rice Co. has been incorporated; to carry on a general Hardware business. Capital, $15,000. Directors: C. Murray Rice and W. R. Brinckerhoff, New York City; G. D. Boles, Boston, Mass.

Parker, S. D.—Roper & Morgan.

Parkersburg, W. Va.—Louis Payne.

Stockton, Cal.—The Stockton Implement Co. has been formed for wholesale and retail Hardware business. Principal place of business, Stockton. Directors: C. M. Jackson, Frank E. Lane, G. A. Stephens, F. H. Kennedy, L. B. Snyder, Stockton. Capital stock, $25,000; subscribed, $21,000.

Stryker, Ohio.—Beucler & Norzinger.

Changes and Improvements.

Adairville, Ky.—Butt & Boyd have sold their stock of Hardware, etc., to George H. Byars.

Billings, Mont.—Donovan & Spear are increasing their Hardware department extensively, and will hereafter carry a large line of Hardware, wagons and implements. H. S. Williston will have charge of this department.

Blackstone, Va. — The Harris-Dillard Hardware Co. are just completing a very extensive addition to their building, which is now in the shape of an L, running around two other stores, and fronting on two streets.

Cameron, Texas. — Thomas, Boyles & Dobbins, Hardware dealers; S. G. Boyles retires, and the business will be continued under the firm name of Thomas & Dobbins.

Caribou, Me.—A steel ceiling has been placed in W. C. Spaulding's Hardware store, and a hard wood floor will be added in a week or two.

Cincinnati, Ohio.—The National Hardware Co. have leased the big building just next to that occupied by the E. A. Kinsey Co., on Fourth Street, west of Plum, and will occupy the new location in a very short time. The concern will remove from No. 337 Main Street.

East Winsted, Conn.—Joseph L. Carroll, for eleven years the chief clerk in the Hardware store of M. H. Tanner & Co. on North Main Street, has bought the store and taken possession of the establishment.

Evanston, Ill.—Peterson & Lemoi, Hardware dealers, No. 1006 Davis Street, have dissolved partnership. P. A. Lemoi has taken entire control of the business, but his former partner, N. G. Peterson, will remain as an employee.

Groesbeck, Texas.—The firm of Finn, Fowlkes, Williams & Co., Hardware, has been dissolved by mutual agreement, Messrs. Finn and Fowlkes returning to Seymour, whence they came two years ago. The business will be continued by Williams & Pringle on a smaller scale.

Hutto, Texas.—Oats & Christian, Hardware, have consolidated with C. R. Stevens.

Lake City, Iowa.—George Wilbur, Jr., has sold his Hardware store and will move to Gladbrook.

Lockhart, Tex.—The Hardware firm of Bowden & Bowden has been dissolved by mutual consent, Mrs. Mollie Bowden having sold her interest in the business to E. L. Bowden, who is now sole proprietor of the extensive establishment.

Nashville, Mich.—The Hardware firm of Mitchell & Young has undergone a change, and Glenn H. Young is now at the head of the establishment, the firm being Glenn H. Young & Co.

Nichols, N. Y.—C. S. Drake and Henry A. Latham have formed a co-partnership to carry on a general Hardware business, and have leased the store at No. 15 Main Street, formerly occupied by D. J. Smead as a harness shop. This building will be repaired and an addition 16 feet long will be built on the rear. The firm expects to begin business on April 1st next.

North Long Branch, N. J.—Cook & Ketell have branched out into the stove business.

Oneonta, N. Y.—Brown & Ward, Hardware dealers, have dissolved partnership. Mr. Ward retires, and Mr. Brown continues the business.

Omaha, Neb.—The Lee-Clarke-Andreesen Hardware Co. have changed their name to the Lee-Glass-Andreesen Hardware Co.

Oskaloosa, Kan.—Critchfield & Co., Hardware, succeeded by Cochrill & Danner.

Packwood, Iowa. — Cline & Bradfield have sold their Hardware business to Baker & Co.

Punta Gorda, Fla.—The firm of Earnest & Co., dealers in Hardware and groceries, has been dissolved. E. M. Morgan continues the business as sole owner.

Sabetha, Kan.—The old established Hardware firm of Hook & Slosson have dissolved partnership, after thirteen years of business life. A. D. Hook will continue the business at the old stand.

Terre Haute, Ind.—Freitag & Weinhardt, who have been engaged in the plumbing, steam and gas fitting and hot water heating business, have decided to go into Hardware, making builders' Hardware a specialty.

Tunkhannock, Pa.—The Mills Hardware Co. will move to Sayre.

Washington, Iowa.—George Stewart & Co., Hardware, succeeded by George Stewart.

Zanesville, Ohio.—George Gray, of Coshocton, formerly of the firm of Richards & Gray, of this city, has purchased the entire Hardware stock of W. A. Fillmore. Mr. Gray will remove the goods to Coshocton.

Business Embarrassments.

Chicago, Ill.—John Schroeder, dealer in Hardware, paints and oils, at Nos. 4187-4189 Halsted Street, has made an assignment to William K. Pattison.

Quincy, Ill.—John J. Grant, Hardware, has failed. The liabilities and assets unknown.

Ripley, Ohio. — J. Chambers Leggett, Hardware merchant and capitalist, has filed a deed of assignment to L. H. Williams.

Tiffin, Ohio.—Bloom Bros., Hardware, have made an assignment to Rush Abbott. The assets and liabilities are unknown.

Fires in Hardware Stores.

Carthage, N. Y.—John Rogers & Co.'s Hardware store has been destroyed by fire.

Evanston, Ill.—Connor & Arnold's Hardware store has been destroyed by fire. Loss $8000; insurance, $6000.

Galion, Ohio.—Henry Helfrich's Hardware store has been damaged by fire. Loss, $3000; insured.

Granger, Iowa.—Caylor & Fox's Hardware store has been destroyed by fire.

Holliston, Mass.—Adams & Co., Hardware, destroyed by fire; loss, $3000.

Holyoke, Mass.—E. D. Wells & Co., Hardware, damaged by fire and water.

Homestead, Pa.—Baker & Oskin's Hardware store has been destroyed by fire following an explosion. The loss is estimated at $30,000; partially insured.

Itaska, Tex.—J. R. Thompson & Sons' Hardware store has been destroyed by fire.

Jacksonville, Fla — The S. B. Hubbard Co.'s Hardware store has been damaged by fire.

Ortonville, Minn.—Geier & Stark, Hardware, damaged by fire at a loss of $5000; insured for $1000.

Pemberville, Ohio.—Keil & Son's Hardware store has been wrecked by a gasoline explosion.

Port Huron, Mich.—S. L. Boyce & Sons' Hardware store has been damaged by fire.

West Lorne, Ont.—Westcott's Hardware store, damaged by fire.

Burglaries in Hardware Stores.

Cherry Valley, Ill.—T. M. Lee, cutlery.

Dayton, Ohio.—A. Bretch, small loss.

Elkhart, Ind.—Wm. H. Brugger, $25.

Fredericksburg, Ia.—N. J. Douglass, $50.

Glencoe, Minn.—L. P. Albrecht, $15.

Inwood Iowa.—Anderson Bros., revolvers.

Ladonia, Tex —Drake & Miller, pistols.

Lott, Tex.—J. M. Foster, revolvers.

Moline, Ill.—John Koch, $200.

New Waterford, Ohio.—H. M. Little, $500.

Philadelphia, Pa.—McMurray & Co., $50.

Salt Lake, Utah.—Wheelwright Bros., revolvers.

Grand Rapids, Mich.—The Michigan Iron Works has been incorporated by W. T. Powers, Frank A. Richards, F. C. Powers, Fred W. Powers, C. H. Gleason, A. L. Banks, J. W. Spooner and C. W. G. Everhart; to manufacture and deal in machinery, tools and mill supplies. Capital stock, $50,000.

Kansas City, Mo.—A new manufacturing plant is to be operation in this city as soon as its building, at First and Holmes Streets is finished. This is Warner, Brown & Long, and it will make handles of all kinds for hoes, axes, picks and other farm, garden and household utensils. Oak and hickory will be the principal material used. The firm will manufacture also, singletrees, doubletrees and breast yokes for wagons.

Kittery, Me.—The Davies Refrigerator Co. has been incorporated by F. J. Hutchinson, F. E. Powell, R. J. Davies and T. J. King; to manufacture refrigerators. Capital stock, $5000.

Los Angeles, Cal.—The Percival Iron Co. has been incorporated by J. F. Percival, O. B. Haskell and W. A. Guthrie. Capital stock, $65,000.

Marion, Ind.—The Marion Scale Co. has been incorporated by B. F. Burke, L. P. Halladay and M. M. Burke; to manufacture scales. Capital stock, $20,000.

Meridian, Miss. — The Martin Machine Works has been incorporated by E. J. Martin, R. C. Smith, C. F. Weatherbee, C. C. Kamper, C. M. Hodges, C. M. Rubush and others; for the purpose of operating machine works. Capital stock, $15,000.

New York, N. Y.—The Kelleher Steam Heating Co. has been incorporated by Geo. Lyman, J. H. Wellwood and H. H. Kelleher. Capital stock, $10,000.

New York, N. Y.—The Supreme Stove & Furnace Co. has been incorporated by A. G. Denniston, J. E. Wheeler, C. Warburton; to manufacture stoves, furnaces, etc. Capital stock, $500.

Oshkosh, Wis.—The Davis-Hansen Co., manufacturers of pumps, cylinders, tools, implements and machinery, located just north of the city near the Chicago & Northwestern tracks, is now a corporation. Articles of incorporation have been filed with the register of deeds, with a capital stock of $25,000. The incorporators are: C. W. Davis, H. C. Hansen and B. E. Van Kuren.

Penn Yan, N. Y.—The Penn Yan Basket Co. has been incorporated. Capital, $10,000. Directors: John H. Kenny, Geneva; Edward Lynch and G. S. Sheppard, Penn Yan.

Radford Va.—The Radford Foundry & Machine Works has been incorporated by W. J. Kenderline, J. G. Osborne, W. T. Baxter, M. M. McGhee and Chas. Ross; to manufacture casting and iron work. Capital stock, $5000.

Sacramento, Cal. — The Union Scale & Mfg. Co. has been incorporated by Robert C. McCreary, Frank Smith and others; for the purpose of manufacturing and dealing in devices and machinery of every kind. Capital stock, $100,000.

St. Louis, Mo.—The Rowley Lac, Varnish & Blacking Co. have filed articles of incorporation in the recorder's office. The capital stock is $12,000. W. H. Rowley holds seventy shares; E. A. Jennings, forty, and T. G. Brooks, ten.

Torrington, Conn.—The Union Hardware Co., manufacturers of skates, are to establish a skate factory in Canada, of which Frederick Hoerle, of this city, will be superintendent. A site for the plant has been selected about three miles from Montreal.

Troy, N. Y.—The Gold Coin Stove Co. has been incorporated. The articles name Troy as the head office of the company, and the directors for the first year are: Esek Bussey, Charles W. Macy and Esek Bussey, Jr.

Changes and Improvements.

Batavia, N. Y.—W. L. Colville severed his connections the first of the year with the United States Smokeless Powder Co., having accepted a position with E. I. Du Pont de Nemours & Co., Wilmington, Del., and will represent their smokeless and other powders this year. He will continue to have an office here for the administration of the DuPont Co.'s affairs.

Chillicothe, Mo.—The Dain Mfg. Co., it is reported, will erect new implement plant.

Danbury, Conn.—The T. & B. Tool Co.'s plant is being removed from New Bedford, Mass., where it will be consolidated with the plant of the Morse Twist Drill Co., by which company it has been purchased.

Hamilton, Ont.—The bolt works of the Grand Trunk shops will be moved to Montreal, Canada.

Lynchburg, Va.—George P. Watkins, J. Gordon Payne, H. E. McWan, William Hurt, R. T. Watts, James R. Gilliam and several other Lynchburg capitalists have jointly purchased the Norwich Lock Works, at Roanoke, and may bring the plant to this city and operate it here. This enterprise, which has extensive buildings at West End, a suburban addition to Roanoke, was moved there in boom days from Connecticut, and for a time employed a large number of men.

Providence, R. I.—All the foreign property of the American Screw Co. has been disposed of finally, the Canadian plant at Hamilton, Ont., having been sold quite recently. The plant at Leeds, England, had already been disposed of.

Rock Island, Ill.—The Moline Plow Co., on account of a rush of business, have leased the old Downing foundry on Ninth Street from Morris & Lewis, and will operate it the rest of the season.

Seattle, Wash.—The Union Iron Works has increased capital stock to $60,000.

Toledo, Ohio.—The Lucas Pump Co., of Des Moines, will locate here. It will employ 350 men and $200,000 capital.

Toledo, Ohio.—The Toledo Tinware Co. has increased its capital stock from $50,000 to $150,000. The company will embark in a more extensive business.

Recent Fires.

Cowan, Ind.—The large washing machine factory of W. H. Neff has been almost totally destroyed by fire. The loss will probably reach $10,000, with about $3000 insurance.

Greensburg, Pa.—The Greensburg Nut & Bolt Works, damaged by fire at a loss of $20,000; insured for $8500.

New York, N. Y.—The top floor of the six-story building, Nos. 11 and 13 Hubert Street, occupied by Ginna & Co., manufacturers of tinware, has been destroyed by fire, entailing a loss on the building and its contents which is estimated at $40,000. The origin of the fire is unknown.

Sherbrooke, Quebec.—The main building of the Gardner Tool Works has been destroyed by fire.

Miscellaneous.

Bowling Green, Ohio.—The stockholders of the American Foundry & Machine Co. held a meeting recently and elected the following directors: J. R. Hankey, J. C. Hickox, L. Black, J. H. Whitehead, A. E. Royce, J. O. Troup and J. C. Lincoln. The direcors organized by electing the following officers: President, J. R. Hankey; secretary, J. G. Hickox; treasurer, A. E. Royce.

Miscellaneous.

Grand Rapids, Mich.—The Pontiac Wheel Co., a new organization, has elected these officers: President, Dr. A. B. Avery; vice-president, Charles Going; secretary and treasurer, Abe Lull.

The Spoon in History.

The custom of collecting spoons of various dates and designs is one that greatly obtains with curiosity hunters, says the London *Sketch*, and from cobwebby antiquarian to contriving hostess the spoon of authentic pedigree is equally interesting and covetable, in one case for its inherited history, and the other for its added ornamental "value" to the dinner table. Old baptismal spoons are especially treasure trove to the collector, and some relics of ornate Tudor times, which were lately unearthed in a Wiltshire village and sold in King Street, fetched the most extraordinary prices.

It is curious to think that the only instrument our forebears fed themselves with was the spoon—and as entertainers in those days were not required or supposed to provide their guests with such out-of-the-way luxuries, each man brought his own in his pocket.

As soon would a lady or gentleman of quality think of travelling without a spoon case in the days between Henry VIII. and James I. as we moderns would be likely, on railway journeys, to go without watches. All persons, then, received spoons from their godparents, more or less ornate, according to the means of those worthy folk, the most ordinary shape being the Apostle handle; but in old Catholic times various sacred objects and legends were commonly engraved thereon with great elaboration.

It was a Somersetshire squire, one adventure-seeking Tom Coryate, who finally delivered England from being altogether spoon-fed, and gave it over to the enlightenment of forks. This was when James I. was king, and when few of his subjects moved out of their own country for pleasure, "the grand tour" being still unknown, and beyond Channel an undiscoverable land to most true-born Britons.

Master Coryate, a *bon viveur* and lover of sights, did his devoirs of sight-seeing with a thoroughness not always possible of repetition to ears polite. At Cremona he ate frogs, at Heidelberg drank wine from a great cask, at Venice saw for the first time women on the stage. Here he also saw some less orthodox others, whose high-heeled shoes (chopines) especially enthralled the receptive man from Somersetshire.

For Sale.

A NICE, clean stock of Hardware, located in one of the largest and most thriving towns in New England, is offered for sale on account of the owner's poor health. The business has been established twenty years; is in the best location in the town, and in a thrifty condition. The stock will invoice at about $10,000. To a party with the cash it offers a splendid opportunity. Address A., care HARDWARE, No. 143 Chambers Street, New York.

FOR sale—Patent and right to manufacture a globe pattern toy bank, very secure, novel construction and attractive; a good thing for the right party. Address A. K., No. 57 Rose Street. Newark, N. J.

FOR SALE—A clean, up to-date stock of Hardware, well assorted; good location; cheap rent; in an Indiana gas town of 25,000 inhabitants; plenty of factories and hustle. Will invoice about $5000. No better town in United States. Address H., care HARDWARE, No. 143 Chambers Street, New York.

A COMPLETE stock of Hardware, saddlery, stoves and tinware. Business well established in a live town and prosperous country. Address A. B. C., care HARDWARE, No. 143 Chambers Street, New York.

Agency Wanted.

MANUFACTURERS of a good staple article or popular specialty whose prices can meet competition, and who will entertain the subject of representation in New York and vicinity, will find it advantageous to correspond with subscriber, whose firm may prove suitable in experience and repute, and would make arrangement mutually profitable. EDWARD CHARLES, care HARDWARE, No. 143 Chambers Street, New York City.

LIVE man (29) desires to represent manufacturers of small lines and specialties, suitable for the Hardware and house-furnishing trades. New York and vicinity. For particulars, address WM. SMITH, No. 718 Chauncey Street, Brooklyn, N. Y.

Agency Offered.

WANTED agents to handle a patented, labor saving device of universal sale; investigation solicited by men who desire quick returns from a legitimate, profitable business. Address (C) BURR MFG. Co Cleveland, O., 823 Society for Savings.

European Agency Offered.

GERMAN, with twenty years' experience in Europe and United States, at present established in Eastern city, intends to return to Europe as agent for American manufacturers. Familiar with English, French, German, Italian and Spanish; has good connections in all European countries. First-class references. Answer E. C. W., care HARDWARE, No. 143 Chambers Street, New York.

An Opportunity.

OWING to withdrawal of estate interest in a long-established wholesale and retail Hardware business in one of the best New England cities, a connection is desired with some man of capital capable of taking charge of the financial and bookkeeping department of the business. For particulars, address INTEGRITY, care HARDWARE, No. 143 Chambers Street, New York.

Notice to Manufacturers.

I AM ARRANGING a trip to the Hawaiian Islands, Philippines and, possibly, Japan. I wish to carry, as manufacturers' agent, a number of lines of goods which will be in immediate demand. I have had a business training of wide scope which has fitted me for such work. I am a young man of exemplary habits, and can satisfy the most conservative with references. Should you be interested in this territory, and think I can do you good, I solicit your correspondence. S. D. WHITE, No. 315 Fulton Street, Peoria, Ill.

THE undersigned wishes to correspond with good parties who can do machine work on light malleable castings in quantities. Address JOHN NICHOLSON, Hardware dealer, Belmont, N. Y.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"GREAT VALUE AS AN ADVERTISING MEDIUM."

Buck Bros., Millbury, Mass. [*Tools*]: We appreciate the great value of your paper as an advertising medium.

Digitized by Google

BUTCHER KNIVES.

You can't make good Butcher Knives any more than good bread without the right material to work with, and even if you have the proper material you can't make good Knives if you don't know how to manipulate that material. . . . . .
The Steel that goes into Goodell Butcher Knives is made for Goodell Butcher Knives and is found in no others. It is the same we have used for years. . . . . .
A Quarter Century experience has taught us how to manipulate that steel to produce the best results.

No. 46.

5, 5½, 6, 6½, 7, 8, 9, 10, 11, 12, 13 and 14 inches.

Goodell Knives have a reputation and are Warranted.

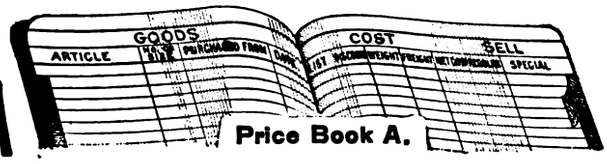
"USEFUL AS AN ADVERTISING MEDIUM."

Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.



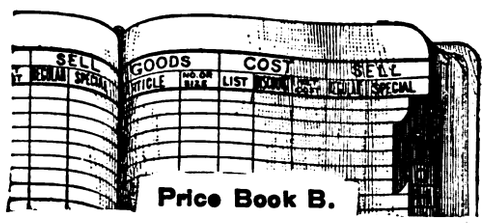
Digitized by Google

HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

A



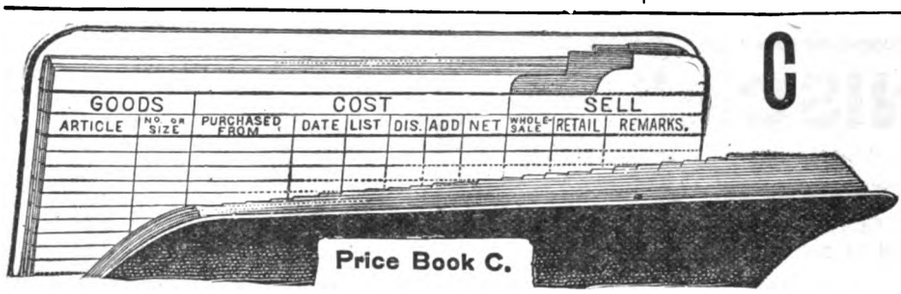
Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75

B



Price Book B.

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

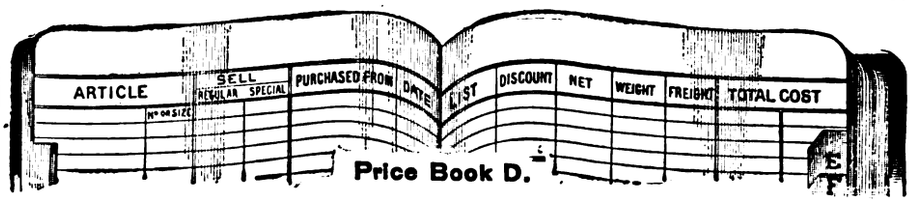
B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

C

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¼ inches.***

FOUR EDITIONS:



C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

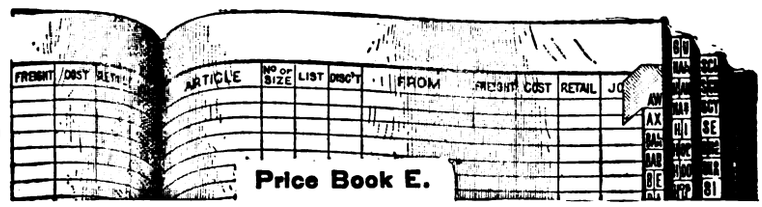
Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2.50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50

D

Price Book D.



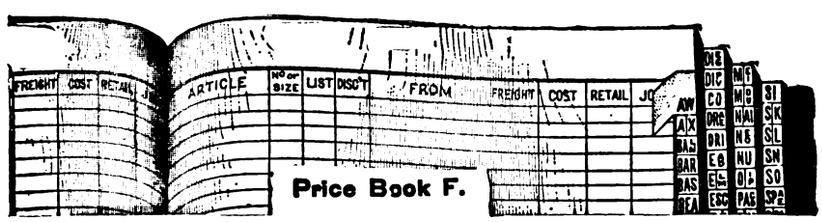
MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to **AU** For Chisels, turn to **CH$_{U}^{I}$** For Iron, turn to **IRO**
" Parers, Apple " **PA$_{R}^{P}$** " Cutlery, " **CUT** " Irons, " **IR'S**

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

E



Price Book E.

AD	GU	SC$_{O}^{I}$	
AN	HA$_{M}^{M}$	SCR	
AU	HAN	SCY	
AW	HA$_{T}^{S}$	SE	
AX	HI	SH$_{E}^{A}$	

Fac Simile of Indexing.

Price Book E—350 pages, 7 x 10 inches, canvas tab indexing. Price, $5.00.

F

Price Book F.

AD	DI$_{G}^{E}$	M$_{I}^{F}$	SI	
AN	DI$_{V}^{P}$	M$_{U}^{O}$	SK

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

HARDWARE

VOL. XVIII FEBRUARY 10, 1899. NO. 9.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.

EASTERN MANAGER:
FRED A. CATON, - - 31 Milk St, Boston.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Changes in prices are constantly being promulgated and every dealer begins to feel as though his stock of goods was once more in a proper shape on which to anticipate profitable results.

The large buyers, of course, have already protected themselves, in a way, by booking their anticipated wants for the coming season, as near as possible to the lowest quotations that were current before the boom began; with each successive advance their complacency has been strengthened and their eagerness for an early delivery made positively sure, has daily increased.

The manufacturers are in a condition where in consequence of their order books being filled with requisitions for their wares taken at low prices, every new discount sheet showing advances in prices seems to benefit the jobber more than themselves, the influence on their business being in the future; but the best effect expected from the present state of affairs is, that later in the day the trade will be prepared to purchase at a nominal advance, and the turn in the tide of industrial prosperity will be felt and realized for the first time in years.

This diversity in prices, as compared with a few months ago, is of a character easily explained and intelligently accepted. The largely enhanced values of all the many and various metals entering into their manufactures is information widely known, and its effect upon the Hardware market readily understood. This has the effect of making the usual objection on the part of buyers to any increase in cost, much milder in statement and less strenuous in settlement than has usually been the case.

It is natural to expect that consolidations of competing interests of a character like that of the American Steel & Wire Co., controlling so completely the output of a product so greatly in demand, should keep up a well-developed fear of their power in making small but frequent changes in quotations, and the formation of rigid rules which compel the laying in of larger stocks than usual, in order to avoid the compulsory warehouse conditions by which the manufacturers for so long a period have carried the stocks for the dealers. With every change in price at which orders are booked, a new price in a few days enables the dealer to see an additional profit, and creates a feeling of satisfaction that he is ahead of the game just that much.

Business appears to be at present in a condition of healthy activity. Stocks having been in a contracted state for inventory purposes, the demand to make them full and complete anticipatory of a lively Spring trade, is honest and genuine. The prospect of a constantly higher range of prices before the buyer makes that important individual, just now, stop the usual bluffing and get down to business, otherwise he will miss an occasional "something to his advantage."

It is a very poor time for long correspondence regarding such goods into which copper, tin, lead and spelter enter largely, as the fluctuations upward in those metals especially, have been of a trade-demoralizing character, the fear constantly prevailing that goods may be sold by the dealer at a profit-bearing price at which perhaps it would be difficult to replenish his stock.

While many goods enumerated among iron and steel wire products have been held very steady under augmenting orders at prices slightly stiffer than had heretofore ruled the market, the strong probability remains that prices named this month by the American Steel & Wire Co. will furnish a good reason for insisting on higher prices all around in these goods. New quotations based on conditions like these create a lively demand for full stocks of goods, but under a pressure to shade the current quotations, largely in the interest of the purchasing jobber, who is willing for the first time in a long while to place on his shelves a full season's stock, the impetus which is given by these conditions for full stock purchases, will prove the one thing needful to bring the trade back to its former conditions of health and prosperity, and will produce satisfactory business relations with the rejoicing manufacturer that will make it unnecessary for the latter to make the competition so hot over the territory legitimately covered by the jobbers' representatives.

Two Bills.

There are two bills before Congress which are so pregnant with results to our commerce, that they rank with the appropriation bills and those applying to our army and navy and foreign relations, and under no circumstances should fail to pass at this session. We mean the Merchant Marine and the Nicaragua Canal bills—twin sisters in carrying our flag and our products to all parts of the world. They are bound to come, and why should not the present Congress have the credit of passing them? It has been a great Congress. Without regard to party it pressed a humanitarian war issue to the front, temporarily multiplied the army ten-

Digitized by Google

fold, supplemented the navy with an improvised marine militia and passed a war revenue bill which created the revenue to pay for it all. Now let it crown its achievements in war with two measures which will make our success in peace equally notable. It is no time for indulging in party traditions or petty statesmanship. The Merchant Marine bill is the result of the best thought of the best minds on that subject. The Morgan Nicaragua Canal bill is equally so as regards that measure. Neither is entirely satisfactory to all the various factions and interests. Some think the Merchant Marine bill does too much for some interests —some too little. Some would wipe out the pioneers who put their money into digging the transcontinental ditch which will unite the great waters of the Atlantic and Pacific oceans. Such objectors are petty partizans and are unworthy of a nation which is destined to lead the world in the march for commercial supremacy. For the first time labor and capital seem to be in unison for these great industrial measures. The National Board of Trade, the Manufacturers' National Association, the United States Export Association, the National Federation of Labor, and the Knights of Labor are a unit on these measures, which will keep our mills and factories running and furnish continuous employment for American labor and American capital. Capital, which is proverbially timid, has hitherto held back from marine and foreign investments because the risks were too great. It is now ready to try them. Shafter, Merritt, Wheeler, Lee, Roosevelt, Dewey, Sampson Schley and other Americans, down to "the men in the engine rooms" and "behind the guns," have been doing their part. Will the Fifty-fifth Congress discourage the present disposition to go ahead and lead the nations in the world's industrial march? We don't believe it will.

Go Slow!

On some goods the advances would seem to be too rapid and frequent to prove of permanent benefit until after the cheaper bought stocks are out of the market. There is always a temptation on the part of the wholesaler to cut the current prices of the manufacturer when opportunity is given; and the manufacturer has a similar temptation in preferring to hold back delivery on stocks booked at old prices, while he, on his own account, is filling more recent orders taken at a comfortable advance.

Should the upward trend in prices have no solid justification, the trade soon discovers it, and the rapid unloading of any excess of their normal stocks by the jobbers soon demoralizes an otherwise satisfactory state of business that should never have known any such alternative. Let us hope that the encouraging outlook of to-day for steadying a trend in trade that for many seasons past has been holding orders back for a constantly recurring lowering of prices, has passed away for good, and that stability in prices and honesty in business methods will govern the markets of the future.

The Ames Sword Co., Chicopee, Mass., have issued a four-page leaflet illustrating and describing their specialties, among which are mentioned front forks, rear forks, rear stays, handle bars, seat posts, bicycle revolvers, Perfection bicycle padlocks, endless silk sewed polishing belts, etc. The articles are nearly all illustrated.

"Before Taking" and "After Taking."

We refer to what our friends, the blacksmiths and horseshoers "take." Strong things are in their line, and one of their strongest is their chief tool, the horse rasp. The Kearney & Foot Co., the file makers, have had much experience with this trade and have friends by the thousand in it. There is no harder friendship to make than with our muscular friends who have stood for so many years "under the spreading chestnut trees," and there is no clan more loyal and steadfast when once gained as a friend. The Kearney & Foot Co. vouch for this, as it has been their experience during the past fifteen years, for which they have been in touch with the horseshoers with the K. & F. horse rasps. The reputation of these horse rasps has made an almost infinite number of horse rasp users much better physically, financially and morally (no "cuss" words are heard when K. & F. rasps are used), "before and after taking" the K. & F. rasps.

The "secret" of the popularity of these goods is found at the factory. It is, because the rasps are uniformly correct—the steel is the best rasp steel that can be procured, and the same stock has been used continuously for years, hence, a familiarity with its working on the part of all the file men coming in contact with it—the forger or shaper, the "cutter" and "puncher," the temperer, all being most important parts of the "secret."

The Kearney & Foot Co. are glad at any time to quote prices on these rasps. Their office is at Nos. 100 and 102 Reade Street, New York. The rasps are made in two factories, at Paterson, N. J., and Kent, Ohio.

The Warren Goods are Photographed.

The J. D. Warren Mfg. Co., Masonic Temple, Chicago, Ill., who describe themselves as "expert designers of Hardware shelving and correct arrangement of stock"—which description is adequately carried out by the appearance of stores in which they have been let loose to do their will—have complimented *Hardware* by the presentation of a handsomely framed representation which is called "The Hardware Merchant's Dream Realized." This shows, in something short of life-size, specimens of Warren's patent glass front drawer sectional Hardware shelving, which is manufactured in interchangeable sections of exactly the same length. It is needless to go into detail as to the various boxes, shelves, drawers, cabinets, etc., here displayed, as there is probably not a Hardwareman in the country who has not seen some establishment fitted up in an artistic and high-class manner with these latest productions of modern art.

A New Putnam Nail.

In order to meet the demand for a first-class nail with a sharp point, the Putnam Nail Co., Neponset, Boston, Mass., have put upon the market a Hot Forged Nail made by the same process and of the same material as the celebrated Putnam Nail, but with a sharp point and stiff blade instead of it being hammer-pointed.

We understand that it has proved to be a good seller, the treasurer informing us that they are at present working on advance orders.

The Cleveland Stone Co., Cleveland, Ohio, always hit the mark when anything original is desired in the way of advertising material. Their latest hanger illustrating the Schofield Bi-Treadle Grindstone, is amusing, satisfactory, and, above all, instructive. It shows a descendant of one o the chiefs of the Philippine Islands, presumably, engaged in putting a fine edge upon his employer's saw, and with the aid of this bi-treadle, the work is being so easily done that the saw is receiving deeper teeth than was expected or intended. The hanger is handsomely finished in colors, and makes a very attractive addition to any store.

A "HARDWARE JODDERS'" NUMDER.

OUR ANNIVERSARY ISSUE OF APRIL 10, 1899, WILL BE DEDICATED TO THE

HARDWARE JOBBERS OF AMERICA.

It will be Handsome, Artistic, Timely, of Permanent Value, and will go into the hands of the Jobbers of the World.

On April 10, 1898, the Eighth Anniversary of the founding of *Hardware*, we published the largest, handsomest and most artistic number that was ever presented by anybody, anywhere, to the Hardware trade.

It was devoted to the Hardware Associations of America; was read by everybody; went into every corner of the globe; was laid away for preservation and future reference by the majority of its readers; and won golden words of commendation from the trade.

This great number is to be duplicated on our Ninth Anniversary of April 10, 1899.

The special branch of the trade to which it will be devoted may be learned from the following title, which will appear upon the cover of that issue:

"HARDWARE JOBBERS' NUMBER."

This seems to us to be the most timely subject that can be chosen, now that the questions touching upon the jobbing trade are being so generally discussed, and so many points continually raised as to the exact status of the jobber before the trade; the extent of his influence; his proper sphere of endeavor; his relation to the manufacturers on the one hand, and to the retailers on the other; his restrictions, and the temptations that beset him in securing trade; and various other points of vital importance that touch upon his very existence, and relate to his status in the future. All these questions, and many more that will readily present themselves, will be fully discussed by men competent to speak for the trade, and who have given serious attention to the themes upon which they have promised to write. Among the many subjects which will be discussed, the following may be named:

"The Hardware Jobber: Has he a Business Future? Is he here to Stay?"

"The Present and Future of the National Hardware Association."

"The Ethics of the Jobbing Business."

"The Hardware Jobber as a Man and Brother."

"The Jobber from the Manufacturer's Standpoint."

"The Manufacturer from the Jobber's Standpoint."

"The Jobber from the Retailer's Standpoint."

"The Retailer from the Jobber's Standpoint."

"The Western Jobber."

"The Eastern Jobber."

"The Southern Jobber."

"The Northern Jobber."

"The Central Jobber."

"The Pacific Coast Jobber."

"The Canadian Jobber."

"The Past of the National Hardware Association."

"Other Hardware Jobbers' Associations."

"The Package and Cartage Question."

"Restrictions as to Jobbing Territory."

"How Does the Jobber's Future Look to a Man in the Corner?"

"Syndicate Buying."

"Fraternity in the Jobbing Trade."

Etc., etc., etc., etc., etc.

In the preparation of our anniversary number of last year, we received the cordial assistance and support of the trade everywhere, and the congratulations which were showered upon *Hardware* for its successful venture into this practically new field, were an ample compensation for the labor and expense involved.

We have already received sufficient assurance that this second endeavor upon the part of *Hardware* will be most earnestly appreciated and endorsed by the trade. We should be pleased to hear from our friends everywhere with such advice, suggestions or information as they can offer for the successful realization of the purpose we have in view.

Hardware Notes by the Way.

Business is opening up auspiciously, is the general verdict. The country demand is not as large as was expected by the early rushers, especially not in the wheat-growing sections, for the farmers still hold about 60 per cent. of their grain for higher prices. The grain movements once begun in earnest, the country trading centers will become hives of activity.

The leading pump manufacturers of the United States held a secret conference at Cleveland during the month. They refused to be pumped by the newspaper reporters as to the object of their meeting. As combines are the order of the day, a pump combine would not be in the nature of a surprise.

The jobber is to encounter a new contretemps on the eve of the twentieth century, namely the selling of manufacturers direct to the retail trade. This feature has always existed in some form without causing disturbance, but it is now developing into an evil. The causes are not manifold at a glance, because they underlie modern conditions. As yet they are in the nature of a disaffection between jobber and manufacturer, the former laying the charges of discrimination, bulldozing and cut-throating at the door of the manufacturer, while the manufacturer charges the jobber not only in kind, but frequently classes him as a trifler who must be dealt with accordingly. There has been so much trouble between jobbers and certain manufacturers of late, superinduced by real and fancied causes, the latter were compelled to seek the retail trade direct if they wished to remain in the market. Doing this, the manufacturer must sell low, for the retailers are generally posted, and have the manufacturer at their mercy. The final result is open animosity which not infrequently ends in the defeat of the manufacturer. It, therefore, behooves the manufacturers to maintain the *entente cordiale* between themselves and the jobbers.

The manufacture of nuts by modern process has always been considered a curious achievement, and interested onlookers could ever be found about a nut works where strikers' barricades did not obstruct the sight. But now there is even a difference between the nut machine of yesterday and to-day. The machine of yesterday required four movements in the perfection of a nut, that of to-day only two. One of these machines was recently exhibited in the window of a large Ohio jobbing house, and was kept in operation during shopping hours. It was the wonderment of all beholders, even in its experimental stage. But the machine is a success, and a Buckeye success at that. The question again arises, what's to be done with the operatives it will displace?

When business is slow, advertise the more, is the precept of the master, but it finds few followers in the elementary school of advertisers. When business is good, it is no trick to induce business men to advertise. Thus, '99, with its grand business outlook, ought to be a prolific advertising year.

The manufacturer who egotistically proclaims to the world that his goods sell themselves and need no advertising, will learn at some unfortunate hour that his competitors have advertised him out of competition.

A Western Hardware house bought a large consignment of high class pocket knives, and not finding a ready market among the retail trade, decided to close them out at retail themselves. Every one of those knives was worth a dollar of any man's money, but the firm placed the price at 75 cents all round. This is more than the average buyer would pay for a knife, but this firm succeeded to close out the entire holding at the price named. They went about it scientifically; announcements, merits and demerits were so clearly expounded that the public became at once interested. At the store these merits and demerits were practically demonstrated by knife mechanics. The man with only a quarter to invest went out and raised two more quarters, so striking were the arguments and exhibits.

No man is a magnet without surrounding himself with the elements of magnetism. The most powerful magnet that lies obscure on your shelf is no magnet at all unsold.

Cleveland, February, 1899. J. B. RINDFLEISCH.

"File Filosophy."

"File Filosophy" is the subject of a dainty and at the same time very practical booklet just issued by the Nicholson File Co, Providence, R. I. It treats briefly, and yet comprehensively, of the general classification of files and definition of file terms; the proper methods of handling and using files so as to secure the best results; and a description of the most common files and the ordinary uses to which they are applied, and for which they are best adapted. It thus covers all the points which most interest and concern file-users, and will be found by them a most readable and valuable book.

The book is really an abridgment of the Nicholson Co.'s "Treatise on Files," which was published in 1878, and which has always been accepted by the craft and trade in general as authority on all matters pertaining to files. This treatise is the foundation of much which has been written or spoken about files since its publication, and by adhering to its substance the Nicholson Co. wisely concluded that they would make the "Filosophy" of most service to the file-users of the world. It is in response to a continued demand for this "Treatise," now out of print, that the present "Filosophy" is published. The matter is carefully compiled and edited, illustrated with helpful plates, and altogether affords a most valuable addition to the body of popular literature on scientific subjects. Moreover, its brevity and convenient size render it the more acceptable.

It is a book which all interested in files will do well to procure, and may be had upon application to the Nicholson Co.'s main office in Providence.

The Late John C. Holden.

The sudden death of John Carleton Holden, senior member of the firm of Holden & Robinson, Hudson, Mass., came as a shock to the members of the Hardware trade of Boston. Mr. Holden, whose genial, whole-souled temperament had won him hosts of friends, and had endeared him personally to his business associates, died at his home on Tuesday, January 31st, after an illness of less than one week. Capillary bronchitis, aggravated by other complications, broke down, in this short time, a constitution which promised a long and useful life. The deceased was still in the prime of life, being only forty-six years of age, and was one of the most popular men in the trade. As a token of respect and sympathy to the bereaved family, all business houses in Hudson closed at noon on the day of interment, which occurred at 2 P.M., Friday, February 3rd, and most of the prominent Hardware firms of Boston were personally represented at the obsequies.

The late Mr. Holden was one of the most active members of the New England Hardware Dealers' Association, and his loss in this circle will be severely felt. He was also a member of the following lodges and associations: Doric Lodge, F. and A. M.; Houghton Chapter, R. A. C.; Trinity Commandery, K. T.; Aleppo Shrine, Boston; Hiram Council, R. A. C., Worcester; Hudson Lodge, I. O. O. F.; King Saul Encampment, I. O. O. F., Marlboro; Rawson Council, R. A.; Hudson Grange, P. of H., and the Hudson Cycle Club. For many years he was connected with the Hudson fire department. He was also one of the directors of the Hudson Co-operative Bank. He is survived by a wife and one son.

HARDWARE'S "Prices Current" are reliable.

THE SALESMEN'S DEPARTMENT---VII.

TRAVELERS' EXPENSES.

There is no advantage in scrutinizing salesmen's Expense Books before paying them, except for clerical errors, which duty naturally falls to the lot of the cashier.

The most satisfactory method of remunerating salesmen for their expenditures is the use of Weekly Expense Books. They avoid a running account with each salesman, save the salesman and the house much annoyance and labor, and tend to make the salesman more business-like. Experience has demonstrated the value of this method to the salesman over the old way of allowing him to draw on the house for a hundred dollars at will, or having him anticipate his needs by making a requisition for this amount, or expecting him to depend upon or use his collections for this purpose.

Too often in the past, with more money in his possession than is usual to-day, the salesman, when desiring a little excitement to relieve the monotony of his life, was easily led into gambling and other vices. This has frequently resulted in the salesman, when pushed for settlement, being discharged for embezzlement, or falsifying his expense account so that the house paid for a large part of the fun, or being called upon by the house to make good the discrepancy from his future salary.

If the salesmen make collections, which are sometimes unavoidable, or are forced upon them by certain customers, they should have instructions to remit the amount immediately to the house, less the cost of the exchange, and it should be credited as if received from the customer direct. Enough have tried, without success, to make a good salesman and a good collector out of the same person, that it should be considered as firmly settled in the negative.

To get all the returns possible from salesmen's salaries and expenses, they should not be hampered with collections. Let them sell goods and allow nothing to interfere with or deter them from their efforts to secure orders. If they undertake to collect for a bill now past due, before soliciting a customer's orders, the customer is very liable to say, "Trade is dull; I don't need much anyhow; I guess I'll not buy anything to-day. I'll wait till your next trip." He really means he will save his wants for the salesman who is not a collector. If the salesmen pursue the opposite course, for fear of vexing or irritating their customer, and say nothing about the past due account the house wants them to collect, until after they have sold him all the goods they can force upon him in order to increase their sales, then the customer will very often say, "You had better just cancel this order; I know my credit is good with your house, but they evidently want their money or they would not have asked you to collect it. You know this is a season of the year when it takes all I can scrape together to pay freights, etc., and my customers cannot pay me until they have realized on their crop. I have to be lenient with them, and I am a little surprised, in view of what I wrote the house, that they should give you the statement."

These customers, while they may afterwards take a more sensible view of the situation, and realize a jobber or manufacturer cannot pay all his bills with promises, and that he is not in the banking business, will gradually give their business to the house which does its own collecting.

Each Saturday night the salesmen should foot up their Expense Books in which they have entered the cost of each item of expense, and send them along with their orders. The best time, and the safest for all concerned, to make the entries of expenditures is on the spot. They cannot be deferred longer than twenty-four hours without errors being made, which may cause the salesman trouble. The Expense Books will be paid by the cashier promptly, and charged to Traveler's Expense. By the following Wednesday the drafts for the preceding week's expenses will be in the hands of the majority of the salesmen. After the middle of the week, when all the books covering the preceding week's expenses have been paid and turned over to him, the manager should scrutinize them carefully, calling the salesmen's attention to any inconsistencies and instruct the cashier to deduct the amount from the salesman's next book.

The salesmen who always makes all charges plain, do the work neatly and seem to try to make their expenses as light as possible, without detriment to their sales, have a warm place in the manager's admiration. The manager does not forget to tell the salesmen so occasionally, nor to mention it to the president some time when the matter of salesmen's expenses is under discussion. The manager should insist upon the salesmen putting all items under their proper head, and inform the salesmen that the words which cover a multitude of indiscretions, namely, incidentals and sundries, don't go with this department. He is glad and willing to depend upon their good judgments in investing a dollar occasionally, where the house will get two dollars in return, but they must specify what it was spent for and with whom. The jobber and manufacturer like to know who of their customers are approachable by this method and whose trade is easier purchased with these things than with low prices.

The salesmen who have traveled the same route for a number of years should be allowed a stated amount for each day they are at work away from home, based on their average expenses per day in the past. They should be instructed to use a "Weekly Report," in which they advise the house at the close of each week of the number of days traveled, which will be paid the same as Expense Books. This method will please the older salesmen, and nothing will be lost in adopting it. CHARLES W. EMERY.

Formerly, St. Joseph, Mo.;
Now of the Van Camp Hardware & Iron Co., Indianapolis, Ind.

In the early history of our country, about 1650, among those who were known as a principal, skilled mechanic and machinist, was Joseph Jenks, a native of Hammersmith, near London, England, who was held in high estimation for his extraordinary ingenuity as an artificer, and many of his descendants to the present day have occupied prominent positions in civil life, and in relation to the industrial arts of the country. Of this early mechanician, who was the Tubal Cain of New England, Mr. Lewis, in his history of Lynn, Mass., remarks: "Joseph Jenks deserves to be held in perpetual remembrance in American history, as being the first founder who worked in brass and iron on the Western Continent." By his hands the first models were made, and the first castings taken of many domestic implements and iron tools. The first article said to have been cast was a small iron pot capable of containing about a quart.

Keys of bronze and iron have been found in Greece and Italy dating from at least the seventh century before Christ.—*Exchange.*

How to Get the Most Work Out of a File.

In the series of practical talk on file work, now being prepared for the Arcade File Works, No. 97 Chambers Street, New York, the above subject is given considerable attention. We are pleased to make further extracts in advance of its complete publication:

ARTICLE IV.

In selecting a file for any piece of work the form and position of the work surface must determine the shape and

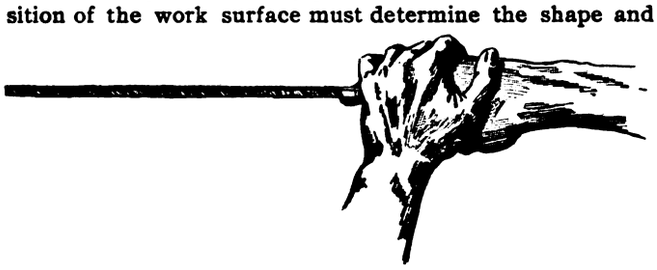

FIG. 9.

size of the file to use. The hardness of the metal and the amount of stock to be removed, together with the quality of the finished surface that is desired will determine the degree of coarseness in the cut of the file used.

If the surface is a flat one, the hand file, the curvature of the sides of which make it best suited to such a surface, or its immediate associations, the flat, mill or pillar files, will be used. The length will depend upon the extent of the surface, files shorter than 8 inches being used only on

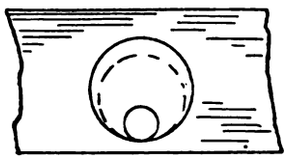

FIG. 10.

very light work and for the heaviest work seldom exceeding 18 inches in length.

If the surface is an interior one, as is the case with the walls of a mortise or key-way, the pillar or square file will usually be used. The pillar file provided with one safety edge is best suited to this work when the dimensions of the work will admit of its use. The extra narrow pillar can usually be used in any slot in which a square file of same length can be operated. If the opening is very narrow a

FIG. 11.

warding file may be advantageously used. As this file is very thin and of equal thickness from point to heel, the operator must depend on springing the file enough to give the required curvature for true filing.

In filing square or round holes as large a file as can be freely operated in the openings should be used, and if very small, a slim square or round may be used, which gives the same file length, but smaller cross-section, thus enabling the use of the longest file possible. If the hole is short as

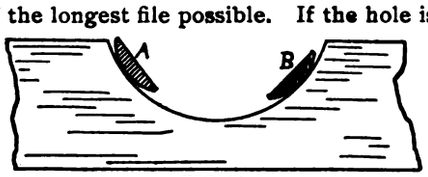

FIG. 12.

compared with the length of the file, the latter may be held at point and handle and still allow enough length for a suitable stroke. When, however, the hole is a long one, the file must be held as shown in Fig. 9. If the round file is materially smaller in diameter than the hole it is enlarging, as shown in Fig. 10, it will be difficult to keep the hole even approximately round; but if larger, as shown dotted, better results can be obtained, inasmuch as the arc of contact is very much greater. Ordinarily, work of this kind does not require great circular accuracy.

When the curvature becomes too great to admit the use of the round file, the half round takes its place. With the larger circles it is not possible or even desirable to have the round side of the file fit the curve, but the results required are in such a case obtained by giving the file a side sweep on the forward stroke. Thus in Fig. 11, when the

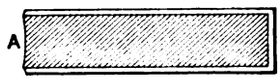

FIG. 13.

file is given only a back and forward motion, it is impossible to maintain the smooth curve, but if, as shown in Fig. 12, the file is swept sidewise on its forward motion from A to B, and after every few strokes reversed, so as to give the sweep from B to A, thus causing the file marks to cross each other, true work can be obtained. The file should, as with the hand file, be well curved in its length, so that any portion of the surface may be brought into action. It should be given a slight rotation in the hand as it is pushed forward in order that the same high spot may be cut through the entire stroke.

Although square files are not usually provided with a safety edge, it will frequently be found desirable in using them on fine work to order them with one side safe, or if the file is in stock one side can be made safe by grinding off the teeth. Any new file having a safety edge should have the edge passed over an emery wheel or grindstone before depending on it for safety, since in the cutting of the sides the stock is expanded over the edge, making it slightly concave, as shown at A, Fig. 13. Although the points of the teeth do not, in cutting, form out full over the safety edge, the roots do, and are very apt to injure the surface the safety edge is expected to protect. The application of the safety edge is shown in Fig. 14 when it is desired to file the surface A without injury to B. The figure serves to show the many places in which this edge is of great

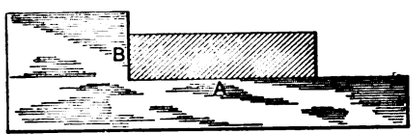

FIG. 14.

value, not only in protecting surfaces, but in the saving of time resulting from the smaller amount of care necessary in using the file.

As we have already informed our readers, the book, when complete, will be sent free to any dealer of files, who sends his name and address to the Arcade File Works, No. 97 Chambers Street, New York.

Magnolia Metal Co. Win.

We learn with pleasure that the protracted law cases which have been pursued in England by the Magnolia Anti-Friction Metal Co., Limited, the London branch of the Magnolia Metal Co. here, in defense of their rights to their celebrated brand, and their business, has been decided in their favor against:

John Sugden, W. E. Watson, A. G. Brown, the Atlas Bronze Co., Limited, and the Atlas Metal Co., Limited, and others who were enjoined respecting patents—trade marks—and from engaging in any anti-friction metal business, with costs and damages.

The text of the decision, as it appears in the English papers at hand, is very severe and sweeping.

We congratulate the Magnolia Metal Co. upon this result; the cases have been prosecuted with great vigor, and, no doubt, large expense, but it is of value to Americans registering under and appealing to English laws, to know that they do and will protect when properly appealed to.

THE NEWS FROM NEW ENGLAND.

The numerous burglaries constantly occurring in and around Boston was the subject of a moral by a representative of a well-known manufacturer of locks and building Hardware. While it is conceded that the ubiquitous and wily burglar usually rises to the emergency presented by intricate and strongly made locks and fastenings, it is also self-evident that the more difficulties in the way of a forced entrance, the greater is the chance of discovery. But the ease and security with which the gentlemen of this profession have been operating recently would seem to justify the statement of this representative that a large percentage of the locks and catches used in contract buildings were of the flimsiest kind, and designed for ornamentation rather than as a safeguard. In support of his contention, he related the case of a man whose architect had told him to use a certain grade of locks and window fastenings. Upon being cautioned against this quality of fittings, and advised to purchase a higher class of goods at, of course, an advanced price, he replied that his architect knew best what was required, and that he was satisfied with the latter's judgment.

"Well," remarked the representative, "I suppose you are a married man. Now, in simple justice to your wife, you should caution her to move the washstand, table, trunks and any other loose furniture against the door when she retires. These goods will prevent the wind blowing the door open, or the servants from entering unannounced, but they are not designed for anything more."

The buyer remained unconvinced, and several months passed before he returned. With blood in his eye, he ordered a complete new outfit of locks, window-fastenings and catches, remarking his economy had cost him about two thousand times the value of his original order. The burglar had come and walked through his house as though the doors and windows had stood open to welcome him.

At the Poultry Show just terminated in Boston, Joseph Breck & Sons have had an extensive exhibit of Prairie State Incubators. During this exhibition about 2,000 chickens were hatched, while about 8,000 in all have been hatched at the twelve different exhibitions attended throughout New England this season. Mr. Breck states that they have placed nearly one thousand of these incubators during the past year, and that the demand is constantly growing. Some idea of the value of the hen and hen products is gained from a statement of the amount of this business in a neat book on the use of incubators issued by this firm. Last year's revenue from chickens and eggs in the United States is given as $290,000,000, exceeding the wheat crop by $53,000,000 and the cotton crop by $31,000,000.

The American Line Grip Co. have moved from No. 26 Milk Street to No. 10 Alden Street, Boston, where they have more commodious offices than at their former address.

Randolph & Clowes, Waterbury, Conn., who for the past two years have carried a stock at Nos. 143 and 147 Oliver Street, Boston, have decided to retain only an office here in future. It has been found that having a stock here has not added materially to the sales in this market, and that the demand can be supplied equally well from their headquarters. A representative of the firm, in an interesting talk on copper and its various uses, stated that 60 per cent. of the total output of this metal for 1898 had been shipped to foreign markets. The use of copper in building has doubled in the past ten years, while in the plumbing trade its consumption has increased four times. Some idea of its enormous use in building may be conceived from the fact that 450,000 pounds of copper were used on the roof of the new South Station just completed in Boston. The bullish tendency of copper has resulted in the advance of seamless brass and copper tubing three cents per pound, and it is expected to go still higher. The inevitable result of the present high price of copper will necessarily be a large reduction in its use where other metals can be substituted, and this in turn is looked to, to bring its price down to its normal condition.

A statement recently appeared in the daily press to the effect that the Boston Belting Co. had been included in a recent amalgamation of the rubber interest. This is flatly contradicted by the firm, who state that they are not in any consolidation and are not prepared to enter any combination.

Hathaway & Sampson, Plymouth, Mass., have recently added a stock of Hardware, stoves, etc., and request manufacturers to furnish them with price lists and catalogues.

The Calumet & Hecla Mining Co. have placed with Chandler & Barber, Boston, an order for a number of tool benches designed for manual training purposes. The Mining Co. have presented these benches to the school children of Calumet, and, it is understood, will also furnish the necessary tools and appliances for a complete manual training school there.

F. A. CATON.

Boston, February, 1899.

As early as May, 1655, a patent was awarded Joseph Jenks, of Lynn, Mass., for seven years for an improvement in the manufacture of scythes "for the more speedy cutting of grass." The innovation consisted in giving greater length and thinness to the blade, and in welding a bar of iron upon the back, to stiffen and strengthen it, as in the modern scythe. This was an essential improvement upon the old form of English scythe, which was a very clumsy instrument, short and thick, like the bush or bramble scythe. In fact, but little radical change has been made since in the form of this agricultural implement. Joseph Jenks died in 1683. Of his sons, Joseph, the elder, after living for some time in Lynn, Mass., removed to Pawtucket, R. I., where he erected a forge; and two other sons went, we believe, to Boston, where Samuel Jenks & Son carried on the blacksmith business on Gardner's Wharf previous to 1789; and John Jenks had a store at No. 39 State Street at the same time.

The Cleveland Twist Drill Co., Cleveland, Ohio, with New York salesrooms at No. 99 Reade Street, announce under date of January 25th, that E. G. Buckwell has been engaged to take charge of their sales department. They add: "We trust his long experience as a traveling salesman, and later as a business manager, will greatly increase the efficiency of our office force, and enable us to give all orders and correspondence prompt and intelligent attention."

"The way of transgressors is hard,"
As they stumble along 'neath their loads;
And they ought to unite and all work with their might
And help us in getting good roads.

Ohio Hardware Association.

A special effort is being made to interest all the retail Hardwaremen of Ohio in the Ohio Hardware Association, which has been continued for several years with such great success. The annual meeting will be held at Toledo on February 22nd, and as an incentive to be present at that gathering, and to become members of this great Association, the following letter has been issued to the entire trade over the signatures of the executive committee:

"We are all looking for business points and better ways of getting at business methods leading to the betterment of our trade. As merchants, we must either progress, stand still or go backward. The Ohio Hardware Association was organized a few years since in the belief that it would lead to the betterment of the trade throughout the State; that it would bring to us final correction of the many abuses that exist among the trade; that it would allow us to know men and methods it had not been one's privilege to know otherwise. The four years of its existence demonstrate beyond a doubt that the benefits of such an association far outclass and outweigh the small membership fee, the slight expense in attending and the loss of time in meeting and associating with the best set of men in business to-day. We have grown in numbers each year—not as largely as we could wish, but it has been a healthy growth. It is the purpose of this letter to you to still further add to its growth, in the addition of your firm to membership.

"We want your name and the strength that goes with it. From this strength in numbers we will in time be able to secure all we ask for. It is not necessary to say to you there is the added pleasure of meeting other Hardwaremen. That goes without the saying. Neither is it necessary to assure you that each one of us can gain something of benefit from the ideas of others. What is there to prevent your joining us? Other dealers throughout the State have come with us who were at one time positively antagonistic to an association, and have gone away with the avowed intention of never missing another meeting. We have letters of congratulation and of encouragement from members all over the State. There must be merit in an association that numbers a great many of the strong, progressive Hardware firms on its roll. It is just as beneficial, too, for the small dealer as the large one; just as good for the general store as for the one labeled 'strictly Hardware.' The brain of the trade all over these United States is rapidly centering in the various retail associations of each State. The thoughtful dealer from all quarters is adding his name to the roll—that is why we ask for and want yours. One member wrote us this summer: 'While attending your February meeting, I gathered a pointer on collections that I took home with me and made use of, and to date, have collected $63 00, and have added security to twenty-seven other accounts, none of which had I been able to handle by any method I had known.' We faithfully believe the expense is as nothing compared to the benefits derived. Another writes: 'I can see no direct results to my business, but am going to every meeting, if only to meet and know the dealers in the State.' Another says: 'I made a friend of a former enemy and competitor while in Columbus, whom I had misjudged, and all because I had not made it my business to know him Now we aid each other in many ways and are fast correcting the abuses that exist.' So it is from everywhere, and this is the feeling that grows with each meeting. Come to Toledo with us on February 22nd. We know you will not regret this trip. The people of Toledo will do much for us, and we predict the Association will do enough for you to bring you again.

"Every member of our executive committee signing this letter, from his own knowledge, experience and benefits, pledges you faithfully that there will be enough of benefits accruing to more than offset the expense and loss of time. The membership fee is but $3.00 Send it in now, to John F. Baker, secretary, Dayton, Ohio, or bring it with you when you come to Toledo. It is all the same now or then, as membership dates from the meeting—but come. We want you. We need you. The benefits are for all of us. Once more, with good wishes, we trust the 22nd of February will see you one of us.

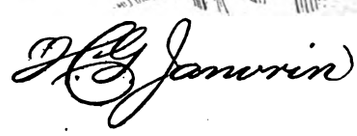
Executive Committee.



Hiram G. Janvrin.

The announcement is made of the withdrawal of Hiram G. Janvrin from the firm of M. C. Warren & Co., No. 9 Dock Square, Boston.

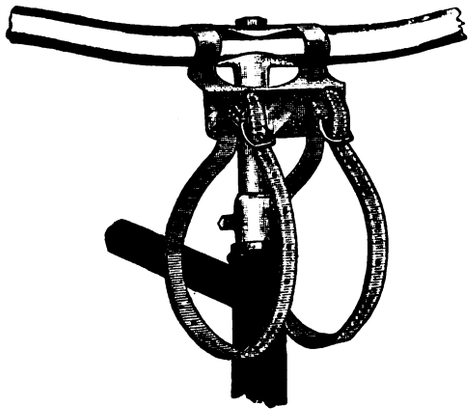
Mr. Janvrin is well known and widely respected in New England Hardware circles, and his withdrawal from active interest in the trade would be regarded with regret by his many friends.

His entry to the business occurred in 1867, when he accepted the position of bookkeeper with this firm; and from

that he rapidly rose to buyer and confidential clerk, which duties he discharged for many years.

At the death of M. C. Warren in 1890, he entered the firm of Wm. H. & Chas. B. Warren, and became general manager, buyer and credit man. Charles B. Warren left the firm in 1893, his interest being assumed by the two remaining partners, and from now on the firm will be continued under the same name by Wm. H. Warren.

As a member of the New England Hardware Dealers' Association, he has always occupied a prominent position, having been its first president, and having had the honor of a second term. His many friends, among whom his name has become a synonym for integrity and fair dealing, will be pleased to learn that he has arranged to continue in the discharge of his usual duties in connection with the new firm.



We have received from the Garrett Engine, Boiler & Machine Works, Garrett, Ind., a catalogue of their Model gas and gasoline engine.

NEW GOODS AND SPECIALTIES.

Hall's Tourist Parcel Carrier.

Edwin B. Stimson & Son, No. 31 Spruce street, New York, are placing upon the market "Hall's Tourist Parcel Carrier," which will be found to be a very useful article for

the purposes intended by its use. We give an illustration which will convey an idea of its great utility. It is made of spring steel which, being tempered in oil, enables the manufacturer to warrant that it will not break or get loose. It will carry any style of camera or package in a perfectly steady manner. Can be adjusted instantly by simply pressing the springs down on the handle bar; can be as readily removed by placing the fingers under the ends of springs; can be pulled upward withaut loosening the package. When not in use it can easily be placed in tool bag or pocket. The many advantages which this carrier possesses over similar devices will readily be observed by the practised eye of the wheelman, for whose more especial use it is designed. The manufacturers will send a sample by mail for 40 cents.

The "Invincible" Ice Scale.

The new "Invincible" Ice Scale shown in this connection is being placed on the market by the Pelouze Scale & Mfg. Co , Nos. 133–139 South Clinton street, Chicago. It is described by the makers as "containing all the good points of other scales," and in addition "is meeting all the requirements demanded of the ice trade of this country." The following points are made in its favor: "It is accurate; is unbreakable; is so constructed as to relieve all strain; both the ring at the top and hook are swivel; the dial is aluminum, with distinct black figures; owing to its construction, when a weight is hung on the scale, together with the usual momentum of rough handling, the index is not retarded, but is allowed to go the full distance of combined weight and force, after which it will immediately adjust itself to exact weight; if for any reason the index should ever register below zero, it can be quickly adjusted by removing cap at bottom and raising index arm, thus insuring a permanent scale." The manufacturers further state that this scale is recommended and highly endorsed by the largest ice companies, and they will be pleased to furnish prices on application.

Covert's Steel Carriage and Wagon Jacks.

The Covert Mfg. Co., West Troy, N. Y., are successfully placing upon the market two articles, which are herewith illustrated. The first is the Covert Steel Carriage Jack,

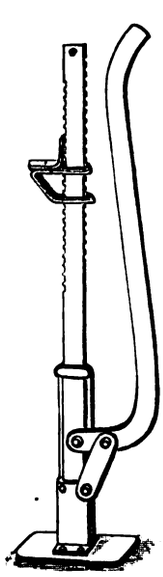

FIG. 1.

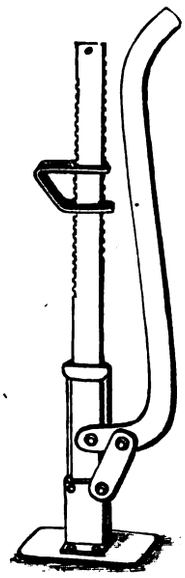

FIG. 2.

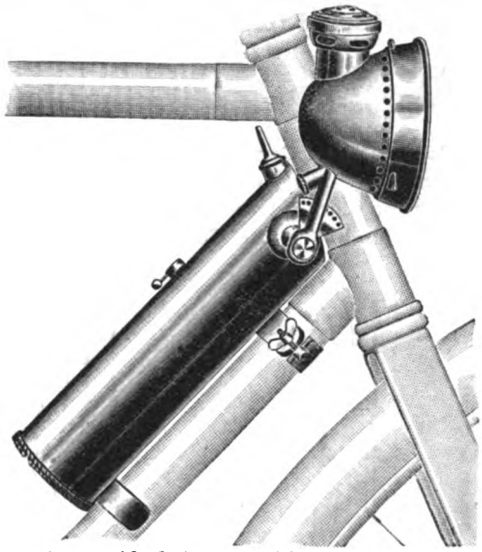
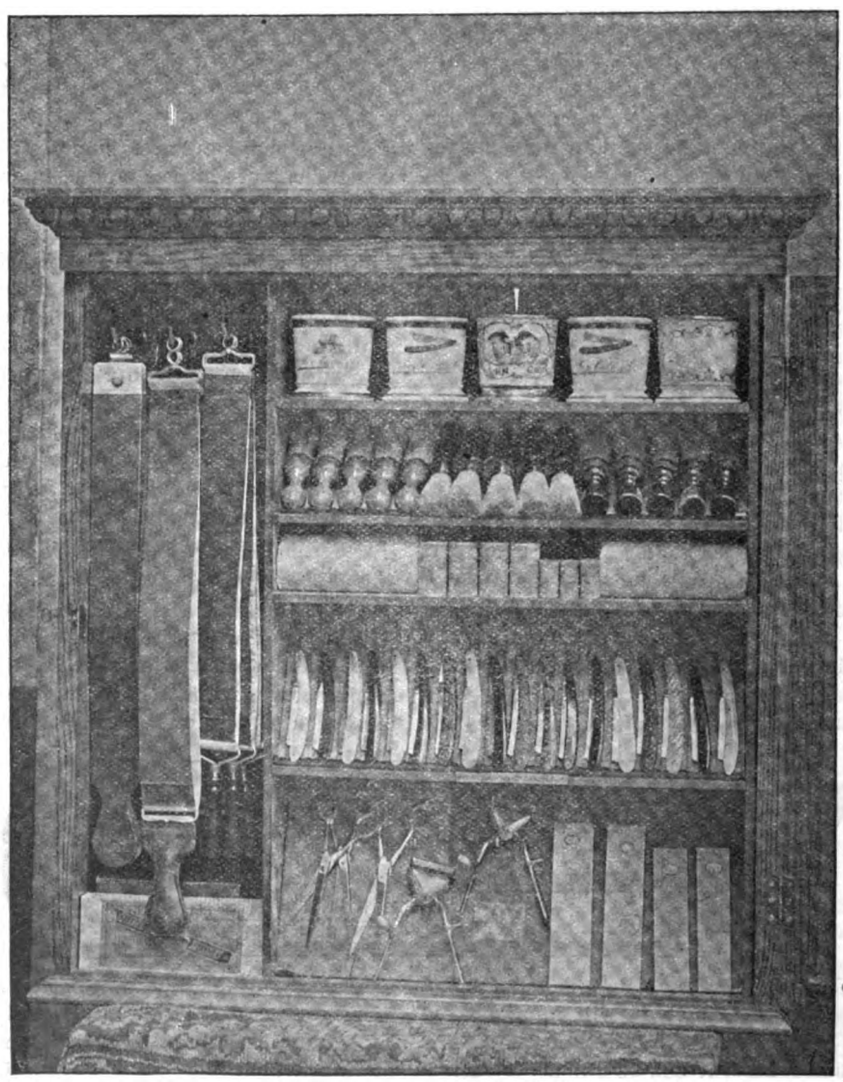
(Fig. 1) which weighs six pounds, and is described by the makers as large in size, and as perfectly fulfilling the requirements of an article of this character. Its power is expressly dwelt upon, as it will lift one thousand pounds. The step is leather covered, thus effectually preventing the metal coming in contact with the axle and marring the paint. The step being movable it can be readily adjusted to the height of any axle. It has a direct perpendicular lift, without any horizontal or oscillating movement so objectionable to some jacks. The Covert Steel Wagon Jack (Fig. 2) is described as possessing the good points of the other, and ia made especially for heavy work. It weighs ten pounds, and is very powerful in its action. It will lift over two thousand pounds, and is warranted to give satisfaction, and is of the same design as the Covert Carriage Jack in its features.



Improved New Departure Acetylene Lamp.

The Jos. Lucas & Son Co., Bristol, Conn., who are always endeavoring to improve the line of goods which they manufacture, seem to have succeeded in this endeavor in the article which we herewith illustrate. Their New Departure Acetylene Lamp, in its improved and modified form, retains the general style and inherent principle, but radical improvements have been made in details of manufacture which bring the "New Departure" still nearer perfection. As will be noted, the separation of the generator and gas chamber from the combustion apparatus is the dominant principle, insuring as it does cool gas supply to the burner and safety from over-heating, as in cases where the burner and generator are in close proximity. The in-

Digitized by Google

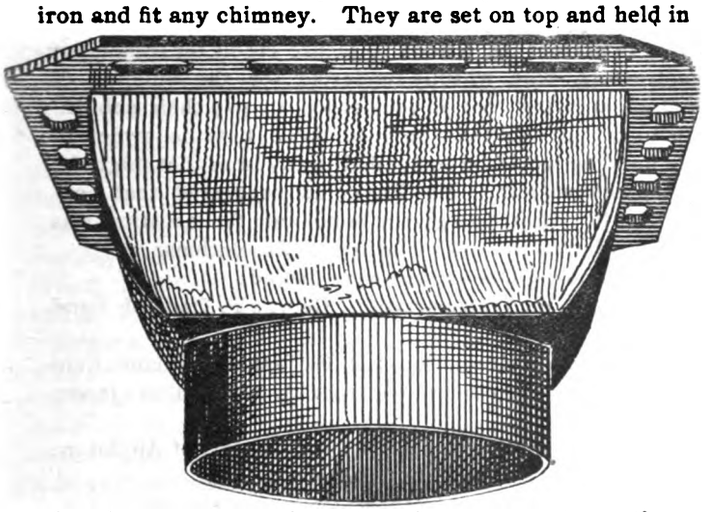


terior of the generator is divided into two equal compartments, one forming the carbide receptacle and the other the generator or chamber for gas supply. The makers say:

"The gas is purified by 'washing,' thus securing the highest illuminating power with the least gas. The generator is regulated by turning a small lever, and this lever is firmly and automatically locked into the desired position. This regulation may be performed while riding, if desired, so simple is the operation. This allows the generation of gas, which then passes into the storage chamber, from which it is automatically supplied to the burner, as required. The burner is housed in a parabolic reflector, designed after the most approved principle, to concentrate the light rays at one point, thus securing a very dazzling and brilliant light, and one which can be plainly seen at a great distance. This reflector is pivotally attached to the gas main, and may be adjusted to project the light at any angle. Provision is made for simply, quickly and effectively clearing the burner and gas chamber from any dirt or deposit. Underneath the reflector hood and projecting backward will be seen a small nipple which is fitted to receive the tubing of the hand or foot pump. Attaching the pump and forcing the air through will effectively clean the passage from all obstructions. The generator is finished in finest full nickel plate, or may be enameled to match color of bicycle frame. Attachment is easily and quickly accomplished by a single clamp screw. The reflector and hood are finished in full nickel, and the whole makes a handsome and neat appearance on the wheel, while the weight is exceedingly small. Loose, or broken, carbide is used, no special form of charge is necessary, and for convenience, reliability, safety and economy, it is unsurpassed." The New Departure is manufactured by the Joseph Lucas & Son Co., Bristol, Conn., whose well known reputation is sufficient guarantee for all that is highest grade in materials and workmanship. It is supplied to the trade by John H. Graham & Co., No. 113 Chambers Street, New York City, from whom, or the makers, any information may be readily obtained.

The "Fox Tonsorial Cabinet."

The Fox Cutlery Co., No. 24 Hudson Place, Hoboken, N. J., are placing before the Hardware trade a specia



cabinet for the purpose of displaying in an attractive manner an assortment of such toilet accessories as make the name of "Fox Tonsorial Cabinet" very appropriate. Every dealer knows how profitable a line of such goods can be made by frequent sales, and to present them to the

Digitized by Google

customer in a way to induce the purchase thereof, has been made the subject often of considerable thought. The Fox Tonsorial Cabinet is an ornament to any store being finely finished, and shelved and spaced to hold the goods attractively. We present herewith an illustration of it which will convey the idea of its utility. The dimensions of the case are 36 by 30 inches, and it has a glass front door, and can be hung against the wall or on a post or against the side of a show window. The goods are invoiced and numbered, so that any article can be re-ordered to replenish the case, and on all such orders the Company prepay express charges. Its contents include every possible article in the tonsorial line from barbers' cups and shaving brushes to oil hones, shears and "Fox warranted" razors. The whole stock nets at trade prices one tenth in amount more than the entire charge for the goods with the case included, which is $30 00, virtually giving the case free under the circumstances. This offer is worthy of the notice of any Hardware dealer handling such goods, and we call attention to the advertisement of the Company on page 10.

The "Everlasting" Chimney Cap.

James Woodside, Hawarden, Iowa, is successfully placing on the market the "Everlasting" Chimney Cap, which is illustrated in this connection. In description of this article the manufacturer says: "These caps are made of cast iron and fit any chimney. They are set on top and held in

place by cement; can be put on by any one at any time; no measuring necessary. They are neat in appearance, everlasting in quality and simple in construction. The caps are provided with collars at the top, to which common round pipe may be attached whenever it is necessary to extend the chimney. Owing to their form of construction they will be of benefit to any chimney, even though it be of sufficient height, as they close up a part of the opening, thereby producing a better draft. These caps take the place of the old style, sheet iron jackets, which only last a very short time, when they become rusted out and fall off. While with the 'Everlasting' cap, after it has been properly cemented in place, is not again disturbed, and when the pipe (where there is pipe used on it), rusts out all that is necessary is to procure new and slip on collar the same as on a stove. No. 7, cap 12½x15 inches across bottom, including flange, 7 inch collar. Weight 12 pounds. Retail price $1.25 each. Liberal discount to dealers."

A Whitehead torpedo carries 220 pounds of wet gun cotton and weighs ready for service 1160 pounds. Its maximum length is 16 feet 5 inches and its greatest diameter is 17.7 inches. At a speed of 28 knots per hour it has a range of about 850 yards. The torpedo is driven by compressed air at a pressure of 1350 pounds per square inch, which operates a three stage engine.—*Exchange.*

"What is everybody's business is nobody's business.' That is why the farms are improved and the highway to market is left to shift for itself.—*L. A. W. Bulletin.*

Brownfield Buyer's System.

The Folding Paper Box Co., of South Bend, Ind., are furnishing with very great success the Brownfield Buyer's System. This consists of a cabinet containing a number of boxes, concerning which the manufacturers speak as follows:

"Brownfield Buyer's System requires the following fixtures: A cabinet containing a number of boxes (numbered) which are to receive the data covering on your subjects of purchase, and boxes (numbered) for catalogues; a special ruled and complete index (copyrighted); special catalogue cards for each subject box; two sizes of gummed labels, one for attaching to catalogues and the other for attaching to smaller memoranda which belongs in the subject boxes; special designed and printed bellows envelopes for sub-dividing a box where it is advisable to sub-divide a subject box on account of the memoranda covering on a single subject being of small volume, or where the subject will permit of a sub-division; and quotation memoranda blanks for entering quotations and memoranda. These cabinets are built of oak, paneled ends, well made and finely finished and built for service. The index is special ruled and made after the latest ideas of complete and convenient indexes, and so sub-divided by the special ruling as to give the quickest and most convenient reference to the names entered, and the front pages of index also contain full instructions covering the practical use of the Brownfield Buyer's System. The catalogue cards and gummed labels, bellows envelopes and quotation memoranda blanks are made of the best of materials and in the best possible form. The boxes for the cabinets are made from substantial board covered with cloth and have brass rings for pulls, also card holders for removable number cards, and made in such a manner that they retain the data placed in them in perfect condition and are of most convenient access."

In regard to the necessity of a system of that character, the manufacturers also say: "Buyers do not have a satisfactory, successful and convenient method, or system, for preserving all the written or printed information which is received covering on their subjects of purchase, or information covering on subjects in which they are interested.

"Quotations, catalogues, price lists, circulars, discount sheets, samples and written or printed information of every description (which are received) covering on subjects of purchase, should be preserved in such a manner that you can procure all the information you have received covering on a single subject and procure this information at once and without handling memoranda covering on subjects you are not interested in at that time. A buyer's experience originated and developed a system for handling this class of information (covering on subjects) which commends itself as perfect to all buyers who give it enough consideration to understand it. We refer to the Brownfield Buyer's System."

They have recently published a little pamphlet entitled "Find Me a Month From To-day If You Can," which ought to be in the hands of every person who is engaged in business where this system applies, and the same will be gladly sent on application.

A representative of the Folding Paper Box Co., in speaking of this system, said: "This system is one of positivei value and merit and is giving the best of satisfaction to the Hardware trade where it is in use, and after it has been installed in an office and thoroughly understood, the purchaser would not give up his outfit for several times the amount that it cost him. The advantages of the system grow on one as he becomes better acquainted with it and it proves a better investment than at first anticipated."

HARDWARE costs but One Dollar per year.

Wisconsin Hardware Dealers' Association.

The third annual convention of the Wisconsin Hardware Dealers' Association was held in Milwaukee, Wisconsin, on February 1st and 2d. The attendance was quite large, and among those who were present may be named the following:

C. A. Peck, Berlin; J. A. Wilkie, Fond du Lac; A. H. Sheldon, Janesville; H. H. Marvin, Oregon; G. W. Adams, Juneau; E. C. Oestreich, New London; O. J. Williams, Cambria; J. Hughes, Fond du Lac; C. F. Hanson, Markesan; J. L. Rohler, Fond du Lac; E. K. Cunningham, Berlin; J. B. Barlow, Jr., Ripon; J. F. Mollenberg, R. A. Beichl, Beaver Dam; H. E. Frisbie, Pine River; James Montgomery, Wausau; August Schupink, Milwaukee; H. A. Kerston, Barron; R. Fits, Racine; Jacob Mohr, Racine; C. E. Dewey, Kenosha; C. Jorgensen, Racine; A. Kercher, Manitowoc; H. Winter, Clintonville: W. Bethsack, A. G. Hurd, Manitowoc; C, Koch, Brillion; H. C. and H. R. Scofield, Sturgeon Bay; H. Raymond, Racine; George Illian, Milwaukee; George P. Dana, Fond du Lac; H. E. Trilling, Menasha; R. E. Root, Owens; J. F. Wegner, Fond du Lac; F. E. McGraw, Peshtigo; O. P. Schlafer, Appleton; F. Rassman, Beaver Dam; Greene Bros., Kiel; O. Heins, Elkhart Lake; G. A. Quecker, Kiel; H. L. Schmitz, Manitowoc; L. L. Dana, Pittsburgh: A. Asp, F. W. Matthews, New Holstein; B. A. Gaffron, Plymouth, J. H. Hoernel, Racine; F. M. Fink, Whitewater; Smith & Meadows, Oconomowoc; Andrew Noll, Chilton; Louis Dietz, Horicon: L. N. Larson, Burlington; H. H. Miller, Sheboygan; F. F. Prenzlow, Johnston Creek; U. B. Wagner, Burlington; J. Hannenstein, Sheboygan; A. D. Race, De Pere; L. W. Dukersheim, Mazonamie; J. Krueger, Columbus; E. C. Williams, Waupaca; J. Stuerner, Stowell; C. F. Pieper, Columbus; A. E. Winke, Oshkosh; F. R. Peck, Berlin; G. G. Pratsch, De Pere; Charles Kuehler, Viroqua; H. Loraberg, Oconomowoc; H. F. Schlegemlich, Eau Claire; C. Lehmann, Cedarburg; R. H. Suettinger, Two Rivers; J. J. Kreppell, Sheboygan; E. J. Schenkelberg, Sheboygan Falls; Jasper Dexter, South Wayne; Victor Husting, West Bend; D. L. Pestah, Sun Prairie; R. C. Murdock, Brodhead; J. H. Hayden, Sun Prairie; H. D. Schall, Beloit; J. B. Ensink, Plymouth; A. E. Anderson, Stoughton; A. Thielke, Mayville; K. G. Olsen, Stoughton; J. W. Fulton, St. Louis; D. A. Lewis, Baraboo; A. G. James, Richland Center; L. B. Nuka, Boscobel; F. N. Day, Omro.

The sessions were full of interest, and the question of railroad charges, which has been very seriously agitated in that section of the country, was taken up and considered, and the following resolutions were adopted:

Whereas, It has been contemplated by the railroads represented in the Western Classification Committee to raise the minimum carload weights on agricultural implements and vehicles and other classes of goods handled by the members of this association, therefore, be it

Resolved, By this association, duly assembled, that we deplore such action on the part of the railroads, and deem it unwise and unjust, and having a tendency to inflict a great hardship on the dealers throughout the State, and we earnestly request and urge upon the several railroads doing business in the State that they retain the former minimum weights, and that they instruct their representatives to oppose the changing of said classification.

Resolved, That a copy of this resolution be forwarded to the Western Classification Committee and the general freight agents of the several railroads doing business in this State.

In his annual repor-, President John Hughes, Fond du Lac, referred especially to the efforts of the organization in preventing the sale to department and "penny" stores of Hardware supplies. He said the association was receiving the support of many manufacturers in confining this trade exclusively to Hardware dealers.

L. A, Gladding, secretary of the E. C. Atkins Saw Co., Indianapolis, and J. J. Sinzich, of Chicago, representing the Bishop Saw Co., Lawrenceburg, Ind., addressed the convention, saying that these companies had refused orders amounting to thousands of dollars for supplies to be furnished department stores, but that they would deal only with the smaller retail dealers. Andrew Noll, of Chilton, vice-president of the Wisconsin association, announced that he had been advised that the American Steel & Wire Co., of Chicago, said to be the largest manufacturers of their product in the world, had taken a similar stand.

President Hughes brought up the subject of overcharges on the part of express companies, and called attention to the efforts being made by the Merchants' Association of New York to secure a reduction of express rates.

"It is a fact," said Mr. Hughes, "that the rates of the express companies are not entitled to any consideration at the hands of the American public. They have proved themselves unpatriotic and selfish, and are fighting to-day the stamp tax that everybody else in the country has been compelled to pay. I suggest that we take some energetic action with reference to these companies, and place our stamp of approval upon legislation tending to secure from them better terms."

H. Raymond of Racine opened a discussion on the proposed changes in the lien law, saying that the law was satisfactory as it now stood, and suggesting that the members of the association request their representatives in the legislature to oppose any change. Otto Gallun, of Milwaukee, said the present law tended to secure credit for fraudulent contractors, who wilfully underbid for the building of houses, knowing that if they failed to pay their subcontractors, they could not be held liable, but the owner of the building would be compelled to pay liens that might be levied against him. Mr. Raymond suggested that contractors be required to give a bond, and the question was finally referred to the Committee on Resolutions.

The following committees were named:

Committee on Transportation: George P. Dana of Fond du Lac.

Committee on Resolutions: D. G. James, Richland Center; James Montgomery, Wausau; A. A. Sheldon, Janesville.

Committee on Grievances: O. P. Schlafer, of Appleton; A. D. Race, of De Pere; G. Hay, of Oshkosh.

Committee on Officers' Report: George Adams, of Juneau; Jacob Mohr, of Racine; A. Neil, of Chilton.

The secretary announced that the local Hardware dealers and manufacturees had invited the association to an informal smoker at the Deutscher Club while some other organization had invited the association to the Alhambra theatre. Both invitations were accepted.

The session of Thursday was devoted largely to the reception of the new members, and of fraternal delegates. The following papers were also read: W. H. Hay, "Object of Association;" paper by John Hissell, of Antigo, with discussion; paper by C. A. Dewe, Kenosha, "Benefits of the Association;" paper on "Credits," by C. A. Peck; paper by C. Hertel, "A Few Points."

The following officers were elected for the coming year:

President: James Montgomery, Wausau.

Vice-president: A. H. Sheldon, Janesville.

Secretary: C. A. Peck, Berlin.

Treasurer: H. F. Schlegelmilch, Eau Claire.

Executive Committee: J. Kornely, Milwaukee; Otto Heins, Elkhart Lake; Otto Schlafer, Appleton; D. G. James, Richland Center.

An invitation was received from the Chicago delegation to meet in that city in the annual convention of next year, but the general opinion seemed to be that the Association should not hold its meetings outside of the State.

Among the other resolutions adopted were the following

Resolved, That it be the sense of this convention that we

Digitized by Google

endorse the action of New York merchants looking to the reduction of the exorbitant express charges now being made by these companies, and we pledge them our loyal support along these lines; and be it

Resolved, That a copy of this resolution be forwarded to the proper officers in New York by our secretary.

Resolved, That we suggest to our executive board the importance of connecting ourselves with a national organization and recommend them to take steps along these lines as suggested by the Chicago delegation, whom it has been our pleasure to receive.

Resolved, That a legislative committee be appointed, composed of the Hardware merchants of Madison, to report to our secretary any bill, or bills, that may be introduced in the Legislature detrimental to the interests of the Hardware merchants of this State.

Resolved, That it should be the duty of each member of this Association to furnish each other information in regard to the financial standing of their customers as they migrate from place to place.

Annual Meeting N. E. H. D. Association.

On Wednesday, February 8th, the New England Hardware Dealers Association held their annual meeting at the United States Hotel, Boston. The meeting was called for 5.45 P. M. sharp, and dinner was served promptly at 6 P. M.

The weather, which for the last few days has been stormy and severe, was no better on the day of the meeting; as a storm little short of a blizzard raged all day long, accompanied by a liberal fall of snow; and this, no doubt, kept many out-of-town members from attending. The representation was, however, very creditable, about one-half of the total membership being seated at the dinner.

Prior to the dinner, the executive committee, consisting of the outgoing officers, met for the last time and concluded the business on hand. After discussing a tasty and elaborate menu, the members resolved themselves into a business committee, and took up the election of officers for the coming year. The nominating committee consisted of Hiram G. Janvrin, Boston; Samuel H. Thompson, Lowell, and D. Fletcher Barber, of Boston.

Secretary Farless, after reading the minutes, followed with his yearly report, which was adopted. The secretary then read a paper on the old Hardware firms of Boston, referring to the part Dock Square, which has been the centre of the industry for 120 years, had played; starting from the time when all Hardware dealers were "importers," and ending with the present time. A singular fact brought out by Mr. Farless was that there were more Hardware dealers in Boston in 1776 than there are to-day. Part of these reminiscences were from the diary of Wm. A. Sanders, who is now 82 years old; and who, with his two brothers, Charles H. and George S., aged respectively 77 and 68, have played an important part in Boston Hardware circles.

A motion was then carried that a committee be appointed to properly express the deepest sympathy of the Association to the family of the late John C. Holden. Messrs. Mulhall, Washburn and DeWolfe were appointed.

President Loomis then called upon the nominating committee for their report, and Mr. Barber responded by saying that President Loomis han been unanimously selected to succeed himself. President Loomis thanked the committee in fitting terms, but said that he had found that his business interests would not allow him to give the proper amount of time that the duties of the position required, and was therefore obliged to decline what he felt to be a great honor. A ballot was suggested and taken, the result showing a large majority in favor of Mr. Loomis, but the latter insisted upon being excused.

Mr. Barber then nominated S. D. Balkam, of Jamaica Plains, who thanked the members for the compliment, but asserted that it would be utterly impossible for him to spare time to discharge the duties properly.

President Loomis then asked the vice-president to take the chair and nominated J. Carleton Nichols, of East Boston, who was elected unanimously, as were the following officers:

First Vice-president—Wm. D. Parlin, Natick.
Second Vice-president—Bion C. Pierce, Taunton.
Third Vice-president—J. H. Sayward, Haverhill.
Secretary—Jas. A. Farless, Boston.
Treasurer—Henry M. Sanders, Boston.

Directors:

Hiram G. Janvrin, Boston.
Geo. W. Burditt, Cambridgeport.
L. W. Thompson, Woburn.
Chas. S. Farquhar, Boston.
John H. Clark, Nashua, N. H.
Thos. H. Baldwin, Boston.
Frank O. Barber, Newton.

Ex-President Loomis congratulated the Association on the excellence of its choice, and besought for the incoming officers their hearty co-operation and support. He further announced his intention of bringing up, from time to time, during the coming year, such subjects as he thought should be discussed by the Association, and suggested that all other members should do the same.

A vote of thanks to ex-President Loomis, Secretary Farless and ex-Acting Secretary Warren was passed.

M. H. Tarbox, of the Boston & Lockport Block Co., then entertained the meeting with a pleasing and graphic account of his recent visit, together with a number of other manufacturers, to the plant of the National Cash Register Co. at Dayton, Ohio. Many interesting innovations were described, among which may be mentioned a reward of $25 for the prettiest back yard abutting on a railroad in Dayton—so that visitors might receive a good impression of the town; a "Suggestion and Complaint" box for the employees, with a reward of $25 for the best suggestion of the year; a lunch to all employees every day; a kindergarten presented to the town, with the rule that after 1905 all new employers must be graduates thereof; a cooking school attached to the factory, and many other novel features, all of which President Patterson had personally instituted with a view to dissolving the differences between labor and capital.

Robert L. Van Buskirk, whose vocal efforts have so often been placed at the disposal of the Association, sang several selections during the evening in his usual masterly style, and met with much applause.

President Nichols, in a most happy speech, voiced the sentiment of the meeting in thanking ex-President Loomis for his untiring efforts during the past year, and presented him with a handsome floral tribute from the Association. A motion to adjourn followed.

Wm. A. Shull, Philadelphia, Pa., has sent us an illustrated catalogue of his "Original" Horse-Tail Strop. An examination of this publication will show that Mr. Shull has kept up with the developments of the recent war, as we find among his goods not only the old "Original," but also the "Schley" Horse-Tail Strop, Shull's "Sampson" Horse Hide Strop, the "Philippina" Horse Hide Strop, and, in addition, the "Perfection" Horse-Tail Strop. A great deal of information is given in regarn to these articles, and Mr. Shull would be pleased to correspond with any who are interested.

The Lockwood-Taylor Hardware Co., Cleveland, Ohio, have issued a catalogue of "Bicycle Sundries" for 1899. An examination of its forty pages, illustrated, shows that it contains about everything made in the line of which it treats. Descriptions and prices are also given.

HARDWARE costs only One Dollar a year.

Digitized by Google

Review of the Markets.

Hardware: The constant and continued withdrawal of prices previously given, and new quotations much higher in character being named in the place of those withdrawn, has been the means of considerable hustling among jobbers to get earlier orders than usual, booked at the lowest prices possible. The demand for all such staples has been unusually good; for the undoubted possibility of a fine trade for spring sales being imminent, has made larger orders, given for stock requirements, than has been the case heretofore at this early date. The dealers are urging early deliveries, and will be found in better shape than usual of late, in meeting promptly any Spring demands that may be made upon them.

Builders' Hardware: The advance in builders' Hardware by all the manufacturers is an important one, and will doubtless be followed by another if metals used in their manufacture continue to advance in price. These goods have been abnormally low for a long time, and the manufacturers are pleased at this opportunity to strengthen, by concerted effort, a market that has been unnecessarily profitless.

P. & F. Corbin, New Britain, Conn., and New York City, under date of January 30, make the following announcement:

Gentlemen: In consequence of the rapid and continued increase in cost of all metals, we are compelled to advance prices on our entire line of Hardware (excepting wood and machine screws and door checks) 10 per cent., to take effect at once. All orders will receive our very best attention.

Yours respectfully,

P. & F. CORBIN.

Similar action has been taken by Russell & Erwin Mfg. Co., Sargent & Co., Yale & Towne Mfg. Co., Reading Hardware Co., Lockwood Mfg. Co., all of whom make the same advance; this advance has reference to the line of locks, knobs and other house trimmings as well as a large line of goods of analogous character. Wood screws, machine screws, bolts, etc., have not as yet known material changes.

Wire Nails: The prices for this leading staple have been announced for February, at the advanced quotations named as follows: To jobbers in carload lots, f.o.b., Pittsburg or Cleveland, $1.65; single carloads, add 5 cents, and for less than carloads, add 10 cents to above base price. The minimum weight of carload lots now consists of 30,000 pounds instead of 24,000 pounds as it was previous to February 1st. This also applies to carload shipments of all wire products. The New York market is represented by the following: Carload lots on dock, $1.80; smaller lots from store, $1.90.

Cut Nails: The market for cut nails has been strengthened and greatly improved by the conditions surrounding the wire nail market. The prices in New York may be quoted as follows: Carload lots on dock, $1.40; smaller lots from store, $1.50.

Smooth Wire: The American Steel & Wire Co., on February 6th, advanced the prices on smooth wire for February, so that the market is now represented by the quotation of $1.50 base, f.o.b. Pisttsburg or Cleveland, with 40 cents added for galvanized wire. This is the price to buyers of carloads; for a single carload, an advance of five cents per 100 pounds is asked. The jobber is also compelled to pay 2½ cents per 100 pounds, when direct shipments of less than a carload are made on existing contracts. Less than carload lots to retailers are subject to an advance of 10 cents.

Barb Wire: The American Steel & Wire Co. have advanced prices on barb wire on February 6th, making quotations for February delivery 15 cents higher than for the previous month and being in harmony with similar advances on corresponding products. There is a good demand prevailing for stocking up purposes and for export, and we quote New York prices for four-point galvanized: Carload lots on dock, $2.30; smaller lots from store, at the customary advance. Painted wire is quoted at 40 cents less than galvanized.

Brass Wire, Sheet Brass, etc.: The Plume & Atwood Mfg. Co., New York, have issued a new discount sheet under date of February 2nd, advancing current prices in conformity with the changes in the metal market. The discount sheet is as follows:

Roll and Sheet Brass	discount, 20%
Patent Leveled Engraver's Sign Brass	" 15%
Slitting Charges (Brass)	" 20%
Sawing Charges (Brass)	" 20%
Jewelers' or Gold Metal	" 20%
Platers' Metal thinner than No. 38	" 25%
Printers' 2x4 Sheets and Galley Sheets	" 20%
German Silver Sheets	" 45%
Platers' German Silver	" 30%
High Brass Rods	" 20%
Wire in Coils (No. 20 and Coarser), excepting Copper Wire	" 20%
Spooling Wire (Brass)	" 20%
German Silver Wire (No. 20 and coarser), and Rods	" 45%
German Silver Re-istance Wire	" 45%
Iron Lined Brazed Tubing	" 55%
Brazed Brass Tubing	" 35%
Zinc Tubing	" 35%
German Silver Tubing	" 35%
Brass Mouldings and Door Rail	" 30%
Angle and Channel Brass	" 30%
High Brass Screen Plates (Sawed) 14x43, ¼ to ½ inch thick, per lb., net	17½c. net
Brass Segments, same price as Circles	discount, 20%

For quantities less than 100 lbs, 10 per cent. discount on all the above. Prices and discount, for material not specified above given on application. Terms of payment net cash, 30 days, or ½ per cent. off for cash in 10 days from date of invoice. Deliveries made or freight allowed, as may be agreed.

High Brass Scrap	11
Low Brass Scrap	12
Gilding and Bronzing Scrap	13

Copper and Brass Products: As indicative of the condition of the market at present on copper and brass products, U. T. Hungerford Brass & Copper Co., New York, under date of February 8th, name the following quotations:

Sheet Brass, Brass Wire and Brass Rod	discount, 15%
Brazed Brass Tube	" 30%
German Silver, Wire, Rod and Sheet	" 40%
Copper Wire	" 15%

Sheet Copper	per lb. base, 21½ cents
Yellow Metal	" " 17 "
Brass Butts	discount, 40&10%
Iron Jack Chain	" 70&10%
Brass Jack Chain	discount, 60%
Soldering Coppers	per lb. net, 25 cents

Prices subject to change without notice.

Shot: Owing to the increasing cost of the metal, since the date of our previous issue, three advances in the price of shot have taken place; one on January 26, making a base price of $1.35 per bag for sizes smaller than B; on January 31 this was made $1.40, and on February 3 these prices were again advanced as follows:

New York, Feb. 3, 1899.—On this date prices will be as follows, subject to change without notice.

Drop Shot, sizes smaller than B,	25 lb. bags,	$1.45	per bag;	5 lb. bags,	35c.	per bag
" B and larger sizes,	"	1.70	"	"	"	40c.	"
Buck Shot,	"	1.70	"	"	"	40c.	"
Chilled Shot,	" "	1.73	"	"	"	40c.	"
Dust Shot,	" "	2.10	"	"	"	50c.	"

Terms—Net cash, 30 days, or 2 per cent. discount will be allowed for cash remitted within 10 days of invoice date. Discounts on ton lots as usual. Freight equalized with Philadelphia and Baltimore.

Copper Rivets and Burrs: These goods being in strong sympathy with the market for copper, have changed quotations with every advance, and may now be quoted at 40 per cent. discount, burrs only being held at 25 per cent.

Brass Hand Bells: Owing to the advance in material, light brass hand bells are now quoted at 66⅔ per cent. discount.

Brass Wire and Sheet Brass: The price of brass wire has been advanced so that the discount now representing the market is 20 per cent. A similar advance has been made in the price of sheet brass, which is also quoted at 20 per cent. List remaining the same as before.

Brass Jack Chain: An advance has been made by the manufacturers in the price of brass jack chain, which is now quoted at 60 per cent. discount.

Digitized by Google

Coil and Crane Chain: James McKay & Co., Pittsburg, Pa., under date of January 28th, make the following quotations on "Proof Coil Chain," in lots of 1000 pounds, of each size:

$5.35	4.35	3.35	3.10	2.05	2.85
3-16	¼	5-16	⅜	7-16	½ inch.
$2 65	2.55	2.50	2.45	2.40	2.10
9-16	⅝	¾	⅞	1	1¼ inch.

"B. B. Crane Chain," ¼ cent per pound above coil chain price, and "B. B. B. Crane Chain," 2¼ cents above coil chain price. Coil chain is not made above 1 inch. Shipments less than 1000 pounds are f.o.b. Pittsburg. Prices subject to change without notice.

Lead Pipe, Sheet Lead, etc.: Under date of February 2nd, lead pipe was advanced to 6¾ cents a pound, and sheet lead 7¼ cents. Subject to the usual trade discount.

Percussion Caps: An advance in prices has been made by the manufacturers of percussion caps. Solid cases of any one kind are now quoted as follows:

G. D., 100 M. in case, per M	30 cents
F. L., " " "	35 "
G. E., " " "	45 "
Musket " " "	55 "

For less than solid cases, 2 cents per M. advance is quoted. Terms, 60 days, or 2 per cent. discount for cash in 10 days, f.o.b. New York or factory.

Putnam and Neponset Horse Nails: In order to meet the demand for a horse nail with sharp points, the Putnam Nail Co., Neponset, Boston, Mass., are placing on the market a new nail under the name of the "Neponset," which, made by the same methods as the Putnam, is sharp-pointed instead of being hammer-pointed. It is sold by the following list prices, at 40 per cent. discount:

Nos	6	7	8	9	10
Cents	23	21	20	19	18

The discount on Putnam nails remains as previously quoted, 33⅓ per cent.

Bright Wire Goods: The extreme prices at which these goods have been held for some time, have been withdrawn by all the manufacturers, and they are now quoted at prices considerably higher. With the advances on brass and iron wire now prevailing, the market is represented by a discount of 90&20 per cent.

Carriage Bolts, Lag Screws, etc.: The market for these leading goods in the line of heavy Hardware, has been greatly strengthened by the withdrawal of all quotations founded on a lower market for raw material. Orders have been so freely given that many manufacturers have enough to occupy their attention for some time under specified dates of delivery. The market may be considered as maintained at the following quotations for present orders:

Common Carriage Bolts	discount, 75 and 10%
Lag Screws, Gimlet Point	" 85%
" Cone Point	" 85 and 5%
Machine Bolts	" 80%
Bolt Ends	" 80%

Cordage: The business in cordage is very moderate, being of the usual normal character for this part of the season. The hemp market continuing firm for both manila and sisal, has made the quotations on rope steady and regular for some time past. We quote as follows for carload lots:

Manila, 7-16 inch and larger	per pound,	7½ to 7¾ cents
" ⅜ inch	"	8 to 8¼ "
" ¼ and 5-16 inch	"	8½ to 8¾ "
Hay Rope	"	7½ to 7¾ "
Sisal, 7-16 inch and larger	"	7 to 7¼ "
" ⅜ inch	"	7½ to 7¾ "
" ¼ and 5-16 inch	"	8 to 8¼ "
" Lath Yarn	"	6½ to 6¾ "

Binder Twine: The manufacturers who are willing to guarantee prices against decline are booking orders and doing a fair business. Prices continue very steady at the following quotations for carload lots, made by Eastern manufacturers:

White Sisal, 500 feet to the pound	per pound,	8¼ to 8½ cents
Standard, 500 feet to the pound	"	8¼ to 8½ "
Manila, 600 feet to the pound	"	9 to 9¼ "
Pure Manila, 650 feet to the pound	"	9½ to 9¾ "

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 42 cents per gallon; in lots of 5 barrels or more, 41 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

FAYETTE R. PLUMB, Incorporated.

THE COLUMBUS TRADE.

We are glad to report a very encouraging outlook for 1899. We never had so little trouble in securing orders for season goods, and they are more liberal than ever before. There seems to be a general impression that the demand for goods from consumers will be heavy as soon as spring comes, and we cannot see anything in the way of a realization of their expectations. Prices seem to be on the upward grade and it looks like higher prices on all heavy Hardware. The wire and nail combine is getting very independent these days, and do not hesitate to tell you when you must draw out goods entered for shipment. Only last week we received a notice that it would be well for us to keep track of our January contract, as any part of it not specified for would be cancelled February 1st. Heretofore when our customers requested us to delay shipment of their nails and wire for a week or even a month, we had no trouble in getting the manufacturers to grant the request; but things have changed. We predict another change before many months, when dealers will be able to dictate terms to a reasonable extent again. So far we hardly think anyone can complain of advances being unwarranted. There is no doubting the fact that many articles are sold too low. Among the staples that have advanced are wire and nails, bolts, screws, tacks, screw and strap hinges, tin plate and tinware, wrought goods and bright wire goods. Any one of the above named articles are not high at present price, but we hope manufacturers will not try to boom prices above their value. We fail to see the necessity of an advance on metallic cartridges. While it is true that brass, copper and lead are all higher, we think that for several years the makers of these goods having been reaping a golden harvest, and could well stand an advance in raw material without advancing the price of the finished articles. We can think of a number of articles that will no doubt be higher in the near future.

SMITH BROS. HARDWARE CO.

THE BALTIMORE TRADE.

The world has changed as regards the relative positions of the Powers. The star of the union born in the Declaration of Independence has increased in lustre, and through its force of attraction, will cause the lesser lights to circle round it.

We note with pride the great development of our country, its institutions of learning, the advancement in arts and sciences and the fact that in manufacturing and finances we lead the nations. Whilst our natural resources and geographical position, strengthened by a large navy will be convincing peace arguments, the revival of ship building, stimulated by conditions favorable to our becoming the greatest commercial nation, should have hearty support. Our manufacturers, through mammoth consolidations, are enabled to produce at a minimum cost immense quantities which, after supplying home demands, must go into other markets and should go in our own vessels, thereby giving employment to American labor and increasing the wealth of the country. The population of our recently acquired territory handled with a little diplomacy and firmness will soon swear allegiance to our flag, and if our friends in Congress will only give us a fearless, conscientious and patriotic legislation, support the administration and quickly pass the Peace Treaty, it will be better for all concerned and especially so for the race we are by divine providence to moralize and Christianize—the poor Filipinos.

We should feel a thrill of delight in our rapid progress, achievements and the possibilities before us and could the peerless Washington, who just one hundred years ago passed into a glorious eternity, return, he would be mystified, filled with emotion and find it difficult to realize that this is the country, with its steam and electric railroads, telegraph and telephone systems, shipping facilities, etc., little dreamed of in his day, for which he so bravely fought, and fathered.

As nations rise and fall there must be a zenith to their glory, so let us hope we are approaching that state and that our star will set tranquilly overhead for many centuries to come. With the trusts it may be different, their prolonged existence is somewhat problematical. The enormous recent advances in copper, lead and spelter and more moderate in other raw materials, have affected nearly every article handled by the Hardware trade, and the quotations received since January 1st show increased values ranging from 10 to 75 per cent.

The American Steel & Wire Co. may find Mr. Robinson and Mr. Biddle aggressive competitors. We await developments. In viewing the general condition of trade, the low rate of interest at which money is loaned, the improved condition of the farmer, whose products will go higher, the increased demand for labor and many other attendant circumstances, we feel that the present year will be unprecedented. It is better to be a believer in optimism than suffer the discomforts of a pessimist. Navigation in the Chesapeake Bay has been somewhat impeded by floating ice, steamers delayed, but no accidents,

Collections are steady and few failures reported.

Orders well assorted with heavy goods in demand.

H. W. WEBB & SONS.

THE OMAHA TRADE.

We have been somewhat crowded for time of late on account of the regular January troubles incident to the closing of the old year and the opening of the new one. The results of the last year's business were, we believe, entirely satisfactory in general to the trade in this locality. The volume of business was exceptionally large, and there was no fault to find, in a general way, with the margins, though they were considerably closer than those to which we had been accustomed in years past, yet we believe no closer than they will be in the future. It will be necessary

Digitized by Google

for us to adapt ourselves to present conditions in order to reach the highest and most satisfactory results instead of mourning because conditions are not what they once were.

As far as the outlook is concerned, it is considerably brighter. Collections are, like sales, very much in excess of the average. There never was a time when the country was buying as freely as at present, and was in as good condition to pay for what it bought. The only difficulty is that some people appear to think that if they sell goods a little closer than their neighbors, they will be able to monopolize the entire trade, and this is a class of business men, both among retailers and jobbers, that probably do more harm and less benefit to the community than any other class. It is impossible for any one man or firm to do all the business, regardless of the prices they make.

If a man will be fair and honest with his neighbors and endeavor in his relations with them to follow the Golden Rule, he will not only make himself respected by his competitors, but, in addition to this, will secure material advantages for himself at the same time. What dealers need more than anything else, in both jobbing and retail trade, is confidence in their competitors, and to secure it, they must have confidence in themselves. The way to sell goods at a profit is to ask a price, and no dealer ever secured a fair margin on his goods unless he asked it and was positive of his position.

We trust that improved conditions may make it possible for both manufacturers and jobbers and retailers to secure better results for the capital invested and the effort required to handle it, and the best way to do this is to be on good terms with your competitors, give them credit for good intentions, and then, with confidence in them and yourself, the results will not be long in doubt.

RECTOR & WILHELMY CO.

THE CLEVELAND TRADE.

Notwithstanding the prolific discussion of the relation of the jobber to the manufacturer and retailer, the jobber is likely to continue. The jobber represents a hundred or more manufacturers to one to two thousand retailers. Many manufacturers make only one line that the retailer needs. The jobbers introduce his goods at much less expense than the retailer could, shipping them in quarter dozen lots with goods from other manufacturers, serving both parties with more economy than they could be served without him. He furnishes the manufacturer specifications for goods many months before they are needed, in this way advising them what will be wanted, permitting the manufacturer to keep his factory busy during the winter on spring and summer goods, and during the summer on winter goods, and by this means the goods are made ready for delivery to the retailer when his customer wants them.

The jobber came in the process of the evolution of business; came because there was a demand for him and will stay until he is superseded by something better. Forty years ago the retailer visited New York at least twice each year, buying a six months' stock. Now he orders in small quantities daily or weekly, carrying a smaller and much more complete stock, doing a larger business on less capital. It is fundamentally a question how a consumer can be most efficiently accommodated. Promptness in supplying his wants is often more important than the cost; his plowing and sowing and reaping cannot be delayed without serious loss.

The search for political issues to be used in the next presidential campaign presents a possibility of serious damage to business. The search is made not for what is best, but what will win; appeals are made to voters to decide important national questions which the wisest statesman hesitates about, questions which can only be left for future determination. Unexpected issues forced upon us by the war call for careful patriotic consideration. We may feel compelled to change our plans because we have been unconscious of the forces that have placed us in our present condition.

We should not imperil the future by fixing a programme that necessity may compel us to abandon. Prudence requires that our powers be developed gradually, guided by experience. The excitement of presidential campaigns is the worst possible condition for prudent action.

LOCKWOOD-TAYLOR HARDWARE CO.

THE KANSAS CITY TRADE.

The best comment we can offer upon the business which has sought our hands, is that for three weeks we have "hustled." Indeed, we have been busy. This correspondent had before him for days an envelope addressed *Hardware*, but never did he find the half hour, or any part of it, necessary to take, to send his letter. This communication is sent because the editor wants copy, and the "devil" will not let up till he gets both "copy"—and editor.

Since the close of the first week in January, we have been almost as busy as we would expect to be two months hence. The orders have been well assorted and of fair size. Of course, we have had heavy sales in staple goods, such as wire, nails, metals, etc., and at no time in the history of this concern did the same period find us so heavily stocked. We were fortunate, indeed, in that respect, and we are still "strictly in it" for assortment, except on nails. We are to-day selling nails at 195 base, barb wire 205 and 240, and a change sheet goes out February 4th, advancing nails ten cents and wires five. Tin plates and galvanized iron, zinc, sheet iron, solder copper and copper goods, etc., we have hoisted in price every week for three weeks past. We hoist them again tomorrow.

We advanced loaded shells January 20th to 40&8; to-day we "shoot" them to 40&3, and the other fellow who shoots with the gun will kick, if his gun doesn't.

Apropos of the date advances. This correspondent is not a stockholder of the Gille Hardware & Iron Co., but he thinks he represents a majority of the sentiment in voicing this sentiment, viz.: the rapid advance mentioned in the above lines of goods are about one-half legitimate as to profit-bearing values; the other half is more or less speculation. The jobber who has goods to sell, in our judgment, would act wisely in selling as nearly at the market as he can and not check the outflow of merchandise which he may later have left on his hands at a materially reduced profit. We prefer selling 2000 tons barbed wire in four weeks at a price which moves it and puts its proceeds into our business, rather than to sell 2000 tons in four months, one-half of it on speculative basis, the other half to take its chances. And to do this we do not have to demoralize the market. We have only to hustle and sell.

We would be glad, indeed, to give a resume of the general business conditions of 1898 as they ceased to be in this vicinity when 1899 opened upon us. We have in mind, however, a place where these facts can be used more advantageously, even if a little old. We will anticipate this much, and say that the year 1898, in its entire assemblage of wonders, found no part of the United States more marvelous in development and fruition than this section of the middle West.

The Hardware jobber, we trust, was of it and in it. Values, in a jobbing sense, have been very steady, other than those noted. Retailers are less than ever it seems to us, inclined to kick if they detect a small change in price during a period when advances are probable. There are some who imagine the jobber is a "robber," but if said jobber reduces the price, the retailer doesn't overlook it, nor does he ever get credit for it.

Such men naturally die sooner than "white" men, so for years past the moral tone of the retailer has kept pace

Digitized by Google

with the jobber, the jobber has learned something, and matters will some day by this process of evolution reach a point where business will be profitable even on a narrower margin than some of it is now transacted. This writer has just finished his dictation of letters, and one of them was to a dealer with whom you all have had experience, hence this train of thought almost unconsciously crept into this space. The kicker at anything—with and without sense, excuse, reason or justice—his is the scalp that you have all reached for. Occasionally you "took it." The question is, did it pay? Is it not cheaper to bid the incorrigible "kicker" a fond adieu and tell him to just please transfer his ledger account to your esteemed competitor, whom you can cheerfully commend as a strictly first-class concern, noted for low prices, prompt shipments, large stock and their unfailing supply of patience which was never exhausted even by the most senseless and unreasonable of complaints of any and every character?

We are having a spell of weather indeed. Business is a little checked in the past three or four days because of the severe cold. Every indication from advance orders, reports, surmises, etc., points to busy days in the near future.

If you do not hear from us, you will know why.

GILLE HARDWARE & IRON CO.

THE PITTSBURG TRADE.

January 1899, was a decided improvement on January 1898. There was a good brisk movement of goods the latter part of the month, and the total sales footed up well. As a rule, retailers had not supplied themselves with nails and wire and were caught napping by the advance. Jobbers who had reasonable stocks have generally divided with their customers, but car load orders come in by every mail, if at prices quoted a week or two since, and the supply does not warrant accepting all that comes.

The moderate advances so far made are very acceptable to merchants who have been selling on a declining market for the past seven years, and although they have been immediately brought about by combination tactics, we believe the condition of affairs warrant a reasonable advance and that prices can be maintained at present figures. The local stove makers are quoting a slight advance on their product.

The Pennsylvania railroad, after many years of promises, is about to replace its present unsightly passenger station with a new and more creditable structure. There are difficulties in construction on account of the location which have recently been overcome, and during the coming summer we are to have the new building. We feel that the greatest freight-producing point on the Pennsylvania system is entitled to better passenger station facilities than we have had, and are glad the railroad company has waked up to the situation.

To show how everything tends to quantities these days, a rivet maker told the writer recently of one concern in Pittsburg now calling on him for 20 tons of rivets daily to supply their needs.

LOGAN-GREGG HARDWARE CO.

THE ALBANY TRADE.

"Coming events cast their shadows before." This is practically what we wrote in previous letters. Although the remark frequently made, "We told you so," is commonly and easily said, still the facts warrant the case now, as the numerous withdrawals of prices by manufacturers of late show conclusively that prices that have not already strengthened will soon be going higher. This condition gives a great impetus to business. Orders have been coming in freely, sales being made earlier this year than for several seasons past.

With nails, screws, tacks and many other goods advanced, it is not unreasonable to believe that many other lines will follow. Advanced prices are being fairly well maintained by the jobbers, although, in some instances, the temptation to get a little under the market has not been resisted particularly among some houses seeking new trade, but it is fair to assume that this will be of short duration as soon as stocks now in the hands of the jobbers begin to get reduced.

Conditions in collections are better than before. The customers are paying up fairly well and indications point to a good financial condition among small merchants when spring trade starts in.

The high prices now ruling in the base metals of copper, tin and lead have caused sudden advances in lines that these largely enter into, and, owing to the extreme prices reached, purchases will be now kept close to actual needs for immediate wants.

The sale of netting, wire cloth, spring hinges, screens and screen doors has been particularly heavy and orders have been placed early so that the retail dealers may be prepared for the demands of their customers as soon as the season for these goods opens. Evidently a great deal of attention is being paid by the trade to have stocks ready earlier than usually and the wisdom of this will in our opinion be realized a month or two hence.

A promising outlook is before us, and if the present conditions continue through 1899, this will be the "Banner" year for the Hardware trade.

ALBANY HARDWARE & IRON CO.

THE INDIANAPOLIS TRADE.

The situation is the same here as elsewhere. We are overrun with orders from customers who are endeavoring to anticipate their wants for a considerable time in the future in order to own their own goods at a less price than they will be compelled to pay later. While we consider this good business policy, we advise conservatism. We do

. . .SMOKELESS POWDER PERFECTED. . .

Peck's Bicycle Spoke Threader.

List, $3.00

No. 50.

THIS little device will prove a **Bosom Friend** to every bicycle repairer, machinist or amateur, or even **The Poor Hardwareman** who sometimes or semi-occasionally may desire to cut a thread upon small wire. It can be readily secured in any vise and the collet of the machine is arranged to hold dies 5/8-inch in diameter. NO DIES, however, are furnished with the tool. The chuck for holding the wire is a three-jawed one, which will accurately center the work, and is fitted with a **Hollow Spindle** which slides back and forth in a splined groove. The tool is well finished and practical. . . . .

GOODELL BROTHERS COMPANY, GREENFIELD, MASS., U. S. A.

not advise any one of our customers to place orders for staple goods beyond their needs for the spring and early summer trade. While we anticipate a strong market for some time to come, we do not advise purchases as a speculation. The desire on the part of many Hardwaremen, both the retailer and the jobber in the past, to grasp everything in sight, hoping to strike it rich in a few weeks, has resulted disastrously in the past, and history is liable to repeat itself.

Let us all be willing to let the other fellow do part of the business, and make a little. Those of our older friends who are in position to talk from experience, say that the farmer who sells his wheat as it comes from the thresher, year in and year out, gets more money out of his crop than the man who is always holding for advances that never come.

The Hardwareman who is conservative is the one who wins in the long run.

VAN CAMP HARDWARE & IRON CO.

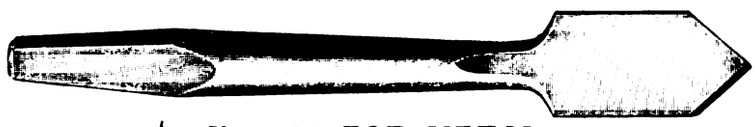
THE DAVENPORT TRADE.

"There is a tide in the affairs of men,
Which, taken at the flood, leads on to fortune."

There is a tide in the affairs of trade, which, taken at the flood, leads on we know not where. This is, beyond a doubt, flood tide in the trade and commerce of this country. Money is a drug in the market. Everybody is trying as hard to get rid of his cash as he was a few years ago to get it and put it into a tin box in a safety vault. The buyer is doing the running now, while the seller sits independently spending his time and energies in marking up prices. To one that has witnessed the ups and downs—mostly downs—of values for the past quarter of a century, it would seem that the millenium of commercial prosperity had arrived. All changes in price are advances. The very atmosphere is filled with a desire to invest in something. Witness the recent advances in stocks, bonds, grain, real estate, and even Hardware. The present expansion in business has come on gradually; the idle capital has been slowly drawn from the stocking legs. For years and years the hand-to-mouth policy of buying has been maintained. It was this policy that floated many commercial crafts over the reefs of threatened bankruptcy in 1893. Will not this rapid increase in values and low rate of interest tempt men to borrow beyond their ability to pay? When these debts become due and banks call in the very paper that they are now anxious to secure, will there not then come a panic that we will not have conservatism enough to avert?

SICKELS, PRESTON & NUTTING CO.

Independent Wire & Nail Co.



The following interesting announcement comes from Philadelphia, under date of February 4th: The Merchants' Wire & Nail Co., chartered at Trenton this morning, is a Philadelphia enterprise, organized to compete with the American Steel & Wire Co. Clement N. Biddle, Robert Biddle and William B. Knight are at the head of it. The capital stock is $500,000, of which $200,000 is paid in, and is distributed in shares of $1,000 each, all of which have been subscribed in amounts of less than $2,500. The company will issue $500,000 of 7 per cent. preferred stock to pay for manufacturing plants. The main office of the concern will be in this city, but there will be branch offices in New York, Newburg, N. Y., Pittsburg, Baltimore, Cleveland, Chicago, East St. Louis, Ashland, Ky.; Pueblo, Col., and Oakland, Cal.

C. N. Biddle says that the stock of the company will not be listed on the Stock Exchange, and that the enterprise is an association to protect those who are in it from the con-

trol of their business by the wire and nail trust. The association will erect a plant at Pittsburg, another one in the West and one in the East, at which it is proposed to manufacture one-third of the annual consumption of barbed and common wire and iron nails. The association will admit other manufacturers who are dependent on the wire trust for a supply and each stockholder will sell his own goods direct.

The Hardware Associations.

A meeting of the East Tennessee Retail Hardware Association was held in Knoxville, Tenn., on January 19th. An address was delivered by the president, J. H. McCaslin, and a number of interesting papers were read.

The Hardwaremen of Northern California recently met at Marysville and organized under the title of "The Hardware & Implement Dealers' Association." The main object of the meeting was to review the situation of the manufacturer and jobber compared to the retailer: to consider the relation of the wholesale and retail dealers and to deliberate on the commercial right affecting the different classes of merchants. The next meeting will be held January 17, 1900, at Chico.

The J. D. Warren Mfg. Co., Masonic Temple, Chicago, have issued an attractive printed sheet, upon which we find that it is a guide to an object desired by all merchants, explained in the following sentence: "The purchasing power of money, and sales greatly increased, with less expense, by new methods." Illustrations are also given of Warren's system of shelving, and especially of a store before and after that system has been applied. The whole thing is expressed in a nutshell, in this extract: "An evolution in the method of store arrangement in Hardware establishments is as rapidly occurring among the merchants of small capital, as with those of more extensive means. Both, however, have made great advancement during the last three years, a result born of the trying times, by learning that capital can no longer be carelessly invested in goods that have heretofore been put away with almost total indifference as to their value, care or necessity of quickly realizing a profit on them."

We have received from Farwell, Ozmun, Kirk & Co., St. Paul, Minn., a finely arranged and illustrated catalogue for 1899 of their large line of bicycle sundries. In a note of introduction, the publishers say: "The goods which we are offering you cover the field more thoroughly than ever before, and prices have been reduced as far as is possible, when quality is taken into consideration."

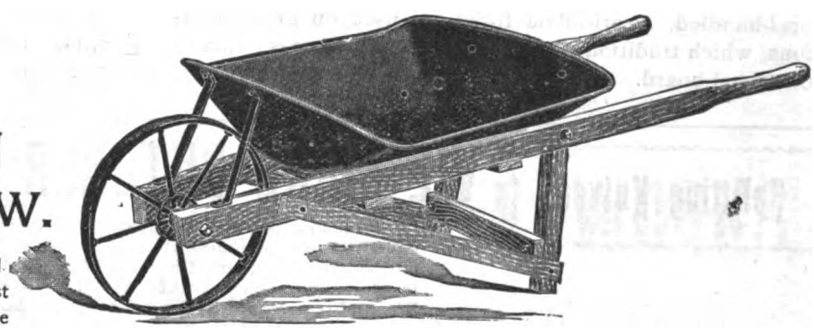
Trade Via the Philippines.



More than a billion dollars' worth of goods are every year imported into the countries commercially adjacent to the Philippine Islands, and more than half that amount is composed of the class of articles produced or manufactured in the United States and offered for sale by her people. Two tables just prepared by the Treasury Bureau of Statistics present some startling facts as to the consuming power of the countries in easy reach of Manila as an entrepot and distributing point. From Manila to Hongkong and Canton, the gateway to Southern China, is but half the distance from New York to Havana, and from Manila to Yokohama, Port Arthur, Shanghai, Bangkok or the Strait Settlements is in each case a distance but little, if any greater, than that from New York to Havana. The great ports and cities of British India and Australasia, while somewhat more distant, are much nearer to Manila than to any other general distributing point for the great classes of merchandise which the countries in question produce.

The importations into these four countries, Japan, China, British Australasia and British India and Strait Settlements, as above indicated, amount to nearly a billion dollars a year. Those of Japan, which a decade ago were less than fifty million dollars, are now more than 100 million dollars, and steadily increasing. Those of China have increased twenty per cent. in the last decade and now amount to nearly 200 million dollars a year. Those of British Australasia are about 300 million dollars a year, and those of British India and the Strait Settlements, which show an increase of about ten per cent. in the decade, are 300 million dollars annually.

More than half this enormous sum of the imports of these four great countries are, as above indicated, classes of articles produced in the United States and offered for sale by her people. Of cotton and cotton goods alone, the imports into these four countries amount in round numbers to 130 million dollars per annum, and of this amount but little over ten million dollars' worth is from the United States, the great cotton-producing country of the world. Imports of iron and steel into the four countries in question amount to over thirty million dollars, and of this, seven million dollars' worth comes from the United States. The imports of leather and manufactures amount to seven million dollars, and less than one million dollars of that sum from the United States; wood and manufactures thereof to about eight millions annually, and less than two millions of it from the United States; machinery, not included under the head of iron and steel manufactures, to thirty million dollars, of which less than two millions were from the United States; chemicals, drugs, etc., amounted to more than ten million dollars, with less than one million of it coming from this country. Of the seventeen million dollars' worth of mineral oils imported into the four countries in question, we furnished over one-half last year. Of the thirteen million dollars' worth of breadstuffs furnished to those countries, our share was less than five million dollars' worth, and of the six million dollars' worth of coal, we furnished less than one per cent. Of the three million dollars' worth of provisions, we furnished but little more than a quarter of a million dollars' worth.

Of the eleven great classes of articles, manufactures of cotton, iron and steel, leather, wood, machinery, chemicals, mineral oils, breadstuffs, provisions, coal and raw cotton, China imported in 1897 ninety million dollars' worth, and of that sum, eleven million dollars' worth came from the United States. Japan imported in 1897 fifty-eight million dollars' worth, and of that sum, twelve million dollars' worth came from the United States; British Australasia imported sixty-four million dollars' worth, of which twelve million dollars' worth came from the United States, and British India ten million dollars' worth, of which three and a half million dollars' worth was furnished by the United States.

Some Old Days.

Think of a dinner party where the guests hungrily grabbed choice bits from the dishes in their immediate neighborhood, and having dipped their "gobbets" in sauceboats which were commonwealths of gravy, then proceeded to get the dripping morsel "indoors" with the best grace they might. Truly there are compensations for not having dwelt in ye good old times. Silver forks were considered the last extreme of foppery in the seventeenth century, and even early in our own good Queen's reign, black-handled, steel-pronged instruments were the only wear of lower and middle classes.

In the days of Queen Anne forks were treated variously to prongs, some being made with two, while many counted to six. Yellow handles had a vogue one year, green another, and so on, until every shade in the rainbow was reached. Many of these quaint relics are still preserved as heirlooms, and in one north country mansion a set of pink coral-handled, pearl-inlaid forks are used on great occasions, which tradition has it once graced Mistress Anne's own royal board.

Now the electro-plate has spread itself over the land. Mayfair and Belgravia are harking back to something away and apart from even the cheapened sterling silver of widespread use, and fancy china-handled forks, stained ivory and jade have been seen on many dinner tables of the social elect during the season.

Aluminum is being pressed into the service, too, and it is not unlikely that the present plain fork of unornamental aspect will be shortly relegated to the hades of lodging house or suburban abode, as out of tune with the artistic intentions of this highly ornate generation.

Sir John Llewelyn, M.P., speaking at a meeting in connection with the Swansea Savings Bank, referring to the disastrous effects of the South Wales coal strike, said from careful calculations he had made he estimated the loss to the industrial community at six millions.—*Exchange.*

The preliminary report of the Nicaragua Canal Commission, states that the project is feasible, and estimates the cost of construction at $123,000,000.—*Exchange.*

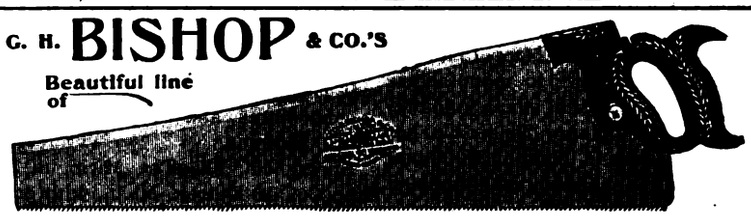
GREENFIELD, MASS.

The
Blount Door Check
is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.



The Yale & Towne Mfg. Company.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements. etc, will be gladly received, and promptly published.

New Companies, Etc.

Baltimore, Md. —The Arupdel Caster Mfg. Co. has been incorporated by Henry P. Wartman, George R. Jacobs, William Hallahan, A. J. Robinson and John F. Schulz; for the purpose of manufacturing and dealing in furniture, casting and light Hardware. Capital stock, $1000.

Baltimore, Md.—The J. S. Hull Mfg. Co. has been incorporated; to manufacture tools and machinery. Capital, $100.000. Incorporators: J. F. Harris, J. S. Hull, C. E. Harris, E. P. Herpin, C. E. Hull, G. H. Knapp.

Cambridge, Ohio.—The Byesville Iron & Steel Co. has been incorporated by A. M. Brown, C. M. Dillisen, J. H. Opperman, W. L. Scott and B. T. Scott; to manufacture iron and steel, etc. Capital stock, $150 000.

Chicago, Ill.—The Henry Nelson Co. has been incorporated by H. Nelson, H. Baum and W. O. Olin; to manufacture plumbers' supplies. Capital stock, $10.000.

Fort Dodge, Iowa.—The Mitchell Implement Co. has been incorporated by J. W. Amond, William Stahlbock, Chas. W. Berresford, P. M. Mitchell and August Nelson; wholesale and retail agricultural implements. Capital stock, $50,000.

Louisville, Ky.—The Marion Scale Co. has been organized to manufacture the Halladay patent.

Malden, Mass.—The Re-New Lamp Co. has been incorporated; to manufacture lamps, etc. Authorized capital, $6000. Paid in, $6000. Incorporators: W. Howland, H. Hastings, G. H. Smith.

Mansfield, Ohio.—A stock company with a capital stock of $15,000 has been incorporated, for the purpose of manufacturing wrenches and a general line of drop forge and machine work. The company will be known as the Galion Drop Forge Machine & Specialty Co. The incorporators are: H. Lannis, Leroy Marley, R.C. Tracht, Weldel Hellrich and F. A. Smith.

New Castle, Pa.—The New Castle Shovel Co. has completed a deal for eight acres of the Sword farm, at New Castle Junction, on which to locate the new factory. Plans for the two main buildings are ready and work will begin at once. One building is to be 300x80 feet, another 120x60 feet, and there will also be an annealing house, storeroom and office.

New York, N. Y.—A corporation bearing the name of the Rubber Goods Mfg. Co. has been organized by Charles R. Flint. Associated with Mr. Flint in this syndicate are: J. Pierpont Morgan, August Belmont, ex-Governor R. P. Flower, ex-Governor Levi P. Morton; Kuhn, Loeb & Co.; Speyer & Co., J. & W. Seligman, I. & S. Wormser, Anthony N. Brady, P. S. Goodhart & Co., of New York; Lee, Higginson & Co., of Boston, and Henry D. Pierce, of Indianapolis, who is also of counsel.

New York, N. Y.—The U.T. Hungerford Brass & Copper Co. has been incorporated by U. T. Hungerford, F. G. Dow and J. R. Van Brunt; to deal in brass and copper. Capital stock, $25,000.

New York, N. Y.—The William Porter's Sons Co. has been incorporated by Annie M. Porter, William H. Porter and William F. Porter; to manufacture lamps. Capital stock, $100,000.

Portland, Me.—The Pan-American Rubber Co. has been organized, for the purpose of dealing in india rubber, with $1,000,000 capital stock, of which $500 is paid in. The officers are: President, A. J. Desmond, of Portland; treasurer, E. K. Milliken, of Deering.

Rutherford, N. J.—The Le Blanc Lock Fastener Co. has been incorporated by Alfred Le Blanc, Rudolph Guttman and Samuel Einstein; to manufacture and deal in goods, wares and merchandise. Capital stock, $200,000.

Springfield, Ill.—The Michigan Brass & Iron Co., of Detroit, Mich., with capital of $200,000, has been licensed in Illinois for $2500.

St. Louis, Mo.— The Advance Water Heater Co. has been incorporated by I. E. Reis, Sol Hammer, W. F. Kennedy and B. Robinson; to manufacture water heaters. Capital stock, $5000.

Toledo, Ohio.—The Lucas Pump Mfg. Co. has been incorporated. Capital stock, $5000. Incorporators: J. O. Cable, Herman Waither, Benjamin Biddle, J. L. Jacobs, J. W. Bussard.

Changes and Improvements.

Ansonia, Conn.—Owing to the great increase of their business, the Bullard Machine Co. is about to erect an extensive addition to their factory. The new building will be 80x60 in dimensions, and, on completion, is to contain much improved machinery.

Appleton, Wis. — The Appleton Wire Works have decided to build a large addition to their plant.

Hamilton, Ont.—T. E. Leather has sold out his interest in the Ontario Tack Co., to J. Orr Callaghan.

Lawrence, Kan.—The plant of the Consolidated Barb Wire Co., of this city, has been sold to the American Steel & Wire Co., and after invoicing the mill and the stock of material on hand, the new owners have taken possession.

Lorain, Ohio.—C. L. Penney, agent, has leased the buildings and machinery formerly used by the Lorain Wrench Co., to the Globe Brass & Iron Mfg. Co., of Cleveland, who will manufacture all kinds of brass fittings such as are used in plumbing.

Newcastle, Ind.—The Jennings handle factory is being remodeled and rebuilt.

Normandy, Tenn.—Tressider & Co. will soon open up a handle factory here for the purpose of manufacturing plow handles.

Perry, N. Y.—The Robison Cutlery Co. is to enlarge its factory and engage in the manufacture of razors.

Recent Embarrassments.

Washington, D. C.—Edwin L. Willson and Edward L. Stoddard, trading as E. L. Willson & Co., pump dealers, at No. 514 Twelfth Street, northwest, have made an assignment for the benefit of their creditors to Douglass S. Mackall. Assets, $3513; liabilities, $3564.57.

Recent Fires.

East Alton, Ill.—The factory of the Western Cartridge Co. has been destroyed by a series of explosions.

Greensburg, Pa. —The Greensburg Bolt & Nut Works have been destroyed by fire; partially insured.

New York, N. Y.—The stock of the Star Safety Razor Co , of No. 4 Reade Street, has been damaged by fire.

Miscellaneous.

Batavia, N. Y.—At the annual election of the Baker Gun Co., the following trustees were elected: W. T. Mylcrane, C. W. Hough, the Hon. George Bowen, E. W. Atwater, H. T. Miller, the Hon. R. A. Maxwell and M. O. Dennis. The trustees organized by re-electing W. T. Mylcrane, president and treasurer; C. W. Hough, vice-president, and E. W. Atwater, secretary.

Cincinnati, Ohio.—The American Tool Works Co. recently shipped a carload of machinery to Japan for a Japanese arsenal, a carload of machinery to Italy, and several orders to Russia.

New York, N. Y.—At a meeting of the stockholders of the American Steel & Wire Co., the following directors were elected: To serve three years, John W. Gates, Isaac S. Ellwood, William Edenborn, Henry Seligman, John Lambert; to serve two years, Stewart H. Chisholm, Frederick P. Voorhees, William P. Palmer, Philip W. Moen, Frederick Strauss; to serve one year, George T. Oliver, Francis M. Drake, Charles T. Boynton, James Hopkins and Charles C. Howard.

St. Louis, Mo.—At a meeting of stockholders and directors of the St. Louis Shovel Co., the following officers were elected: President, J. C. Birge; vice-president, S. S. Gould; secretary and treasurer, E. K. Holton. Directors: Ernest M. Birge and Walter M. Birge.

Syracuse, N. Y.—At a meeting of stockholders of the Syracuse Chilled Plow Co., these trustees were elected: Austin C. Chase, Francis Hall, Joseph C. Willets, James Manning, Harry Wiard, T. J. Leach, J. C. Chase, C. A. Chase, W. W. Wiard. The trustees elected the following officers: Austin C. Chase, president; Francis Hall, vice-president; Joseph C. Willetts, secretary; W. W. Wiard, assistant secretary; James Manning, treasurer; C. A. Chase, assistant treasurer; Harry Wiard, superintendent.

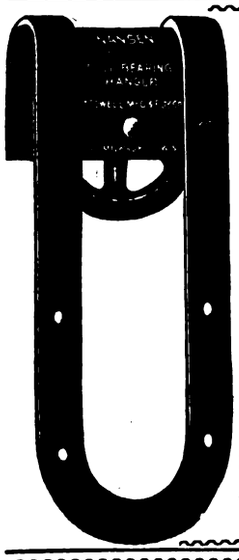
Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of



EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Akron, Ohio.—The Akron Trolley Wheel Co. has been incorporated by A. E. Hiatch, L. H. Williams, C. A. Williams, B. C. Carter and W. M. Carter; to manufacture wheels. Capital stock, $10,000.

Bala, Pa.— William Olmsted, Hardware, bicycles, sporting goods, etc., will open a new store. He will also conduct an electrical and bicycle repairing department.

Denver, Colo. — The Bostwick Gun & Sporting Goods Co. has been incorporated by H. M. Bostwick, G. H. Adams, H.C. Van Schaack. Capital stock, $6000.

Detroit, Mich.—The Monnier Cycle Supply Co. is the style of a new house at No. 68 East Congress Street.

Detroit, Mich.—The Detroit Rubber Tire Co. has been incorporated, with a capital stock of $6000.

Hornellsville, N. Y. — The Hornellsville, Derksen Handle Bar Co. has been incorporated by J. Oppenheimer, G. P. Rishel and F. S. Prindle; to manufacture bicycle handle bars. Capital stock, $1000.

Mobile, Ala.—Bloch Bros. have contracted for machinery, and are now erecting a plant for putting rubber tires on vehicles of all kinds.

Mystic, R. I.—Chas. H. Denison will open his bicycle store in Morgan's Block.

Omaha, Neb.—The Allen Mfg. Co. has been incorporated in Nebraska, to make tire valves. The authorized capital is $20,000. The incorporators are: T. G. Northwald, C. C. Allen, G. N. Hypse, E. M. Allen.

Peoria, Ill.—The members of the firm of Rouse, Hazard & Co. are in business again. S. B. Hazard and a Mr. Doubet, who at one time was a member of the firm, have formed a partnership, and they will make and sell wheels, and handle sundries, wholesale agricultural implements, etc.

Portland, Me. — The Eaton Motor Carriage Co. has been incorporated; to manufacture motor carriages. Authorized capital, $500,000. Subscribed capital, $40. Paid in, $40. Incorporators: Paul Askenasy, A. M. Sheehan, Boston.

Rochester, N. Y.—The Bullis Ball Gear Co. has been incorporated by F. O. Bullis, A. J. Fist, T. J. Swanton and S. A. Servis; to manufacture bicycle gears. Capital stock, $75,000, of which $60,000 has been paid in.

Rochester, N. Y.—The Non-Puncturable Tire Co. has been incorporated in New York. Capital, $50,000. Directors: A. D. Ellis, of East Syracuse, and N. M. Ferguson, K. P. Shedd, E. A. Hinsdale, James S. Tripp and H. D. Shedd, of Rochester.

San Diego, Cal.—The San Diego Cycle & Arms Co.; for the purpose of making, buying and selling bicycles and arms. Directors: F. W. Garretson, D. F. Garretson, Geo. G. Garretson, J. S. Ackermann, San Diego. Capital stock, $10,000; subscribed, $3500.

Syracuse, N. Y.—The Trebert Automatic Coaster & Brake Co. has been incorporated. Capital, $10,000. Directors: Francis W. Gridley, C. Arthur Benjamin, Henry Trebert, William A. Wynkoop and Daniel W. Gridley, Syracuse.

Toronto, Ont.—The Wheeler Saddle Co., of Toronto, Ltd., is the name of a new company chartered by B. W. Yates, G.C. Clark, A. A. Mann, E. S. Wheeler and L. H. Foster, of Detroit, and H.P. Davies, of Toronto. The capital is $20,000.

Watertown, Mass.—The Watertown Rubber Co. has been incorporated in West Virginia, to manufacture and deal in rubber tires. Authorized capital, $200,000. Subscribed, $50. Paid in, $50. Incorporators: H. N. Wayne, E. Dizabean, Newton, Mass.; G. M. Goddard, A. W. Crossley, Boston; L. P. Destribotz, Watertown, Mass.

Changes and Improvements.

Anderson, S. C.—W. S. Simpson & Co., Thompson Cycle Works succeed.

Chicago, Ill.—The Brown-Lewis Cycling Co. has increased its capital stock from $10,000 to $100,000.

Chicago, Ill.—The Chicago Bicycle Rack Co. has changed its name to the Wallingford Mfg. Co. Change of object to general manufacturing.

Danbury, Conn.— Root & Chambers, bicycles, have dissolved partnership. A. G. Root will continue the business.

Kalamazoo, Mich.—Rhodes & Co., bicycle dealers, have dissolved partnership.

Montreal, Can.—A Canadian syndicate, composed of Hon. George A. Cox, E. Gurney, E. B. Ryckman and Richard Garland, of Toronto, and Warren Y. Soper, of Ottawa, have purchased the entire American rights of the Dunlop Tire Co. in the United States and Canada. A charter for the American portion of the business already exists, and application is being made for incorporation in Canada. The new company will be known as "The Dunlop Tire Co. of Canada," with a capitalization of $500,000.

Nevada, Iowa.—The bicycle firm of Cook & Farrar has been dissolved. The business will be continued by George P. Cook.

Olean, N. Y.—The Close Cycle Co., sold out to Frank and Fred B. Close. Style unchanged.

Rome, N. Y.—The Rome Bicycle Mfg. Co. has been dissolved. Samuel J. Harris retires and Albert Krebs will continue the business. Fred W. Fisher, of Syracuse, will be superintendent.

Washington, D.C.—J.D. Arnold, bicycles, No. 1325 New York Avenue, is offering business for sale.

Waterville, Me.—F. S. Brown, electrician and dealer in electrical and bicycle supplies, has rented the store so long occupied by Mr. Ames as a tin shop, and will move his business there from his present location next south of the central fire station. He is fitting up the new place now and expects to be moved in a week or two.

Wallingford, Conn.—The moving of the Wheel & Cycle Bar Co. works from here to Berlin is now an assured fact. In Berlin, a meeting has been held, and $16,000 worth of stock was taken.

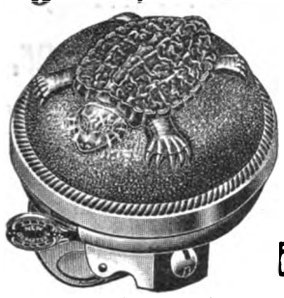
Wilkesbarre, Pa.—Beels & Ferter, bicycle dealers, have dissolved partnership.

Recent Fires.

Harrisburg, Pa.—I. W. Dill, carriage and cycle works, damaged by fire; insured.

Indianapolis, Ind.—The Duthie Chain Co., manufacturers of chains, damaged by fire.

The *American Electrician* draws attention to the fact that the possibilities of electrical combination locks for cash drawers and similar receptacles have not yet been realized to their fullest extent. It requires but little ingenuity to arrange four or five push buttons in such a way that only one combination will close the circuit of an unlocking magnet, and any other will ring an alarm. The alarm could be placed at any convenient point, and at other points could be placed cut-out switches, which, when manipulated, would render it impossible even for one who knew the combination to succeed in opening it. The device is easily developed, and marketable.



During 1898 oil lamp accidents caused 100 deaths, 44 in London, and 56 in the country.—*Exchange.*

The Armstrong Mfg. Co., of Bridgeport, Conn., who manufacture a general line of water, gas and steam-fitters' tools, sharpen and repair all dies and bits of their own manufacture which may be returned to the factory by gas and steam-fitters or other users of these tools. Of course, this does not apply to tools in which the teeth are broken to any extent, as the company do not undertake to insert new teeth; although in some cases dies that lack only one or two teeth can be repaired so as to cut threads properly. Tools returned to the factory for the above purpose should be accompanied by full instructions.

The man with character and capacity may more often be trusted than the man with capacity without character, even though he has ample capital.—*F. R. Boocock.*

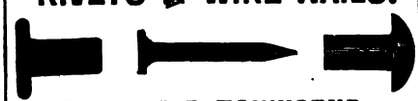
Troy Nickel Works, Troy, N. Y. [Alaska Stove Hardware]: HARDWARE is on our advertising list as one of the best. We will be glad to keep you in this position.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

The metric system is based upon the distance from the equator to the pole. The ten-millionth part of this arc was chosen as the unit of measure of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin:

TABLE FOR THE CONVERSION OF METRIC WEIGHTS AND MEASURES INTO ENGLISH.



Metres into Yards.		Kilometres to Miles and Yards.			Litres into Gallons and Quarts.			Hectolitres into Quarts and Bushels.			Kilogrammes into Cwts. Qrs. Lbs. Oz.				Hectares into acres.	r.	p.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

BUTCHER KNIVES.

You can't make good Butcher Knives any more than good bread without the right material to work with, and even if you have the proper material you can't make good Knives if you don't know how to manipulate that material. . . . . .
The Steel that goes into Goodell Butcher Knives is made for Goodell Butcher Knives and is found in no others. It is the same we have used for years. . . . . .
A Quarter Century experience has taught us how to manipulate that steel to produce the best results.

No. 46.

5, 5½, 6, 6½, 7, 8, 9, 10, 11, 12, 13 and 14 inches.

Goodell Knives have a reputation and are Warranted.

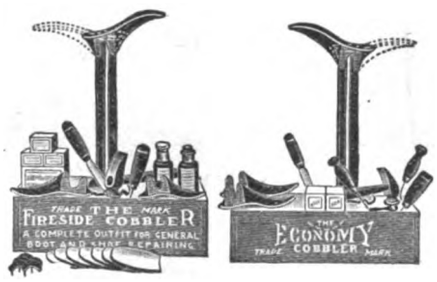
CELEBRATED "HEINISCH" SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name HEINISCH or H. C. HEINISCH on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.



Very Respectfully,

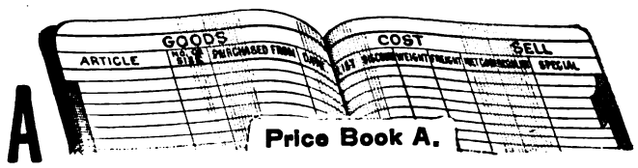
"USEFUL AS AN ADVERTISING MEDIUM."

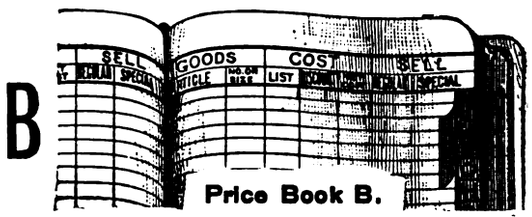


Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

Digitized by Google

HARDWARE PRICE BOOKS.

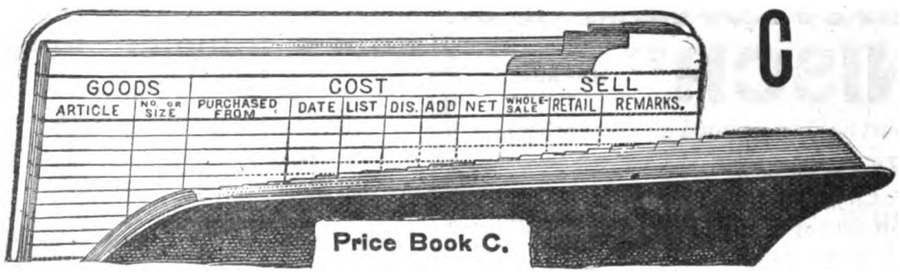
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:



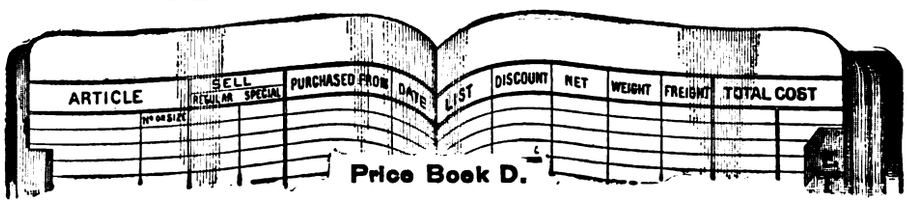
A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



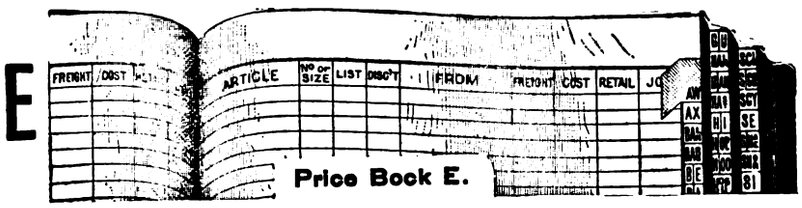
FOUR EDITIONS:

C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

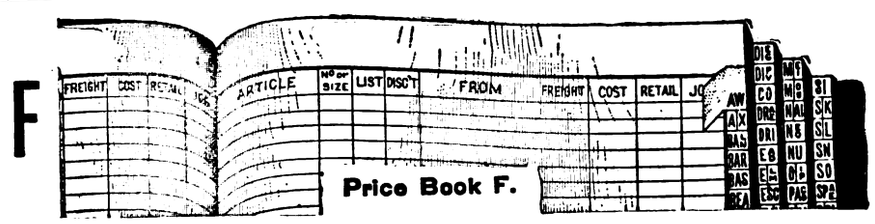
D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2.50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to AU For Chisels, turn to CHI For Iron, turn to IRO
" Parers, Apple " PAP " Cutlery, " CUT " Irons, " IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

AD GU SCO
AN HAM SCR
AU HAN SCY
AW HAT SE
AX HI SHE

Fac Simile of Indexing.

Price Book E—350 pages, 7 x 10 inches, canvas tab indexing. Price, $5.00.

AD DIE MF SI
AN DIP MO SK
AU DO NAI SL
AW DRA NE SN
AX DRI NU SO

Fac Simile of Indexing.

556 pages, 8¼ x 11 inches, black leather tab indexing with gilt lettering. Price, $7.50.

Note.—In Price Books E and F there is an Index Character to EVERY PAGE.

LIGHT HEAD

THE TOLER
Liquid Door Check and Spring.
PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, strong, simple and effective, giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

HIT THE PIPE

as hard as you like with chisel or mallet and observe that the surface finished with simply one coat of our

ELASTIC IRON ENAMEL

is scarcely marred. It also withstands a high degree of heat; in truth it is as nearly indestructible as it is possible to make a varnish. For smoke-stacks, fire-place casings and stove-pipes

ELASTIC IRON ENAMEL has no equal.

The accompanying cut represents a miniature stove-pipe finished with one coat of

ELASTIC IRON ENAMEL.

We send these display pipes with dealer's orders for this specialty. Pints, half pints and quarts are its most salable packages.

Especially Adapted for Hardware Stores.

THE CHICAGO ROLLING LADDER.

The first requisite for a store ladder is ease of operation. The Chicago is the only ladder of the style shown above that does work easily. If you would save one-half your labor, fit your store up with either the Chicago or Bicycle Step Ladder system. Write for Catalogue illustrating our 4 distinct ladder systems to

HARDWARE

VOL. XVIII. FEBRUARY 25, 1899. NO. 10.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the

HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
JAMES H. KENNEDY, - Editor and Manager.
HENRY HOPKINS, - - Associate Editor.

EASTERN MANAGER:
FRED A. CATON, - - 31 Milk St, Boston.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The two weeks just passed have been so filled with meteorological disturbances as to seriously cripple legitimate local business throughout the country. The heaviest snows we have had in years made all roads fairly impassable, followed by severe rains which added discomfort and inconvenience to the previous stagnating conditions.

Advances in prices based on increasing costs of raw material are still the prevailing features of an otherwise satisfactory market for our leading productions. Starting with the pronounced advances on everything in the iron and steel production, from pig iron to structural steel and followed by the phenomenal changes in lead, spelter, copper, tin and other metals, it looks as though a boom was on which might create disadvantageous conditions.

The general sentiment of the Hardware industry, while not deprecating improvement in the low prices which have so long prevailed, is averse to anything looking like a boom, which at a later date may be compelled to take a retrograde movement and so unsettle the market as to "scotch" business seriously even if it does not kill it for good and all for the season.

Price lists have been made up and sent out with insincere advances in order to stimulate purchases at stiffening quotations. The idea being conveyed that at the prices at which orders are entered, and the current lists and discounts, lies a larger margin of profit than the trade has been familiar with for a long period. As nearly all the large orders so far booked have been at prices certainly better than the lowest which prevailed last fall, they have been accepted with a promise of cutting possibilities based on discount sheets of fluctuating figures, unjustified to the extent indicated.

If it has only the effect of keeping the buyer's mind away from previous unprofitable quotations and makes him a willing convert to possible improvement from now on, it will have done good work that will materially strengthen the conditions governing a season of prosperity. But weekly changes covering a long line of metal products, at each successive two-penny fluctuation in price of the raw material, will have the effect of stultifying all the good sought to be obtained when stiffening the general markets under more intelligent methods.

One of the most important statements as bearing on the prosperity of the business men of the country in 1898, is the fact that although the number engaged in the different business pursuits surpassed that of any previous record, the number of failures was the smallest since 1892.

Out of 1,093,373 firms and companies doing business in 1898 the failures numbered 11,615, with total liabilities of $141,611,413. This was a less amount than in any year since 1890, except 1992, and the percentage of assets to liabilities reached 52.1. Of all sections of the States, the Eastern and Middle States only showed any increase in number of failures.

The Jobber's Advantage.

The impetus given to ordering goods for early delivery is a very encouraging one, and will eventually prove an important factor in the commercial prosperity of our various industries for which the manufacturer has long been on the lookout.

In previous seasons, for some time back, the stock of the wholesaler has been kept as light as possible, owing to unfavorable trade conditions, and the manufacturer was compelled to carry a stock, frequently a heavy one, in order to honor the orders of the jobber when received with instructions to "rush" delivery. It was conditions like these that compelled the manufacturer to seek the paths usually frequented by the jobbers, and endeavor to sell the large retailers in order to diminish the increasing stocks made necessary by a state of affairs which dullness in trade could alone make possible.

This season it would seem as though these abnormal conditions will no longer prevail. Stocks will be ordered abundantly, under advancing quotations from makers; the jobbers' shelves and warehouses will again be filled, and in good order for prompt delivery upon urgent demand being made upon them. The manufacturers, with order books crowded with specifications for delivery months ahead, will leave the retail trade alone, and as prompt delivery can only be promised by the stock of the wholesaler, everything will progress favorably and will bear good fruit for future seasons.

All this is as it should be; and if prices are not placed by our over-zealous manufacturers beyond the bounds of intelligent conviction, the prospects of a thoroughly satisfactory business being done by all the parties interested in prosperous conditions are too plainly perceptible to admit of the possibility of a doubt.

The Fifteen Club.

Deeply deploring the fact that the Hardware Club intended letting 1899 go by without the usual annual celebration of its corporate existence, a delegation of the younger element representing the Hardware industry, without too much time being given to its inception, met at "The Arena," on February 21st, and passed one of the most enjoyable evenings in their existence, discussing the good things provided by the host, and the many good things provided by "the boys" themselves. The following gentlemen were present:

Thos. W. Laing, Miller, Sloss & Scott; W. D. Holmes, Reading Hardware Co ; V. C. Brown, Miller, Sloss & Scott; G. W. McLean, Union Selling Co.; John Ellice, Bishop & Co., Boston; R. P. Floyd Jones, Panama S. S. & R. R. Co.; G. A. Rogers, H. A. Rogers & Co.; J. F. Roe, Roe & Conover, Newark, N. J.; J. C. Smart, John H. Graham & Co.; Geo. H. Ruwe, Heller & Merz Co.; Ira E. Douglass, The Shelton Co.; Joseph N. Limeburner, Allerton-Clarke Co.; G. L. Gillon, Watson-Stillman Co,; N. D. Williamson, N. J. Car Spring & Rubber Co., and E. H. Coffin. Mr. Williamson was the chairman and toastmaster of the occasion, the first duty of which was the proper distribution of the following:

MENU.

Blue Points. Sherry.
Clear Green Turtle.
Olives. Celery. Radishes.
Broiled Pompano a la Maitre d'Hotel.
Potatoes a la Parisienne. Haut Sauterne.
Filet de Boeuf, Pique a la Bordelaise. St. Julien.
French Peas. Stuffed Piementos.
Spring Chicken a la Toulouse.
Flageolets Saute, au beurre.
Sorbet au Kirsch. Roast Squab on Toast.
Escarole Salade. Mumm's Extra Dry.
Fancy Ice Cream. Assorted Fruit
Cheese. Cafe Noir Liqueurs.

"With jovial speech and mirthful song,
The happy hours they did prolong."

Mr. Williamson spoke on "Sociability in Trade." Mr. Laing favored the assemblage with a song. Mr. Gillon dwelt upon "Hydraulics" in his remarks. Mr. McLean spun a yarn about "Manila Rope." Mr. Floyd Jones was on deck, "Running a Steamship." Mr. Rogers dwelt sympathetically on "The Absent Ones," and what they were missing. Mr. Roe responded as "Our Friend from Jersey," and was true blue throughout. Mr. Smart extended his vocal chords with the pathetic song, "Come Kiss the Hand that Raised the Lump." Mr. Douglass added to the hilarity of the occasion, sailing on the "high C" with a song worthy the attention it received. Altogether, "the boys" did themselves credit, and were glad to find the morning hours were so pleasant in which to catch the early trolley.

Two Wheel Announcements.

Edw. K. Tryon, Jr. & Co., Philadelphia, Pa., publish a very attractive catalogue of their Bicycle line for 1899. This illustrates and describes the famous Apollo and Vesper bicycles so successfully handled by this company, and also the Devon, which is a good representative cheap wheel. They also handle the Cycloe and Fairy bicycle for juveniles. This catalogue is handsomely printed in colors, thoroughly illustrated. In a note of introduction, the company say: "We have always made it a rule not to reduce the prices of our wheels at the close of the season, as has been the custom of many manufacturers. This policy insures our customers against loss and makes our bicycles not only the best, but the safest line for 1899. Another year brings us nearer cycle perfection; a little change here, a little strengthening there, mark the improvements for '99. There have been no radical changes in construction as in years past, as our experience of '98 teaches us that the ideal has almost been reached. During the past season there has been some talk about the advantages of 30 inch wheels—'easy riding,' etc.—and we have arranged to supply this size where desired. We believe, however, the demand will be light, as any advantages in favor of the 30 inch wheel are counterbalanced by the 28 inch wheel—rigidity, weight and even appearance."

Reference was made in a recent issue to the advance sheets of the 1899 Bicycle Catalogue issued by the McIntosh-Huntington Co., Cleveland, Ohio. We have now received the publication itself, and an examination of the same reveals the fact that there is nothing needed in the bicycle line that is not displayed in this publication. Special attention is given to their line of Sunol, Hercules and Wizard bicycles, which are the great specialties of this company. They make the following announcement in connection with the business of the present year: "With the year 1899, we commence our eighth year as manufacturers of bicycles. During that time there have been many changes in styles and many improvements, and we are proud to state that our bicycles have always appeared abreast of the times. 1898 marked the perfection of bicycles to such an extent that it is difficult to note any radical improvements for the year 1899. Our bicycles, however, have been improved in some respects, as the detailed description which follows will show. They have been before the public now for seven years, and we are sure they stand in the front rank."

Colonel Nutting on the Retailers.

We find the following interesting remarks in regard to recent action of the Retail Hardware Association of Iowa, in the Davenport (Iowa) *Republican* of February 10th. They were made by Col. James R. Nutting, of the Sickels, Preston & Nutting Co., in response to inquiries by a reporter:

"The resolutions of the Retail Hardware Association, passed at their meeting in Des Moines on the 8th, seem about the same as have been passed by similar associations in other States. That there is a great injustice being done to the local retail dealers by larger houses in the great cities there is no doubt. Whether it can be remedied by a boycott there is a doubt. People the world over, who have anything to sell, are liable to sell when they have a favorable opportunity to do so at a profit. Most people try to buy when they think they can get the most for their money."

"Do you think the movement could cut off the department stores from getting the goods they want?"

"The department store of to-day," replied Colonel Nutting, "is only the general store of a few years ago developed in size and enterprise to keep up with the times. They are patronized by all classes of people. Hardwaremen's wives right here in Davenport patronize them. This I know to be a fact, for our own wives do so. Is it consistent to boycott a manufacturer for selling a store that we all patronize?"

"Personally, however, the matter does not affect us. We depend upon the retail Hardware merchants for our trade, and are much pleased with their high standard of business methods and practices."

"File Filosophy" Gratis.

We omitted to mention in the recent notice of this little book published by the Nicholson File Co., that it would be supplied by the company gratis to any one upon request. Address the main office at Providence, R. I.

The book is being circulated widely, and is received with the utmost favor by all interested in files and their uses. It is of very practical value, and is highly appreciated by all who receive it.

HARDWARE costs but One Dollarper year.

THE SALESMEN'S DEPARTMENT---VIII.

ENTHUSIASM.

The manager's prime duty is to save dollars and to make dollars. What will make dollars for the jobber and his salesman, means dollars to the manufacturer and the retailer.

Referring to the benefits accruing to the retailer, the more goods a salesman sells at practically the same expense, the lower prices he can afford to make his customer, while his employer's profits are at the same time increased. For this reason it is of advantage to the retailer to throw all the trade possible to one jobber, as the jobber has found it advantageous to throw all the trade possible to one manufacturer. The time was when the retailer had some grounds for being a little shy of placing his confidence in one salesman or jobber, fearing he would take advantage of his credulity. Times have changed; competition is so keen and the competing salesman so alert to grasp an opportunity to advance his interests with the dealer, that the jobber and salesman who have undivided accounts appreciate their friends and realize not only their advantage over their competitors, but that just treatment only, will secure the benefits permanently.

One of the most important duties of the manager is to enthuse the salesman under him. A salesman's enthusiasm must not only be sufficient to secure a large part of his customer's patronage, but it must be imparted to the customer the minute he darkens the door. The salesman's visits should be such an inspiration to his customer that the effect of the call upon the customer will not have entirely disappeared before he calls again. Some one has correctly said "Enthusiasm is the Soul of business." No salesman does his whole duty, who does not show his interest in his customer, by cheering and encouraging him in his combat with the petty trials and daily annoyances incident to the retail business.

Here is the secret of the success of many salesmen over others: It is the salesman who exhibits a brotherly feeling for his customer, who has the ability to get "next" to his customer, a quality lacking in so many salesmen, who today gets the lion's share of his customer's patronage. It was the salesman's ability to secure his customer's confidence, good will and business, that influenced the jobber to select him as manager of his salesmen, and it is this quality that will cause him to succeed in the position. To-day the jobber will not allow his salesman to be undersold by his competitor, and as a consequence, the price cutter wins no permanent advantage over the up-to-date salesman whom he expects to follow him in a few days.

Woman at the Head.

The following from the Grand Rapids (Mich.) *Herald* of a recent issue, is interesting as showing that the active and enterprising women of America are advancing their way into positions of business responsibility, as they already have won recognition in the field of literature and art:

Beginning tomorrow morning, the Bissell Carpet Sweeper Co. will go under the direction of a new management. Charles B. Judd, who has had the management for a number of years, is in such poor health that absolute rest is required, and freedom from all business worry. Mrs. M. R. Bissell will assume the care of the business, assisted by Maurice Shanahan, the treasurer of the company. This will not be in any sense a venture on the part of the company, as Mrs. Bissell is not a stranger to the duties that will be demanded of her in her new capacity which she has assumed. Ever since the death of Mr. Bissell, her husband, she has served as president of the concern, and instead of any decrease in the business done, their output has steadily increased, until the Grand Rapids Carpet Sweeper is known in the world's market. In the early days of the business, when it was a comparatively new venture, the part which Mrs. Bissell played was by no means an unimportant one. And she, in those days, proved herself to be a woman of superior talents for business. At one time she was the representative of the company on the road, and her sale of the first lot of sweepers to John Wanamaker, of Philadelphia, was the first introduction of the machine in the East, and probably paved the way for the enormous demand that comes from that part of the United States at the present time.

When the time arrived when her help was no longer needed in the business, she retired to home life and began as vigorous a work in a larger number of benevolent and charitable causes as that which she had conducted while in the world of commerce, and to-day the city of Grand Rapids has many reasons to thank Mrs. Bissell for her work in behalf of the poor and unfortunate.

Probably the best monument to the generosity of Mrs. Bissell is the Bissell House, which was founded a short time ago.

The illness of Mr. Judd, which has occasioned the present change, is causing his friends a great deal of anxiety. He is at present in Florida, and will remain there until spring, when he will return only to go from here to Germany to take the famous Manheim baths, which are expected to afford relief. Most of all he needs entire rest and quiet, and the relief of the care of the great business which he has been conducting is hoped to contribute to this end. Mr. Shanahan says that the business of the company is in excellent shape, and the prospects for the future were never better.

Russell & Erwin's Election.

At a recent meeting of the Russell & Erwin Mfg. Co., the following gentlemen were unanimously elected for directors during the coming year:

William G. Smythe.
George J. Laighton.
Louis H. Wales.
Andrew J. Sloper.
Frank L. Hungerford.
Frederick N. Stanley.
Daniel R. Howe.
Robert W. Parsons.
Frederick P. Wilcox.

During the recent bicycle show in New York, the Olive Wheel Co., of Syracuse, N. Y., was quite well represented in connection with the National Cement & Rubber Mfg. Co., Toledo, Ohio. The following representatives of the Olive Wheel Co. made the Toledo concern's headquarters their home most of the time: C. Arthur Benjamin, C. J. Batchrie, Henry Trebert and Geo. N. Jordan.

The Sportsmen's Show, under the auspices of the National Sportsmen's Association, has been extended three days, making the dates March 2nd to 15th, Sunday excepted, at Madison Square Garden, New York.

As To Dating Ahead.

The subject under consideration is the practice of selling and shipping a bill of goods, say January 1, and dating the invoice March 1, terms say sixty days from date. How and why did this practice originate? The habit of dating ahead came upon business men so insiduously that it is hard to tell exactly when they found themselves laboring under the impression that dating ahead was essential to the commercial life of the customer, and that the customer demanded it. In time, however, observation showed that the customer was not being benefited by the custom. Practical experience proved that it was injuring him. If an investigation were to be instituted it would demonstrate that the desire for dating ahead did not originate with the customer, but instead is something that he was persuaded into adopting.

The salesman was about to miss getting an order, notwithstanding the fact that he had priced the goods lower than usual. The customer urged that he did not want the goods and saw no use in having them upon his shelves, exposed to dust and risk of loss by fire and theft. The salesman said: "That is all right. You will need them. I'll tell you what I'll do. I'll ship them now, date the invoice sixty days hence, and give you sixty days from that date. You'll gain the reputation of carrying a better stock than the merchant across the street and besides you can sell your goods on longer time than your competitor, because you can buy them on better terms. We have an immense stock and are crowded for room, while your store looks sort of empty."

The salesman's statement and offer were something new to the retail merchant. When he thought the proposition over it became irresistible. It appealed to the weakest spot in a business man's make-up. In fact, it aroused in him the propensity, the operation of which kept Diogenes from finding what he sought. The salesman presented what appeared to the customer to be an opportunity to get the advantage of his neighbor. Accordingly the bill was bought, the goods were delivered, the invoice was dated ahead and all was well, apparently.

Is it surprising that harm should grow out of evil? Is it not surprising that any of us should expect good to come from that which we know is bad? If at night we raise our hearts in worship to the Being whom we say and believe is almighty and all-wise, why in the morning do we try to prosper by doing what He has discouraged and forbidden? If consistency were the only jewel beauty would go unadorned.

Merchant No. 2, across the street, buys his goods from the competitor of the salesman whose little speech to Merchant No. 1 has been recorded above. The salesman of this competitor comes along after awhile and meets Merchant No. 2, who has heard that Merchant No. 1 got four months on a sixty-day bill. Salesman No. 2 is told by Merchant No. 2 that he must have just as good terms, and so it is arranged. From little incidents of this kind it soon gets abroad that merchants in general will not buy unless invoices are dated ahead —J. T. JENKINS.

Mica Mines Becoming Exhausted.

"There are between 250,000 and 300,000 pounds of mica used in the United States annually," said a wholesale dealer in that mineral in New York to a writer for the *Washington Star* recently. "North Carolina, New Hampshire and other States once supplied all the mica used in this country, but so extensively has the material been utilized in the last ten years in various arts and mechanical trades, that many of our most productive mines have been pretty nearly exhausted. The consequence is that about 55 per cent. of the material is now imported from Norway, Sweden and Russia, and the expense incident to shipping it to this country has raised the price of the article 20 per cent. The wholesale price for mica at present varies from $1.20 to $25 a pound, according to the size and quality of the sheet, and a still larger advance may be expected if new American mines are not soon discovered.

"The material is largely used in the arts for spectacles and optical instruments, especially for holding small objects for examination through a microscope. It is also used, when finely ground, for making bronze powder. Sheet mica is used, as is well known, instead of glass in places exposed to heat, such as reflectors, headlights and stove and lantern lights. On naval ships it has taken the place of glass in portholes, where it is not easily fractured by the discharge of heavy guns.

"The working of a mica mine is a comparatively easy and inexpensive process. Sheets of the silicate stand in upright ledges, and, when uncovered, are easily separated from the adjacent rock. Then with hammers the splitting up of the strata is accomplished without much trouble. Blocks yielding sheets two and two and a half feet square have often been quarried in New Hampshire. 'Scrap' mica is gathered in the mines in great quantities, much of it being the debris left where the sheet mica has been broken by the picks in cutting it out. It is ground up for use in varnish and paints and makes a glittering coating for wall paper. It is worth from $5 to $25 a ton."

How Emery is Quarried.

Co-operators may be pleased to know that among the few trades of the world in the hands of the laborers is that of the emery quarryman. Emery comes from the Island of Naxos, in the Eastern Mediterranean, whence it has been exported for the last two centuries or more. The beds are in the northeast of the island, the deposits descending into some of the neighboring islands, the emery being found in lenticular masses, resting on layers of schist in limestone, almost identical with Parian marble, the finest marble known, which comes from the Island of Paros, close by. There are about three hundred men engaged in the trade, all of whom have to be married before they are admitted to the fraternity. The material is much too hard to be dug out, or even blasted. Great fires are lighted around the blocks till the natural cracks expand with the heat, and levers are then inserted to pry them apart. This system is continued until the blocks are reduced in size to masses of a cubic foot or less, and they are then shipped as if they were coal. There are said to be 20,000,000 tons yet available at Naxos, and the last reported year's export was 3950 tons. It is one of the hardest substances known.—*Ironmongery* (England).

The Howard Iron Works, Buffalo, N. Y., founders and machinists, who are well known the country over, have passed into the hands of a new management, which has reorganized the old concern and is pushing the goods of their manufacture with a great deal of enterprise and energy. These goods consist of vises, bolt cutters, paper cutters, pulleys and shafting. The old concern furnished a splendid business foundation, and with the new life blood that has been infused into the management, the success of the past will be greatly increased and advanced in the future.

Chas. M. Hall, the popular and good looking hustler for the National Cement & Rubber Mfg. Co., Toledo, Ohio, rolled in home one day last week from an extremely successful trip through the East, and remained long enough to say "howdy" to a few of his friends, and then started on a three weeks' Western trip, which will take in St. Paul, Omaha, St. Louis, Minneapolis and other points of importance.

HARDWARE costs only One Dollar a year.

Digitized by Google

THE NEWS FROM NEW ENGLAND.

WHEN ALL HARDWARE WAS IMPORTED.

In these days, when the roar of machinery and the smoke of countless factory chimneys throughout the land give constant evidence of the enormous output of our industries, it is hard to realize that, within the memory of man, all Hardware was imported, and yet such is the case.

There lives in Boston to-day, a gentleman, William A. Saunders, now in his eighty-second year, who for many years was prominently associated with the Hardware trade. His business career commenced with Lane & Read, at No. 6 Market Square, in 1832, at $100 per annum. He continued with them until 1841, receiving $500 per annum for the concluding two years of his service with them. After leaving them, he went into business for himself at No. 29 Merchants Row, and continued until he retired.

In the leisure time of his private life since retiring he has amused himself by writing his recollections of the trade in former years, and this embraces not only his personal experiences, but many incidents, which were discussed in his hearing as a boy by his elders

Speaking of his elders in the business, Mr. Saunders says: "Old Sam Bradley," as we irreverently called him, called at our store very often, and talked much of the Hardware business before and during the war of 1812. Bradley was a good authority, being a large importer before the war. He was very proud and high tempered, and his black eye would almost pierce you, especially if you differed from him, as the hard pull to my store door would often evidence. His advice to me in the first week of my business was not exactly after the Golden Rule. "Be a Turk, young man," he said, "be a Turk, or you will fail in a year." Owing to the dullness of business during the war, he struck outside of his line, and bought indigo for a war rise. Coming down State Street one Sunday morning, he saw a fresh bulletin announcing the arrival of the *Brattle* and peace. There was no peace for him, however. He was ruined. Debtors fared hard in those days. He was arrested and put in jail. The first meal brought to him by the jailer—a dish called skillery—he dashed in the man's face, adding that if he had had his fowling-piece he would have shot him.

Mr. Saunders mentions about seventy-five different firms known to him in Boston in the '30's, adding that all of them imported their goods and had the sign over their doors, "Importers of Hardware and Cutlery."

For several years after going with Lane & Read they did nothing in powder and shot; but their large business as importers of fine guns and accoutrements eventually led to their importing fine grades of sporting powder from Thetford, England, and from Germany. After a few years, however, the American article superseded the foreign, the Dupont company's product being considered very fine. The shot tower companies of the South and West supplied the large demand for their lines.

Mr. Saunders mentions the early days of the match, the first American invention of this kind being named Loco-Foco, a slang name for the Jackson party, then in power. The older boys at Lane & Read's, he says, were allowed to sell these to their country customers, packing them in the boxes with Hardware, and making a little profit on them for pocket money, until the "inveterate peddler" ended their trade.

At this time everything that could be connected with the Hardware trade came across the water, excepting what the "village blacksmith" could supply—perhaps a few nails and similar articles—but for the most part even the clumsy wrought nails used in building were imported.

Lane & Read did a large business with country traders in Massachusetts, Maine, New Hampshire and Vermont, supplying everything in the Hardware line, including pins and needles of all kinds, ladies' and wooden combs, candlesticks, snuffers and their trays, table trays, teapots, fire dogs and andirons, bellows for parlor and kitchen, an abundant supply of knives, forks and spoons, iron-bowed spectacles, sad irons, pans, kettles, etc., etc.

For packing purposes, the boys in the store were instructed to buy all available empty sugar boxes, tea chests and lemon boxes that could be found. These were scraped and packed away till required.

"Our country customers came only twice a year—March and April in the spring, and September and October in the fall. They put up at the 'taverns' for about a week, and just before taking the stage or schooner for home, called for their bills; gave a note 'on demand,' which then meant *when convenient;* paid an installment on or possibly the whole of the old note; and so on indefinitely. The four-horse covered country wagons which had brought loads of products, called around with their 'pilots' for the packages of Hardware, crockery, dry goods, etc., to carry home."

Lane & Read alone supplied the famous merchants of Salem with the class of goods needed for their ships on their long voyages up the northwest coast of America to trade with the Indians. These articles were principally cheap, small, showy axes imported in casks, black stock, poor-enough guns, covered with bright-colored tinsel ornaments, beads of all colors, showy snuff boxes, little dashy looking-glasses in boxes of thin wood, and other trinkets to catch the eye of the Indian.

Before the days of ranges and boilers, set for washing, there was a constant demand for brass kettles. Each bill of goods included a nest of them, varying in capacity from four quarts to six pails. They were imported in long, tapering casks from Germany, without bails or rims. These were put on by brass workers here.

Lane & Read were fortunate friends in every way to the pioneer, the first Oliver Ames, the grandfather of the former governor of Mass. They loaned him money, which he always needed, as the cost of trip hammers and other machinery absorbed the profit as fast as he realized on his goods. The quality of his products was so good, however, that he secured a great reputation, followed by a large demand from the South. The only transportation to those parts as well as to New York and Albany was by water. Mr. Ames' son, Oakes, assisted in the management. and afterwards became most prominently associated with the first transcontinental railroad.

Another branch of the Hardware business was in supplying ships for foreign voyages with muskets and cutlasses. This was in the days of pirates and "outlandish seamen," and before the invention of the revolver.

The youngest boy at this time had to do much menial service. He must go to the master's house for the keys of the store, early, before breakfast, however distant (in my case a mile or more); then to the store, take down and in the shutters, and again put them up at night, sweep the store, dust the shelves of goods, make the fires, wipe the mahogany desks with an old silk handkerchief, see to the pens and ink, etc. All these chores done, if your master

Digitized by Google

had arrived, you might wash and go to breakfast. Upon your return, fill and trim the tin store lamps, and prepare the stove kindlings for the next morning. Then work around, ready for errands or anything else, as directed. What would the young men of to-day say to this, with porters and men to order about as they wish?

Mr. Homer, of Homes & Homer, told me that when screws were first substituted for the blacksmith-made iron nails for wood work, soon after the Revolution, they were imported in bulk and sold by weight, or put up in grosses by the apprentices to employ their leisure time. The screws were poor enough, but would wear their way into wood just as far as the awl point had reached. Years later they were improved upon; but it fell to the good fortune of a Rhode Island Yankee to ask himself, as he saw a carpenter using a gimlet to make way for the screw, 'Why not have that gimlet point on the end of the screw itself?' The answer was a fortune to himself and others. In a short time an end came to the English screw business.

It was a marked characteristic of our English cousins, until perhaps the last generation, to oppose all change or alteration in the style of their manufactures. Take, for instance, their auger—a thick-edged article with one lip. How they managed to bore with such a tool, I do not know. They must have gouged a small hole first; and to continue even then was awkward enough. As a curiosity, I saved one for years, and then sent it, with many other ancient tools, to the Manual School Museum. I think the auger with a screw on it was an American invention. They were made in Plymouth County by a Mr. Cushman, and I remember to this day the codfish aroma from the boxes in which they were packed. In 1844 an ingenious tool and steelyard maker got up a pattern of a balance with a real steel bar, that would balance and work accurately. At this time we imported largely the Collins steelyard. The new American balance was much better, but costly, and I attempted to have them made in England. An accurate description was sent, and then a sample; but I got in return the regulation English article. 'Their grandfathers never used this foolish Yankee article, you know.'"

Mr. Saunders then follows with a full description of the store of Lane & Read and its stock and arrangement. Many articles mentioned are now obsolete, and are only remembered as being associated with pioneer days, such as warming pans, porringers, water scoops, Banbury locks with wood frames, copper powder flasks, shot belts, gun flints, tinder boxes and steels, hand made English "G" horse nails, 6d., 8d. and 10d. nails, iron candlesticks, snuffers and trays, Norfolk latches, ink powder, letter wafers and blotter sand, writing quills, steel watch chains and keys, muskets for whaling and merchant ships, etc., etc.

Altogether, Mr. Saunders' memoirs form an interesting account of the conditions and difficulties under which business was conducted in early days, and will be much prized by his successors in business as a history of the firm. The present firm of William Read & Sons, Boston, was founded by Mr. Read, of Lane & Read, who were pioneers in the gun trade of America, and has continued under the same name up to the present time. William Read, who is now at the head of this well-known firm, is a son of the founder, the business having had only two heads in the seventy odd years of its existence.

BOSTON CYCLE DEALERS' PROTECTIVE ASSOCIATION.

A number of the prominent jobbers of bicycles and bicycle parts of Boston, have formed an association under the above name. The object of the affiliation is primarily to protect the members against the numerous small dealers of no standing or credit who hitherto have been able to obtain goods without furnishing satisfactory guarantees, and whose intentions have apparently been to allow the jobber to shoulder the loss if such there proves to be at the end of the season.

The membership now includes seventeen concerns in and about Boston, but the intention is to embrace all of New England and New York if possible. At a recent meeting the following officers were elected: J. Frank Scott, Boston Cycle Supply Co., president; Albert King, Brown & Wales, secretary and treasurer and financial agent pro tem.; Daniel S. Pratt, Elastic Tip Co ; W. S. Atwell, William Read & Sons, and Joseph A. Cushing, John P. Lovell Arms Co., as an executive committee for the next three months.

A further object of the Association will be to maintain a standard of prices, and to blacklist those manufacturers whose practice it is to solicit the retail trade.

OLDEST BUSINESS HOUSE IN NASHUA.

This year, 1899, is the seventy-fifth anniversary of the establishment of Clark's Hardware store. It was opened by the Nashua Mfg. Co. in 1824, was thirty-six years in a building on the present site of Beasom's building and thirty-nine years at its present location in Nutt's building, corner Main and Park Streets. We believe it is the senior business house of this city: Nashua Co., 1824 to 1826; Isaac Spalding, 1826 to 1837; Kendall & Gould, 1837 to 1840; N. Kendall & Co., 1840 to 1843; Munroe & Taylor, 1843 to 1846; Charles H. Nutt, 1846 to 1889; John H. Clark, the present owner, since 1889.

The latter is, in every sense of the word, an up-to-date merchant who keeps abreast of the times, and who believes in modern methods. He is a prominent member of the New England Hardware Dealers' Association, and seldom misses the opportunity to attend the monthly meetings in Boston. At the last annual election of officers Mr. Clark was selected by his associates as one of the directors for the present year. F. A. CATON.

Boston, February, 1899.

New Members of the Hardware Club.

At the regular meeting of the board of governors of the Hardware Club of New York, held on February 17th, the following gentlemen were unanimously elected to membership:

Frederic E. Underhill; Underhill, Clinch & Co., No. 94 Chambers Street.

Lloyd Collis; Tubular Dispatch Co., No. 154 Nassau Street.

Isaac G. Johnson, Spuyten Duyvil, N. Y.

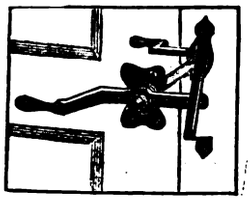
William H. Coldwell; Coldwell Lawn Mower Co., Newburgh, N. Y.

Benjamin F. Taylor, No. 253 Broadway.

F. Joseph Duffner, No. 413 Penn Avenue, Pittsburg, Pa.

Ferdinand Baumgard, No. 193 West Street.

The annual meeting of the Hardware Club of New York will be held on Saturday, March 18th, at 12 M. The usual annual reports will be presented, and one or two proposed amendments to the constitution are to be acted upon. A nominating committee has been appointed to select five governors to fill the vacancies which will occur in March, 1899. The following gentlemen have been chosen for said committee: William G. Smythe, chairman: William P. Mason, Robert Sickels, Thomas H. Taylor and Frederick G. Draper.



Americans sell clothespins practically everywhere—all over Europe, in South Africa, South America, Australia and elsewhere. Some clothespins are made for the supply of local markets, in Sweden and in Scotland, but they are big and clumsy pins, twice the size of the Americans, and whittled out by hand, and American pins are sold in both these countries in competition with the home production. Clothespins are made chiefly of beech and of maple; some are made of tupelo wood. They are made entirely by machinery, counted into boxes, containing 720 each, by machinery, and the boxes are nailed up by machinery —*Ex.*

NEW GOODS AND SPECIALTIES.

Refrigerator Door Fastener.

With this issue we have the pleasure of bringing to the notice of the trade a novel Refrigerator Door Fastener, manufactured by Bernard Gloekler, Nos. 1127 to 1133 Penn

Avenue, Pittsburg, Pa., patented January 20, 1891. The illustration, No. 0, is a size especially adapted to cold storage plants and extra large refrigerators. The lever is 16 inches long over all, and the spindle is long enough for a door ten inches thick. This style is made also in a smaller size, No. 00; length of lever, ten inches; suitable for doors as large as 3x6 feet or ordinary sizes. The spindle is suitable for six-inch thickness of doors or under. There are also three sizes which operate on the outside of the doors only. They are easily applied, requiring no hole through door or wall. All sizes have the advantage of forcing doors open, by reversing the lever it passes down the outside of keeper from the top. They are durable, being made of malleable iron and heavily tinned. They can also be had in polished brass or nickel plated in iron or brass. The tinned is the most popular and most serviceable in the large sizes especially. They are already in use in many of the largest cold storage houses, breweries, etc., with the best of satisfaction. An illustrated price list will be mailed upon application to above address.

The Lane Elevator Door Hanger.

The accompanying cuts illustrate a new style of Hanger which Lane Brothers Co., Poughkeepsie, N. Y. are just placing upon the market. It is designed especially for use on passenger elevator doors. It is said that at present hangers for this purpose are usually selected from some of

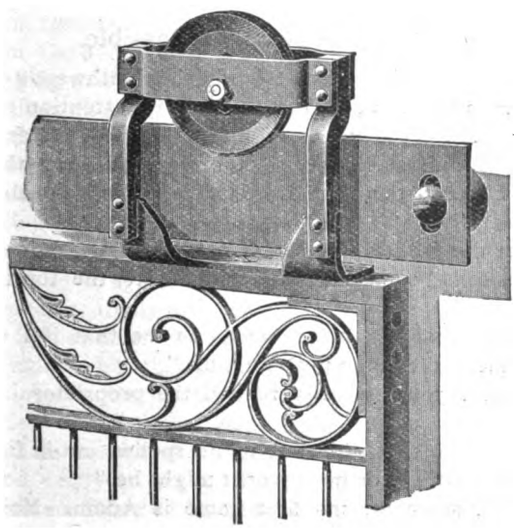

FIG. 1.—THE NEW HANGER.

the numerous styles of parlor or house door hangers, which it is claimed are not well suited for this use, for various reasons. One of the most potent causes of trouble is the fact that the loose or adjustable parts of the hanger wear abnormally on account of the slamming of the doors. As will be seen from the illustration, the hanger in question has a solid steel frame that has no joints or loose parts, and it is fitted with a ball-bearing wheel. Particular attention is called to the great amount of use to which such hangers are subjected, and the necessity of thorough dura-

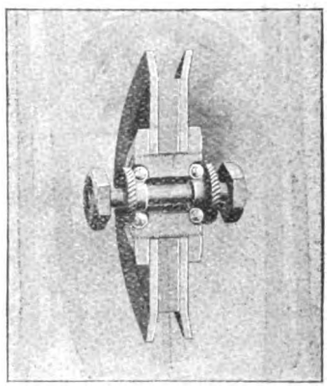

FIG. 2.—A SECTIONAL VIEW OF THE WHEEL.

bility. We present a sectional view of the wheel and bearing used in this hanger, which is the same as that supplied with the company's Ball-Bearing Parlor Door Hanger, and it is claimed that the cups, cones and balls are made in the best possible manner. The track is supported at the ends only, thus reducing to a minimum the work connected with erection. The adjustment is accomplished by means of the track.

The Universal Sharpening Machine.

John Chatillon & Son, Nos. 85 to 93 Cliff street, New York city, are placing upon the market with great success the Universal Sharpening Machine, which is here shown. In Fig. 1 is seen the Hand Power Machine, for household and general use. In Fig. 2 is shown the Foot and Steam Power Machine, for packers, tanners, butchers, farmers, hotels and restaurants. The machine itself, with the meth-

FIG. 1.

od of operation, can clearly be understood from an examination of Fig. 1. In regard to these machines the manufacturers say: "These machines are practical, based on correct mechanical principles and have reached their present state of perfection after many years of experimenting. We manufacture these machines for sharpening cutlery of

Digitized by Google

all kinds, razors, surgical instruments, &c. The machines form the most perfect cutting edge and sharpen with great rapidity. They are simple in their construction, so that it requires no skill to use them." They further say that the grinding wheels can be replaced at a nominal cost, and that one machine will last a lifetime. The further directions as for use are given: "To sharpen the knife, place it

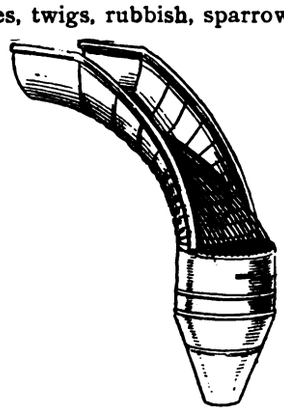

FIG. 2.

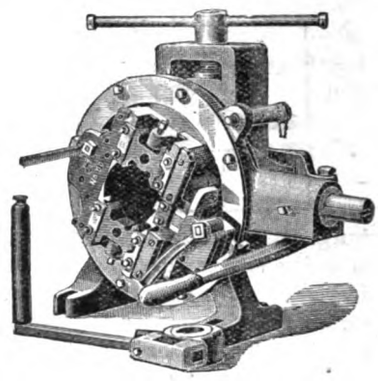
in the guide-jaws and pull it entirely through, uniformly and steadily, at the same time turning the grinding wheels rapidly. Draw the knife completely out and repeat as often as necessary to sharpen perfectly. Wheels should be used dry; should they become too smooth to cut freely, rub them gently with rough emery cloth and afterwards with fine emery cloth. Machines are set properly for use when sold. Reset occasionally to allow for wear on wheels. To set machine for use, loosen the thumb screws and lower the arms. Then put on the gauge with the projecting pin upwards and raise the arms until the grinding wheels touch the pin on the gauge and fasten the arms with the thumb screws. Be sure that both the wheels touch the pin firmly so that the wheels lap before fastening the arms. Then take off the gauge. Oil shafts of the machine occasionally so that it will run smoothly."

Eave Trough Screen.



Neville's Eave Trough Screen, here shown, is manufactured by Edmund Neville, Dixon, Ill. It is intended to prevent all leaves, twigs, rubbish, sparrows, etc , from en-

tering the down spout, thereby rendering the trough self-cleaning. The illustration shows its method of application.

A New Pipe Threading Machine.

A new machine which has just been placed on the market by the Armstrong Mfg. Co., of Bridgeport, Conn., is shown in the accompanying illustration. It is built on the same general plan of some smaller machines manufactured by the company, but it has some important modifications. The new machine will thread pipe from one to four inches in diameter. It uses the regular Armstrong stock dies, which are put into the machine and adjusted in the same manner as the hand stock. The dies can be opened after cutting the thread, and when the pipe is removed can be locked back to the standard size without resetting. This is accomplished by an automatic locking device which is operated by simply pulling a lever. This lever is an improvement over the old form of machine, and is shown at

the left of the illustration. The dies, however, can be adjusted to the variations of fittings the same as in the stock. All the gears and moving parts of the machine run in oil, being enclosed in a chamber which covers them from chips and dust. The die head has no teeth on the part where it fits into the shell and forms a bearing, in this way preserving its bearing surfaces and making it impossible to get loose. In addition to this bearing being preserved by not revolving on top of the gear teeth, there is an inner journal of large diameter, thereby still increasing its wearing surface and preventing the die head from becoming loose. A powerful self-centering vise, which exerts its power on the center of the jaw and not on the side, is used with this machine, and will hold the pipe being threaded with a light pressure of the lever. The construction of the machine admits of its being fastened to a bench or placed on an iron stand, which is furnished when desired. The machine here shown is designated as No. oo, and has a cutting-off attachment for cutting pipes the same as the Armstrong Co.'s larger machines. The total weight of the new machine without the stand is 370 pounds.

No Improvement Possible.

Down in a thriving iron town in the Southwest a touring wheelman found need for the kindly attention of a repairer. Inquiry soon caused him to learn of an expert in that line, and seeking his shop, he read over the door thereof the legend, "A. Swindle, Cycle Dealer and Repairer."

After the job had been completed, and the price therefor was found to be extremely moderate, the touring one said:

"Pardon me, sir, but it seems to me that if I were in your place I'd change my sign a bit."

"Would you," wearily replied the proprietor. "How so?"

"Well, I'd have the first name spelled out in full—Arthur, or Andrew, or whatever it might be."

"Well, stranger, my first name is Adam. Now what would you do?"

But the advice giver had not a word to say. The facts didn't warrant anything further being said.—*The Wheel.*

Guantanamo, Cuba, on a railroad 15 miles from the bay, has 7000 people; is cool in winter and very warm in summer.—*Exchange.*

MINNESOTA HARDWARE CONVENTION.

The annual meeting of the Minnesota Retail Hardware Dealers' Association was held at Market Hall, St. Paul, Minn., on February 8 and 9. The attendance was large, and a great deal of enthusiasm was displayed by the members. The president, Charles F. Ladner, introduced Mayor Kiefer of St. Paul, who delivered an earnest address of welcome, after which the president delivered his annual address, as follows:

After a year of hard wrestling with the duties of business life, we again meet to review the work of our association and to consult and deliberate together how to make the present year one of still greater profit to us, both individually and as an organization.

When our convention adjourned last year the work of perfecting the Northwest Retail Hardware Association had not yet been completed, but a committee had been appointed to meet like committees from Wisconsin and North Dakota for the purpose of perfecting such an organization, and immediately after the adjournment of our convention they met, drafted a set of bylaws and resolutions, which were in due time approved by their local associations, and thus the Northwestern Retail Hardware Association, comprising the States of Minnesota, Wisconsin and North Dakota, with a joint membership of over 700, became established.

That this consolidation of the interests of the Hardware dealers of these three States has been beneficial to all, no one will question; and we hope before long to be able to add other States to our organization. The State of Iowa, which organized late last summer, are holding their first meeting to-day, and one of the points they are discussing is whether or not they will join their interest with ours. And, should they decide to do this, ought we not to bid them welcome and receive them with open arms? Just as much as we grow in numbers and territory, just that much will our influence grow, and just that much more respect and recognition can we demand.

Inquiries regarding the work of our association call for copies of our constitution and other printed matter have been received from a number of States, and some even from Canada, which all goes to prove that the leaven is working and that our plan is watched with keen interest all over this broad land; and I have no doubt that, if we are faithful to the trust we have imposed upon ourselves, before many years the work we have started in such a small way will result in the organization of a national association of retail Hardware dealers which will take in every State in the Union.

This is an age of consolidations, combinations and trusts. You can scarcely take up a daily paper and not read about the formation of one kind or another, and within the last six months has this been especially the case with the formation of such that have a direct bearing on the Hardware trade. This one fact alone ought to be sufficient to make retailers realize the necessity of organizing, and thus to stand ready to meet, if necessary, the new conditions which are likely to be brought forward by these different combinations.

Now, as to the work that we should take up in addition to that already in hand, I would suggest:

First. That some action should be taken by which a united, vigorous onslaught would be made on the work of the so called steel range peddlers. They have invaded different parts of the State again this year, and with the persistency with which they work are no doubt doing the regular retailer a good deal of harm.

Second. Another subject I would like to call your attention to is the agitation now going on in different parts of the country against the exorbitant charges of express companies. We ought to lend this movement our full support, for often does it not happen that we need some article of repair or merchandise in a hurry, and oftentimes find the cost of carrying the same by the express company to five or ten times exceed the original cost of the article itself?

Third. As the legislature is now in session another and most important subject will require our attention, and that is the passage of such laws most beneficial to ourselves, and which at the same time are just to those we do business with, be they professional men, farmers, merchants or laborers. There has lately been formed in this State an organization called the Minnesota Business Men's Association, which, I believe, has the one purpose in view to better the condition of the business interests of the State through proper legislation; and I would suggest that we co-operate with them in everything that would be of mutual benefit to both of us.

I desire again this year, the same as last, to express my sincere thanks to the traveling salesmen for the good work they continue to do in our behalf, and only hope that our members will appreciate their work and encourage the same by giving them all the business they so richly deserve.

The first thing in order was the election of officers and committees, and the result was as follows:

President, James E. O'Brien, Cookston; Vice-president, J. W. Berg, Little Falls.

Executive—T. C. Holmes, Austin, First congressional district; Joseph Mason, St. Peter, Second; J. R. Cosgrove, Le Sueur, Third; Albert A. Marzdolf, St. Paul, Fourth; H. P. Gardner, Minneapolis, Fifth; G. W. Wells, Duluth, Sixth; O. H. Myron, Ada, Seventh.

Mutual Fire Insurance—A. C. Hatch, Battle Lake; P. L. Norman, Montevideo; B. W. How, Sauk Center; J. W. Berg, Little Falls; O. A. Bishop, Blue Earth City.

Press—A. T. Stebbins, Rochester; G. W. Wells, Duluth; S. R. Nelson, Owatonna.

Nominating—John Smith, First congressional district; G. M. Evenson, Second; W. H. Tomlinson, Third; John Schelck, Fourth; C. F. Stremmel, Fifth; L. E. Wakeman, Sixth; Frank Hunt, Seventh.

Resolutions—T. H. Caley, Princeton; S. M. Davis, Minneapolis; George A. Parmlee, Rochester; G. W. Wells, Duluth; W. H. Tomlinson, Le Sueur.

A paper on "Advertising" was read by W. W. Evenson, of St. Peter. His suggestions were timely and practical, showing that he had made a personal study of the matter.

A paper on "Our Duty to Jobbers and Manufacturers," was read by E. A. Move, of Duluth; and one on "Local Competition" by P. L. Norman, of Montevideo; one on "Relation of Trade Papers to the Dealers" by R. R. Williams, of the *Iron Age*, of New York; one on "Combinations and Trusts" by E. H. Loyhed, of Faribault; one on "Organization and Membership" by J. E. O'Brien, of Cookston.

The report of Secretary Clark was then presented and the following extracts are taken from the same:

It is the duty of the secretary to make a report of the

Digitized by Google

work done by him and to chronicle the progress of the association during the past year. For this purpose I shall have to go somewhat into detail. It is also proper to state that this report covers what was done under the auspices of the Northwestern, as well as the Minnesota association.

The first work done was to finish up the business of the first annual meeting, sending out membership cards and an invitation to members to pay their dues; next selecting an office in Minneapolis, and removing thereto February 25th. On the 27th a special letter was prepared and sent to members urging them to assist in obtaining new members. Preparing the report of the annual meeting for publication and mailing a copy of same to every dealer in the state required considerable time.

The formation of the Northwestern association having been completed, and a set of resolutions adopted, a copy thereof was sent every member in North Dakota, Wisconsin and Minnesota. It was decided by the executive committee to prepare a new "list." This was done at considerable expense, and much time was consumed in completing the same, but the result justified the means.

The influence of the Northwestern association was very evident from the start. Many jobbers and manufacturers who had previously ignored us were very glad of the opportunity to join the procession, and as the result this new "list" contained more than double the number of firms reported "favorable" than did the one issued by the Minnesota association four months previous. The total reports therein was over 600.

A letter to non-members was prepared and sent to all in the state, again soliciting them as members. A copy of the "proceedings" and application was enclosed.

A circular pertaining to Northwestern association matters was prepared and sent out.

To the jobbers and manufacturers who were reported "favorable" a letter was sent asking them to co-operate with us as against those reported "unfavorable," together with the new "list" and a copy of the Northwestern association resolutions for their information. A few very nice letters were received in reply, promising hearty support.

March 18th, 20th and 31st other circular letters were sent members, also jobbers and manufacturers. April 15th a second letter on co operation with jobbers and manufacturers was sent out.

The funds of the association being low, the second request for dues from delinquent members was mailed on May 1st.

May 15th a new "list" was completed and mailed to members in all states. The new "list" proved very effective, making it necessary on June 5th to send out the first "change sheet." This contained seventeen "favorable" reports. June 16th the first meeting of the executive committee was held in the office of the association, in Minneapolis, the members present being C. F. Ladner, C. F. Stremel, J. P. Watson, J. E. O'Brien, Charles Schleck and W. H. Tomlinson. Meeting called to order by President Ladner at 1:30 P. M. This sessions was a busy one for the committee. Many questions of importance were discussed, and the secretary advised thereon. Secretary was instructed to prepare joint expense account to June 1, 1898, and send to the presidents of the North Dakota and Wisconsin associations. At 5:45, motion to adjourn carried.

On June 24th special letter to delinquent members was sent, giving notice that all dues unpaid July 1 were subject to draft. About one-third acknowledged receipt and remitted their dues. This left 101 still in arrears, so on the seventh day of July drafts were drawn on them and about forty of these were honored. This proved rather expensive, the cost of draft, collection and remittance of three dollars being often as high as thirty-five cents.

By August 1st the second "change sheet" was ready. With this was sent a letter requesting members to report all catalogue and department stores in the state.

On the 8th of August the secretary began soliciting membership. The most populous part of the state having been visited last year, the work was not so readily accomplished, the towns being further apart and containing a less number of dealers, but I found it much easier to secure them as members than the year previous. This work took up all the time to October 15th, with the exception of state fair week and the time consumed in sending out "change sheet No. 3" on September 23. The whole time on the road was twenty-seven days and nights, in rain or shine, heat or cold, on foot, by bicycle, teams or cars. Fifty-six towns were visited. In forty-three of them forty-seven new members were obtained and in each and every case where delinquent members were met the dues were collected. This work necessitated traveling over 2,100 miles. Total expenses incurred, $114.08; total collections, $261.00, leaving $146.92 net above all expenses.

A telegram was ordered sent to the Iowa Retail Hardware Dealers' Association, which was in session at the same time, as follows: "Though miles of ozone lie between us, our purposes are one. Though the mercury is depressed, our enthusiasm is correspondingly elevated. May success crown your work."

On the mornlng of the 9th, the jobbers and manufacturers, who were present at this gathering, joined hands with the retailers and had an old-fashioned experience meeting. The entire forenoon session was given up to fraternal advice and suggestions, and much pleasant feeling was engendered as a result of the gathering. The newly elected president of the retail association, James E. O'Brien of Crookston, occupied the chair.

Representatives from the leading Hardware establishments of the state participated in making suggestions and giving advice for the benefits of both sides. R. A. Kirk, of the firm of Farwell, Ozmun, Kirk & Co., of Minneapolis, made one of the most timely addresses. Among the other speakers were C. W. Hacket, W. C. Dean, of Nicols & Dean; Horace M. Hill, of Janney, Semple, Hill & Co., and H. C. Penfield, of the Minnesota Iron & Steel Co., Minneapolis; C. H. Pruden, of the St. Paul Stove Works, and C. C. Peterson, of Newark, S. D.

The election of G. S. Parmlee, of Rochester, as secretary, was announced as having been agreed upon by the executive committee.

A pleasant feature of the morning session was the presentation to the retiring president, C. F. Ladner, of St. Cloud, of a china clock and silver tea service. The presentation speech was made by A. T. Stebbins, who afterwards offered a resolution of thanks to Mr. Ladner for his untiring efforts toward the Association's success. This, of course, was adopted. Secretary Clark also received a figurative bouquet when the delegates gave him a rising vote of thanks for the excellent work he has performed in that trying position.

At the afternoon session only the members of the Association were allowed to be present. On motion of C. A. Moye, of Duluth, it was voted to hold the next annual convention in that city on February 7 and 8, 1900.

It was suggested by the chairman of the insurance committee that a committee be appointed to draft a plan for mutual insurance and submit it in detail at the next convention. It was thought best by the committee to appoint one member from each congressional district and four at large.

The Association is very much opposed to the contemplated move by the Western classification committee to raise the minimum carload weight on agricultural implements and vehicles and other goods handled by the retail Hardware merchants, and passed a resolution looking to defeat the plan. They are suited with the former minimum weight.

Digitized by Google

P. G. Hanson, president of the Business Men's Association of Minneapolis, and Secretary Dingman, of the same body, spoke on contemplated legislation and a committee was appointed to attend to legislative matters in the Hardware interests. H. L. Cleveland, of Minneapolis, and A. T. Stebbins, of Rochester, are two of this committee.

The finances of the Association were never in better shape than at present, and the membership is rapidly growing.

A telegram received from the Iowa Retail Hardware Association congratulated the Minnesota merchants on the flourishing condition of their organization and predicted long life for it.

North Dakota Hardware Association.

The annual convention of the North Dakota Retail Hardware Association was held at Grand Forks on February 23. The attendance was quite large. President Kelley presided, and delivered an annual address, in which he declared that the membership was much larger than before and that loyal work was being done in every direction The annual report of C. N. Barnes, secretary, was also presented. Several papers of interest were read, and the following officers and Executive Committee were chosen for the coming year:

President, Clark W. Kelley, Devil's Lake.

Vice-President, H. B. Allen, Jamestown.

Treasurer, H. N. Joy, Hamilton.

Secretary, C. N. Barnes, Grand Forks.

Executive Committee—H. T. Helgesen, Milton; N. Halverson, Northwood; C. A. Reinhardt, Grand Forks; P. L. Pritchard, Fargo; H. F. Stehlon, Casselton; C. B. Cook, Gardner; J. L. Gale, Hunter.

The next session will be held in Fargo, and will occupy two days instead of one, as heretofore.

Kansas Organizing.

At a meeting of the retail Hardware dealers of Kansas at Topeka, some days ago, there were represented, either in person or by letter, about fifty of the most prominent dealers in the state. They at once proceeded to organize a state association for their mutual protection and advancement, and elected the following officers for the first year: President, Frank Rudy, of Paola; vice-president, S. J. Gilbert, of Arkansas City; secretary and treasurer, J. A. Cole, of Topeka; executive committee: A. Buckley, Parsons; C. W. Sington, Greeley; Solomon Landis, Hoyt; J. F. Berger, Anthony; W. S. Culver, Topeka.

The New Jersey Car Spring & Rubber Co., Jersey City, N. J., have issued a new catalogue of 'Rubber Mats and Matting which they manufacture. The catalogue is almost entirely given up to illustrations and descriptions, together with price lists of mats and mattings for a great variety of purposes. Illustrations are given of a variety of shapes and patterns of plain and monogram mats for floor use, corrugated stair treads, street car-step treads, carriage mats, table mats, coin mats, as well as a miscellaneous line for barbers, dentists and other uses. The catalogue contains forty-eight pages with sixty-seven illustrations. The company will be glad to send it upon request.

A valued subscriber asks us to obtain for him the name of the publisher of a book entitled "The Labor Exchange," issued by somebody who employs the title "Temple of Labor" as suggesting the publishers. We have been unable to locate this work, and we would be very much obliged if some reader could furnish us with the name of the publisher of the same.

Caiguaran, cedar, ebony, lignum-vitae, logwood, mahogany and redwood are abundant in Cuba.—*Exchange.*

An Association for Missouri.

A meeting of the retail Hardware dealers of Missouri was held at the Midland Hotel, Kansas City, on February 15, and after some discussion it was decided to call a convention of the retail Hardware dealers of Missouri, to be held in St. Louis on April 11 and 12, for the purpose of forming a State association.

A committee, consisting of J. W. Poland, G. A. Easterday, I. D. Cottey, B. F. Naylor and D. Thomas, were appointed to issue a call for this convention. That call has been issued under date of February 15, and the committee say: "Nearly every Western State has now an association of retail dealers in Hardware and stoves. It is considered desirable that Missouri should also have such an association, the advantages of which are so great in these days of close competition that it hardly admits of argument. A preliminary canvass has been made of a number of dealers in this State, and the replies have been so favorable that it has been concluded to issue this call for a meeting. At a preliminary meeting held in Kansas City, February 15, this committee was appointed and authorized to issue a call for a first meeting. Now, therefore, in accordance with such authority, we hereby call a meeting of the retail dealers in Hardware and stoves of the State of Missouri, to meet at the city of St. Louis on April 11 and 12, 1899, for the purpose of organizing a State association."

American Lanterns.

American lanterns are exported to all the countries of the world where lanterns are used. Many are sent to South Africa and to South America, to Australia and New Zealand, and some are sold in Asia. Few, proportionately, are sent to Europe.

Kerosene oil is now commonly burned in lanterns all over the world. There are no lanterns made nowadays for candles only, but there are exported to South America some lanterns made so that either candles or oil may be burned in them. These are provided with a candle socket which may be set down into the oil reservoir, the wick holder having been removed. By removing the candle socket and screwing in the wick holder the lantern is made ready to burn oil. Excepting railroad and other lanterns for special uses, substantially all the lanterns made nowadays are of the kind known as tubular, first introduced about thirty years ago, and now made in various modifications as to detail, the tubular part of the lantern being designed with a view to producing better combustion and a brighter light. The lanterns made for ordinary uses are produced in about forty styles.

The American lanterns are the lightest, the sightliest in appearance and the best adapted to their use, and they are sold cheaper than lanterns of equal quality produced elsewhere. There are large establishments in this country making lanterns only. It is probable that more lanterns are now exported from this country than from either England or Germany, and the exports of American lanterns are increasing.—*New York Sun.*

The T. B. Rayl Co., Detroit, Mich., make the following announcement under date of February 1, 1899: "We take pleasure in announcing to our business acquaintances that from this date we shall have associated with us Mr. Geo. A. Hamilton, as a member and director of the T. B. Rayl Co. Mr. Hamilton severs a many-years' connection with the Russell & Erwin Mfg. Co., of New York, to make Detroit his home, and brings with him an extended experience in builders' and manufacturers' supplies, which, with the continued services of our Mr. Paton and Mr. Mathieson, we believe will add greatly to our efficiency in attending to the wants of our customers, in these branches of Hardware."

IOWA RETAIL HARDWARE DEALERS' ASS'N.

The meeting of the Iowa Retail Hardware Dealers' Association, held at Des Moines on February 8th and 9th, was a success in every sense of the word. Although the call for this gathering had been out but a short time, the attendance was large, and showed that 157 members had been enrolled, which number was increased to 260 before the adjournment of the gathering.

The meeting was held at the rooms of the Des Moines Commercial Exchange, and the first session was called to order at 2 P. M. on the 8th. C. W. Brelesford, of Villisca, acted as chairman. In the absence of the president, P. C. De Vol, his address was read by the secretary, from which the following extracts are made:

At our initial meeting a keen realization of the many evils from which we, as Hardware dealers, are suffering, and which might in many cases be mitigated by associating into a State organization, led to the call for our organization, and I am very much gratified indeed at the hearty response and active co-operation which is here manifest in the large number attending our first annual meeting, and in the fact that we have to-day enrolled more than 200 firms as members of our Association.

The great benefits which State Associations have already accomplished for their members make it absolutely certain that every State in the Union will be thoroughly organized inside of the next few years, and that we will have a National Organization to cope with the greater evils which State Associations cannot handle.

It is probable that some of the very large manufacturers of staple goods like hand saws, rifles, ammunition, etc., will pay but little attention to the complaint of a State organization that their goods are being offered by catalogue houses to our trade as baits at prices very little above the absolute cost to ourselves, but when these complaints are brought by a national organization and are backed up by the loyal support of the legitimate Hardware trade in the majority of States in the Union, these complaints and their redress will be a thing of tremendous moment to these manufacturers.

A thing of growing importance, which I consider it wise to refer to again, is the question of combined carload shipments by neighboring Hardware dealers either in the same or in adjoining towns. The action just taken by the general freight agents of the Western Traffic Association, which recommends raising the minimum car weight to 30,000 pounds, makes this a burning question in Iowa from this time forward.

Perhaps the greatest evil from which we are suffering to-day is the unnecessary and absurd spirit of animosity and retaliation which exists between competing Hardware dealers throughout the State. This is responsible for more unpleasantness, more years which wind up as unprofitable ones for the dealers involved and for more wide-spread ills from which we are suffering to-day than any other one thing which our organization can overcome. This evil is even greater than the catalogue house or department store competition or range peddlers, for it is absolutely and wholly bad, whereas the advertising by these other concerns results in a certain amount of business even for local dealers. I appeal to you, as members, to spread this spirit of fellow feeling and mutual co-operation, in every way possible, as the greatest work which our Association can do. Let our members, each one personally, visit and become thoroughly acquainted with their competitors. Invite him, if necessary to break the ice, to your house as your guest, and in nine cases out of ten you will find him a loyal good fellow, instead of the unprincipled enemy which you have heretofore supposed him to be.

The secretary's report was presented by H. A. Cole. Following this came the reading of the proposed constitution, which was adopted, the main features of which are as follows:

NAME AND OBJECT.

Sec. 1. The name of this Association shall be the Iowa Retail Hardware Dealers' Association.

Sec. 2. The object of this Association shall be to promote the welfare of the retail Hardware trade of Iowa.

ARTICLE II.

Sec. 1. Any person, firm or corporation in Iowa engaged in the business of selling Hardware, and known and recognized as a regular retail Hardware dealer, may become a member of this Association.

ARTICLE III.—OFFICERS.

Sec. 1. The officers of this Association shall be president, vice-president, secretary and treasurer, and nine members, no two of whom shall be chosen for the same congressional district, who, with the president and vice-president, shall constitute an executive committee.

Sec. 2. The president, vice-president and executive committee shall be elected annually by ballot, and shall hold office until their successors have been elected and qualify.

Sec. 3. The secretary and treasurer shall be appointed or removed by the executive committee. The treasurer shall receive and disburse the funds of the Association under the direction of the executive committee, through a voucher signed by the president and secretary, keeping a careful account of the same. The secretary shall be under the direction of the executive committee, and his or her duties shall be assigned by them.

Sec. 4. The executive committee shall fix the salary of the secretary and require bonds from the treasurer and secretary in any amount they may deem sufficient to be approved by the president of the Association.

Sec. 5. In case of a vacancy in any of the offices of this Association, the same shall be filled by the executive committee until the next annual meeting. The executive committee shall perform the duties of an auditing committee, and examine the books of the treasurer and secretary and report their condition at the annual meeting of the Association. A majority of the executive committee shall constitute a quorum for the transaction of business.

ARTICLE IV.

Sec. 1. The regular meeting of the Association shall be held annually on the second Wednesday of February at such place as may be designated by the Association at its previous annual meeting.

Sec. 2. The executive committee is subject to the call of the president.

Sec. 3. It shall be the duty of the president, or in case of his inability to serve, of the vice-president, to exercise supervisory control over the affairs of the Association, and preside at all meetings of the executive committee, and to carry out and enforce all measures adopted by the Association calculated to improve the condition of the Hardware business.

Sec. 4. The president shall appoint for each county one member, whose duty shall be to obtain membership in this Association and encourage the formation of local Associations.

Digitized by Google

Sec. 5. The presiding officer shall appoint at the annual meeting a sergeant-at-arms.

Sec. 6. Amendments to the constitution and by-laws may be made at any regular meeting by a vote of at least two-thirds of the membership present.

Sec. 7. All traveling men of Iowa are eligible as honorary members on payment of $1.00 fee per year, but have no right to vote.

The Association then proceeded to the election of officers, with the following result:

President, H. A. Cole, Council Bluffs.

Vice-President, S. R. Miles, Mason City.

Executive Committee—Jake Seither, Keokuk; A. T. Nelson, Wilton; H. C. Chapen, Union; E. G. Penrose, Tama; G. L. Miles, Grinnell; L. H. Kurtz, Des Moines; M. W. Keating, Afton; H. S. Vincent, Fort Dodge; Joe Mattes, Odebolt.

Wednesday evening was devoted to the opening of a question box.

Among the features of Thursday was the reading of a paper by H. A. Cole, entitled "How to Handle Department Store Competition." This was followed by a report of the Executive Committee, to the effect that Mrs. Henrietta E. Kupper had been appointed secretary of that committee and Charles Swaine appointed as treasurer. It was decided that the next meeting should be held in Des Moines. In the afternoon a paper was read by C. M. Doxsee on "Advertising," and one by C. W. Aldrich on "Trade Reform." The usual question box was opened, and several committees of a minor nature were appointed. The following resolutions were offered by the Committee on Resolutions and adopted:

Your Committee on Resolutions report for your consideration and suggest the adoption of the following:

Resolved, That we remain loyal to and work for the successful enforcement of the recommendations of our executive committee.

Resolved, That it is the wish of this Association that the legislative committee investigate and formulate plans for mutual insurance.

Resolved, That we recommend to our legislative committee the consideration of abuses connected with the employment of women and children by retailers, and recommend that the committee use its best efforts to secure the enactment of a law that will fix a minimum wage for this class of labor, to correspond with the wages of a man performing like services.

Resolved, That our legislative committee is instructed to use its best efforts to secure the enactment of a law making deceptive and false advertising illegal on the part of the dealer.

It was decided that the Association should be incorporated, and President Cole and Treasurer Swaine were appointed as a committee on incorporation.

Jack Tar's Predicament.

An old jack tar quoted by the *Marine Journal* had this to say recently about modern war ships: "Things are busted wide open. How can a fellow swear on one of those new-fangled boats? He'd sound like a fool a sayin' of 'Shiver me timbers!' when there ain't nary a piece of timber, nawthin' but iron from bow to stern. A feller can't take a reef in anything, he can't belay, there's no belayin' pins, 'n he can't use any o' them old words which hez made their navy. I suppose a feller will now have ter yawp 'Unrivet me plates!' 'Douse me searchlight!' 'Smash me fightin' top!'or 'Foul me screw!' or somethin' o' that sort."

Four months before it will become due is the will-o'-the wisp that has lured innumerable merchants to destruction. Long credit is as damaging to the retailer who accepts it as it is to the wholesaler who offers it, and likewise as it is to the business community which suffers the inevitable consequences.—*F. R. Boocock.*

Review of the Markets.

Hardware: Storm conditions affected to some extent the increasing volume of trade which has been the feature of the local market during recent weeks. The difficulty attending prompt movements of trade made many merchants temporarily defer anticipated visits, while the proper attention usually given to mail orders was prevented by inability to ship promptly, on account of the embargo laid upon transportation by the recent blizzard. There has been no diminution of the confidence felt by the trade in the auspicious prospects for the season's business. Demand continues good and prices are gradually, but surely, reaching a plane where declines are not discussed as being probable, so far as the prices are concerned at which large purchases are actually made. The strengthening of quotations is now reaching up into the domain of shelf Hardware, where labor frequently represents an 80 per cent. proportion of a possible cost; but until the labor market becomes agitated, such lines will be kept within a 10 to 15 per cent. basis, that will prove more of an incentive to buy than a handicap against a natural distribution of leading staples.

Wire Nails: The market on wire nails has been kept in a steady condition during the past two weeks, the latest advanced prices referred to in our previous issue being well sustained. Orders are solicited for immediate delivery more especially, the manufacturers evidently preferring a regular and steady business, than an accumulation of stocks in the hands of parties who might at a later date demoralize the conditions of the market by a general slashing of prices, in which wire nails would form a feature. Prices remain as previously quoted at $1.65, f.o.b. Pittsburg or Cleveland, for carload lots, less 5 cents a keg, to the jobber in carload lots; the single carload buyer is permitted the privileges of taking either a straight or mixed carload of either nails or wire. The export price, it is understood, has been advanced 10 cents a keg over recent quotations. The railroads have receded for the present from their decision to make 30,000 pounds represent a carload lot. Until March 31st they will continue under the old classification, which makes 24,000 pounds the minimum carload standard of weight. New York prices are maintained firmly, as follows: Carload lots on dock, $1.70 to $1.85; smaller lots from store, $2.

Cut Nails: The market for cut nails has been materially strengthened by the increasing costs of wire nails. The cut nail market may be considered as firmly maintained at the recent advance, which was to a basis of $1.35 for car load lots f. o. b. Pittsburg. New York prices may be quoted as follows: Carload lots on dock, $1.50, and smaller lots from store, $1.60.

Barb Wire: Since our last report, under a good and steady demand, the market for this staple has been successfully maintained at the recent advances. Large orders for future delivery are avoided by the mills. Controlling the market so thoroughly as they do, has caused many large purchases during the past month to cover possible requirements for weeks to come.

Present quotations may be named as follows: Painted barb wire, $1.70; galvanized, $2.10, f. o. b. Pittsburg or Cleveland. These prices are the extreme to large buyers. Buyers of single carload lots are quoted an advance on the above of 5 cents, and for less than carloads 5 cents additional. New York prices are steady at the following: Four point galvanized, in carload lots on dock, $2.25 to $2.30, and smaller lots from store $2.40. Higher prices are anticipated by those largely interested in the distribution of barb wire products, firm advances on billets and the high price of spelter being a sufficient pretext.

Wire Goods and Specialties: All the manufacturers' order books for these goods have been kept pretty full of orders on account of the large demand. The quotations formerly

Digitized by Google

governing these goods have been gradually increased in some cases quite largely; the disposition being forced by the fear of further advances in material, and a probability of short supply. Wire hat and coat hooks, ceiling hooks, and similar specialties, are now held at prices 20 to 25 per cent. over previous quotations.

Wrought Butts and Strap and T Hinges: The extremely low quotations on these goods which have prevailed for a long time, have been recently advanced from 10 to 15 per cent.; which while more particularly affecting the "special extra discount" for large quantity will still stiffen current quotations to an extent not specially disadvantageous.

Brass and Bronze Metal Screws: On account of increased costs of raw material, the manufacturers of wood screws have agreed to make the following changes in their discounts applying to the lines of goods referred to.

	Discount.
Flat Head Brass	80&10%
Round and Oval Head Brass	75&10%
Flat Head Bronze Metal	75&10%
Round and Oval Head Bronze Metal	75%

Brass Globe and Angle Valves, Etc.; All such goods into the manufacture of which copper and tin enter largely, have been subject to weekly advances in consequence of the constant fluctuations of the metal market, changes in prices more generally affecting the rougher goods in which metal and not labor especially predominates.

Warm Air Registers, Etc.: A new and revised price list for warm air registers, ventilators, faces and borders, was adopted at a recent meeting of manufacturers, held in Cleveland, taking effect on February 9th. This price list supersedes the previous one in use, dated Dec. 27th, 1897; and is subject to the following regular trade discount:

Black Japanned Registers, Ventilators, Faces and Borders	50%
White Japanned Registers, Ventilators and Faces	40%
Bronzed Finishes in Imitation of Gold, Silver, Copper or Bronze	40%
Nickel Plated	50%
Electro-Plated in Brass, Bronze, Copper or Oxidized Silver	40%
White Porcelain	30%
Solid Brass and Bronze Metal	25%

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 42 cents per gallon; in lots of 5 barrels or more, 41 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE PORTLAND TRADE.

New England has had the usual snow blockade due at this season of the year. Very few winters pass but we get at least one storm that completely blocks all business. This year has proved no exception to the rule, but instead of one, we have had three blocking storms.

Trade conditions continue good, and the increased cost of goods seems to stimulate buying, and give people courage to anticipate their coming wants. Manufacturers in most all lines have been obliged to advance their prices, but we think in some special lines they have lost their heads, and are making an advance out of proportion with the actual condition of the market.

The whole country seems to be trust-mad; even our own State seems to be afflicted with the fever. Our ice men, who are supposed to be "cool," are trying to combine. The latest thing we have heard of is the Putty Trust!

We appreciate that the conditions in many lines warrant all the advances that have been made, but we hope manufacturers will not, in their zeal, put prices so high that there will be a reaction. The only thing that troubles the jobber at present is to raise funds to meet his increased purchases, made necessary by advancing markets.

Collections are slow. The Emery-Waterhouse Co.

THE BOSTON TRADE.

The severe storms during the past two weeks have interfered with general business, and throughout New England there has been a decided lull in the volume of orders as well as in collections. It has taken all our time to catch up with the many advances, and place our costs and selling prices in line for spring business.

The advances on such goods as nails, lead, zinc, iron and all brass and copper goods are being well maintained, and it is to be hoped that the manufacturers will be as conservative as possible, in order that prices will be maintained throughout the season.

Where prices cannot be advanced in a legitimate way, manufacturers now seem to have recourse to the popular method of combining together, and never was there a time when manufacturing industries were possessed of such a spirit of combination as at present. What the result will be, no one is wise enough to predict, but it is safe to say that if the changes continue as they have during the past few months, many of the most important producing interests will be combined in a few companies which will not only control prices but the markets and conditions. Under these circumstances the question arises: What will be the condition of the individual operator and seller in the business world? Frye, Phipps & Co.

THE MANCHESTER TRADE.

We are more cheerful. Business is improving. People who hold on tight to their pocket books are beginning to loosen their grip, to buy before the rise in prices. The advance of prices in all kinds of merchandise is certainly stimulating trade, and anticipated profits make one feel like buying a better dinner. So one trade helps another.

Our factories are all full of orders, some working overtime; greater demand for labor, and money circulating more freely. John B. Varick Co.

THE PHILADELPHIA TRADE.

In 1888 we had a snow storm which for severity was par excellence and took the name of the "Blizzard," but, in the last week, this record has been more than eclipsed by the storm which covered the entire East, and which, in our section of the country, completely blocked railroads and transportation.

In our own city, people living a few miles from their places of business were unable to reach their homes, and the down town hotels were crowded for one or two nights in consequence.

Shipping has been simply impossible, owing to the vast amounts of snow in the streets, and salesmen have been snowbound in all sections, and even from the South come unexampled accounts of storm and hardship. Of course, business has been practically at a standstill for a week, and the financial loss involved is beyond computation.

During this time, however, prices have still been on the upward turn, and almost every day's mail brings a record of new advances which seems to be taking in all lines of goods and almost all manufactured goods in our line.

Raw materials are also higher and very firm, while, for the only time for some years, the production seems scarcely equal to the demand. Of course it will not take the production long to catch up, but it seems to be the opinion of many that goods will remain on a somewhat higher plane of prices, as, for years, they have been on an unproductive basis to manufacturers.

It is pleasant to report that collections seem to be improving—apparently, showing that dealers throughout the country are feeling the good effects of the better times and of the increased amounts being paid out for wages and manufacturing.

The demand for goods is fair and it is particularly noticeable that customers are inclined to be much more liberal in the quantities ordered.

Biddle Hardware Co.

THE BALTIMORE TRADE.

Baltimore has labored under and is now emerging from what, to our oldest inhabitants, has been recognized as a record-breaker. A continuous snowfall of 20 4-10 inches,

Digitized by Google

accompanied by strong winds, formed heavy drifts, and with prolonged low temperature reaching to twelve degrees below zero, closed navigation, blocked electric and steam railway travel and caused a complete cessation of business. Numerous casualties resulted, and among the unfortunates the writer is laid up with a slightly sprained ankle.

The demand for snow shovels, incident to above conditions, has been far in excess of supply in the hands of both jobber and retailer, and nearly every style of shovel has been called into requisition.

Picks, mattocks and brooms are also moving rapidly.

Employment thus afforded to thousands of men in clearing tracks, streets, sidewalks, etc., has gladdened the hearts of many destitute families, and we quote, "'Tis an ill wind that blows nobody good."

During the past week we have been unable to make any shipments out of the city, and our customers in the country are for the time being isolated. Judging from the reports of our snow-bound traveling men who have been fortunate enough to get home, letters reaching us from customers along the railroads now forwarding mail and press items, we believe it will be several weeks before business will again assume normal proportions. Much higher temperature is prevailing at present, and a feeling of distrust pervades the pedestrian who sallies forth, as the apparently solid mounds of snow are very deceptive, many of which precipitate feet and legs into abysses of ice water sufficient to cool the ardor of the most brave and crush the spirits of the too fastidious.

Baltimore may be successful in securing the immense ship building plant of Henry G. Morse, involving an immediate expenditure of $3,000,000 and the employment of 5000 men. Such an opportunity should not be lost by our capitalists.

Many orders packed and awaiting shipment.

Collections are "off." H. W. WEBB & SONS.

THE CLEVELAND TRADE.

The ratification of the treaty with Spain brings the country face to face with the perplexing problem, delay in its ratification inspired rebellion, and hesitation by Congress in giving the administration authority to enforce the obligation that international law imposes, is sure to encourage it. This delay also shows the strangest lack of the perception of national honor by some members of Congress. One of the most brilliant men the nation ever produced, committed political suicide for himself and for all who followed him, by opposing appropriations for supplies for our army in Mexico. Some of the present members of Congress will do well to profit by his example. The honor and dignity of the nation must not be sacrificed in an effort to furnish party platform. Dewey and his brave men must be sustained, if it takes a hundred thousand men to do it. The example of hesitation will tend to create rebellion in both Porto Rico and Cuba. We shall be the laughing stock of nations if timidity, economy, politics or cowardice prevent our providing ample reenforcements to the brave men who are defending the nation's honor. A traitor to the country's honor, no matter what pretence, will not be forgotten or forgiven. All predictions of prosperity are verified. The demand now is that the nation be united to protect its honor and dignity.

LOCKWOOD-TAYLOR HARDWARE CO.

THE COLUMBUS TRADE.

As it may not be generally known that it has been cold, so we thought best to mention the fact. It was so cold here that it froze Bower-Barff finish off the door knobs. Trolley poles were frozen stiff, street car rails were frozen as hard as iron. Rabbits haven't any tails since the freeze, and a jackass's bray froze in chunks as he propelled it from his "inards." We are sorry we did not have a kodak so we could send you a photo of it. It looked funny we assure you. It looked something like liver wuerst. In fact, nearly everything stiffened up, even Hardware. Now that the weather has moderated, why not some articles in Hardware? We refer to the articles that have advanced 100 per cent. or more, and there are several articles that have made that much of an advance. We think a great many of the advances are justifiable and none too much, but cannot say that of all. Our salesmen complain that they will soon wear out their catalogues making so many changes in prices, and say why don't they jump the price 2 cents a month on solder instead of ½-cent every week. That has been about the record for the past two months on solder and copper. The extreme cold checked trade for a few days, but the month is going to show a good increase over February, 1898. Merchants are ordering their Spring goods in earlier than usual, and we think it wise on such articles as poultry netting, steel goods, wire, nails, etc., as the demand will start in at the first signs of Spring. Collections have only been fair so far this year. This is always the case when it is time to pay taxes.

Columbus had a very disastrous fire a few weeks ago and all the goods not burned up are now being shipped to Chicago. Columbus merchants are congratulating themselves that the goods were not dumped on the home market. People will flock to fire sales and seem to be happy to pay as much for damaged goods as perfect goods. Barnum made a true statement when he said American people liked to be humbugged; but it is different with Hardwaremen, so we will stop short.

SMITH BROS. HARDWARE CO.

THE INDIANAPOLIS TRADE.

We have been impressed with the fact that while the trade in general have been anxious to anticipate their wants and save money by purchasing liberally of wire and nails, many of them have overlooked the advance that is taking place in the price of tin plate. The only way we can account for this lack of foresight on the part of the retail dealer and consumer, is that per package, it runs into money much faster and is not used in quantity, or to such an extent the year round as the other articles named. We feel sure many will regret having overlooked this item while investing their ready cash in staples which they will need later.

The above remarks lead us to call the attention of all to the fact that we are entering upon an era of higher valuations in all lines. A few years ago, the people in the West complained bitterly because they were compelled to pay their mortgages and debts with which they had previously burdened themselves, on a lower basis of values than prevailed when they assumed the obligations. In other words, they found it took more of whatever they had to sell to pay their indebtedness than it did when they incurred it. The situation is now reversed. Eighty-five cents invested today in any commodity will purchase as much as a dollar will a year hence. If the farmer gets more for his products and the workman more for his labor, everybody will be better satisfied with the higher valuations than with the low valuations which have prevailed for several years past.

VAN CAMP HARDWARE & IRON CO.

THE CHICAGO TRADE.

We have only had time to write you semi-occasionally during the past sixty days, for the reason that it has taken all our spare time to make out changes of prices for the benefit of our traveling salesmen, so as to keep them fairly well posted as to the present condition of the market. We find so many articles have advanced in the way of sheet steel, copper, barbed and plain wire, sheet iron, tin plate and other metals, that these advances have in turn caused the manufacturers of smaller articles in the Hardware line to make advances in the majority of their goods, which

Digitized by Google

have made changes necessary in most articles that we keep n stock.

The advancing tendency of the market has caused an unprecedented demand for goods, and the wise and far-reaching retailer has never been more anxious to cover his spring requirements than at present. It is true that our salesmen in many instances have favored customers by dividing part of these advances with them, but we do not see how we can continue such a course, for the reason that we are obliged to pay the advances ourselves for the sorting up of our stock.

We have been extremely busy since we wrote you last, and have more orders for future shipments by a large majority than ever before at this season of the year. The advances this week of ten cents on cut steel nails, also the further advances of twenty-five and fifty cents per box of small and large size tin plate, and the advance in the price of black plate and zinc is causing a good many of our customers to purchase goods in quite large quantities; so that we really have all the business we can possibly attend to without working night and day. Future prospects for a spring and summer trade were never so good in the experience of our concern. WELLS & NELLEGAR CO.

THE DAVENPORT TRADE.

The cold wave depressed business as well as the mercury. Since it passed, both have returned to normal condition. There was no speculative demand while mercury was down and prices up. Manufacturers who recently consolidated are as loud in their declarations of independence as a Fourth of July orator. The retailers are also organizing, and may soon be ab'e to dictate terms to the manufacturing monopolists. When the fight is on, the jobber will continue to saw wood with one of Disston's cross-cuts. There is more talk now about copper than silver. Why not have a free copper political party? If manipulation can double the price of copper, why can it not be done with the white metal and suddenly stop all this talk about fifty-cent dollars? Zinc is also ambitious to be classed among the precious metals.

Unfortunately, we inventoried in November; the result would be more satisfactory if taken now. Have no orders yet from the Philippines for skates, coal hods or snow shovels, but advance orders are coming in freely from Iowa for farming tools and binder twine.

SICKELS, PRESTON & NUTTING CO,

THE KANSAS CITY TRADE.

We go to press right this minute. We are busy as bees. We will dispose of you in one time and two motions. Prices are reasonably steady, but if they don't decline a few notches on wire and nails, we will account ourselves poor prognosticators. The cold weather was a "deadener" on business while it lasted. A rush followed it. How serious the damage has been upon winter wheat, which is the great staple in Kansas in which we are most concerned, we do not at this writing know.

Just excuse us now. Whatever the rest of the people say about business, consider as our sentiment. We will agree to subside until we can get more time to do justice to the affair. GILLE HARDWARE & IRON CO.

THE PITTSBURG TRADE.

Despite the intense cold weather, February shows a good increase of business over the same month a year ago. When the thermometer gets down to twenty below zero, it rather chills the enthusiasm of buyers, yet enough of them were about to make a 33⅓ per cent. increase for the first half of the month.

We have just read President McKinley's Boston speech on the political situation, and are more than ever impressed with his patriotic, honest and able handling of the very difficult matters which have fallen upon him during his term of office. The carping critics who constantly harass him in the daily press, should crawl into their holes after such an outspoken, manly definition of his policy in dealing with the Philippine question.

The outlook for spring business is very favorable; all our industries are busy; no lack of employment for all workers, and in some large concerns wages of the lower class labor have been advanced voluntarily.

Bicycles and bicycle sundries are beginning to attract attention, the larger towns having already taken agencies. Experience has developed the fact that it don't pay to handle poor goods. The survivors among manufacturers are generally those of established reputation for quality. Prices are down to a popular basis, and with improved business conditions, the sale of these goods promises to be very large this season. LOGAN-GREGG HARDWARE CO.

THE OMAHA TRADE.

Unusually cold weather for the past two weeks in this locality has somewhat affected trade, as when the thermometer ranges from twenty to thirty below, it naturally has a tendency to restrict trade, and in many sections not only customers and dealers, but travelers, have been practically weather-bound, and unable to transact business.

In spite of this fact, however, trade has been unusually active for the prevailing conditions, and little complaint could be made either in regard to the volume of business or collections.

Advances are being unusually well maintained, and the fact that everybody realizes that many goods were altogether too low and that the advance indicates a healthy condition of affairs, not only assists in maintaining advances already made, but in preparing the trade for a further marking up along many lines of goods. Season goods have been unusually active for this season of the year, and large shipments, not only of staple goods, but of wire cloth, poultry netting and screen doors, etc., have already been made, thus indicating that dealers are preparing for an active and early spring trade.

RECTOR & WILHELMY CO.

THE ST. PAUL TRADE.

There is not much to be said about the business conditions in the Northwest that has not already been said. We have had some days of extreme cold weather, that, while it lasted, had a tendency to cut off business, but we have had no blockading snow storms, such as have occurred in the East, and. on the whole, the weather conditions have been very satisfactory.

As might have been anticipated, the sales for the past two months have been large. It may be a question whether it would not have been better for us if our sales had been less, when we consider the sharp advances in prices that have taken place, but, as merchants, our business is to sell goods as opportunity offers, and be thankful if we make a reasonable profit. What is to be the outcome of this boom that seems to be on? Are prices to continue to advance until, from their own weight, they break and topple over? It is certainly to be hoped that conservatism will be manifested and that the trusts now formed, and forming, will not use their supposed power in putting up prices to that extent that disaster will come to the business interests of the country. The greed of the few may bring ruin to the many. Nevertheless, we can expect a large and profitable business during the coming season.

C. W. HACKETT HARDWARE CO.

A meeting of the American Screw Co. was held in Providence on Wednesday, February 15th, and the following directors for the ensuing year were elected: Clark Thurston, Charles B. Humphries, Henry C. Bangs, Charles Alexander and Herbert J. Wells. President Edwin G. Angell, James Tillinghast and Charles D. Rogers were nominated for directors but declined to serve.

Digitized by Google

Recent Trade Publications.

North Bros. Mfg. Co., Philadelphia, Pa., have issued a very artistic little handbook, devoted to the well-known line of ice cream freezers, etc., which they have so successfully manufactured, and which, under their intelligent management, have found their way into every corner of the globe. This is entitled "The Ice Cream Freezer Book," and is printed in colors, with a very artistic cover. Among the illustrations shown are those of their new automatic twin scrapers; their Lightning ice cream freezer; their Gem freezer; their Blizzard freezer; their Jumbo Lightning freezer; the double action Crown with crank and also with fly-wheel, etc., etc. In a note of introduction, the company say: "The line of freezers illustrated in this catalogue, comprises the largest variety made in any factory, and the line meets every demand, from high quality to low price. The freezers illustrated are of established reputation, in demand, easily sold, give satisfaction to merchant and user. They can be sold without misrepresentation. They embody all that is best and of intrinsic merit in an ice cream freezer. The special features adopted in our freezers during the last few years continue to distinguish them as superior to all others in perfection of construction and practical results in use. No other freezers have: Automatic twin scrapers; cedar pails with electric welded wire hoops, guaranteed not to break or fall off; cans of heavy tin plate, with drawn steel bottoms, guaranteed not to leak or break; materials and workmanship so perfect. These facts, we think, merit your consideration before placing your order for coming season. Our trade is confined exclusively to jobbing houses, who will be pleased to give you prices that we think will interest you, particularly when the reputation and quality of goods is taken into consideration. We shall be pleased to send you any further information you may desire, and trust to have your order through your jobber. We keep full assortment of all styles and sizes in stock all the year round and orders can be filled same day as received. Net prices quoted on application."

The Chadborn & Coldwell Mfg. Co., Newburgh, N. Y., are distributing to the trade their catalogue of Lawn Mowers for the 1899 season. Having an experience in the business of thirty years' standing, they feel that they are in a position to supply the trade with any grade of lawn mower desired, from the highest to the lowest price, consistent with good work. In this catalogue the "New Model" claims precedence being made in six sizes, 10, 12, 14, 16, 18 and 20 inches; they also make this mower with either low or high wheel. The revolving cutter used has four heavy steel blades fastened by screws (not riveted) to malleable iron flanges and is six inches in diameter. The driving wheels of the high wheel grade are ten inches in diameter. The "Excelsior Roller" Lawn Mower still holds a prominent place in their product, although it was first produced, as they claim, over thirty years ago; it is still popular with the trade requiring a high grade mower. This same pattern is followed in the popular Horse Lawn Mower which has been made by them so many years under the name of the "New Excelsior." Included in the assortment shown in their catalogue is the "Rival" Lawn Mower, which is made in four sizes, from 10 inch up, and marketed at lower prices. These mowers are also made in low wheel or high wheel as preferred, according to which section of country they are required. The "O. K." Lawn Mower, made popular last year among those requiring a low priced machine, is still continued as one of their lines, having been found to fulfil every requirement of those desiring that grade.

The Parry Mfg. Co., makers of light vehicles, Indianapo-Ind., have published for 1899 one of the handsomest and most artistic catalogues which it has been our pleasure to receive. It is printed upon very heavy paper, in convenient form, and contains about 100 pages. The cover is in red, brown and gold, and is very artistic. Upon the back page is a view of their extensive works, which are described as "The Largest Buggy Works in the World, Producing High-Grade Buggies." A large number of their products are illustrated in black and white, with a description opposite each. There is certainly shown everything which one could possibly desire in the buggy line. The motto of the concern is well shown in the following sentence taken from the catalogue: "We like to do things differently from others—we delight in surprises—and we try to make the unusual thing the every-day feature of our business when it's a thing profitable to our customers." Hardware dealers who are interested in the buggy line should write to the Parry Mfg. Co., and we are certain that a copy of this handsome catalogue will be sent them.

We have received from the C. W. Hackett Hardware Co., St. Paul, Minn., their 1899 catalogue of Bicycles and Sundries. This is a very attractive publication, in which is described and illustrated everything known under the sun which can be required for the needs of a bicycle rider or repairer. Each of these is accompanied by a description, with prices, and the whole is very artistically arranged. The company announce that among the wheels they will handle this year are the Victor, the Hackett Special and the Hackett Roadster. The frontispiece is devoted to a picture of the company's large business building in St. Paul.

The little publication, "Graphite," issued by the Jos. Dixon Crucible Co., Jersey City, N. J., for February, contains a portrait of Joseph Dixon, the founder of the Dixon Co., accompanied by some interesting matter in regard to

Setting Saws.

In the matter of setting saws, either hand or power, the main object of setting the teeth must not be lost sight of in the details of the process, says the *National Builder*. The object of setting the teeth of a saw out in either direction is to make the tool cut a kerf wide enough to admit the saw without heating it by excessive friction or consuming useless power in rubbing the saw against the sides of the kerf.

To meet these conditions, the setting may be barely sufficient to let the saw clear the fibers of wood which are left projecting by the cutting operation. The length of the fibers varies with the kind of wood operated on, hence the necessity of giving a saw more set when cutting soft than hard wood.

The operation of setting consists of bending outward each alternate tooth on opposite sides of the saw, but it is not sufficient that the mere points of the teeth be bent out at an angle with the saw. This leaves barely the points of the teeth exposed to the wood, and a very short time answers to wear off the points, making the saw so dull that the teeth do not cut enough to clear.

A section of the entire tooth at the top should be set out bodily, and nearly parallel with the saw blade. It is not easy to do this, therefore, the usual and effective form of a set tooth is a long taper from the blade to the outside of the kerf and the rest of the tooth for a distance depending upon the size of the tooth parallel with the saw blade. This gives a surface which will wear a long time without getting dull enough to affect the cutting of the saw.

To meet the conditions noted above, the saw setting tool must be so made and used that it will bend the tooth twice —once out and then the point back again parallel with the body of the saw. The tool must not smash the point of the tooth. Some of the patent sets do this badly, when used by unskilled hands. There must be adjustable stops so arranged as to hold the saw firmly and rigid enough so as not to spring when setting the heaviest tooth the set will take.

Above all, the teeth should be all of a length, and filed nearly to a size before setting, as it is impossible to set large and small teeth accurately alike.

The National Cement & Rubber Mfg. Co., Toledo, Ohio, are continually adding some new specialty, and they have a fashion of springing them upon the public without any notice as to what is coming.

We never to the greatness climb
Which in our youthful dreams we planned.
We've wasted so much precious time
We find we haven't got the sand.

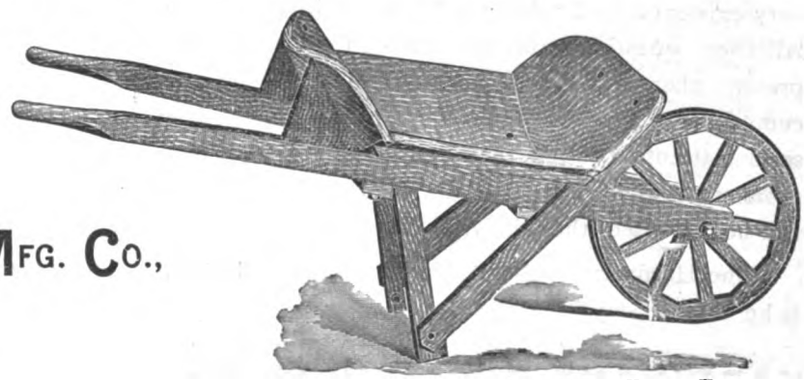
The Magill Hardware Co.



The Magill Hardware Co., Chattanooga, Tenn., make an announcement under date of February 1st, of an important change in their business, concerning which, among other things, they say: "We beg to announce that owing to our increasing trade, we have found it necessary to enlarge our quarters, and in making the change we have merged our business into a stock company, with the following executive officers: W. L. Magill, president and general manager; J.A. Magill, vice-president; T. H. Johnston, treasurer; S, M. Hardin, secretary. As soon as the busy season incident to the spring trade is over we will remove to the capacious Vance & Kirby building, No. 729 Market Street and No. 730 Broad Street, so well known to the trade, which will give us 10,000 additional square feet floor room, for the accommodation of our increasing business. We do not appear before the trade as entire strangers, but trust it will not be amiss to say a few words in reference to the personnel of our company. W.L. Magill, our president and general manager, when nineteen years of age entered the employ of J. H. Warner & Co. in 1879. In 1884 he was admitted to a partnership in that Hardware firm. In 1888 the firm of J. H. Warner & Co. was merged into the corporation of Carter-Magill Hardware Co., of which Mr. Magill was general manager, and it was under his able management that this company acquired a prestige second to none as long as he had charge of its affairs. In 1894 he left the Carter-Magill Hardware Co. (which thereupon changed its name to Chattanooga Hardware Co.), and with his brother, J. A. Magill, established the Magill Hardware Co. Mr. Magill has, therefore, been for twenty years continuously engaged in the Hardware business in Chattanooga, and a large line of his old friends and customers naturally followed him to his new concern. His thorough knowledge of the Hardware business, his extensive acquaintance with the trade, added to his untiring energy and uniform courtesy, warrant us in saying that with his careful personal attention given to the details of our business in every particular, the affairs of this company will be conducted in a thoroughly honorable and business-like manner. J. A. Magill, our vice president, is a resident of Sweetwater, Tenn., for many years cashier of the bank of that place, but now president of the Mascot Knitting Mills at that place, is well and favorably known throughout East Tennessee and North Georgia as a capable and successful business man. Thomas H. Johnston, our treasurer, is well known to a majority of the customers of our house. He has been associated with us for the past four years as bookkeeper and traveling salesman, and with this thorough preparation and acquaintance which he has acquired, coupled with his earnest endeavors to give our patrons at all times his careful attention, renders him specially fitted to take charge of the office and financial affairs of our company. Samuel M. Hardin, our secretary, comes into our business with the determination to add our list of friends and patrons to his large circle of acquaintances, whose good wishes follow him here from his native home city, Rome, Ga. His former connection with the Rome Hardware Co. has given him a practical knowledge of the Hardware business and enables him to take immediate charge of our order department. He will give personal attention to the prompt execution of all orders sent us, either voluntarily or through our traveling men."

James and Henry Leonard, who were skilled in the forged iron products of England, came here from Pontypool in Monmouthshire, in 1652, and to Raynham, Mass., about two years after the first settlers had planted themselves upon the spot, built the first forge in America.

Electro magnets capable of picking up a load not exceeding five tons are used by an Illinois steel company to transfer steel beams or plates from one part of the shop to another.—*Exchange.*

A "HARDWARE JODDERS'" NUMDER.

OUR ANNIVERSARY ISSUE OF APRIL 10, 1899, WILL BE DEDICATED TO THE

HARDWARE JOBBERS OF AMERICA.

It will be Handsome, Artistic, Timely, of Permanent Value, and will go into the hands of the Jobbers of the World.

On April 10, 1898, the Eighth Anniversary of the founding of *Hardware*, we published the largest, handsomest and most artistic number that was ever presented by anybody, anywhere, to the Hardware trade.

It was devoted to the Hardware Associations of America; was read by everybody; went into every corner of the globe; was laid away for preservation and future reference by the majority of its readers; and won golden words of commendation from the trade.

This great number is to be duplicated on our Ninth Anniversary of April 10, 1899.

The special branch of the trade to which it will be devoted may be learned from the following title, which will appear upon the cover of that issue:

"HARDWARE JOBBERS' NUMBER."

This seems to us to be the most timely subject that can be chosen, now that the questions touching upon the jobbing trade are being so generally discussed, and so many points continually raised as to the exact status of the jobber before the trade; the extent of his influence; his proper sphere of endeavor; his relation to the manufacturers on the one hand, and to the retailers on the other; his restrictions, and the temptations that beset him in securing trade; and various other points of vital importance that touch upon his very existence, and relate to his status in the future. All these questions, and many more that will readily present themselves, will be fully discussed by men competent to speak for the trade, and who have given serious attention to the themes upon which they have promised to write. Among the many subjects which will be discussed, the following may be named:

"The Hardware Jobber: Has he a Business Future? Is he here to Stay?"

"The Present and Future of the National Hardware Association."

"The Ethics of the Jobbing Business."

"The Hardware Jobber as a Man and Brother."

"The Jobber from the Manufacturer's Standpoint."

"The Manufacturer from the Jobber's Standpoint."

"The Jobber from the Retailer's Standpoint."

"The Retailer from the Jobber's Standpoint."

"The Western Jobber."

"The Eastern Jobber."

"The Southern Jobber"

"The Northern Jobber."

"The Central Jobber."

"The Pacific Coast Jobber."

"The Canadian Jobber."

"The Past of the National Hardware Association."

"Other Hardware Jobbers' Associations."

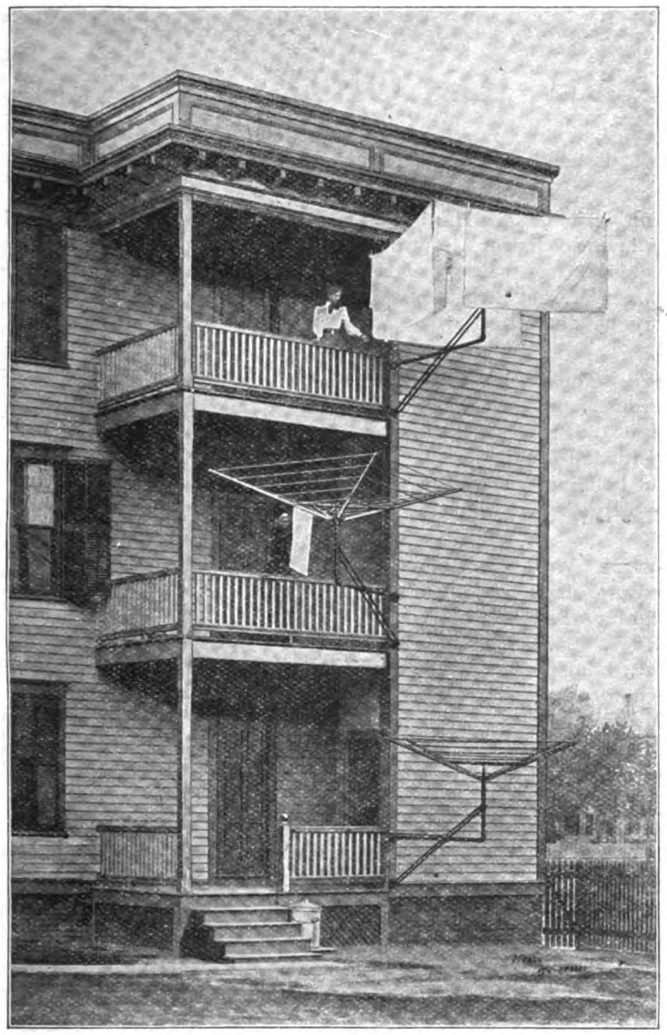
"The Package and Cartage Question."

"Restrictions as to Jobbing Territory."

"How Does the Jobber's Future Look to a Man in the Corner?"

"Syndicate Buying."

"Fraternity in the Jobbing Trade."



Etc., etc., etc., etc., etc.

In the preparation of our anniversary number of last year, we received the cordial assistance and support of the trade everywhere, and the congratulations which were showered upon *Hardware* for its successful venture into this practically new field, were an ample compensation for the labor and expense involved.

We have already received sufficient assurance that this second endeavor upon the part of *Hardware* will be most earnestly appreciated and endorsed by the trade. We should be pleased to hear from our friends everywhere with such advice, suggestions or information as they can offer for the successful realization of the purpose we have in view.

St. Louis, Mo. — The Ranz-Lambrecht Stamping Tools & Mfg. Co. has been incorporated. Capital stock, $5000. Incorporators: Jacob Ranz, A. Lambrecht and L. Lambrecht.

Changes and Improvements.

Appleton, Wis. — The Appleton Wire Works Co. have decided to add a weaving, also a winding department, to their plant, and the necessary buildings will be constructed within the next few months.

Buffalo, N.Y.—The plant of the Standard Radiator Co., at the corner of Heacock and Roseville Streets, has been sold to the American Radiator Co. The Standard plant is well equipped for the manufacture of all kinds of radiators and everything used about them. The shop has employed at times 400 men and has made 3,000,000 feet of pipe in a year. The American Radiator Co. now own two plants in this city. The Pierce plant was purchased some time ago. Two large plants in Detroit are also owned by this company.

Cincinnati, Ohio.— The Cincinnati Machine Tool Co. have purchased the buildings of A. H. Kerkhoff & Co., and the two plants will be merged.

Cincinnati, Ohio.—The National Brass Works Co. have determined to construct an addition 100x200 feet in size.

Cleveland, Ohio.—It is stated that the Born Steel Range Co. have determined to make an addition to their plant, which will be 50x250 feet in size.

Cleveland, Ohio.—The Garry Steel Mfg. Co. will replace their building recently destroyed by fire by a structure 325x100 feet in size.

Freeport, Ill.—The Arcade Mfg. Co. have decided to construct an addition to their plant, which will considerably increase their present output.

Ironton, Ohio.—The Marting Iron & Steel Co. has been chartered, with $200,000 capital stock. It has secured control of the Aetna furnace property. H. A. Marting is one of the principal directors.

Kansas City, Mo.—The Prest Heating Co. will erect a new foundry building.

Lynchburg, Va.—The Lynchburg Brass Mfg. Co., amendment has been made to charter, changing the name to the Lynchburg Hardware Mfg. Co., and increasing capital stock, so that it shall not be less than $20,000, nor more than $100,000.

Newcastle, Pa.—The Wire Novelty Works will be removed to Sharpsville, where the citizens have taken $30,000 in stock in the concern.

Toledo, Ohio.—The Toledo Tool & Machine Co. have secured new quarters for their business, which will considerably increase their facilities.

Worcester, Mass.—A five-story addition is to be made to the factory of the Wire Goods Co., No. 20 Union Street, for which plans are now being drawn by Baker & Nourse. The addition will be 50x100 feet, and of brick, and will make room for the rapidly increasing business of the company. It will manufacture all kinds of wire goods and Hardware.

Recent Fires.

Brooklyn, N.Y.—Fire has partly destroyed the three-story brick factory occupied by the Jones Tubing Co., at No. 63 Kent Street, Greenpoint. The loss is estimated at from $15,000 to $20,000.

Monmouth, Ill.—Fire has destroyed the remnant of the old Weir Plow Co.'s plant in this city. Loss, $25,000.

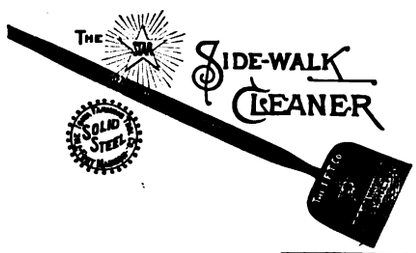
BUSINESS IS BETTER AND THERE WILL BE
A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.



Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Hardware Business For Sale.

HARDWARE, coal and lumber business in a town of 3000 population. No other Hardware store or lumber yard within ten miles. Inventory January 1, 1890, $10,000. A rare chance to right party. Address J. C. SENDEL, Weatherly, Pa.

A COMPLETE stock of Hardware, stoves and tinware, paints, oils, plumbing and tinning, steam and hot water heating; water works now going on, can have the tapping of mains. Established ten years and no opposition. Right party can make $1500 per year over expenses. Nearest Hardware, ten miles in a thriving town in Pennsylvania. Will sell property if wanted or will rent reasonable. Reason for selling, going to retire from business. Address Box 92, care HARDWARE, No. 143 Chambers Street, New York.

HARDWARE business on Pacific Avenue, Tacoma. Stock inventories $20,000. Manager recently deceased and owners desire to sell. Business established in present location ten years ago. Address THE SYNDICATE Co, No. 503 California Building, Tacoma, Washington.

A NICE, clean stock of Hardware, located in one of the largest and most thriving towns in New England, is offered for sale on account of the owner's poor health. The business has been established twenty years; is in the best location in the town, and in a thrifty condition. The stock will invoice at about $10,000. To a party with the cash it offers a splendid opportunity. Address A., care HARDWARE, No. 143 Chambers Street, New York.

A COMPLETE stock of Hardware, saddlery, stoves and tinware. Business well established in a live town and prosperous country. Address A. B. C., care HARDWARE, No. 143 Chambers Street, New York.

File Factory for Sale.

ON Saturday, April 1, 1899, the plant of the late McClellan File Co. will be sold at the Saginaw County Court House, by the Circuit Court Commissioner, to satisfy mortgages about one-third the value of the plant, which will be sold entire, comprising real estate, buildings and all machinery. The factory has a capacity of 500 dozen files per day, and is one of the most thoroughly equipped file plants in the country. Plenty of cheap fuel. An elegant opportunity on a small capital to manufacture files for the trade, or to operate it as a re-cutting factory. For further particulars, address GEO. J. LITTLE, Saginaw, Mich., for mortgagees.

Agency Wanted.

A PARTY with many years' experience on the road, and who has a first-class agency for the United States, would like to add one or two more lines, or would join with another who has good agencies. Address B., care HARDWARE, No. 143 Chambers Street, New York.

EXPERIENCED Hardwareman desires to represent manufacturers or jobbing houses of Hardware and house-furnishing, or anything in the building line. Have a very good standing among contractors and building fraternity of Cleveland, Ohio, and vicinity. Address CHAS. L. HEISER, care the Builders' Exchange, Cleveland, Ohio.

MANUFACTURERS' AGENT, with well located store in machinery district in New York, would like to hear from manufacturers wanting a reliable representative; have an established trade and years of experience. Address GEO. W. CHURCH, No. 183 Greenwich Street, New York.

COMPETENT cutlery man, residence, Colorado; twenty years in business, four years road work, wants agency for first-class cutlery firm or manufacturer in territory west of the Mississippi. Address G. A G., care HARDWARE, No. 143 Chambers Street, New York.

MANUFACTURERS of a good staple article or popular specialty whose prices can meet competition, and who will entertain the subject of representation in New York and vicinity, will find it advantageous to correspond with subscriber, whose firm may prove suitable in experience and repute, and would make arrangement mutually profitable. EDWARD CHARLES, care HARDWARE, No. 143 Chambers Street, New York City.

LIVE man (29) desires to represent manufacturers of small lines and specialties, suitable for the Hardware and house-furnishing trades. New York and vicinity. For particulars, address WM. SMITH, No. 718 Chauncey Street, Brooklyn, N. Y.

Agency Offered.

WE would like to hear immediately from a few live Hardwaremen who would like to be sole representatives in their towns, of a concern that is in the market for business, and have a line made for "men now on earth"—a modern line THAT CAN BE SOLD to your customers. Address "BOX 88," care HARDWARE, No. 143 Chambers Street, New York.

WANTED agents to handle a patented, labor saving device of universal sale; investigation solicited by men who desire quick returns from a legitimate, profitable business. Address (C) BURR MFG. Co Cleveland, O., 823 Society for Savings.

Attention, Salesmen!

SALESMEN on uncovered ground can add hose, tires and full rubber line. Free samples. Cash commissions. Protected ground. One salesman earned $3900 in 1898. MINERALIZED RUBBER Co., New York.

An Opportunity.

OWING to withdrawal of estate interest in a long-established wholesale and retail Hardware business in one of the best New England cities, a connection is desired with some man of capital capable of taking charge of the financial and bookkeeping department of the business. For particulars, address INTEGRITY, care HARDWARE, No. 143 Chambers Street, New York.

HOPKINS' "HANDY NOTES AND QUERIES."

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Pearce's Improved Cahoon Patent Broadcast SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The **CAHOON** is not the lowest priced seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two-thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the **CAHOON** make a profit and a satisfied customer at the same time. They stay sold. A prominent Hardware dealer in the South wrote us under date of February 13, '99: "We are not handling any other broadcast seeder similar to yours Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principal distributing points. . . . . .

NEW YORK OFFICE, 10 WARREN STREET.

GOODELL COMPANY, - ANTRIM, N. H.

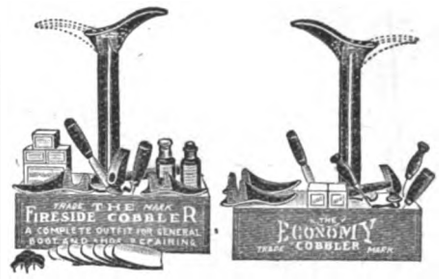
CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.



Very Respectfully,

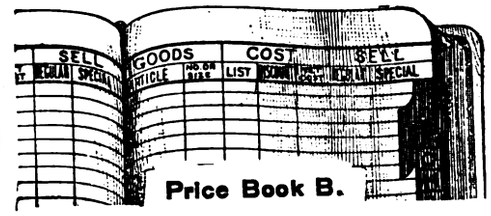
Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

Digitized by Google

HARDWARE PRICE BOOKS.

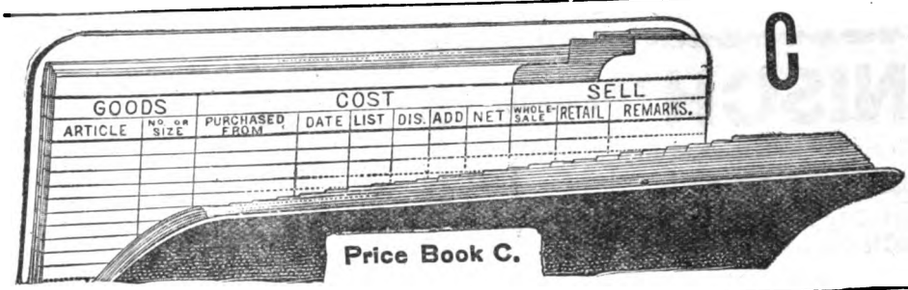
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:



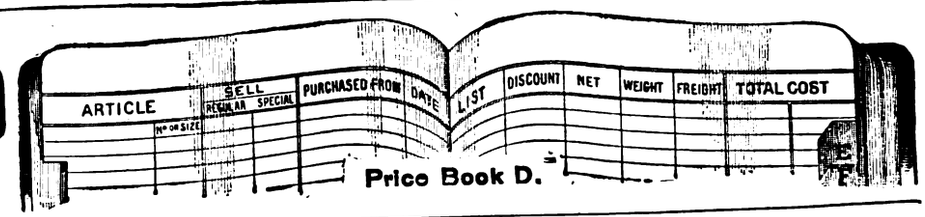
A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



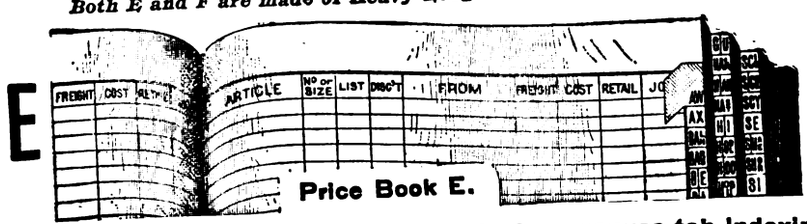
FOUR EDITIONS:

C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

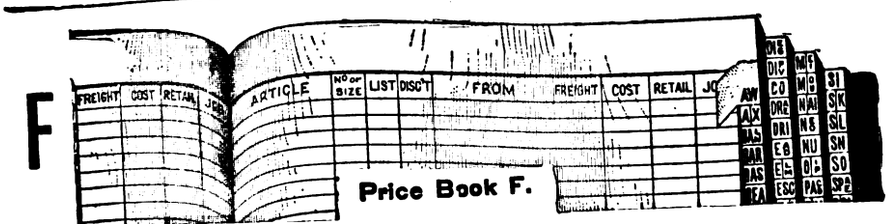
D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2.50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to AU For Chisels, turn to CHI/U For Iron, turn to IRO
" Parers, Apple " PAP/R " Cutlery, " CUT " Irons, " IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

AD GU SC/O
AN HA/M SCR
AU HAN SCY
AW HA/T SE
AX HI SH/E

Fac Simile of Indexing.

Price Book E—350 pages, 7 x 10 inches, canvas tab indexing. Price, $5.00.

AD DI/G M/F SI
AN DI/V M/U SK
AU DO NAI SL
AW DR/E N/O SN
AX DRI NU SO

Fac Simile of Indexing.

556 pages, 8¼ x 11 inches, black leather tab indexing with gilt lettering. Price, $7.50.

Note.—In Price Books E and F there is an Index Character to EVERY PAGE.

FAC-SIMILE OF AUSABLE BOX AND BRAND.

Genuine Ausable Nails are packed in boxes bearing their FULL NAME and Trade Mark.

THE TOLER

Liquid Door Check and Spring.

PERFECTION ATTAINED AT LAST.

Entirely new in style and mechanism, **strong, simple and effective,** giving in results all the best achievements of other checks, together with new and valuable features only to be found in this.

It has a vertical case, with openings only at the top.

It has no plugs or caps screwed to the cylinder ends. It cannot leak. There is no way for the liquid to escape after the Check is applied.

The piston is idle during a greater part of the opening and closing of the door, thus saving the wear on all parts.

It is made of the very best of material throughout.

It works to perfection, closing the door quickly and gently.

It is easily taken apart by anyone; no returning to the factory for anything. This saves time and money. The working of the Check will speak for itself.

Regular finish, Gold Bronze. No extra price for Silver Bronze or Dead Black when so ordered. Furnished Plated in Brass, Nickel, Copper or Silver, Plain or Oxidized, at a reasonable extra charge. No extra charge for Brackets where needed.

Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.

Champion Model.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. **List, per doz., Enameled, $30.00; Full Nickel, $42.00.**

No. 4, Nickel-Plated	$5.00

For household and general use.

FOOT POWER MACHINE.

No. 1, $25.00 each

For Packers, Tanners, Butchers, Farmers, Hotels and Restaurants.

Liberal Discount to the Trade.

Most perfect knife sharpener made.

Easily operated and quick work.

The degree of perfection attained by the use of this machine is far superior to that accomplished by the ordinary method of hand work.

These machines are practical, based on correct mechanical principles and have reached their present state of perfection after many years of experimenting.

They are simple in their construction, very durable and sharpen with great rapidity.

Knives keep their proper shape and last much longer when sharpened with the "Universal" machine. Silver-plated knives can be sharpened without damaging the blade.

Every dealer and every family should have one of these machines.

We guarantee the "Universal" machine to be as we represent it, "practical, convenient and perfect."

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The present business situation, highly favorable though it be, can hardly be considered in the light of a boom. Since the panic times of 1893 there has undoubtedly been in many ways an annually increasing development of our industrial resources and the enterprising methods by which our stupendous production must be marketed. The widely diversified plants scattered throughout the country have created expensive modes of distribution, which recent co-operative combinations have largely minimized, and have doubtless placed in the way of profit sharing, which with previous competition frequently made it a difficult problem.

With the expansion of our territory, and the successively good crops which have raised our agricultural states from the slough of despond, the prospect ahead is one of solid and healthy prosperity. While a few over zealous mistakes may be made—and rectified, we are opening up new outlets for distribution of our productions, are largely increasing in population, whose growing demands constantly create conditions that call for renewed energies on the part of our people, conditions that make home needs assume greater importance than ever before.

We are rapidly reaching a condition in our industrial prosperity, when orders from abroad covering some lines are not solicited so persistently as heretofore, the domestic demand giving the manufacturers all the orders on which they can promise prompt delivery, and giving at the same time the prospect of a more profitable distribution. This is especially noticeable we might say on wire nails, where the export price has advanced but 10 cents a keg in the two months ending March 1, while the home dealers find the advance to them is made six times as great.

The most encouraging feature connected with many remarkable advances in current quotations is the fact that labor gets an unexpected, and in many cases an unsolicited increase of remuneration, with the prospect an open one for a long continuance of employment. There can be no fear of a recurrence of hard times as long as the working classes find satisfactory industrial conditions, with a remunerative field of labor.

Every branch of the iron and steel industry, under the controlling influence of the producers of so-called raw material from pig iron to wire products, is apparently justified, by the extraordinary activity in the iron working plants, in keeping prices at a top notch to check a demand that has already filled order books for months to come and to an extent that makes specified deliveries doubtful of accomplishment.

That the advances in prices have come to stay is evident from the fact that so many mills, being in condition through well filled order books, have inaugurated advances in wages, many of which are to take effect on April 1st, and ratio of increase aggregating in many cases ten per cent. As an evidence of prevailing conditions it is stated that at the annual meeting of the Pennsylvania Steel Co., which will be held March 14th, the company will show a profit for the year ending December 31, 1898, on the operation of the Steelton plant, of over $100,000, against a deficit of $124,000 for 1897.

Our "Hardware Jobbers'" Number.

As will be seen by special announcement elsewhere in this issue, we will publish on April 10th, 1899, the Ninth Anniversary of the founding of *Hardware*, a special number, which will in every respect equal the magnificent anniversary edition published on April 10, 1898, which was devoted especially to the Hardware Associations of America.

This number is to be called the "Hardware Jobbers' Number," and will take up and discuss everything of importance in connection with the present and future of the Hardware jobbing business, will give histories of the leading houses, and contain a number of special articles by prominent members of the trade.

Among these special features we are permitted even at this early date to announce the following:

A paper by William W. Supplee, Supplee Hardware Co., Philadelphia, ex-president of the National Hardware Association, on "The Future of the Hardware Jobber," or some theme which has relation to this subject.

"The Present and Future of the National Hardware Association," (or a similar theme). By H. H. Bishop, McIntosh-Huntington Co., Cleveland, Ohio, president of the National Hardware Association.

C. B. Lockwood, of the Lockwood-Taylor Hardware Co., Cleveland, Ohio, on "The Ethics of the Hardware business."

Digitized by Google

"The Hardware Jobber from the Manufacturer's Standpoint," by James D. Foot, president of the Kearney & Foot Co., New York.

"The Manufacturer from the Jobber's Standpoint," by John Bindley, Bindley Hardware Co., Pittsburg, Pa.

"The Hardware Jobber from the Retailer's Standpoint," by H. P. Davidson, president of the Hardware Association of Cleveland, Ohio.

"The Retailer from the Hardware Jobber's Standpoint." By J. H. Smith, Smith Bros. Hardware Co., Columbus, Ohio.

"The Package and Cartage Question," by Col. James R. Nutting, of the Sickels, Preston & Nutting Co., Davenport, Iowa.

"How Does the Hardware Jobber's Future Look to a Man in the Corner?" by J. B. Comstock, of the W. Bingham Co., Cleveland, Ohio, the author of the letters from the "Corner Desk."

"Old Jobbing Days in New York," by Henry Hopkins, Associate Editor of *Hardware*.

"Syndicate Buying," by Thomas E. Oliver, of Oliver Bros., New York.

"The Hardware Jobber of the Central States," by George T. McIntosh, of the McIntosh-Huntington Co., Cleveland, Ohio.

"The Hardware Jobber of the Southern States," by James D. Moore, of the Moore & Handley Hardware Co., Birmingham, Ala.

"The Hardware Jobber of the Western States," by H. C. Rushmore, of the Gille Hardware & Iron Co., Kansas City, Mo.

"Shall the Manufacturers Sell Only to the Jobbing Trade?" By C. S. Van Wagoner, Van Wagoner & Williams Hardware Co., Cleveland, Ohio.

"The Hardware Jobber and the Bicycle Trade." By James H. Ritter, Biddle Hardware Co, Philadelphia, Pa.

"Wherein Lies the Jobber's Profit?" by R C. Morley, Morley Bros., Saginaw, Mich.

"Department Store Competition." By a member of the firm of J. B. Shannon & Sons, Philadelphia, Pa.

"Net Prices in the Hardware Jobbing Trade." By Charles W. Emery, Van Camp Hardware & Iron Co., Indianapolis, Ind.

Other themes which will be discussed in this number, may be mentioned, as follows:

"The Hardware Jobber as a Man and Brother."

"The Eastern Jobber."

"The Northern Jobber."

"The Pacific Coast Jobber."

"The Canadian Jobber."

"Other Hardware Jobbers' Associations."

"Restrictions as to Jobbing Territory."

"Fraternity in the Jobbing Trade."

List of Members of the Jobbing Trade.

Membership Lists of the Jobbers' Associations.

Etc., etc., etc., etc., etc.

A Notable Incident.

The Appellate division of the Supreme Court, first department, last week admitted to the Bar of the State of New York, under its somewhat stringent requirements, with the endorsement, as to character of ex-Judges Wm. G. Choate and Roger A. Pryor, and Howard Ellis, Esq., a man fifty-seven years old, who was reared as a merchant and began the study of law at the age of fifty-four—Francis B. Thurber.

The case is so unusual that we have looked up the circumstances, and they constitute one of the romances of American life which are seldom found in the world of law. Mr. Thurber was born on a farm in Delaware County, New York; was educated in the common schools and the Delaware Academy; began as a boy in commercial life in New York at $2 a week, and in thirty years worked up to the first rank in the commercial world, as partner, and then president of a great house, with branches in London and Bordeaux and correspondents in all parts of the world. In 1892 he was a millionaire merchant, noted for his public spirit and his charities.

The panic of 1893 left him a poor man, although he could have avoided this by deserting his co-investors, which he refused to do. He was a student and a thinker; a contributor to the "press" and "reviews," on politico-economic subjects, upon both sides of the Atlantic. While chairman of the Committee on Foreign Commerce of the New York Chamber of Commerce, in discussing with a legal friend problems of the international law involved in President Cleveland's message on the Venezuelan question, it was suggested that he had a logical mind and ought to study law. Although weighted with the cares of a family and their existence, he accepted the suggestion, studied in the University Law School of New York and the law offices of Howard Ellis, Esq., burned the midnight candle in reading Blackstone and studying cases, and, last week, was admitted to the Bar.

For many years he has been a figure in the commercial organizations of the country and an advocate of their interests before legislative bodies. He organized the New York Board of Trade & Transportation and the Anti-Monopoly League, which held the balance of political power in New York State, and created the State Railroad Commission. He had much to do with shaping the Interstate Commerce Law; but he has a judicial mind, which recognizes the fact that when circumstances change upon which opinions are based, that it is consistent to change with them, and he now advocates the right of contract for railroad and other corporations. Unless we are mistaken, he will be heard from in adjusting the relations of labor and capital, for he is a good illustration of the American citizen who is capable of looking upon all sides of a question and weighing the evidence so as to establish justice.

He is president of a publishing company and of the United States Export Association, and will probably never "practice law" in the usual sense; but in this highly specialized age there is need in the law of men with just such intellect and business experience, and Mr. Thurber ought to be very successful in Federal, departmental and corporation practice, with which his business experience has made him familiar.

Attention is especially called to the announcement of the Goshen Sweeper Co., Grand Rapids, Mich., on page 39 of to-day's issue, in which they offer thirteen carpet sweepers for one dozen, for the season of 1899. This is certainly giving full count with something thrown in.

"Now," said Bunker, "I can once more face the world an honest man. The last of my debts is outlawed."—*Philadelphia North American.*

THE SALESMEN'S DEPARTMENT---IX.

THE CANCELLATION OF ORDERS.

This is a subject upon which much has been written and said, but in the majority of instances, it has not been discussed from a salesman's standpoint. In this article, it will be discussed just as if the writer were addressing a number of salesmen.

There is one phase of this matter which has greatly disturbed the writer, and against which we desire to protest. It is neither right nor just to yourself or your competitors to importune your customer to cancel an order after he has given it to a competitor, that he may favor you with it, at the same or a less price.

The idea of having slips to attach to orders bought for future delivery, or a rubber stamp with which to place an agreement relative to their cancellation, is something unknown in many localities.

The salesman who encourages the cancellation of such orders, must realize that it will react upon himself, and that what he encourages his customer to do for him, the customer will, in all probability, do for others. We regard it as poor business policy to suggest the cancellation of an order after it has been placed. The practice should be discouraged, for the reason that it places the salesman in a position of uncertainty regarding the amount of business he has done.

Salesmen complain if the jobbers are not able to fill all their future orders on the date specified for shipment. They do not take into consideration that while this practice continues, no jobber can base his specifications for goods upon his salesmen's orders.

All salesmen should apply the Golden Rule to this matter, and should consider the deal consummated when they find their customer has placed an order with his competitor for certain goods. A salesman need not be fearful of saying a good word for his competitor after the order is placed. If the fortunate salesman is a gentleman, he will return the compliment at the first opportunity. This is not beyond the range of a possibility, as there are more gentlemen on the road to-day among traveling salesmen than ever before.

A salesman cannot increase the friendship which his customers feel for him or build up his sales by making disparaging remarks regarding his competitors. A salesman cannot better advertise a competitor than by following this course of procedure.

Do not gather from this that we do not believe in competition. We feel that every salesman should use all the talent at his command to secure the business of his customer, but when the order is placed, he should treat it just as he would want it to be considered had he been the successful one. An order once entered, should be considered a transaction signed and sealed, and not subject to cancellation.

If the T. P. A. and U. C. T., in the Middle West especially, want to devote their time to something that will be of practical benefit to all their members, they cannot spend it in any better way than in discouraging this practice.

CHARLES W. EMERY.

Formerly St. Joseph, Mo.;
Now of the Van Camp Hardware & Iron Co., Indianapolis, Ind.

Paris and Marseilles are connected by telegraph lines entirely underground. They are placed in iron pipes and buried four feet beneath the surface, with manholes 3000 feet apart. It cost nearly £1,500,000 to bury the wires.—*Ex.*

A Fence Publication.

Ellis & Helfenberger, Indianapolis, Ind., who have for years been known among the prominent manufacturers of fences, fence wire, etc., have issued a very attractive catalogue, covering their entire line for the year 1899. It contains quite a number of pages, every one of which is filled with information of value to the merchant who handles goods of this character, and no man can look through it without learning all there is to be known in regard to metal fences. In an introductory note to the trade, the manufacturers say: "We have manufactured and sold quantities of fence in the last ten years—our product going into twenty-seven different States in the year 1898. We own our factory and are practically acquainted with the details of fence building in all its branches. We believe in making the best and out of the best material. We caulk all wrought iron fences, so that a panel of fence is almost a solid piece. We provide in the fittings for all expansion and contraction. We use heavy cast iron braces for all posts, including the adjustable line post. The fence is first-class and the price is right for good work. We have large designs, showing some of the fences more in detail, that we are pleased to send for special jobs where heavy work is wanted. Give us a chance to quote special prices on large contracts. Note our double line posts and anchor bases used with our lawn fences."

Death of William Honeyman.

The recent death of William Honeyman, vice-president of Honeyman, DeHart & Co., Portland, Ore., takes from the ranks of active business life on the Pacific Coast, a very prominent figure. He was born in Teasses, Fifeshire, Scotland, in 1840, and was in his 59th year at the time of death. Mr. Honeyman came to the United States in 1870, going directly to Portland, and reaching there the last day of October of that year. He immediately entered the employ of Northrup & Thompson, Hardware dealers, a salesman, and when the firm changed to Thompson & DeHart, continued in the business. About 12 years ago the present firm of Honeyman, DeHart & Co. was established and has since been one of the stable business houses of Portland. Its reputation is due in a large measure to Mr. Honeyman and his business associates.

A New Cutlery Company.

The Challenge Cutlery Corporation has been incorporated in Bridgeport, Conn., by W. M. Taussig, president; H. S. Dormitzer, vice-president; C. Kloefkorn, secretary and treasurer, and others, to manufacture cutlery, razors and other specialties. They have purchased the plant, patterns, etc., of the Hatch Cutlery Co., adding them to their present facilities for manufacturing high grade goods in their particular line. As the "Challenge" brand of goods is already favorably known throughout the trade, they anticipate a continuance of the approval already received, and by a largely augmented product, enable their increasing orders to be promptly filled.

The annual election of the Albany Hardware & Iron Co., Albany, N. Y., on the 6th inst., resulted in the election for the eighth time of Charles H. Turner, president; Wm. B. Wackerhagen, secretary; Jas. K. Dunscomb, treasurer.

Arcade File Works' File Talks.

From a valuable text book to be distributed gratuitously at a later date to dealers in files, we are permitted to make the following extracts. This valuable book, when completed, will be mailed free to those interested in the use of files, and may be obtained by sending addresses to Arcade File Works, No. 97 Chambers Street, New York. See page 37.

V.

As the teeth of files of rectangular cross-section are not fully formed at the corners, it is not possible to file a full

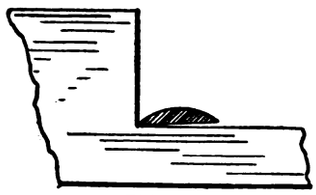

FIG. 15.

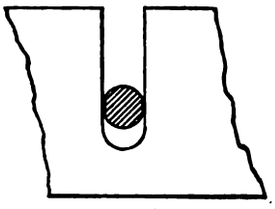

FIG. 17.

square with them, since the rounded corners of the file leave a small fillet in the angle of the work. By grinding a safety edge on a full-cut file, teeth projecting to the extreme corner will be obtained, and the angle of the work can be completely formed. As these corner teeth are very delicate, they must be used only for the finishing strokes, which virtually limits this file to that one operation, as only the edge or the side opposite the safe edge can be used for other work without injury to the corner teeth. It will usually be found quite satisfactory to finish these corners with the edge of a small, finely cut half-round file, used as shown in Fig. 15. By canting the file slightly and using a reason-

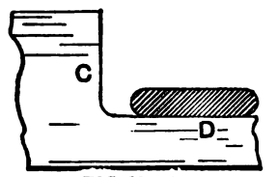

FIG. 16.—A.

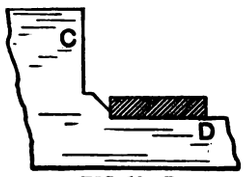

FIG. 16.—B.

able amount of care, good results will be obtained in this way.

A carefully fitted corner, as shown in A, Fig. 16, is difficult to obtain. A flat or square file used on surface C and D is very apt to get into the fillet, and if a safety edge is used, leaving the work as shown at B, Fig. 16, considerable difficulty will be had in bringing down the corner with a round file without its cutting into the faces C and D. A flat file with rounded edges and the teeth ground from one side makes a good file for work of this character when the curvature of the file's edge conforms reasonably close with the curve of the fillet. The faces C and D after being finished will not be injured in the use of the safety side file. The faces will steady the tool, and its round edges will

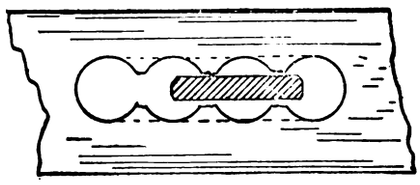

FIG. 18.

form the corners, it, of course, being worked in from each side of the angle.

When the end of a slot or mortise is to be filed circular the round file usually does the work. As there is difficulty in preventing the round file from cutting into the sides of the slot, it will be found advantageous when much of this work is to be done to take a round file somewhat larger in diameter than the width of the slot, and grind flats on opposite sides, making it narrow enough to work freely in the slot, as shown in Fig. 17. When, however, the ends of the slot are formed by a drill and reamer, and the sides filed down to the dotted lines, as shown in Fig. 18, the edges of the file should not only be safe, but rounded, as shown, to prevent the corner teeth from gouging into the curved ends.

Correct methods of holding work for filing must not be overlooked. If the work is large and heavy, it will simply require suitable, rigid support to bring it to the proper height to be operated upon. A very large percentage of the work will be held in a vise. It is important that the

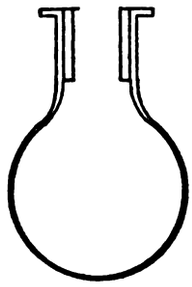

FIG. 19—A.

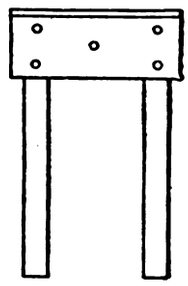

FIG. 19—B.

work surface be as close down to the top of the jaws as possible, in order that it can be rigidly held.

If the work must be held by its finished surfaces, smooth vise jaws should be used. As it would be impossible to keep the jaws in this condition false jaws must be used between the work and the vise jaws. These can be made of soft copper or sheet lead, pounded into the proper form to fit nicely over the jaws. The spring vise jaw shown in Fig. 19 is well adapted to this purpose. Paper fiber faces applied to these jaws are excellent when the surface of the

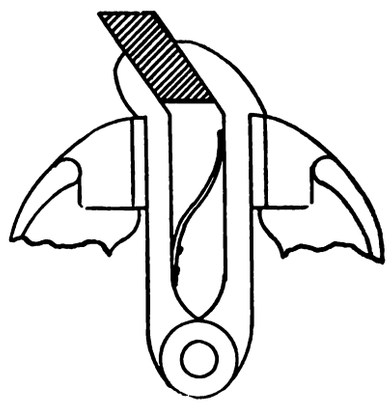

FIG. 20.

work caught is large enough to distribute the pressure over the face fairly well.

When a large amount of bevel filing is to be done some form of jig or clamp should be used to hold the surface filed in a horizontal plane, as shown in Fig. 20.

If very thin work is to be filed on its faces, it will not be possible to hold it in the common vise, as the top edges of the jaws are usually worn rounding, and the work is frequently of irregular outline. It may be secured to a block of hard wood by bradding around its edges, and the block held in the vise. The brads will file down with the work, and the flat surface prevents the work from springing.

An eelskin leather factory, an exchange says, is situated in a street in the neighborhood of London bridge. Here are prepared and manufactured various articles from the skin of the common eel. The skins are manipulated by numerous complicated processes until they resemble and would easily be taken for leather, although of a more glutinous and pliable nature. This strange commodity is cut into long, thin strips and plaited very closely together for whiplashes, and to cover portions of the handles of more expensive whips. Certain kinds of lashes and harness laces are made of eelskin. This leather is almost indispensable in articles of this description, where flexibility allied with an uncommon toughness is desired.—*Exchange.*

THE NEWS FROM NEW ENGLAND.

A COMBINATION ON NAILS.

The many advantages derived from trade associations are gradually forcing attention on all branches of commerce; and the Hardware trade is one of the first to recognize and take advantage of this fact. New associations among the retailers of this industry are constantly being formed; and older ones are daily increasing in strength and usefulness.

There exists to-day an association of Hardware dealers, in a city of the East, formed 15 years ago for the purpose of protecting prices on nails. Their purpose has been effected without any flourish of trumpets; and the benefit derived has not been inconsiderable. For the time mentioned prices have been maintained and a fair profit assured; despite the fact that quotations in other and more important markets have at times been little less than ruinous.

A copy of the agreement signed by every member is given herewith, and will be seen to contain a cash penalty large enough to deter any brother with a tendency to backslide in the face of a sale promising a fair profit, but the strongest deterrent from such a course has been a sense of honor, for in no case has it been necessary to inflict the fine.

Nail Agreement, October 29, 1898.

We, the undersigned, hereby agree to maintain the base price (and regular card rate of extras) on cut and wire nails adopted this day, without reservation, conditions, qualification or equivocation of any kind or nature, until the rate is changed by a vote of the . . . . Nail Association.

It is also understood and agreed that a majority of members present and voting at any meeting of said association, may change the base price, and this agreement shall be binding and all signers to maintain any change so voted.

Any subscriber hereto may withdraw from this agreement at any meeting called for the purpose of considering such action, and the chairman shall call such a meeting upon request of any member.

It is further agreed, if any representatives of any firm signing, shall undersell the established rate or in any manner violate this agreement, said firm shall pay to the treasurer of the association the sum of $25, and any fines so collected shall be distributed as a majority vote of the members may decide.

An investigating committee of three members shall be elected at the next meeting of the association, who shall investigate any complaint of cutting or violation of this agreement, and the finding of a majority of said committee shall be final.

Base price adopted this date.

Cut Nails: To consumers, including any person, firm or corporation using nails, except recognized dealers who carry nails in stock and for sale, $0.00.

Car lots sold and invoiced to one customer, price optional.

Wire Nails: To consumers, as above defined, $0.00.

Lots of 50 casks or more optional.

Memoranda. Above agreement signed by eighteen dealers in this city, practically all in the trade.

The dating of this agreement simply indicates the last time the wording of the instrument was changed, the association having been continuous for more than fifteen years, and is working to the entire satisfaction of all.

At one time trouble was experienced with a suburban town, the dealers of which had been invited to come into the organization. They, however, saw fit to decline this courteous request, and announced their intention of fighting the matter.

A reasonable amount of time was allowed them to experience a change of heart, and when this failed to come, their town was declared an open market. The effect was instantaneous, and a truce was followed by the erring ones coming into the organization.

At another time a shrewd dealer from an outside town secured the services of a salesman familiar with the field covered by the association, and sent him into it, with quotations calculated to upset the market. This, however, did not last long, as means were taken to bring the author of these efforts to his senses, and since then the field has been undisturbed.

NEW ENGLAND IRON & HARDWARE ASSOCIATION.

The annual meeting of the New England Iron & Hardware Association will be held at Young's Hotel, Boston, on March 21st. Dinner will be served at 6 P. M., and will be followed by a number of speakers on appropriate subjects. The Hon. Patrick A. Collins, U. S. Consul General at London, will address the meeting on "Foreign Commerce of the United States;" and will be followed by Col. H. A. Thomas, Boston's eloquent postmaster, and the Rev. Edward A. Horton, equally well known as a public speaker. A full attendance is expected, and every effort will be made by the committee on arrangements to make this annual feature a decided success.

HISTORY ON FACTORY WALLS.

It is not often that the walls of a factory are made to record the stirring events of a nation's history, but that it sometimes happens may be seen from the following. In the machine shop of W. L. Barrett, of Bristol, Conn., the following entries are made with chalk on the walls close up to the ceiling:

"Our President Garfield shot, July 2, 1881. Died, September 19th. Guiteau, the murderer, hung, June 30, 1882." The letters are large and cover a space of fifteen or twenty feet, and were made at the time the events occurred.

The following is a sign used by a Boston paint dealer in his window: "Look in for paint."

There is one man in Boston who believes in advertising. He is the owner of a bicycle, and upon it he has erected an iron frame about twelve feet high and the same in length. This he has divided into a number of small spaces filled with canvas which he lets to the advertiser—if possible. For circulation he has the Boston street crowds, who eye his mysterious medium with some amusement as he struggles to maintain his own and his machine's equilibrium in the teeth of an east wind.

ODE TO A HOT-AIR REGISTER.

(In December.)

What greater ecstasy, what fiercer joy
Could yearning lover from slow-handed Fortune seek;
Than lie, as I do now, entranced, but coy;
And feel thy heated breath upon my cheek.

See how the hot blood answers thy caress;
'Twas cold and sluggish till by thy hot kisses fired.
See, too, my glowing lips, which strive to press
One spark of that bright fire thou hast inspired.

Again! Once more, I beg, thy life's breath blow
Upon me; that my being may absorb its heat.
Oh! thus forever, would my blood could flow.
Thus would I the last call to Heaven meet.

(In May.)

Less passionate, I beg. Would thou could'st find
A cooler manner to announce thy presence here.
Thy enervating breath benumbs my mind—
My stifling nostrils hate this atmosphere.

Inconstant? Fickle? Pray, what would you crave?
Did'st think my protestations of last winter held
With equal force in summer's balmy wave;
And that a Hot-Air Register my constancy compelled?

Boston, March, 1899. FRED A. CATON.

THE OHIO HARDWARE ASSOCIATION.

The Ohio Hardware Association held its fifth annual convention in Toledo, Ohio, on Wednesday and Thursday, February 22nd and 23rd, there being a very large and representative attendance. The membership has reached the remarkable number of 300, showing that this pioneer organization among retail associations is very popular and is receiving the almost unanimous support of the retail trade.

The first session of the convention was held at 2: 30 P.M. on Wednesday, in Pythian Hall, and the first thing in order was the annual address of the president, H. C. Wiseman, of Springfield, who spoke as follows:

ADDRESS OF PRESIDENT H. C. WISEMAN.

Gentlemen of the Ohio Hardware Association: In this year of our national prosperity, so long promised us and so welcome in its coming, and among this gracious people of the city of Toledo, it becomes my pleasant privilege as your presiding officer, to offer you greeting and congratulation at this, the initial meeting of our fifth annual gathering, which I do right heartily.

The past few months and the weeks of the new year have given us assurances from very many sources that this meeting would bring us together with more of interest, with an added membership, greater than we have ever known, and our mutual greetings could be only more cordial, more heartfelt, and more a subject for congratulation, in that they extended still nearer toward each one of the eleven hundred retailers of our State, and yet there is cause for felicitation in the many new faces that have come among us to-day—we trust each one of them with the purpose in hand of adding their names to our roll, and leaving us enthusiastic members, anxious to help on the good work.

IT IS A HOBBY

that I am sure you will bear me out in riding, is this harping on increase in numbers. It becomes more than a hobby—it is a necessity, if we stand for organization at all, if we stand for progression and for the up-building of the trade; if we stand for success and are in earnest in our efforts. It is a paramount truth that individual conflict can never reach where concerted action succeeds. The few State Associations already held are a revelation in their growth and enthusiasm, and manufacturers and jobbers throughout the country, as well as the traveling salesmen and the conservative dealer who has waited for results, begin to realize that we not only may be, but are a power, not for evil toward them, not for antagonism toward any, but for good in all things.

THERE ARE RIGHTS AND WRONGS.

We do our best to secure the former; we have unsought our full share of the latter, and in our gatherings seek to rid ourselves of these, rather through a plain statement of facts, than that ever the cloven foot or the spirit antagonistic should be shown.

In the earlier days of our conventions, when seemingly it was not understood that the associations meant trade loyalty, new and stronger friendships, intelligent legislation, correct lines of merchandising and the up building of our business; manufacturers and jobbers stood aloof; even the men most interested, our neighboring retailers, smiled and got in out of the cold—quite a good many of them are not yet out.

I remember some cases in which complaints were entirely ignored; letters remained unanswered, and others went so far around to avoid the issue that it was necessary to restate it time and again. The contrary is quite the reverse at present. We have that attention we will always command; other than as we become a majority, it will increase, and instead of deliberate trade violations, we will note care, question, and to a certain extent, permission sought where it be a question.

RAILROADS AND EXPRESS COMPANIES

are two of the shadows that continually cross the path of the man in business; the former more just in all matters than the latter, except it be in the line of claims, and a claim for damages against a railroad has come to be a joke, whether it be for losses or for goods broken in transit. Both subjects need the attention of the Hardware Association, the lawmakers and the business man. In the matters of discrimination and over-charges it is almost an impossible matter to find recourse. Until now it has been understood that for the future we were to be loaded with the incubus of 30,000 pounds as a minimum carload. On the eve of our Association meeting, we thank the powers that be, this action has been rescinded and we return to the old basis of 24,000 pounds.

As to express rates, there is no explaining them; their values should be little beyond that of a common carrier; there is no comparison as to values with rates; we are simply robbed right and left and on all occasions. We honor and trust every Association will aid the Merchants' Association of New York in its efforts for lower and equitable rates based on a valuation of shipments, or those now in existence, so scaled that in these days of hustling merchants, goods may be laid at our doors by these monopolies not entirely devoid of profit.

OUR INFLUENCE

we cannot but feel will always be for the good of the trade, and never to its detriment. The natural growth of each Association, and their deliberations, have made this a manifest truth. It has already shown its values in our system of accounts and credits, in our collections and their methods, in our payments for purchases, in our treatment of the traveling man and the house he represents, in our neighborly spirit toward our competitor we once ignored, in our bettered methods throughout. Were there no other results, had we naught to ask of jobber and manufacturer, of our lawmakers, of our traveling visitors—all this organization would be worth more than it has cost us. It is the testimony, voluntarily given, of nine men out of every ten who take part with us.

HAVE WE ACCOMPLISHED ANYTHING?

The question is often asked, and the answer always comes, Yes! We are recognized, we are known throughout the length and breadth of our country. We have individually and collectively sought trade concessions, and in many cases received them. We have interested legislators who are now framing for us laws of lien and collection, whose absence on the statutes heretofore have cost us very many dollars. The lines of trade are being more closely followed—the retailer is a retailer, the jobber a jobber in fact, and in time, through our persuasive powers, we hope to close the door of the peddler to the consumer. We all of us have had, and will have, the department store and the catalogue house with us, and have learned much of how best to war with them in using their own ammunition. We have assurance from some makers and jobbers of goods that they prefer not to sell this class of trade. We have it from one of the largest corporations in America, that be-

Digitized by Google

ginning with the coming month, they will hereafter sell strictly the Hardware trade. We hope to see our way toward carrying our own insurance; we are charged a rate exorbitant. We are classed in every case and in every city the same as lines ten times as likely to burn. I feel sure that in time a plan of mutual insurance will result—a saving of thousands to the Hardwaremen of the State.

AS TO A NATIONAL ASSOCIATION,

I don't feel like going by a question that seems to have developed into one of importance. We have forty-five States; ten of them have Associations. While they are all strong, healthy and growing, let me submit in view of the agitation on the subject. Are we ready just yet for a national organization? Are we large enough, strong enough, and are there enough of us to constitute one if organized? We do not want to make a second failure, admitting the conditions are not now what they were when the first one was attempted. Will it not be time enough to talk National when at least one-half of the States are represented with their own? We want to be a power in the land when that time comes; we want it a great success. I believe in it faithfully—believe the time will come for it, and will take great care and interest in helping to further one, but I do believe that an expression should be had at this meeting that will place us on record as against it just yet. We want a National Association, when the time does come, to bind together all our State Associations, to add strength to our own and to make strength for its members. Let us make haste slowly in this matter.

THE WORK OF THE YEAR

is in partial evidence before you in the numbers present here to-day; among those who have come long distances that they might know the pleasant experiences of former years, and in our new members whom we welcome, with us. There has been great missionary work this year among the members by the Executive Committee, through trade journals, and let us not forget it, our traveling friends have served us well in this respect and on all occasions. I want to thank the Executive Committee for what is certainly the best year's work ever shown by any committee, and this without reflection, since it consists of seven this year and but two before. Hard, untiring, individual work has been given to this seven and the results will show. And now, gentlemen, in closing, I feel that each one of us personally is under a lasting obligation to our genial secretary, than whom, I believe, there never was a harder worked man. His is truly a labor of love and loyalty, a thankless job, unless he accepts the full measure of our gratitude in part payment. His report will give you, fully and in detail, the actual work that is beginning to be a part of a growing organization.

I thank you for your kind attention.

The next thing in order was the annual report of the secretary, John F. Baker, of Dayton, as follows:

REPORT OF SECRETARY JOHN F. BAKER.

When our Fourth Annual Session convened at Columbus last year, our membership numbered sixty-five firms. During the session there were twenty-six names added, making a total membership of ninety-one at the close of the session. Since that date five firms have withdrawn, two having discontinued business, and three on account of lack of interest. During the year we have received the names of twenty-one firms, thus making our membership at this date 107. Our increase during the year has been the largest of any one year since its organization, and while it is not as large as it should be, yet the growth of our Association has been on the whole, slow, solid and sure.

The Ohio Association, as is known, is one of the pioneers, and yet it has not grown as rapidly as the far western Associations, the only reason I am able to give being that our dealers have not felt the incursion of the department store or the catalogue houses as the Hardware dealers of Wisconsin, Minnesota or Iowa have.

The Executive Committee have labored very zealously during the year. The change in the number of the Committee from two to seven has proven to be the part of wisdom. Coming as they do from the different parts of the State, and uniting their ideas regarding the work, has inured to the benefit of the Association, and the result has been that we have reaped the benefit therefrom.

Great credit is due Mr. Harrison of the Committee for the major part of the work. Earnestly desiring that the Session at Toledo should be the best ever held in its history, he has worked early and late untiringly for its interests, and whatever success we have at this session is in a great measure due to his individual efforts. In the hope that the Secretary will not be charged with exaggeration, he ventures the remark that if every member of our Association has consumed the amount of postage Mr. Harrison has, the Post Office department itself would in a short while dispose of the national debt.

As stated in my last Annual Report, the Secretary has had considerable correspondence in regard to our Association. Inquiries have come from all parts of the Union as to its aims and objects. In every instance these inquiries have been answered at length, and in several instances at great length, in order that the Association ideas may grow and succeed in every portion of our land.

In quite a number of instances dealers desiring to form City or County Associations have written the Secretary for instruction and information, and at such opportunities the Secretary has used his best efforts to promote such organizations.

It will also cause the members some surprise to learn that in not a few instances he has been enabled by correspondence to assist a number of dealers who desired to sell their establishments to find other dealers who were anxious to purchase. It will thus be seen that if our Association suddenly went out of existence, the loss to the Hardware trade in Ohio would not be inconsiderable. Since last we met we have had but two complaints brought prominently before our Executive Committee. Manufacturers and jobbers are realizing more and more the importance of our Association, and if the Hardware dealers of our State could but know the value of an organization, which in its very nature is bound to be a guardian of their rights, they would quickly come forward and join us, thus protecting themselves and strengthening the Association.

On the 30th of last November the Executive Committee held a meeting at the Hotel Chittenden in Columbus for the purpose of making preparations for the coming Session. All the members were present but one, who was unavoidably detained. The Secretary makes mention of this fact that the members may see that the Executive Committee are alert and faithful to their duties, and yet while great praise must be given our Committee for the work they have done this year, the Secretary insists, as he has done before, that our Association will grow more rapidly if each individual member will make it a personal matter to push the interests of our Association, and work for the increase in its membership. At the meeting of the Committee the opinion was expressed that the trade should be thoroughly aroused regarding the coming session, and to this end an address was prepared by the Committee and mailed to every dealer in the State.

That the dealers in our State have been well informed is no news to our membership, as may be seen by the numerous messages sent through the mail. We have over 1,100 bona fide Hardware dealers, and shall not discontinue our efforts until the larger part of this number are found in the membership of our Association.

In view of the fact that we are in need of printed Constitutions, the Secretary offers a suggestion, that since the

Digitized by Google

present Constitution and By-Laws are somewhat crude and inadequate, that a Committee be appointed to revise the same, and that the Executive Committee be empowered to have a quantity printed. The Secretary has also received a communication relative to the formation of a National Hardware Association, and suggests that some action be taken regarding it, also a communication referring to the matter of excessive charges by the various express companies, which might be discussed with some profit by our own Association.

In conclusion, the Secretary desires to extend to the members his personal thanks for the confidence reposed in him, for the many expressions of friendship he has received, and for the numerous acts of kindness shown.

At the close of the reading of the secretary's report, a vote of thanks was tendered him, after which H.H.Bishop, McIntosh-Huntington Co., Cleveland, president of the National Hardware Association, addressed the convention by special invitation. He expressed his pleasure at meeting the members of the trade in Ohio. He then gave a detailed statement as to the National Hardware Association and its work, showing that its objects are purely of a friendly nature and for the purpose of cultivating a better feeling within the trade. He believed that the wholesale and retail trade of the country should work together in every possible way, to promote the welfare of the general public.

The following committees were appointed by the president:

On Question Box, Messrs. Winters, Gray and Woodward.

On Resolutions, Messrs. Morris, Angle, Duffy, Bogardus and Davidson.

On Wednesday evening a banquet was tendered the Association in the rooms of the Odd Fellows Building. Some 500 sat down, and a literary and musical programme was carried out, including addresses by the president, by Mr. Bishop and others.

On Thursday morning, interesting remarks were made by J. W. Schapp, of the New York Cutlery Co., Gowanda, N. Y., and by Hugh A. Cole, president of the Iowa Retail Hardware Dealers' Association. This was followed by a number of interesting questions from the Question Box, which brought forth subjects of an interesting nature from various members of the Associaton.

On Thursday afternoon, a cordial invitation was extended by Mr. Bishop on behalf of the Hardware dealers of Cleveland, inviting the Association to meet in that city next year in annual convention. At a later date in the meeting this invitation was accepted.

The efficient secretary of the Association, Mr. Baker, was next called to the bar of the gathering, by the president, who delivered a warm and well deserved enlogy, and followed it with a presentation of $100 in gold on behalf of the Association, for the very efficient work which the secretary had done during the past year. Mr. Baker thanked the members for their generous appreciation, with such words as he could command.

A nominating committee was appointed, consisting of the following gentlemen: Messrs. Guyton, Harner, Reed, Haberman and Talmage.

The following resolutions were then adopted:

Resolved, That we reaffirm the sentiments of the resolutions adopted at the meeting held at Columbus in 1898.

Resolved, That the necessity of an organization in every town where there are two or more stores be urged upon our members to the end that Hardwaremen may become better acquainted and work more in harmony.

Resolved, That it is not expedient for this Association at this time to encourage the formation of a National Retail Hardware Association.

Resolved, That we endorse the action taken by the Merchants' Association of New York against the exorbitant charges of the express companies and pledge them our hearty co-operation.

Resolved. That in the absence of any lien law for the protection of the Hardware trade we earnestly urge that the Executive Committee be authorized to act in this matter.

Resolved, That we recommend that a committee of three be appointed to revise the constitution and by-laws of this Association, which are at present inadequate.

The committee on nominations reported in favor of the re-election of the entire list of officers, with the addition of H. P. Davidson, of Cleveland, as a member of the Executive Committee. Under the suspension of the rules, these officers were elected by acclamation. The list is as follows:

President: H. C. Wiseman, Springfield.

Vice-president: E. L. Harris, Columbus.

Secretary and Treasurer: John F. Baker, Dayton.

Executive Committee: W. A. Remy, Mansfield; O. M. Scott, Marysville; L.F. Stahler, Waverly; Frank Harrison, Toledo; W. P. Scott, McConnellsville; Geo. M. Gray, Coshocton; C. C. Fouts, Middletown; H. P. Davidson, Cleveland.

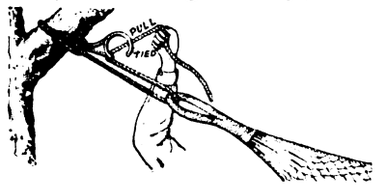
The exercises were concluded at the end of the session of Thursday, and were followed by an attendance at the Valentine Theatre, where the members and other guests were cared for by the generosity of the local reception committee.

Names of Animals in Mechanics.

The English language has been enriched by many words drawn from other tongues to facilitate direct and comprehensive expression on all subjects. Within the language itself a similar principle has prevailed and old words of well-established meaning have been adopted in the sciences and arts to designate certain things or operations that seemed to resemble those from which the names were taken. In their new relations these words have strictly technical meanings. Their suitability is often obvious enough in English, but they can rarely be rendered in their exact technical sense into their actual equivalents in foreign tongues.

A number of words drawn from the animal kingdom for use in the mechanic arts are enumerated by a writer. "The machinist," he says, "employs a dog on his lathe; he takes a hog cut, if the tool will stand it; the castings are made from pigs of iron, which in turn were fed from a sow. Work is set upon a horse or buck, and punched or bent by a convenient bear; screws are turned by a monkey wrench. Hoisting is done by a crab, and a convenient cat is a part of the outfit of a shop crane, and a kit of tools is ever at hand. A crow helps to straighten work, a jack to lift it, a male pulley aids in driving machinery that a donkey engine turns. A fish connects parts end to end, or strengthens a broken beam; shells are used all over; a worm does powerful but quiet work. A cock shuts off the water; one kind of a ram raises it and another does heavy work. A printing press has a fly; the fast locomotive has a grasshopper valve motion and drive, and butterfly valves are common. Herring-bone gears are used by the best builders; turtles fit printing-press cylinders, and fly wheels are running all over the world. In drilling, even an old man is called into service and doctors prevent faulty lathe work.

"But from the human body itself we borrow the name of nearly every principal part, as head, neck, chest, arm, leg and toe; heel, sole and foot; elbow, shoulder, wrist and knee; knuckle and finger; rib and diaphragm; eye, ear, nose and cheek; mouth, tongue and tooth; throat and gullet; back, side and belly. From the minor animals also we get snout and horn, tail and claw, wing and feather, quill and spur, fin and scale."—*Straps and Buckles.*



The island of Cuba could supply the western hemisphere with sugar. It has exported 1,000,000 tons in a single year.—*Exchange.*

NEW GOODS AND SPECIALTIES.

Tie Co.'s Hammock Holdfast.

The Tie Co., Unadilla, N. Y., have created an industry out of a single need, for devices essential to the proper marketing of many other things. They claim their line to

cover ties and holdfasts for a hundred uses, and the claim is well substantiated by the illustrations on their trade circular, which shows the great utility of their devices in many ways. We illustrate herewith the very seasonable one which is advertised on the first page of our cover. It is

there used as a Hammock Holdfast. They are made for this purpose in several styles:

No 8 For ⅜ Hammock Rope, on Plate .....price each, $0.12
No. 80 For ⅜ Hammock Rope, on ½ inch Screw Eye ..... " .12
No. 100 For Hammock, on 5-16 inch Sisal Rope, 8 feet long.. " .12

Two Successful Traps.

The two rat and mice traps shown in this connection are being successfully placed upon the market by the J. M. Mast Mfg. Co., Lancaster, Pa. In Fig. 1 is shown their

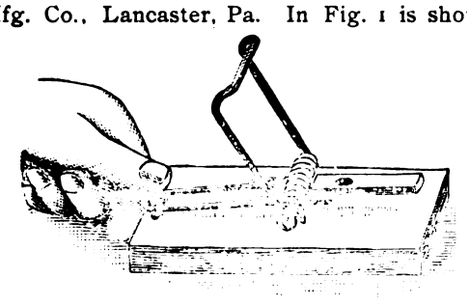

FIG. 1.

Blizzard No. 1, which is described as furnishing "a cold day for rats." It is set with a safety lever, and its chief superiority is described as "the ease with which it is set, safety to the fingers while adjusting it, and substantial construction. You do not take hold of the jaw or striker, but use the movable lever on top to raise and fasten the striker in position, as shown in the illustration." It is made in two sizes: No. 1, for rats; No. 12, for mice. We also show in

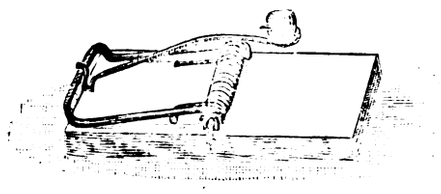

FIG. 2.

Fig. 2 their "Stop Thief" trap. The makers say: "Here is simplicity, durability and effectiveness. This trap is exactly what its name implies. It is a detective that catches the thief every time he steals. Needs no instructions to set. A wooden man would know how to set it. Made in two sizes: No. 30, for rats; No. 40, for mice. Cheapest traps on the market." Prices upon application to the J. M. Mast Mfg. Co., Lancaster, Pa.

Giant Grindstone Hanger.

The Stowell Mfg. & Foundry Co., South Milwaukee, Wis., who are well known as manufacturers of Hardware,

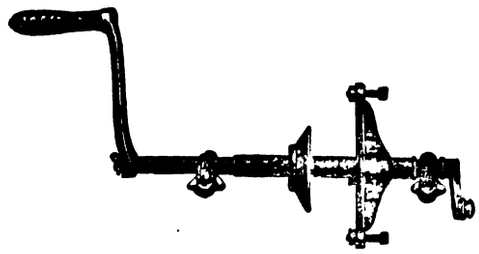

FIG 1.—SET UP.

door hangers, hot-air registers, etc., have added to their line the "Giant Grindstone Hanger," which is manufactured exclusively by them, and which they are now introducing to the market. They say this is not an experiment,

FIG. 1—KNOCKED DOWN.

but that it has demonstrated its good qualities and has proved itself a thorough success in use. They say that with this hanger the stones are held true and fast without wedging or cementing. They will be pleased to send full description with prices on application.

Recent Trade Publications.

Sargent & Co., New Haven, Conn., and New York, are distributing to the Hardware trade their catalogue of 1899 of screen Hardware. It is a pamphlet of 36 pages folio, size of their large catalogue pages, printed in blue on a pale blue paper, which gives it an extremely artistic effect. Embodied in its contents are all the needed furniture for the construction of screens and screen doors, including: Door springs, spring hinges, door catches, in a very large variety of styles and sizes, covering every possible specification; locks and night latches, screen corner brackets, window screen pulls, sash lifts, door pulls, shutter knobs and door bolts. Nearly all these various goods are made in the styles and qualities demanded by manufacturers and the trade generally, from bronzed iron to genuine bronze metal, and although the catalogue is a pamphlet of so few pages, it is completely filled with the seasonable goods so essential in a general stock of Hardware at this spring season of the year.

We have received from the Knapp & Spencer Co., Sioux City, Iowa, their 1899 catalogue of bicycles and sundries. It shows the full line of Clippers which they handle, and also an extensive assortment of sundries, covering about everything needed in the bicycle line.

Clarence S. Lunt, manager of the Metallic Basket Co., Rochester, N. Y., has been in the city for the past few days looking up business in connection with this successful establishment.

HARDWARE'S "Prices Current" are reliable.

New England Hardware Dealers' Association.

The regular monthly meeting of the above Association was held at the United States Hotel on March 8th. The business meeting was called in the hotel parlors at 5:30 P. M., and dinner was served at 6.

The business before the meeting was taken up in its regular order, J. H. Sayward, of Haverhill, third vice-president, occupying the chair.

A letter from J. Carleton Nichols was read, in which he declined the office of president, to which he was elected last month, stating that, while appreciating the honor, he found it would be impossible for him to serve.

Hiram C. Janvrin, as chairman of nominating committee, said that he had spoken to Mr. Nichols, and had found he was firm in his intention, and that he had then given his attention to securing an equally desirable successor. W. D. Parlin, first vice-president, had consented to accept a nomination on the condition that he should receive the hearty support of the members during the year. Mr. Janvrin therefore nominated Mr. Parlin. This was seconded, and the vote was unanimous in the latter's favor.

As this election vacated the office of first vice-president B. C. Pierce, second vice-president, and John H. Sayward, third vice-president, were advanced to first and second respectively; and E. M. Richardson, of Waltham, was elected third vice-president. The Pricing Committee of 1898, consisting of J. B. Hunter, M. A. Chandler, W. H. Billings, W. E. Plumer and J. C. Nichols, were re-elected, as were also the Investigating Committee, composed of E. C. W. Bliss, H. M. Sanders and M. W. Tarbox; and the Membership Committee, H. G. Janvrin, J. H. Sayward and M. H. Tarbox.

The following new members were elected: E. O. Noyce, Brockton; Jos. K. Hanks, South Boston, and Geo. H. Campbell, Boston.

Ex-President Loomis then addressed the members on the question as to whether the Association should continue as a social organization, or should be distinctly of a business character. Personally he believed that benefit from associations was inevitable; but the object was to secure the best results. He spoke at length of the benefit derived by the members of the Providence Nail Association, which had existed for over fifteen years, and had absolutely controlled the price of nails in that market, and assured a fair profit when other markets were selling almost at cost. He also referred to the Bicycle Association in the same city, which had accomplished much good. He believed that the New England Hardware Dealers Association could be made the parent of many small local associations, which could be represented at the meetings of the former. He did not think it possible for the parent body to legislate suitably for outlying districts, as their interests were not always identical. Already Rhode Island was investigating the possibility of forming a local organization, and with many such sub-associations it would be most interesting to watch the development that was bound to follow. He suggested appointing several sub-committees to find how the dealers of smaller towns felt.

Mr. Janvrin said that Mr. Loomis had expressed his views almost word for word. He considered that the Association had been a decided social success, but not a business one. The idea of local organization was the secret of success. He felt that they had undertaken too much to secure direct membership from the whole of New England, and that while he would not exclude out-of-town membership, he felt that the Boston trade could secure better results if they were purely a Boston Association.

Chas. E. Adams, of Lowell, in reply, said that he was a member of the New England Paint, Oil & Varnish Club, which for years had secured uniform prices throughout New England, and saved all price cutting. Personally, he intended to put a stop to all selling of goods at a loss, and he believed Mr. Loomis' suggestions would effect that reform.

Mr. Janvrin asked the last speaker whether, in his opinion, the Association would be better as a single organization, or as the head of a number of sub-divisions. Mr. Adams replied that he considered the latter course the better one.

Mr. Loomis, referring to Mr. Janvrin's remarks about making it a purely Boston Association, contended that the parent organization should continue to exist, and that a local Boston branch should be formed, if desirable.

Secretary Farless read a letter from a traveling representative of a Hardware firm, who had, at the request of one of the members, felt the pulse of the out of town dealers. It was found that great interest was manifested by this trade in the success of the organization, and that the proposition to affiliate locally as branches of the New England Association was favorably received.

A suggestion that circulars be sent out to the trade generally, was adversely commented upon by Secretary Farless, whose opinion and experience it was that nothing but personal missionary work would have the desired effect. Owing to the lateness of the hour the question was then put over to the next meeting, and a motion to adjourn followed.

Rubber from Indian Corn.

An important development affecting the rubber trade has been recently made by a company operating the principal glucose plants of the United States, viz.: the manufacture of a substitute for india rubber from corn oil. The company controls about ninety per cent. of the total output of glucose for domestic and foreign consumption, and from a statement issued on August 1st it appears that its several mills had consumed since August 15, 1897, 20,616,000 bushels of corn, from which were produced 542,100,000 pounds of glucose, 120,572,000 pounds of starch, 98,382,000 pounds of sugar, 2,600,000 pounds of dextrine, and 151,788,000 pounds of residue.

The number of by-products manufactured is forty. Among these is the manufacture of a substitute for rubber. It is not intended to entirely take the place of rubber, but it is to be used as a mixer. The manufacturers are now selling the product at 4½ cents per pound, and the claim is made that rubber goods manufacturers, particularly those who make bicycle tires, are using it extensively. If its durability is proven it is thought that the rubber trade will be revolutionized.

This rubber substitute is made from corn oil by a vulcanizing process, the product closely resembling Para rubber in appearance and quality. It can be used, according to the statement of the company, in the manufacture of all grades of rubber goods, including sheet rubber, bicycle tires, rubber boots, rubber soles, waterproofing, linoleum, etc. The fact that corn oil does not oxidize readily makes this product of great value, since it also is not affected by oxidation, so that the products manufactured from it will always remain pliable and will not crack as those made from other substitutes made from rape-seed oil, linseed oil, etc. A mixture of fifty per cent. pure rubber and fifty per cent. rubber substitute will, it is claimed, remain soft and pliable and will not crack.—*Bureau of American Republics.*

George B. Parsons, St. Johns, Newfoundland, writes us that he is prepared to accept the sole agency for Newfoundland for any American Hardware firm. He has been the representative for several English and Canadian Hardware firms for a number of years, and would be pleased to extend his connections. A letter addressed to him, care of P. O. Box 331, St. Johns, N. F., will receive immediate attention.

Review of the Markets.

Hardware: Advancing tendencies on the part of such metals as are largely used in Hardware production have probably reached a limit for the present. Copper, lead, spelter, etc., having reached a point where lower quotations than prevailed ten days ago, have been named, to meet the views of buyers or equalize the strength of a bull market. Many discount sheets now in preparation will carry higher prices than have been experienced for a long time. The American Steel & Wire Co. are striving very hard to surpass all previous records in the way of advancing quotations, having increased fully sixty per cent. in two months, from $1.25, which was the prevailing quotation the latter part of December, to $1.85 announced for Feb. 27th. The product is so fully controlled by the trust conditions with which it is surrounded, the retail dealers can hope for but little relief except by the occasional marketing of some large holdings purchased by the jobbers previously, at much lower quotations.

Wire Nails: Since our previous issue an important advance has taken place in the base price of this leading staple. On February 27th the American Steel & Wire Co. announced that in consequence of the increased cost of the raw material, an advance of 25 cents a keg would be made. This also involved a few minor changes as to graded prices, which make present prices read as follows: To large buyers in carload lots, f. o. b. Pittsburg or Cleveland, $1.85; to large buyers in less than carload lots, $1.87½; to small buyers in carload lots, $1.90; to small buyers in less than carload lots, $2. Notwithstanding these unusual advances in price, business in this line may be considered fairly active. From the growing lack of material it is feared a scarcity may confront the trade at a later date. New York prices may be named as follows: Carload lots on dock, $2.05; small lots from store, $2 25. No great effort is made to enter orders far ahead at the present time, which is probably on account of the large orders already booked and as yet unfilled.

Cut Nails: The market for cut nails is improved by every advance in wire nails, the present state of the market being held firm at a slight advance over former quotations, the market price now being $1.40, f. o. b., Pittsburg. New York prices being fully maintained at the following: Carload lots on dock, $1.55; small lots from store, $1.65.

Builders' Hardware: The great demand for builders' Hardware is being felt by every manufacturer in this important industry. It is certainly of a character to promise the most active season the manufacturers have had in several years. The statement made by the department of buildings recently, that the applications last Saturday for the building of new structures, exceeded in number that of any day, with one exception, since the establishment of the department, was of a most gratifying character, and justifies the confidence felt in the industry that the prosperity before them is permanent and progressive.

Barb Wire: The same advance which astonished the trade on wire nails, has been felt in barb wire as well, the present prices being represented by the following, f.o.b. Cleveland or Pittsburg: To large buyers in carload lots, painted, $1.95; galvanized, $2.35; to small buyers in less than carload lots, painted, $2.10; galvanized, $2.50. The market even at these advanced quotations is noted as being a very firm one, as orders for the current month only are solicited. New York prices are steady at the following: Four-point galvanized in carload lots on dock, $2.50 to $2.55, and small lots from store, $2.65.

Smooth Wire: The market for smooth wire being governed by the same conditions as are noted in other wire products, is represented by quotations showing an advance of 25 cents beyond previous quotations in our columns recently. We now quote: $1.70 base, f.o.b. Cleveland or Pittsburg, with 40 cents advance for galvanized. For buyers of single carloads an advance of five cents on above prices is made; the price for less than carloads being $1.85; galvanized, $2.25.

Auger Bits, Augers, etc.: The recently made discounts on these goods have been advanced, and the present quotation is represented by 75&5 to 75&10 per cent., with the market stronger in many respects on good grades.

Rules: Few goods have kept as low in price for so long a period as boxwood rules, which have been sold at a discount of eighty per cent. with several extra tens, for so long a time, few dealers can remember anything different. Increasing costs on constructive material, boxwood, brass, etc., compel the makers at last to agree to quotations, uniform with all of them, that will protect the industry from positive loss at this time, when the demand is an aggressive one. Under date of March 1st, the Stanley Rule & Level Co. issue a revised discount sheet, changing the discount on boxwood rules from 80&10 per cent., which previously prevailed, to 75&10 per cent., which becomes the present market price.

Wrought Nuts: The present market on heavy Hardware is fully maintained on advancing quotations. Under date of February 28, the market is represented by the following:

Hot Pressed Nuts, square	Cents off list,	6.10
" " hexagon	"	6 80
Plain Cold Punched Nuts, U. S. Standard, square	"	5.80
" " " hexagon	"	6.10
Cold Punched, C. T. & R. Nuts, U. S. Standard, square	"	5.80
" " " hexagon	"	

Iron Rivets: Under date of March 4th the following changes in discounts are announced:

Bulk and Coopers	70%
1000 Rivets or in papers	70%
Belt Rivets and Burrs, Tinned	70%
" " Coppered	70%

For Tinning or Coppering other than 1000 or Belt, per pound..2½ cents.

Bronze and Brass Padlocks: Slaymaker-Barry Co., John H. Graham & Co., New York, agents, announce the withdrawal of all quotations, which may be had on application.

Picks and Mattocks: The following revised list was adopted by the manufacturers of picks and mattocks at the meeting held in Pittsburg, February 23. This new list is subject to a discount of from 70 and 10 to 75 per cent.:

MATTOCKS.

Adze Eye, Long Cutter,	6 pounds	per dozen,	$17.00
" Short "	5½ "	"	16.50
" Long "	5 " or lighter	"	16.00
" Short "	5 "	"	16.00
" Pick Mattocks,	6 "	"	17.00
" " "	5 "	"	16.00

GRUB HOES.

Western Pattern, No	0, 3 pounds	per dozen,	$11.50
" " "	1, 3½ "	"	12.00
" " "	2, 4 "	"	12 50

Heavy, per dozen	$18.00	19 00	20.00
Light, "	14 50	15.00	16.00

Withdrawal of prices: In the present state of the markets affecting their productions, many manufacturers are withdrawing the prices they had already given at an earlier date on which to base purchases of spring stocks. New discount sheets are in preparation, by the aid of which, it is believed, the jobbers will be able to maintain uniform quotations when soliciting the business of the retailers at a later date. Among those whose announcements have

Digitized by Google

reached us, are the following: Snell Mfg. Co., Fiskdale, Mass., John H. Graham & Co., No. 113 Chambers Street, New York, selling agents; Lane Bros. Co., Poughkeepsie, N. Y.; New Haven Copper Co., John H. Graham & Co., No. 113 Chambers Street, New York, selling agents; Atlas Mfg. Co., New Haven, Conn.; Troy Nickel Works, Albany, N.Y.; Peck, Stow & Wilcox Co., New York.

Steelyards: The Peck, Stow & Wilcox Co., Cleveland and New York, announce, under date of February 15th, that the price to the jobbing trade of steelyards, both American and Domestic, and Farmer's and Hart's represented on page 209 of their 1899 catalogue, will be 40 and 10 per cent. discount, and they also announce having discontinued the manufacture of the 50-pound iron bar American and Domestic steelyards. The list on their 50-pound steel bar American and Domestic steelyards will be $6 per dozen, f.o.b. Cleveland, with no allowance for freight.

Tire and Stove Bolts: The American Screw Co., Providence, R. I., under date of February 23d, make the following changes in their discounts:

Tire Bolts.	Norway Philadelphia	75&10%
"	Eagle Philadelphia	80&10%
"	Bay State, Plain	70&10%
"	Bay State, Fluted	70&10%
Sleigh Shoe Bolts.		80&10%
Stove Bolts.	Flat Head	70&10%
"	" Annealed	70&10%
"	Round Head	70&10%
Stove Rods		70&10%
Sink Bolts		70&10%

Cordage: The continuation of the unsettled conditions in the Philippines has caused the market for Manila hemp to be greatly disturbed; higher prices following as a matter of course. It is believed by many manufacturers that more advanced figures will be reached before any settlement is made that will have a contrary effect upon the market. We quote the following as the prevailing quotations from manufacturers:

Manila, 7-16 inch and larger	per pound,	9¼ cents
" ⅜ inch	"	9¾ "
" ¼ and 5-16 inch	"	9¼ "
Sisal, 7-16 inch and larger	"	10¼ "
" ⅜ inch	"	8¾ "
" ¼ and 5-16 inch	"	7¼ "
" Lath Yarn	"	7¾ "

Binder Twine: Naturally the same influences that affect prices on cordage have their effect on binder twine, the market for which may be considered firm at the following quotations, which are manufacturers' prices for carload lots f. o. b. Eastern factories:

White Sisal, 500 feet to pound	per pound,	9 to 9¼ cents
Standard, 500 feet to pound	"	9 to 9¼ "
Manila, 600 feet to pound	"	9¾ to 10 "
Pure Manila, 650 feet to pound	"	10¾ to 10½ "

Bright Wire Goods: Continued advances in price of wire products is one cause of bright wire goods being held at a discount of 90 per cent., to which price this important line was advanced recently.

Cabinet Locks: An advance in the price of these staple goods is announced by the leading manufacturers, the prevailing discount being made 33⅓ per cent.

Sash Locks, Window Stop Adjusters, etc.: Hobart B. Ives & Co., New Haven, Conn.; J. H. Graham & Co., No. 113 Chambers Street, New York, agents, make the following changes in quotations:

March 1, 1899.

To the Hardware Trade: Until further notice, our discounts and terms on Hardware manufactured by us, as shown in catalogue No. 10, 1899, will be as follows:

Window Ventilating and Mortise Door Bolts	discounts,	65%
Sash Locks, Wrought Steel, also with Bronze Metal Knob.	"	65%
Sash Locks, Wrought Bronze and Brass Metal	"	62½%
Sash Locks, Cast Iron, also with Bronze Metal Knob	"	66⅔ and 5%
Sash Locks, Cast Bronze and Brass Metal	"	66⅔%
Window Stop Adjusters	"	40%
Sash Lifts and Shutter Bars	"	55%

Terms, 60 days net, less 2 per cent. for cash in ten days.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote as follows: In lots of less than 5 barrels, 42 cents per gallon; in lots of 5 barrels or more, 41 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 54 cents per gallon. Above prices are subject to change without notice.

THE BALTIMORE TRADE.

Hardware jobbers are usually good mathematicians, and a knowledge of this branch is highly essential to the correct solution of the many problems presented to them by the manufacturers, and that the latter possess a masterly knowledge can be demonstrated by the various lists and discounts emanating from them in the past few years. Genius linked with talent has placed the manufacturers of Hardware in the front rank, and with amazing ability they seize every opportunity (whether through consolidations, agreements through associations or mutual understanding,) to enlarge the margin of profit.

The bewilderment occasioned by the rapid change of prices in all lines of goods since the first of the year, and the anticipation or uncertainty regarding still higher prices has kept the jobber under a continual strain, both mental and financial. Some manufacturers have been considerate enough to advise their customers that an advance in their lines would occur at a stated time whilst others have sprung, without a moment's warning, new prices upon us, and decline emphatically any protection.

This latter treatment is unfair to say the least, as when working upon quotations made, or understood to be, for our season's requirements, with traveling men scattered over the country and prices given in reply to inquiries addressed us, the jobber is placed in a position to accept many orders and fill same at a loss, or suffer mortification and the loss of confidence of his customers.

Having just experienced conditions as above expressed on our Fork line, and receiving an eloquent letter from the manufacturers, whose goods we have handled almost exclusively for many years, advising us that they could not honorably accept our order at prices made us last December for the spring trade, as they had agreed with other manufacturers a day or two previous to the receipt of our order to maintain the new and much higher prices, would state that we admire honorable men, also consistent men, but would like to know where the jobber comes in.

Navigation by water has opened; by land it is still difficult, owing to the present bad conditions of the roads, which makes driving exceedingly slow, expensive and objectionable to salesmen; railroad points are therefore principally visited. With favorable weather trade will be in full blast in another week, and we hope in sufficient volume to make up for lost time occasioned by the blizzard.

Collections are bad owing to our customers being unable to collect their bills from the farmers indebted to them.

H. W. WEBB & SON.

THE PHILADELPHIA TRADE.

The advance in prices still continues, and, in fact, manufacturers tell us it has simply begun, and from all we can learn, the raw material market is in more active shape than any time for twenty years. Not only have prices advanced heavily, and are still advancing, but even if a man is willing to pay the advance, he frequently still finds it impossible to get the stuff.

A leading manufacturer prophesied a few days ago pig iron would reach $25 inside of six weeks, and that certainly seems to be the tendency at present. Manufactured goods are, of course, responding to this state of affairs, and both jobbers and retailers are kept busy in marking up the value of their goods.

The natural inquiry of course comes, "Is this advance legitimate?" "Is it not caused by the trusts which are being formed on every hand?" While, in answer, it may be admitted that the new trusts play some part in the advancement of price, the main cause lies quite beyond them, and is to be found in actual shortage of goods.

For years both manufacturers and dealers have been

Digitized by Google

buying from hand-to-mouth and keeping their stocks as low as possible; consumers again have been economizing greatly, making their tools and implements last as long as possible, and doing without many things which they actually needed. While this depression lasted many manufacturers gradually withdrew from business, while the population of the country and the actual need for goods steadily increased. Suddenly then Providence favors us at last with large and profitable crops, increased money begins to flow into the country, mechanics and laborers and coal operatives find plenty of employment, and suddenly a largely increased demand arises, and a shortage being found, the price naturally advances.

It must also be borne in mind that for some time many goods have been sold at prices which actually did not cover the cost of production, and on many lines it must be admitted that the advances made so far are but very moderate, and that still further advances are more than justified by the increased cost of raw material.

We feel, therefore, it is a conservative view to maintain that a higher level of prices may be expected for some time to come, and we think all business men agree that prosperity and high prices go hand in hand.

Advances are far too many for us to record, but they will be found doubtless in the price columns.

Trade naturally feels the impulse of better prices, and much better orders are the result. Dealers are no longer afraid to buy with some freedom. With many goods it is not a question of price, but whether jobbers and manufacturers will be able to deliver them. This is naturally true of spring goods, and many others which have been sold at abnormally low prices.

A good spring trade may fairly be expected, and with prosperous times it is hoped that collections will largely improve, and that failures will become smaller in number.

BIDDLE HARDWARE CO.

THE COLUMBUS TRADE.

These are busy times, and a Hardwareman cannot afford to even go duck hunting for fear nails will advance another 25 cents a keg, and he will fail to get the information to his salesmen before they sell a few carloads at old prices. This will also apply to a long list of other goods. In fact, nearly everything in the Hardware line has caught the fever. It is more contagious than the grip, and looks as though it might hang on longer. Advances make some people feel good. One of our customers on being informed about the advance on nails, cheered up and said, "By George, that caught me just right. I have two whole kegs of 8d nails on hand," and he was in earnest, too, as that was a good stock for him. Trade is good; everybody seems to be ready to buy, especially on goods that have not advanced much. Wire cloth and poultry netting are getting scarce before the season begins, and prices are very firm with a still farther advance probable. Rope advanced 1¼ cents per pound in less than two weeks. Binder twine has gone up fully $10 per ton, and some factories are sold up and declining orders.

The latest strike that we know of was among the hens. That strike must have been "hatched" on the quiet during that extreme cold weather. The hens no doubt concluded that the eggs would freeze as soon as they were laid and be wasted, and it was no fun running around the barn a dozen times to get warmed up to lay a 2 cent egg, when it was 20 below zero, and so they all became roosters (at night). It is strange how hungry a fellow gets for eggs when they are 75 cents to $1 a dozen. We are glad there is more than one "lay" delegate in hen society. After a freeze-up of about two weeks the strike is off, and with a great deal of fuss and "feathers" eggs are being produced at the low price of 25 cents a dozen. If some combinations could be regulated as easily as the hen trouble, we would have no cause for complaint.

SMITH BROS. HARDWARE CO.

THE PITTSBURG TRADE.

Men of foresight are profiting by the present condition of business. So far as our observation goes most of the jobbing trade can be counted in this class, but we think the retailer has become so accustomed to low prices that he has not realized that they are on the advance until after the event. We occasionally receive letters from customers whom we have charged the first advance, asking why they are charged more than last time. Jobbers generally believe the advances so far made are but the beginning of the upward movement, and are asking and getting the new rates. Under present conditions there is bound to be some irregularity in prices, but as a general rule the retailer who stocks up at the first advance will do well. Goods have been abnormally low for a number of years, and a moderate advance is healthy.

Employment is general among all the working classes, and wages are being advanced for common labor. Building promises well in our city this year.

LOGAN-GREGG HARDWARE CO.

THE DAVENPORT TRADE.

Invoices of goods bought in a speculative way two months ago are becoming due, but in many cases the pay therefor cometh not.

The sellers of different lines of Hardware are not as independent as they were two weeks ago; they are becoming more willing to sell, for, verily, the profits on goods purchased or produced previous to the recent advances are decidedly attractive. Buyers are more conservative, many of them having accumulated large stocks that were carefully selected and well assorted, and they are therefore in-

WRITE FOR PRICES.

GOODELL BROTHERS COMPANY,

GREENFIELD, MASS., U. S. A.

clined to dispose of what they have on hand, realizing the gain that the improved condition of the markets has given them rather than risk any further speculative purchases.

The harmony prevailing between manufacturers and jobbers is gradually expanding the differentials in prices between the wholesale and retail trade. Consolidation on one side, and organization on the other, has, without doubt, much to do with bringing about this necessary and most welcome change in favor of the Hardware jobber.

The local banks report deposits increasing; calls for commercial discounts light, and demand for long time loans from savings banks improving.

Most metals continue to rise from manipulation, but there is one metal according to the interesting letters published in *Hardware* of the 25th ultm., that for a time even pools and trusts could not elevate, that was: mercury in the thermometers. For:

Your trade reports from East and West
Of Smith and Jones and Brown,
All show the day was cold for trade
When mercury went down.

SICKELS, PRESTON & NUTTING CO.

THE CLEVELAND TRADE.

The boom seems to have got the bit in its teeth, and is going like mad. The long depression and low prices settled the question for a good many people that we had permanently come to an era of low prices, but it seems they were mistaken.

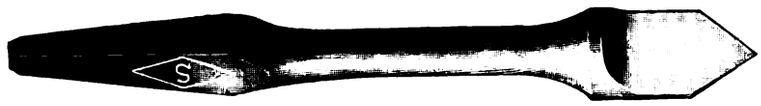
Now, if we can profit by experience, we shall remember that changes will continue to come.

The unusual demand for goods is largely caused by the feeling that an advance is to take place, and a large number of purchasers in the country feeling this have increased their orders, and this aggregate makes an enormous demand, far in excess of any consumptive demand.

It is easy to predict the result. The demand will decrease with the excitement and manufacturers will be stampeded, because orders are falling off and prices are sure to decline.

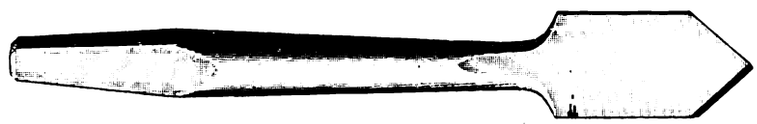
Goods bought at or near the old price will prove a good purchase, as they will not reach the extreme low prices for a number of years, but they are sure to decline when the boom passes.

A dull season will surely come again, and the probability is that this will not be long delayed if the boom continues acute for a month longer. Facilities are large enough to over-supply any legitimate demand, and the excessive demand will be short-lived.



THE LOCKWOOD-TAYLOR HARDWARE CO.

THE INDIANAPOLIS TRADE.



We are doing our best to fill our orders complete, but find it hard work because we cannot get the goods fast enough from the factories.

The matter of clearing up our stock is having our attention. Even with the exercise of great care, goods will accumulate in every Hardware stock, which, to a certain extent, are unsalable. This comes largely from the demand changing from one line to another. An illustration of this is the lack of demand now for a polished copper tea kettle, the trade being almost entirely for nickel plated, owing to the small difference now in the price. Another illustration is tinned tacks, the trade having changed almost entirely to a polished steel tack put up in a variety of packages. There is no better time than on a rising market for the jobber or retailer to turn slow sellers into money, that he may invest the proceeds in goods for which there is a continuous demand. Many Hardwaremen are too conservative to sacrifice their profit on such articles or to sell them for less than cost, but it is the only way to clean up stock, and at the same time make the purchaser,

whether he be a consumer or retailer, feel that you are doing him a favor.

Some people think because there is a slight demand for an article in a locality where the people do not keep up with the times, that it is necessary to keep some of these "old timers" in stock.

VAN CAMP HARDWARE & IRON CO.

THE OMAHA TRADE.

The weather during the past month was not very favorable for an increase in trade, as its unusual severity and many heavy storms throughout the West materially decreased what would otherwise have been a very heavy month. However, even under the unfavorable conditions, trade showed a very material gain over the corresponding month of a year ago. In accordance with the universal custom which now burdens the mails, we have withdrawn all prices and are endeavoring, with not quite as much success as we would like to meet with, to procure a sufficient supply of goods to fill the demands of the trade. There is no question at all but that the next few months will see a larger demand for goods than jobbers and manufacturers are able to take care of. Under the circumstances, it appears to be a recognized policy on the part of the trade to cooperate in the maintenance of all advances made by the manufacturers, which under present conditions appears to be the wisest and most satisfactory policy for all concerned.

Collections are much better than might be expected.

RECTOR & WILHELMY CO.

THE GRAPHITE INDUSTRY.

It would use up three or four of Dixon's best pencils in marking down the expressions of satisfaction at the result of the graphite business for 1898. Inventory is finished, the books are closed, the directors have congratulated the management, and the orders come in with "equiponderating and reverberating momentum."

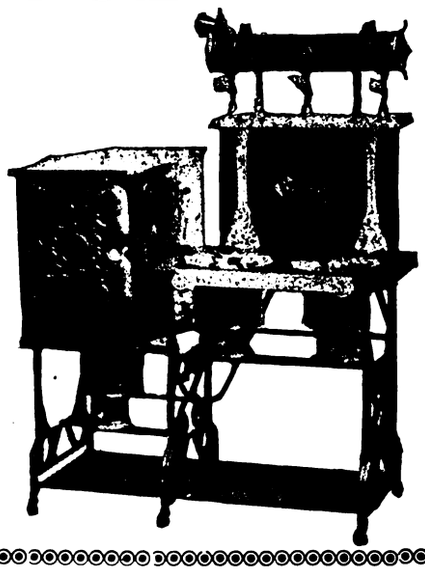
We cannot enter into details, as much of your valuable matter would thereby be crowded out, but we will only say that January and February each carries a banner at the head of the 1899 procession, and February, with two holidays and a lot of blizzards, shows a 60 per cent. increase over the February which we enthused about last year.

If there is any one thing the manufacturing public and the foundry people and the railroads and all the rest of the country at large needs, it is graphite in some of its useful forms, and they naturally send to us for it, and they get what they want with little delay, if they will only await their turn.

We have just broken ground for a new four-story addition to the pencil works, for we do not propose to permit orders to remain unfilled when a new building or two will help us out. Don't ask for any pessimistic reports; some one has cut the word out of our office dictionary.

Your readers can have a handsome calendar mailed to them if they send their business card—the new edition runs from March 1st. JOSEPH DIXON CRUCIBLE CO.

The men of Berlin have an odd habit of brushing and combing their hair and whiskers in public. In the restaurants and cafes men pull out their implements and "spruce up" while waiting for their orders to be filled. They do not take the trouble to leave the table either.—*Exchange.*



Benefits Greater Than Ever Before.

The Dangler Stove & Mfg. Co.,

.... CLEVELAND, OHIO.

The Scarcity of Tin Ore.

The fact that tin of all the metals in common use is only sparingly distributed throughout the world, is again called attention to by an Australian geologist, Mr. B. J. Skertchley, who has published a monograph upon the subject. While the known gold fields of the world cover more than 1,500,000 square miles, the tin fields have an area of less than 12,500 square miles. Thus, for every square mile of tin ground there are 132 square miles of gold-bearing country. There are seven tin districts in Europe, producing about 8300 tons yearly, of which the Cornish mines yield about 8000 tons. Asia has two tin areas—Hunan, in China, estimated by some of the best authorities to produce 10,000 to 20,000 tons a year, but proved by official figures to yield less than 2500 tons, and the Straits Settlements and adjacent principalities, yielding 58,000 tons yearly, the richest yield in the world. Africa has no known tin mine; North America no payable mine; South America only one tin area, Bolivia and Peru yielding less than 4000 tons a year, and Australia, the youngest, contributes about 6000 tons a year.—*Exchange.*

The Troy Nickel Works are sending their friends a very useful office ornament in the shape of "The Perpetual Don't Forget Alaska Always Cold" Calendar. It consists of an iron frame, containing small cardboard calendars, which, with a very slight manipulation, will become perpetual, and the user does not have to depend upon the changing calendars of each changing year. Enclosed is a series of original directions, as follows: Drive tack into cross bar of pigeon hole of your desk, facing as you sit preparing to take up your day's work, and hang the calendar; then look up your wants, in our line, taking into consideration the fact that we are very busy, and need 30 days to fill orders, some of the time. This calendar is perpetual and so are Alaska Stove Trimmings.

Situations Wanted.

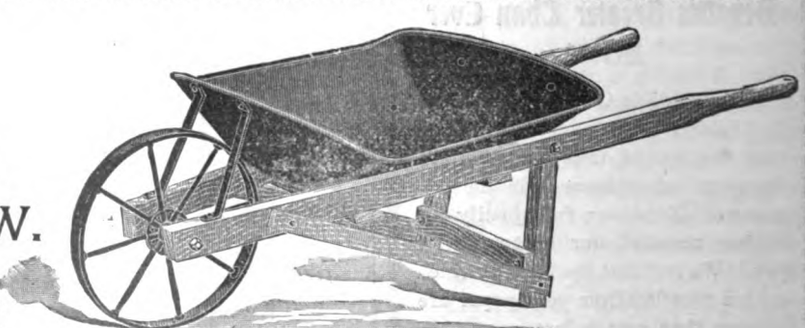
WANTED, by a practical Hardwareman, a position as salesman or stock clerk. Salary moderate; reference A1. Address OLD IRON, care HARDWARE, No. 143 Chambers Street. New York.

Foreign Agency Wanted.

A GENTLEMAN with large experience and with good connection in all the principal towns in Newfoundland, is prepared to undertake additional agency in Hardware trade; good testimonials and references from firms represented. Address GEO. B. PARSONS, P. O. Box 331, St. Johns, Newfoundland.

English Agency Wanted.

A GENTLEMAN who has been in the Hardware and cutlery line in England for twenty-five years wishes to represent American houses in light iron and steel line, patented novelties, etc., or the sole sale for England on his own account. Address Box 96, care HARDWARE, No. 143 Chambers Street, New York.



A Hardware Store Needed.

WANTED—An experienced man with sufficient capital to open a Hardware, housefurnishing and implement store in one of the best towns in Western Pennsylvania. No competition; large population; town has natural gas, paved streets, water works, etc.; needs the store to supply the large demand. Address S. MORGAN, Freedom, Pa.

Attention, Manufacturers!

FIRMS contemplating going into the enamelling business or wishing a new formula to enable them to add to their present lines in one or two coated ware, are invited to correspond. Highest references. "EXPERIENCED ENAMELLER," care HARDWARE, No. 143 Chambers Street, New York.

STANLEY
RULE & LEVEL CO.
New Britain, Conn.

SOLD BY ALL
Hardware Dealers.

Stanley's Improved Plumbs and Levels.

☞ All our Levels have the "HAND-Y" feature, rightly so called.
And only PROVED GLASSES are used.

In climbing ladders, walking on stagings or on the frame of a building, this form of the Level gives a feeling of steadiness.

Proved Level Glasses.

Made of extra thick tubing. Each Level Glass is marked at its highest, or crowning point, by two indelible lines; and each Plumb Glass with a single line.

Reduced Imports.

The import record of the calendar year 1898 is as remarkable as that relating to its exports, but for opposite reasons. The total imports of the year are less than those of any calendar year in more than a decade, while the exports of the year are the largest on record. The imports fall more than $100,000,000 below those of 1897 and nearly $50,000,000 below those of the years of great depression, 1896 and 1894, on which occasions the imports were phenomenally light. That the importations in the early part of the year 1898 should have been light was not surprising because of the heavy imports in certain lines prior to the enactment of the tariff law of 1897; but that they should continue light during the entire year in the face of the large home demand which prosperous business conditions would naturally create has proved surprising to those following closely the commercial developments of the year. The importation of a full year's supply of wool, sugar and other articles of that class just prior to the enactment of the Dingley law naturally had a marked effect in reducing the imports in the closing months of the calendar year 1897, but that the imports of the closing months of 1898 should remain as low as those of 1897 is a matter of very considerable surprise. The November imports in 1898 are no greater than those of November, 1897, and the eleven months of 1898, when compared with the corresponding months of 1897 or 1896 show a remarkable reduction in certain classes of imports.

The Lancaster Machine & Knife Works have recently started to run overtime, having large orders on hand, with every indication of a first-class spring trade. They are located at Lancaster, N. Y., and manufacture high-class knives for paper-cutting, wood-working, etc., and also bit braces and butchers' cleavers. Their general agents are the Allerton, Clarke Co., New York.

Iver Johnson Cycles.

HONEST WHEELS.

BUYING a cheap bicycle is like buying a cheap coat, a cheap hat or a cheap pair of shoes. They look well and imitate closely the better goods—but how do they wear? You know; and it's the same way with a cheap bicycle. They won't stand the wear at all.

It's much better to buy wheels honestly made and honestly sold at an honest price. By **honest price** we mean the price that an article is worth. We have cycles listing at from

. . . $40 to $75.

They are worth the price asked.

A "HARBWARE JOBBERS'" NUMBER.

OUR ANNIVERSARY ISSUE OF APRIL 10, 1899, WILL BE DEDICATED TO THE

HARDWARE JOBBERS OF AMERICA.

It will be Handsome, Artistic, Timely, of Permanent Value, and will go into the hands of the Jobbers of the World.

On April 10, 1898, the Eighth Anniversary of the founding of *Hardware*, we published the largest, handsomest and most artistic number that was ever presented by anybody, anywhere, to the Hardware trade.

It was devoted to the Hardware Associations of America; was read by everybody; went into every corner of the globe; was laid away for preservation and future reference by the majority of its readers; and won golden words of commendation from the trade.

This great number is to be duplicated on our Ninth Anniversary of April 10, 1899.

The special branch of the trade to which it will be devoted may be learned from the following title, which will appear upon the cover of that issue:

"HARDWARE JOBBERS' NUMBER."

This seems to us to be the most timely subject that can be chosen, now that the questions touching upon the jobbing trade are being so generally discussed, and so many points continually raised as to the exact status of the jobber before the trade; the extent of his influence; his proper sphere of endeavor; his relation to the manufacturers on the one hand, and to the retailers on the other; his restrictions, and the temptations that beset him in securing trade; and various other points of vital importance that touch upon his very existence, and relate to his status in the future. All these questions, and many more that will readily present themselves, will be fully discussed by men competent to speak for the trade, and who have given serious attention to the themes upon which they have promised to write. Among the many subjects which will be discussed, the following may be named:

"The Hardware Jobber: Has he a Business Future? Is he here to Stay?"

"The Present and Future of the National Hardware Association."

"The Ethics of the Jobbing Business."

"The Hardware Jobber as a Man and Brother."

"The Jobber from the Manufacturer's Standpoint."

"The Manufacturer from the Jobber's Standpoint."

"The Jobber from the Retailer's Standpoint."

"The Retailer from the Jobber's Standpoint."

"The Western Jobber."

"The Eastern Jobber."

"The Southern Jobber"

"The Northern Jobber."

"The Central Jobber."

"The Pacific Coast Jobber."

"The Canadian Jobber."

"The Past of the National Hardware Association."

"Other Hardware Jobbers' Associations."

"The Package and Cartage Question."

"Restrictions as to Jobbing Territory.

"How Does the Jobber's Future Look to a Man in the Corner?"

"Syndicate Buying."

"Fraternity in the Jobbing Trade."

Etc., etc., etc., etc., etc.

In the preparation of our anniversary number of last year, we received the cordial assistance and support of the trade everywhere, and the congratulations which were showered upon *Hardware* for its successful venture into this practically new field, were an ample compensation for the labor and expense involved.

We have already received sufficient assurance that this second endeavor upon the part of *Hardware* will be most earnestly appreciated and endorsed by the trade. We should be pleased to hear from our friends everywhere with such advice, suggestions or information as they can offer for the successful realization of the purpose we have in view.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Allentown, Pa.—Amandus D. Berger and Milton A. Glose will open a Hardware store in the Ritter building at No. 115 North Seventh Street. The firm name will be Berger & Glose.

Chattanooga, Tenn.—H. E. Sanderson, a well-known business man of this city, has embarked in the heavy Hardware and engine business with J. W. Cavender, at No. 1112 Market Street.

East St. Louis, Ill.—The Schaub Hardware & Iron Co. has been incorporated by G. Schaub, E. Schaub and Fred Gorsing. Capital stock, $10,000.

Fort Wayne, Ind.—Articles of incorporation have been filed for a Hardware company, which will be composed of C. C. Schlatter, George F. Bantel, J. M. Stouder, Henry E. Fischer, C. C. Cissell, C. P. Sordelet, J. C. Trier, O. E. Richard, H. C. Hollenbeck, William Mertz and F. T. Zimmerman.

Garfield, Wash.—The Garfield Hardware & Merchandise Co. has been incorporated, with a capital stock of $26,000.

Grand Rapids, Mich. — The Hardware Supply Co. has been incorporated, with a capital stock of $10,000.

Harpersville, N. Y.—The new firm of Hardware merchants, G. F. Demeree & Co., have opened up business as successors to Demeree & Olendorf, at the old stand.

Harrison, N. J.—The J. B. Conover Co. has been incorporated by Joseph B. Conover, Lewis Hudson and Willard Nixon; to deal in Hardware. Capital stock, $20,000.

Huron, Kan.—Stanberger & Miller have opened a Hardware and implement store in the Probasco brick.

Lenox, Iowa.—W. E., Emil and Albert Cless have opened a Hardware store. The firm style is Cless Bros.

Melvin, Mich.—A. J. McDonald, Hardware dealer, has erected new store and added a new lot of Hardware.

Redwood, N. Y.—M. C. Kelly, of Hammond, has opened a tin shop and Hardware store in the Butterfield Block.

Rockland, Mass.—Hedge & Hall have opened a Hardware store in the Savings Bank Block.

Theresa, N. Y.—Frank Delaware, who has been for several years in the employ of R. Rodenhurst & Son, as tinner, has formed a copartnership with G. H. Timmerman, of this town, and they are about to embark in the Hardware trade at Massena Springs.

Union City, Tenn.—The Glass Hardware Co. has been incorporated by W. Campbell, A. P. Scroggins, W. B. Campbell and M. Hornbeck.

Union City, Tenn.—The Lawson & Sears Hardware Co. has been incorporated by A. J. Lawson, A. D. Sears, E. S. Tatom, T. J. Mott and R. H. Driskill; to conduct a merchandising business. Capital stock, $7000.

Washington, D.C.—Darius E. Burton has opened a Hardware store at No. 612 Twelfth Street.

Changes and Improvements.

Baltimore, Md.—Howard MacCarthy and J. Brown Harper have purchased the interest of the Calvert Hardware Co., and will continue the business under the firm name of MacCarthy & Harper at No. 345 North Calvert Street.

Boonville, N. Y.—B. C. Sharratt has sold his Hardware business to Henry D. Ryder, of New Woodstock, who will take possession as soon as the inventory is completed.

Boulder, Colo.—Parker & Wills, Hardware, dissolved.

Cherry Creek, N. Y.— Charles Shepard has sold his stock of Hardware to his brother.

Cicero, Ind.—Beals & Scott, Hardware, succeeded by Beals & Bennett.

Duluth, Minn.—The stock of the Northern Hardware Co. has been sold to Wallace H. Wells and Roderick Annis, who will continue the business under the company name. The store will, however, be reduced in size, and will hereafter occupy No. 222 West Superior Street, the eastern half of the present place.

Eldon, Iowa.—Ray Bros. have sold their Hardware stock to H. C. Mason, who has taken possession.

Falls City, Neb.—W. S. Korner has sold his Hardware store to Frank Uhlig.

Farmer City, Ill.—Smith & Carr, Hardware, succeeded by Williams & Johnson.

Fort Collins, Colo. — The Fort Collins Hardware Co. have just sold out a half interest to Oliver A. Sproal, formerly of Buffalo, Wyo.

Gladwin, Mich.—Mrs. J. H. Foster and Mrs. B. S. Lewis will continue the Hardware business of the late J. H. Foster, under the name of Foster & Lewis.

Huntington, Mass.—The stove, tin and Hardware business owned and conducted by Edward A. Allen has been sold to W. Malcolm Brock, of Wells River, Vt.

Lebanon, Ind.—Perkins & Co., Hardware, succeeded by W. A. Bell.

Lewisburg, Tenn.—The firm of King & Walker, proprietors of the Racket Store, has been dissolved, the former selling his interest to J. N. McCord, late of McCord Bros.

Le Sueur, Minn. — Huberty Bros. will shortly put in a tin shop in connection with their Hardware store.

Litchfield, Ill.—Thomas Rhoads has purchased the Hardware and implement stock of M. Morrison & Co.

Maquon, Ill.—Mrs. J. Shearer has sold out her grocery and Hardware store to G. G. Shearer, who will conduct the business at the same stand.

Marlette, Mich.— Stroebel Bros. & Co. have been succeeded by the Thompson Hardware Co., Messrs. Stroebel retiring.

Painesville, Ohio.—R. E., C. E. and H. M. Doolittle have purchased the Hardware stock of C. O. Child, and the business will be conducted under the name of Doolittle Bros.

Rhome, Tex.—A deal has been consummated between J. P. Perkins and T. W. Weems, in which the latter purchased Mr. Perkins' store building near the central portion of the city, and will move his Hardware stock from Aurora to this place.

Riverside, Iowa. — Fesler & Davidson have bought the Harmon & Esley stock of Hardware and have rented the Nicols building, and are moving their stock across the street.

Rochester, Mich.—Stone & Case, Hardware, C. W. Case has taken possession of store.

Sistersville, W. Va.—A joint stock company under the style of the Sistersville Hardware Co. has been formed, and they have purchased the stock and good will of the following firms: Berry & Colbert, W. L. Gorham and Smith & Breshar. The new company will have a capital stock of $10,000, and the incorporators are: F. M. Berry F. J. Colbert, E. A. Durham, Robert McCormick, George E. Work and F. D. McCoy.

Waverly, Ohio.—Stahler Bros. have been improving their Hardware store by the addition of the latest style shelving and ladders.

Woonsocket, R. I.—The Hardware business of E. Ross & Co. have been sold to Rosbrooks & Cummings, who have taken possession of the business.

Fires in Hardware Stores.

Baltimore, Md.—Francis Albert & Co.'s Hardware stock has been damaged by fire to the extent of $10,000.

The
Blount Door Check

is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.

Norristown, Pa.—The Reading Screw Co., of Philadelphia, will remove its extensive plant to this city.

Peoria, Ill.—The Avery Planter Co. have certified to a change of name to the Avery Mfg. Co.; also to an increase in capital stock from $300,000 to $600,000; also an increase in directory from five to seven.

Sharon, Pa.—The Shenango Machine Co. have begun the erection of a large steel building. The Buhl Steel Co. will soon erect five open-hearth steel furnaces.

Toledo, Ohio.—G. F. Donaldson has sold his stock in the Toledo Machine & Tool Co. to E. W. Tolerton and Graff Acklin. Mr. Acklin has now the management of the concern. Mr. Donaldson held 125 shares.

Toledo, Ohio.—The management of the Lucas pump factory have secured a lease on the building, No. 412 Front Street, and have started on the manufacture of the pumps on a small scale.

Wheeling, W. Va.—The La Belle Iron Works will erect a new mill, and possibly two plate mills.

Recent Fires.

Auburn, N. Y.— The large scythe and knife factory of David Wadsworth & Son has been entirely destroyed by fire.

Chicago, Ill.—Niagara Radiator Co., damaged by fire at a loss of $5000.

Gananoque, Ont. — The bolt works of George Gillies have been injured by fire to the extent of $15,000.

Mansfield, Ohio.—An explosion occurred in the japanning department of the Baxter Stove Works some days since. Fire followed, which completely destroyed the plant, leaving only the two main walls standing. The Monarch Stove Co., manufacturers of gasoline stoves, occupied the same building. The loss on building, stock, patterns, etc., is estimated at about $150,000 to $200,000, probably fully covered by insurance. Fully 200 men will be thrown out of employment.

Moline, Ill.—The Deere & Mansur Co.'s corn planter works foundry has been partially burned with a loss of $10,000, fully covered by insurance.

New York, N. Y.—The Manhattan Brass Co.'s factory at Nos. 334-338 East Twenty-eighth Street, has been destroyed by fire.

Quakertown, Pa.—The large stove works of Roberts, Winner & Co. have been destroyed by fire, the loss being at least $50,000, fully covered by insurance. About two hundred hands were employed.

Jamestown, N. Y.—Jos. W. Graff has opened a bicycle and Hardware store at No. 15 East Third Street.

Jersey City, N. J.—The Bailey Automatic Bicycle Brake Co.; to manufacture bicycle brakes. Capital, $150,000. Incorporators: J. R. Lane, J. H. Grant and F. Von Kusserow.

Jersey City, N. J.—The United States Tube Co. has been incorporated by Wm. P. Chapman, Jr., Albert C. Ridley and Francis D. Pollak; to manufacture all tubular and other products of steel, etc. Capital stock, $75,000.

Kansas City, Mo.—The Kansas City Spoke & Handle Mfg. Co. has been incorporated by C. W. Schreiner, A. J. Brown, W. H. Warner, R. Long, W. J. Crowley and R. Long. Capital stock, $10,000.

Montreal, Can.—Charlebois & Martineau, bicycles, new firm, have commenced business in the Windsor Hotel Block. They handle the Orient wheel, and also conduct a modern repairing shop.

Nashua, N. H.—Frank H. Morgan has opened a bicycle store.

New York, N. Y.—Charles J. Stebbins & Co.; to manufacture bicycles. Capital, $30,000. Directors: Charles J. Stebbins, T. W. Munroe and F. N. Bell, New York City.

New York, N. Y.—The Whitelaw-Dailey Co. has been incorporated by W. Whitelaw, C. J. Dailey and C. A. Wilson; to manufacture bicycles and sporting goods. Capital stock, $7500.

New York, N. Y.—The Dreadnaught Tire Co. has been incorporated by F. W. Barker, C. W. Spurr, Jr., D. F. Halsted, Lauron Ingels and C. A. Pettie. Capital stock, $100,000.

New York, N. Y.—The American Cycle & Supply Co. has been incorporated by Theodore Berau, Sidney New and Bernard B. Vorhaus. Capital stock, $3000.

North Attleboro, Mass.—E. A. Scott will open a store and repair shop in Kendall Block.

Owego, N. Y.—Terwilliger & Houk will open a store and repair shop.

Reading, Pa.—Rhode & Gehringer is the name of a new firm which will manufacture cements and chain graphite.

San Francisco, Cal.—The Jersey Wheel Co. has been incorporated by W. P. Fuller, C. A. Roberts, I. F. Littlefield, A. W. Crandell and F. P. Bull; to manufacture and sell bicycles. Capital stock, $20,000, all subscribed.

Syracuse, N. Y.—The Rice Bicycle Co. has been incorporated by Harry R. Gilbert and Frank C. Riggs, of Syracuse, and John W. Rice; to deal in bicycles. Capital stock, $1500.

Thompsonville, Mass.—The New England Machine Screw Co., manufacturers of rivets and screws for bicycles, have started up operations. The factory is located in the second story of the Pease Lumber Co.'s building, and is in charge of George H. Ball.

Washington, D. C. — The Automatic Cycle Pump Co. has been incorporated by Geo. C. Ferguson, Lyman F. Ellis, John W. Holcombe and David H. Dawson.

Washington, D. C.—The Washington Automobile Co. has been incorporated, under the laws of Alexandria, with H. D. Merrick, president; A. W. Armstrong, local agent; for the manufacture and sale of horseless conveyances. Capital stock, $50,000.

Wellesley, Mass. — H. W. Hager has opened a store.

West Gardner, Mass.—J. B. Barnes will open a store in Stevens Block.

Changes and Improvements.

Baltimore, Md.—Reinewald & Gunther, dealers in bicycles, succeeded by E. W. Reinewald.

Chicago, Ill. — W. T. Russell, bicycle dealer, has been succeeded by Charles H. Hahn.

Detroit, Mich.—The Baker Hardware Co., bicycles, etc., Jerome Oliver, proprietor, sold out.

Elkhart, Ind.—Keen & Co., Hardware, sporting goods, etc., succeeded by Jones & Watson.

Fort Wayne, Ind.—Voorhees Griffith, who for the past four years has run the sporting goods store at Sixth and Main Streets, has sold out his interest to Charles Duffin.

Gloucester, Mass. — Lloyd, Parsons & Martin, bicycles, reported to have sold out.

Indianapolis, Ind.—B. Koehring & Son, bicycles, Hardware, etc., changed style to C. Koehring & Bro.

Iowa City, Iowa.—Parsons & Westcott, sporting goods, etc., dissolved, Mr. Westcott retiring. The business will now be conducted under the style of Parsons & Stouffer.

New York, N. Y.—The Bowman Bicycle & Gun Co., dealers in bicycles and sporting firearms, have moved into new quarters, which have recently been completed, at No. 300 Broadway.

Norwich, Conn.—R. B. Tracy & Co., bicycles, etc., dissolved; succeeded by B. B. Tracy.

Paxton, Ill.—Thompson & Keator, bicycles and bicycle sundries, etc., business purchased by the Paxton Hardware Mfg. Co.

Sault Ste. Marie, Mich.—J. C. Hardy has purchased the bicycle livery and repair shop of the Soo Cycle Co. on West Portage Avenue and will continue the business at that place under the same name.

St. Albans, Vt.—Montefiore & Warner, bicycles, succeeded by J. V. Montefiore.

Wallingford, Conn.—The Wheel & Cycle Bar Co. will be moved to Berlin, the whole of the $30,000 worth of stock necessary to secure its removal having been subscribed. The capital is placed at $40,000, the balance of $10,000 being represented by the present members of the company.

Recent Embarrassments.

Boston, Mass.—The Boston Cycle Supply Co., bicycles, reported to have made an assignment.

Urbana, Ohio.—L. W. Neer, bicycles, etc., reported to have made an assignment.

Winchester, Mass.—H. G. Higgins, manufacturer of bicycle specialties, has filed a petion in bankruptcy.

Recent Fires.

Chicago, Ill.—The bicycle factory and machine shop of I. Silverman & Bros. at No. 100 West Fourteenth Street has been partly destroyed by fire, causing a loss of about $75,000.

Chicago, Ill.—The Tugwell Mfg. Co., bicycle hubs, etc., damaged by fire.

Chicago, Ill.—J. P. Barnett & Co., bicycle supplies, damaged by fire at a loss of $5000.

Chicago, Ill.—H. E. Graves, bicycles, damaged by fire at a loss of $10,000.

Detroit, Mich.—H. M. Snyder & Co., bicycles, destroyed by fire; insured.

South Framingham, Mass. — W. H. St. George, bicycle dealer, damaged by fire.

St. Matthews, S. C.—The Bicycle Supply Co., damaged by fire.

It is an interesting and suggestive fact, and one not generally understood, perhaps, that the Dominion of Canada is the largest foreign purchaser of American goods in proportion to population. We sold the Dominion $65,000,000 worth of goods last year, or $13.50 per head of population. Even to the United Kingdom we sell less than this per capita, and to Mexico, our neighbor in the South, only $1.86 per capita.—*Exchange.*

"EVERYTHING IS COMING UP."
BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

The metric system is based upon the distance from the equator to the pole. The ten-millionth part of this arc was chosen as the unit of measure of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin:

TABLE FOR THE CONVERSION OF METRIC WEIGHTS AND MEASURES INTO ENGLISH.

Metres into Yards.	Kilometres to Miles and Yards.	Litres into Gallons and Quarts.	Hectolitres into Quarts and Bushels.	Kilogrammes into Cwts. Qrs. Lbs. Oz.	Hectares into acres. r. p.

Hardware Business For Sale.

HARDWARE, coal and lumber business in a town of 3000 population. No other Hardware store or lumber yard within ten miles. Inventory January 1, 1890, $10,000. A rare chance to right party. Address J. C. SENDEL, Weatherly, Pa.

A COMPLETE stock of Hardware, stoves and tinware, paints, oils, plumbing and tinning, steam and hot water heating; water works now going on, can have the tapping of mains. Established ten years and no opposition. Right party can make $1500 per year over expenses. Nearest Hardware, ten miles in a thriving town in Pennsylvania. Will sell property if wanted or will rent reasonable. Reason for selling, going to retire from business. Address BOX 92, care HARDWARE, No. 143 Chambers Street, New York.

HARDWARE business on Pacific Avenue, Tacoma. Stock inventories $20,000. Manager recently deceased and owners desire to sell. Business established in present location ten years ago. Address THE SYNDICATE CO., No. 503 California Building, Tacoma, Washington.

A NICE, clean stock of Hardware, located in one of the largest and most thriving towns in New England, is offered for sale on account of the owner's poor health. The business has been established twenty years; is in the best location in the town, and in a thrifty condition. The stock will invoice at about $10,000. To a party with the cash it offers a splendid opportunity. Address A., care HARDWARE, No. 143 Chambers Street, New York.

A COMPLETE stock of Hardware, saddlery, stoves and tinware. Business well established in a live town and prosperous country. Address A. B. C., care HARDWARE, No. 143 Chambers Street, New York.

File Factory for Sale.

ON Saturday, April 1, 1899, the plant of the late McClellan File Co. will be sold at the Saginaw County Court House, by the Circuit Court Commissioner, to satisfy mortgages about one-third the value of the plant, which will be sold entire, comprising real estate, buildings and all machinery. The factory has a capacity of 500 dozen files per day, and is one of the most thoroughly equipped file plants in the country. Plenty of cheap fuel. An elegant opportunity on a small capital to manufacture files for the trade, or to operate it as a re-cutting factory. For further particulars, address GEO. J. LITTLE, Saginaw, Mich., for mortgagees.

Agency Wanted.

A PARTY with many years' experience on the road, and who has a first-class agency for the United States, would like to add one or two more lines, or would join with another who has good agencies. Address B., care HARDWARE, No. 143 Chambers Street, New York.

EXPERIENCED Hardwareman desires to represent manufacturers or jobbing houses of Hardware and house-furnishing, or anything in the building line. Have a very good standing among contractors and building fraternity of Cleveland, Ohio, and vicinity. Address CHAS. L. HEISER, care the Builders' Exchange, Cleveland, Ohio.

MANUFACTURERS' AGENT, with well located store in machinery district in New York, would like to hear from manufacturers wanting a reliable representative; have an established trade and years of experience. Address GEO. W. CHURCH, No. 183 Greenwich Street, New York.

COMPETENT cutlery man, residence, Colorado; twenty years in business, four years road work, wants agency for first-class cutlery firm or manufacturer in territory west of the Mississippi. Address G. A. G., care HARDWARE, No. 143 Chambers Street, New York.

MANUFACTURERS of a good staple article or popular specialty whose prices can meet competition, and who will entertain the subject of representation in New York and vicinity, will find it advantageous to correspond with subscriber, whose firm may prove suitable in experience and repute, and would make arrangement mutually profitable. EDWARD CHARLES, care HARDWARE, No. 143 Chambers Street, New York City.

LIVE man (29) desires to represent manufacturers of small lines and specialties, suitable for the Hardware and house-furnishing trades. New York and vicinity. For particulars, address WM. SMITH, No. 718 Chauncey Street, Brooklyn, N. Y.

Agency Offered.

WE would like to hear immediately from a few live Hardwaremen who would like to be sole representatives in their towns, of a concern that is in the market for business, and have a line made for "men now on earth"—a modern line THAT CAN BE SOLD to your customers. Address "BOX 88," care HARDWARE, No. 143 Chambers Street, New York.

WANTED agents to handle a patented, labor saving device of universal sale; investigation solicited by men who desire quick returns from a legitimate, profitable business. Address (C) BURR MFG. CO Cleveland, O., 823 Society for Savings.

Attention, Salesmen!

SALESMEN on uncovered ground can add hose, tires and full rubber line. Free samples. Cash commissions. Protected ground. One salesman earned $3900 in 1898. MINERALIZED RUBBER CO., New York.

An Opportunity.

OWING to withdrawal of estate interest in a long-established wholesale and retail Hardware business in one of the best New England cities, a connection is desired with some man of capital capable of taking charge of the financial and bookkeeping department of the business. For particulars, address INTEGRITY, care HARDWARE, No. 143 Chambers Street, New York.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

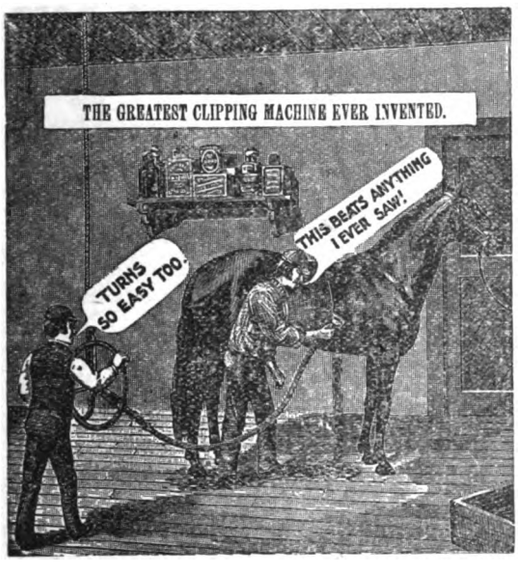
PELOUZE "STANDARD" Family or Counter Scale

25 pounds by ounces.

Do not confuse the **"STANDARD"** with inferior scales.

Made of Steel throughout, no castings to break. Large aluminum dial, nickel rim, black figures. Double upright steel supports, insuring accuracy. Beautifully japanned and striped. Large polished Scoop. . . . . .

Warranted Accurate.



All dealers should sell the

....STANDARD....

at all seasons of the year.
Invaluable to families in preserving and canning.
Also detects errors in weight of purchases. . . .

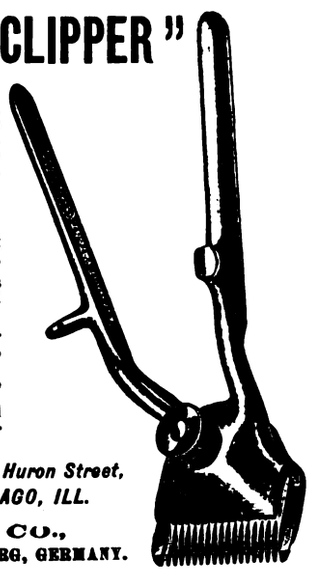
Order Through Your Jobber.

Pelouze Scale & Mfg. Co.,
Mfrs. of Reliable Family, Counter, Postal and Candy Scales. **CHICAGO.**

"The NEW '98 CHICAGO CLIPPER"

"Famous the world over." Retails at $8.75.

Patented in United States, Canada, England, France, Germany and Russia. All records were broken with this Clipper by clipping a horse complete in 14 minutes. Weight of machine only 35 pounds. All Hardwaremen can sell them in place of the old fashioned two-hand Clippers. Get posted.



TOILET CLIPPERS.

There are all kinds, but if you want a Clipper with a **"REPUTATION" INSIST** on the "Stewart Patent." They will cost you no more than the "inferior kind." All parts are absolutely interchangeable. Clippers stamped with our name is a guarantee of quality. Send for Catalogue of Modern Clippers.

We have just been awarded Gold Medal at Trans-Mississippi Exposition, highest and only award for horse clipping, sheep shearing and cattle grooming machines.

Eastern customers can obtain machines, knives, parts, etc., from our New York Office, No. 97 Chambers Street.

We also have at the above address a complete repair and grinding department with an expert grinder from the factory in charge.

Chicago Flexible Shaft Co., *158-160 Huron Street, CHICAGO, ILL.*

HAMMACHER, DELIUS & CO.,

Pearce's Improved Cahoon Patent Broadcast SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The **CAHOON** is not the lowest priced seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two-thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the **CAHOON** make a profit and a satisfied customer at the same time. They stay sold. A prominent Hardware dealer in the South wrote us under date of February 13, '99: "We are not handling any other broadcast seeder similar to yours. Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principal distributing points. . . . . .

NEW YORK OFFICE, 10 WARREN STREET.

GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Factories: GEORGETOWN, CONN. WIRETON (three miles from Chicago), ILL.
ESTABLISHED 1818.

IF

TWO HEADS ARE BETTER THAN ONE HEAD
TWO PROPOSITIONS ARE BETTER THAN ONE PROPOSITION

We want to know how many of the readers of HARDWARE sell any kind of **FURNITURE, CARPET** or **RUG-BEATERS**. In order to find out, we make you the following proposition. To any dealer in the United States or Canada who sells or **CAN** sell any kind of dust beater, who will send us 25 cents in stamps, we will mail him one of our 50-cent **PLANET LEATHER DUST BEATERS**, prepaid. Then if you accept the very liberal proposition which we will send with sample, we will refund the 25 cents to you. This is the time of year when you can afford to consider our propositions, for **SPRING-TIME** is **HOUSE-CLEANING TIME**. Our **SECOND** proposition will be made you upon request. When you have seen a sample of the **New Planet Leather Dust Beater**, you will be interested in our other proposition. Write to-day. Mention HARDWARE.

Enameline
J. L. PRESCOTT & CO. NEW YORK, N.Y. U.S.A.
ENAMELINE

Can You Afford— to carry in stock unknown brands of stove polish that your customers know nothing about, brands they do not call for, the quality of which is inferior, gives them dissatisfaction, and the consequent sale of which brings discredit to your store? Your best judgment answers NO! Then sell ENAMELINE, the Modern Stove Polish. Paste, Cake or Liquid. If you are doing business for a profit it will pay you to handle our whole line.

J. L. PRESCOTT & CO., NEW YORK.

WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for **hard wood**. The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in **hard wood** We have combined **two principles in one**, and think we have solved the problem of putting a bit on the market that is suitable for all around use. Price-lists and samples furnished on application.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The advances in prices during a period of only a few months are beginning to make even those profiting the most by the change, feel apprehensive of the future. Orders have been taken at prices so greatly at variance with present quotations, the jobbers begin to fear that a competition among themselves may be generated that will cry a halt on future orders, based on extravagant quotations.

If sales are made, as many fear, based on cost alone, at what prices will they be had in the market when present overgrown stocks are exhausted? Will the manufacturer insist upon any such prices as he considers the current quotations sufficiently indicate? With an unexpected scarcity of material confronting the manufacturer, over-production is tolerably well held in check, for the delivery of orders in hand will need to be well distributed to keep all his patrons in a fairly happy frame of mind, and no one concern may find the complete delivery of all the requirements until the season is nearing its end.

How long can the conditions now confronting the industry be expected to last? A reluctance to purchase at 50 and 100 per cent. advances may be a prevailing feature later in the season, conditions like these being too abnormal to take to generously, when the present sellers again become buyers. This feeling has been behind many speculative purchases of staple lines, and will be all the more difficult to reconcile after these unusual stocks have passed into the hands of the retailer and consumer.

That the prices of the past will speedily become memories only, there can be but little doubt. The country has seemingly renewed its industrial vitality and the impetus given to trade requirements, not only at home, but also abroad, indicates long years of prosperity ahead if the cupidity of the manufacturers through controlling trust influences does not become so exacting as to kill the proverbial goose that lays the golden egg.

By reference to our trade letters from various parts of the country, many of the questions now agitating the relations existing between the jobbers and the manufacturers, will be found in detail; also the increasing sales made as compared with previous years, notwithstanding the new prices militate to some extent against large purchases of goods already quoted at big advances. Trade reports are excellent, and collections generally are better than in years, for spring settlements.

A School for Salesmen.

Hardware has been congratulated from many sources, and has also congratulated itself, upon having furnished in the articles which have recently appeared in this journal under the heading of "The Salesmen's Department," a series of the most able and helpful contributions to Hardware literature which have ever been placed upon record. The author of these papers, Charles W. Emery, of Indianapolis, Ind. has demonstrated himself as thoroughly competent in every respect for the founding of a school of instruction for salesmen—for such these articles have proved themselves to be. He has had wide experience as manager of a department of this character, and has studied the question from every standpoint, and especially that of practical knowledge, and has a thoroughness, a genius for organization, and an executive ability, enabling him to carry his ideas into the completed work of business life. The papers were read before the National Hardware Association, in November last, and were commended in the highest degree, the Association practically placing itself upon record in endorsement of these papers, as a text-book for the learner in the art of selling goods. We feel that not only the readers of *Hardware*, but the entire trade, are under obligations to Mr. Emery for this work, which certainly should be placed in book form as a permanent contribution to the literature of the trade.

Corporate Propulsion.

Constantly increasing industrial trusts, the capital stocks of which represent anywhere from twenty to one hundred millions each, are making many of our extremely conservative financiers nervously apprehensive. These trusts have multiplied rapidly in such lines as are analogous to Hardware and iron and steel production, from the ease by which they can be promoted under conditions now governing the market. The fact that bonus stocks, immediately they are listed in the stock market reach unexampled figures not dreamed of in the preliminary canvassing of possibilities, forms an unanswerable argument that proves too tempting to old conservative companies. Many of such investors have never looked upon the wine of speculation when it is read on the tape of the ticker or in the financial columns.

Whether an ability will be found beyond the pros-

Digitized by Google

perous outlook to keep these large issues of stock alive by prospective dividends, remains to be seen after a year or two have passed, but for the time being everything seems "smooth and serene and altogether too lovely."

Present Conditions.

While it may safely be acknowledged that the position of a large Hardware buyer at the present time is scarcely a happy one, the promises held out by current opportunities intoxicates his judgment by alluring dreams of a future profit. Iron and wire products have advanced so abnormally and so repeatedly that the fears which have pervaded one week, that manufacturers were imposing upon the good-natured credulity of the anxious jobber, become subject the following week for critical comment and serious regret, in the face of new advances more revolutionary as to precedents than any previous changes.

Advances of such extravagant expectations leave the present race of buyers with no established records or precedents with which they are familiar and by which they can judge a safe course of action. In the days of greenback inflation of 1863 and 1864, such things were possible as a well defined wonder when it would all end; which it did with a vengeance at a later date, when, with a thud, products assumed conditions of costs which admitted of no nonsense and left some concerns out of business.

It remains to be seen whether under the advantages gained by trusts and combinations controlling outputs and prices, the markets can be managed with equal justice to all trade interests. The groundwork for industrial expansion no doubt is in the cheapness with which money can be procured; and the fact that but small interest is obtainable on hoarded savings, has made stock speculation present temptations impossible to shun, and made it easy to market industrial securities which, if the bottom facts were sifted, would seem to have but little foundation in the way of real security, if in the future a wave of financial uncertainty should sweep over the country. The firms who avoid the speculative temptation to buy a year's stock for a three months' business, will know hours of ease and content before the year closes, denied to the houses which act to the contrary; houses that see big dividends accruing from larger contracts than their business demands, which later in the season may have to be marketed at unsettling prices, in order to provide the wherewithal to meet the demands of the manufacturers who favored them.

A movement is on foot for the creation of an association among the retail Hardware merchants of North Carolina. Active steps in this direction have been taken by McG. Holliday, of the Dunn Furniture & Hardware Co., Dunn, N.C. It is proposed that a meeting shall be held in Wrightsville some time in July for the purpose of getting things into shape. The movement is a most commendable one, and if the Hardware dealers of North Carolina act with their usual enterprise, the association will be fully launched between now and the coming fall.

An excess of credit is oftentimes not only a resistless motive to a dishonest failure, but also a factor in forcing an unwilling failure. To confine credit to boundaries established by actual needs is one of the best safeguards to debtor and creditor alike.—*F. R. Boocock.*

The Ohio Hardware Association.

True to their record for enterprise, the officers of the Ohio Hardware Association have published in full the proceedings of the fifth annual convention held in Toledo, on February 22–23, 1899. This contains not only these proceedings, but a list of the officers and the dealers represented in this convention, making a most formidable and valuable showing. In reference to this attendance, the following quotation from the report of the secretory, John F. Baker, will be of interest, showing as it does the position taken by the officers, and the loyal support that is tendered by the Association: "Appended hereto is a list of the dealers who were represented at all of the sessions. A glance at the names will show them to be the active and progressive Hardware dealers of the State. Surely, there must be something in an association of business men that should appeal to the dealers of Ohio, who are not members. The discussion of trade topics, the interchange of ideas, coupled with a large acquaintance and the fellowship that exists between our members, all these, must in some degree, tend to moderate the sharp competition that usually exists between dealers, and in its place, beget a fraternal spirit that ought to prevail. An earnest invitation has been extended to the trade of Ohio to join our Association. The secretary, in his annual report for 1899, referring to the results that had been accomplished, said: 'If the Hardware dealers of our State could but know the value of an organization, which in its very nature is bound to be a guardian of their rights, they would quickly come forward and join us, thus protecting themselves and strengthening the Association.'"

In Memory of the Late Charles Daly.

At a recent meeting of the board of governors of the Hardware Club of New York, a special committee was appointed to draft resolutions in honor of the memory of the late Charles Daly, who had faithfully served as a member of the board of governors from the very beginning, until March, 1898, when he declined a renomination. This committee consisted of Messrs. Eugene Bissell, E. C. Van Glahn and R. R. Williams.

At a meeting of the board held on March 18th, these gentlemen reported a series of resolutions which had been handsomely engrossed and bound in an artistic morocco cover, for presentation to the family of the deceased. The resolutions were unanimously adopted, and were as follows:

We, the Board of Governors of the Hardware Club of New York, hereby put on record our sincere sorrow in view of the death of Mr. Charles Daly, and our appreciation of his character and worth. For many years he was prominently and honorably identified with the business interests of the city, as a successful merchant of ability, energy and sterling worth, wise in his judgments, uncompromising in his integrity and love of truth, warm and firm in his friendships.

In the organization and development of this Club he bore an active and efficient part, and was a valued member of its first Board of Governors. In view of his personal qualities and worth, and the sincerity and symmetry of his Christian character, he was held in deservedly high esteem by all who knew him, and many friends, saddened by the tidings of his death, recall the amiable and manly traits that endeared him to them, and the kindliness and uprightness of his good and useful life.

We desire that a copy of this minute be sent to his family with expressions of our deepest sympathy.

The Carlton Hardware Co., Calumet, Mich., have opened a branch store at Rockland, Mich., where they will carry a full line of shelf and heavy Hardware, mining and mill supplies and house-furnishing goods. They will be pleased to receive catalogues from manufacturers and jobbers, sent to their new address at Rockland.

Digitized by Google

Our "Hardware Jobbers'" Number.

As will be seen by special announcement elsewhere in this issue, we will publish on April 10th, 1899, the Ninth Anniversary of the founding of *Hardware*, a special number, which will in every respect equal the magnificent anniversary edition published on April 10, 1898, which was devoted especially to the Hardware Associations of America.

This number is to be called the "Hardware Jobbers' Number," and will take up and discuss everything of importance in connection with the present and future of the Hardware jobbing business, will give histories of the leading houses, and contain a number of special articles by prominent members of the trade.

Among these special features we are permitted even at this early date to announce the following:

A paper by William W. Supplee, Supplee Hardware Co., Philadelphia, ex-president of the National Hardware Association, on "The Future of the Hardware Jobber," or some theme which has relation to this subject.

"The Present and Future of the National Hardware Association," (or a similar theme). By H. H. Bishop, McIntosh-Huntington Co., Cleveland, Ohio, president of the National Hardware Association.

C. B. Lockwood, of the Lockwood-Taylor Hardware Co., Cleveland, Ohio, on "The Ethics of the Hardware business."

We call attention in this issue to the advertisement of the old house of William Read & Sons, Boston—the oldest gun house in the United States, and which has been in business over seventy-five years. They have always made a specialty of strictly good goods, and their reputation extends all over the country. Their line of bicycles for 1899 is very fine, and comprises the medium priced as well as higher, and their wheels have a very heavy sale all through New England especially. It will be of advantage certainly to get their quotations before laying in stocks. They also carry a full line of bicycle sundries. In fishing tackle and guns this house is one of those at the top and their stock very heavy. Surely get their catalogues and judge for yourselves.

The Parker Ice Tool Co., of Worcester, Mass., have recently purchased a factory in South Framingham, to which place they are now removing their plant. The change has been made necessary on account of the increase in their production of ash-sifters. The premises in Worcester, while sufficiently large for their original line of ice tools, was found to be inadequate for the new business.

The Pawtucket Business Agency, Pawtucket, R.I., manufacturers' agents, and dealers in novelties, specialties, etc., would like to receive circulars and price lists of any salable articles in their line.

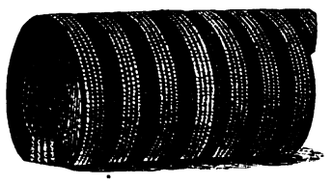
The Boston Belting Co.



We have received from the Boston Belting Co., No. 256 Devonshire Street, Boston, Mass., an artistic, illustrated catalogue, calling attention to their lines of packings, valves, gaskets, diaphragms, etc., some of which we illustrate herewith.

The general excellence of the products of this firm has in the past year made such a good reputation with the

trade as to require but brief mention here. In the preface, the following announcement is made:

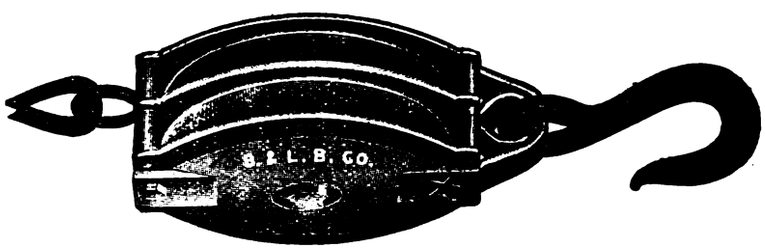
"The various packings, valves, gaskets, etc., herein described, all possess the merit of having satisfactorily stood the test of time. The majority of them have been on the market for many years, during which their uniform quality and reliability have become widely and favorably known. Users of our packings and other products may rest assured that their high standard of excellence will be strictly maintained; and in the future, as heretofore, goods of our manu-

facture will continue to be the most economical and desirable of any offered."

James Bennett Forsyth, manufacturing agent, and general manager of this company, is a man well known and highly esteemed in business circles. His career in this connection is well worthy of study and emulation. He started with the Boston Cutlery Co. thirty-five years ago, in the modest capacity of factory clerk, and, by his sterling ability and strict attention to business, has risen to his present position. His keen interest in the company's progress and its various products has resulted in his personally

obtaining over fifty patents for processes and machinery used by the company in their factories. Many of the ideas originally covered by Mr. Forsyth's patents are now in general use throughout the rubber manufacturing industry. The incalculable benefits to be derived from the services of a man of this character could have but one result. His worth was quickly recognized, and his advancement to his present important post was the natural result of one of nature's inexorable laws—that everything must inevitably find its own level.

He Discourses on Trusts.



"The Man at the Corner Desk" of the Bingham store, Cleveland, Ohio, makes salutation in his March letter to the entire American people, and pays respects to trusts in the following language: "With what startling rapidity we are making history in these piping days of peace at home and of war abroad! The entire industrial and commercial situation is changing, putting on an aspect new and strange, and presenting problems for which there is no precedent to serve as a guide to their solution. The great American nation, always with a penchant for fads and extremes, seems to have taken to trusts and combinations, and we shall now have an excellent opportunity to settle for all time the mooted question as to whether their influence is for good or evil, and to what extent they affect the times. It seems safe to predict that within a decade the pendulum of popular favor will swing as far back towards individualism as it now does toward concentration—or, it may be that the present course is merely a recoil from the independent rivalry of the early '90's, which led to overproduction and general inflation which could only end in disaster. But, however this may be, there is genuine comfort in the knowledge that the present unprecedented demand for goods, and the enormous increase in values of late have their foundation upon a real prosperity, and that the power to control the product in many lines, now vested in the great corporations, lessens the danger of the repetition of the trouble of '93. All the factories are busy, with stocks in hand, but slightly in excess of the quantities ordered, and there is difficulty in obtaining raw material. Some of the iron and steel mills have sold their product until October, and the buyer, whether jobber or manufacturer, who lacked the insight to get his orders placed in time, must suffer with those dependent upon him."

Boston & Lockport Block Co.

The above company notify us of extensive additions to their plant, made necessary by increasing business. A new building of two stories, 40x80 feet in measurement, has just been completed, and a quantity of important machinery, specially designed for prompt production of large orders, has been installed there. Among this is a new method, by which the hooks are completed practically in one process, the iron not being cooled until finished.

Speaking of the business outlook, Mr. Tarbox states that the increase in the demand for special and high class goods is the surest evidence to them of improvement.

The company announce that hereafter their efforts will be directed toward the best trade only, as they believe

quality to be a much more important feature in their product than is price. Many inferior grade blocks are made, which, so far as appearance goes, are equal to the best, but which are very liable to result in great damage, if not loss of life, when under a strain. For this reason the purchaser is at the mercy of the manufacturer, and the latter must produce reliable goods to merit and retain confidence. One admirable point in the construction of the blocks of this company is the fact that the pin penetrates both the strap and the shell, thereby securing the greatest safety against mishaps due to the possible breakage of any minor parts.

HARDWARE'S "Prices Current" are reliable.

NEW ENGLAND IRON & HARDWARE ASS'N.

The annual dinner of the New England Iron & Hardware Association was given at Young's Hotel, Boston, on Tuesday March 21st. If happy faces and genial good-fellowship be omens of business prosperity, certainly the trade represented on this occasion is in a condition calling for congratulation. The philosopher and the poker expert counsel the sons of man to cultivate the perennial smile; but experience teaches that the glad face is more spontaneous, when the fox of dull business gnaws not at the breast. The general feeling of relief, due to escape from several years of business uncertainty, and disturbing elements, and the entrance upon what promises to be the most prosperous era of the business, found vent in a flow of wit and wisdom, that will make this occasion one to be remembered as the most happy in the history of the Association.

The parlors of the hotel began to fill with members and guests at 5.30 P. M. and the reception prior to the dinner afforded an opportunity for the renewal of old acquaintances; and the making of new ones. The Reception Committee, consisting of President H. C. Bangs, Harry L. Doten, Chas. F. Dowse and John T. Boyd, by their indefatigable attention to arriving guests and members, placed every one at ease.

At 6:30 P. M. dinner was served; and over one hundred sat down to the usual excellent menu, for which this hotel is so celebrated. An appropriate blessing was asked by the Rev. Stephen H. Roblin.

In the interest of digestion, and to promote the general feeling of bon hommie, the various courses were punctuated by various gay and patriotic songs; accompanied by an excellent orchestra. "My Old Kentucky Home," "Streets of Cairo," "The Bowery," "Old Black Joe," "Jingle Bells," "Marching Through Georgia," "The Soldier's Farewell," "The Old Oaken Bucket," "We Won't Go Home Till Morning," "Tramp, Tramp, Tramp, the Boys are Marching," and several other equally classical selections were rendered with a vigor that denoted an earnest spirit.

After cigars had displaced the necessities, President H. C. Bangs called the meeting to order; and after a few prefatory remarks, calculated to produce mirth among his hearers, addressed the assemblage as follows:

We are to-day more strongly united than ever before since our organization. The past year has been a year such as we, as a nation and as iron and Hardware merchants, seldom see. One year ago we, as a people, were facing we hardly knew what. We found ourselves in the midst of awful war with a foreign power. We all remember the check upon our business plans, all interest being centered in the great cause of our common country—a few short months, short, perhaps, to us, but how long to our heroes, who can tell?—the cloud lifted, the strain was relieved and we took up business with renewed vigor. We in the iron and Hardware interests, who have been looking in vain for so many years for the old-time prosperity, were wondering if we of the younger generation were not lacking in some of the essentials of our older friends, as all signs of life in the iron and Hardware lines seemed to fail.

Suddenly, we hardly knew whence or how, the sun of prosperity seemed to burst upon us. This sun seemed to rise, not in the East, but in the West, and we trust its going down will not be hurried.

It has been estimated that our membership represents a combined capital of $25,000,000 to $30,000,000. Is there any jobber present who dares to say there can be no weight in combined effort? We expect through association work that the jobber in iron and Hardware will not have his epitaph written until at least the present generation shall have had their halcyon day. We shall then be willing to let those coming after us fight their battles, should the age of iron and Hardware not fully have passed away.

President Bangs closed with a wish that America and England might, as Ambassador Choate expressed it, be rivals in trade, but united for the civilization and uplifting of the world.

In introducing Toastmaster Charles Clark Adams, President Bangs referred to him as the association's "perennial toastmaster," and said they gave him a chance to practice at the monthly dinners so as to have him in trim for the annual event. "He's lately been to Europe," said President Bangs. "Perhaps he can tell us what he went to Europe for."

"I can," said Mr. Adams, rising. "I went for $150 there and back. You can't do that except in winter."

He said in accepting the responsibilities of toastmaster:

I thank you sincerely for your pleasant introduction, and this hearty reception from the members, among whom I count so many warm personal as well as business friends, is especially gratifying to me, as it is the first time I have been able to see so many of your kind faces since my return home from other lands.

Permit me to say, I have tried to travel with open eyes and an inquiring mind, and learned some valuable lessons, as well as drawn some conclusions from our friends abroad, but, as we are to hear from a distinguished gentleman who has studied foreign methods of doing business, it will be at least modest on my part for me to listen to his suggestions before furnishing him with any of my ammunition. I can say this, however. As a nation we are striding forward as young giants in the production and manufacture of the lines of products counted in iron, Hardware, and metals, but I fear we are "but as recruits" in the selling of our wares; certainly, the old "veterans" of commerce on the other side view with astonishment, if not alarm, our nervous, hustling, American methods of literally hurling our goods at them, without much regard for profits. On some other occasion, when we are as a private family, around our own hearthstone, you may be pleased to hear some of my personal experiences.

To-night we are here to enjoy every delight of our annual banquet, and to quote the words of a prominent author "the time to be happy is now."

Mr. Adams then introduced the Rev. Stephen H. Roblin, Chaplain of the Ancient and Honorable Artillery Company, and, in doing so, called attention to the fact with poignant sorrow that he—Mr. Adams—was the only one present who had recognized the divine calling of the clergyman.

Mr. Roblin congratulated the Association on their "Bang"-up President, and their good-looking members.

In the course of his remarks Mr. Roblin referred to the long suffering of the United States in witnessing Spanish outrages in Cuba. He scored, in severest terms, those people who found only good to say of "blear-eyed Spain," and who painted Aguinaldo as a "saint, benefactor and hero," while they had only condemnation for this country, imputing to it the basest motives for all it had attempted to do for humanity.

"What have I to say of destiny? Simply this: If ever it

Digitized by Google

was permitted man to see the handiwork of God written upon the destiny of a nation's life, then we have seen that writing in the movements of the nation in this great crisis. This war of emancipation, to wipe out wrongs for which we were not responsible shall bring us, as one of its blessed rewards, an American commerce, carried in American vessels on all the seas of the earth. There will be no more councils of nations with America sitting in silence. When the other nations gather again to settle world questions, the lion may roar, the bear may growl, and the other animals of the menagerie give forth their vocal sounds, but there shall be the flapping of wings and the eagle's scream to call attention to the fact that we as a people are in evidence for evermore."

Mr. Adams, in introducing Mr. George W. Morse, recalled the fact that the latter had been a captain in the Second Massachusetts Regiment at Gettysburg. This regiment, he said, had held their ground until re-enforced, thus making possible the later and greater victory of the entire body of federal troops.

Mr. Morse said: "I did not expect to act in the role of a hero, but I certainly cannot assume the role of youth, for I am reminded that the battle of Gettysburg was thirty-six years ago." He said he believed the volunteers in the Spanish-American war showed quite as much martial spirit as the Union soldiers at the opening of the rebellion. The men of the North had so long been yielding to the uncompromising demands of the South that they lacked courage, and it was not until the blood that goes back to the English oak and the Irish shillalah was aroused that they really began to fight. The Spanish-American war soldiers had inherited the courage which the war of the rebellion had inspired.

He took strong ground in favor of the present attitude of the United States in the Philippines. He asked General Collins an intricate legal question regarding the standing of Aguinaldo. "If you were putting that question to a witness," replied General Collins, "I should say it was too long," and everybody laughed at the sally.

Turning to the question of an Anglo-American alliance, Mr. Morse urged General Collins to become the prophet of his people in forwarding such a union of Anglo-Saxon peoples.

"I had forgotten that General Collins was born in Ireland," he said. "He is such a good American."

"Perhaps that's the reason," drily remarked General Collins.

"Why should not the noble people of Irish descent," continued Mr. Morse, "that martial people whose destinies are linked with the Anglo-Saxon race, and who have everything to gain by acting in harmony with it, give their support to the alliance, which is now a fact in spirit, if not in actual legislation?"

The toastmaster then introduced the Hon. Patrick A. Collins, late United States Consul-General at London, referring to the esteem in which the latter was held both at home and abroad. General Collins is well known to hold anti-expansion views; and the remarks of some of the former speakers bearing on this subject were seen to bring an occasional flash of fire in his eye. On rising to respond he was greeted with prolonged applause, and met with the same reward at many points throughout his speech.

General Collins said he was surprised at the size of the gathering until he found out that Mr. Adams was toastmaster. He had expected to get some inspiration from the former speakers; but they evidently thought the killing of Filopenos and general bloodshed was the proper way to encourage the iron and Hardware industry. He had always noticed that lawyers, ministers and soldiers spoke much better on subjects of which they knew least (laughter). For that reason he would talk about our foreign commerce. American merchants who wished to sell goods abroad depended on foreign consuls almost entirely. He had found, in his experience, that he was a general agent for American manufacturers. He had found that the way to encourage export was not by killing people; not by showing partiality to any one nation; not by stirring up strife; not by gatling guns and rifles. Commerce must be extended only by commercial methods.

Five years ago Great Britain's only rival was Germany. To-day the United States occupies that position. One of the most potent reasons for our lack of greater success was that the representatives we sent abroad understood only our own language. A foreign agent should not only be conversant with the language of the country; but with the habits, tastes and requirements of the natives. A linoleum factory in Scotland made different designs and patterns for each different section of Europe and America. They knew the tastes of the people. Had they tried to force one pattern on all, bankruptcy would have followed.

We can produce better goods and more of them than any other country; but we cannot sell goods simply because they are American. In addition to merit they must be suited to the requirements of the country for which they are designed—in most cases very different from the style we would use here. Our goods should be quoted in the weights, measures and currency of the country to which they are sent. Circulars describing goods are simply wasted. If a firm is not able, financially, to send a good agent abroad, let it be done by a combination of houses in allied lines. Our consular agents throughout the world were ready and willing to aid, in every possible way, the manufacturer desiring an export trade; but they could not sell the goods. They would answer any questions asked them; would advise as to the best methods of securing the markets; but the real work of selling must be done by capable representatives.

General Collins then turned his attention to the expansion question, saying that God made the Philopenos as such, and that if he were one he would be fighting now. If we held Spain's title to the country we held the title of a tyrant.

The last speaker of the evening was C. S. Van Wagoner, of the Van Wagoner-Williams Co., Cleveland. Speaking from the manufacturers' standpoint, he said that the fact which impressed him most was that, during the past five years, the country had demonstrated its ability to produce much more than it could consume. For this reason it was essential that we should seek markets abroad for our surplus. Americans are very quick to "catch on," and General Collins was right in saying we must adapt ourselves to the conditions of the countries to which we sell. He dwelt upon the great intelligence of all classes here, and the great latent power of the nation. He concluded his remarks by prophesying for this country the greatest conquest in the world's history—a commercial conquest of the world.

The evening's entertainment was concluded by singing "Auld Lang Syne."

Letters of regret, owing to other engagements or sickness, were received from Governor Walcott, Mayor Quincy, C. E. Adams, President State Board of Trade, Robert A. Bait and T. James Fernley, Secretary National Hardware Association.

Too much credit for the success of the dinner and the excellence of the arrangements cannot be given to the energetic secretary of the association, John T. Boyd.

Those who were present were:

The National Sportsmen's Association.

The great Sportsmen's Show, under the auspices of the National Sportsmen's Association, which recently closed, at Madison Square Garden, New York, was certainly one of the best ever given, and it must be gratifying to those whose earnest efforts have brought to such successful issue this great exposition. It is with pleasure that the management announce at this early date that the Sixth Annual Sportsmen's Show will open in Madison Square Garden, New York City, on March 1, 1900. In a circular announcing this to the trade, the management say: "The management have eliminated from this show anything that did not pertain strictly to a sportsman's idea of what a Sportsmen's Show should be, and we feel fully rewarded by the flood of complimentary criticisms from those competent to judge. It is hoped that there will be a unanimous effort on the part of all interested to make every feature of the show in 1900 as attractive as it is possible to make it. If it is your desire to take part in, or be represented in the Sportsmen's Show in 1900, the management would be pleased to be advised at an early date, as space will be rapidly taken up by special features now being arranged for, and space allotted to trade exhibits which will be undoubtedly more limited than at this show."

New Members Hardware Club.

At the regular monthly meeting of the board of governors of the Hardware Club of New York, held on Friday, March 17th, the following gentlemen were unanimously elected to membership in the club:

Charles Howard Daly, No. 325 Broadway.
Edmund D. Gibbs, No. 68 New Chambers Street.
Henry E. Fanshawe, No. 68 New Chambers Street.
Henry W. King, Worcester, Mass.
Joseph Leiter, Chicago, Ill.
Alexander Henderson, No. 18 Vesey Street.
John T. Kelly, No. 104 John Street.
Edward E. Bruggerhof, No. 11 Broadway.
Wolfgang G. Triest, No. 39 Cortlandt Street.
Stephen T. Williams, No. 9 Murray Street.
Joseph Tripp, No. 17 Warren Street.
Edward F. Keating, No. 452 Water Street.
William P. Crary, No. 17 Warren Street.
Schuyler Merritt, Stamford, Conn.
Otto F. von Arnim, St. Paul Building.

A Decision as to Piracy.

We have had on numerous occasions in the past to write and publish articles concerning unfair methods resorted to by some manufacturers in appropriating devices of others and foisting upon the market goods made in imitation of those whose devices are used, and selling the same in such guise as makes them pass as genuine articles. A case in point has recently been brought to the attention of the United States Circuit Court for the Southern District of New York in a suit brought by Mrs. Sarah C. Morrill, the successor in business of the late Mr. Charles Morrill.

The saw sets manufactured by Mr. Morrill have for many years past been well known to the trade, and owing to the perfect manner of their construction and the excellency of the material employed, have well deserved the reputation which they have earned. One of the earlier of Mr. Morrill's patents expired some months ago, and the saw set manufactured under the said patent became common property; several manufacturers immediately proceeded to make saw sets on the same pattern covered by the expired patent. This, of course, they had the legal right to do, and had they sold them openly without any devices thereon or under their own names, Mrs. Morrill would have had no legal nor other ground for complaint. In order, however, to permit their customers to deceive the public and to make them believe that these imitations were genuine Morrill saw sets, some of the manufacturers stamped on the saw set itself the words "Morrill Pattern No. 1," and packed the saw sets in boxes of the identical size and style of Mrs. Morrill's boxes, which having practically the same inscription stencilled on the same, the purchasers who saw the boxes or the saw sets naturally believed that they were buying the genuine saw sets. Mrs. Morrill was compelled to begin suit, and we are informed that Justice Lacombe issued an injunction on February 27, 1899, enjoining the manufacture and sale of saw sets bearing upon the same, or upon any boxes or packages containing the same, the name Morrill or any colorable imitation of her name, device or trade mark; or from advertising or exposing for sale goods which in any way or manner would lead the purchasing public to believe that they were purchasing genuine Morrill saw sets. It is hoped that this decision of Justice Lacombe will have a good effect upon the Hardware trade, and congratulate Mrs. Morrill upon her success in putting a stop to this unfair competition.

The 1899 catalogue issued by Henry Disston & Sons, Inc., Philadelphia, Pa., is a valuable and interesting addition to the literature of the trade. The company show a line of goods not previously made by them, among which may be mentioned rift saws, lock corner cutters, hand ice saws, perforated lance one-man cross cut saw, Pacific and Oregon tooth cross cut saws, Russian pattern cross cut, pit and gang saws, cross cut saw tool, saw setting tool; D-100 hand, panel and rip saws, adjustable compass saw, compass blades, patternmakers' saw, Champion and Tuttle tooth and wood saw blades, wood saws No. 111, Web saw frame, steel duplex and clipper wood saw rods, corn grater, turnip or potato shredder, cabinetmakers' screwdriver, shafting and pocket levels, etc. This catalogue is in style and binding similar to those previously issued by this great concern, but includes a much larger number of pages. It is very thoroughly illustrated, and gives descriptions and list prices of the goods mentioned therein.

We have received from Buhl Sons & Co., manufacturers, importers and jobbers of Hardware, Detroit, Mich., their Spring Circular No. 101 under date of March 1, 1899. This shows in illustration and description a line of goods covering everything that could be needed in connection with the spring trade.

A New Screw Company.

The Providence (R. I.) *Journal* of March 4th contains the following interesting information in regard to the formation of a new screw company: As a direct outcome of the last annual meeting of the American Screw Co., there promises to be an interesting fight in the screw business. An act to incorporate a new screw company was introduced in the State Legislature yesterday, and the men behind it are well known in this industry. This development has created a good deal of talk and much interest is excited as to the outcome.

This new company is to be known as the Rogers Screw Co., and will have a capital stock of $250,000. The incorporators are: Edwin G. Angell, Charles D. Rogers, Gen. Olney Arnold, Henry R. Rogers and Olney Arnold, 2d. As one of those interested yesterday stated it is not a stock jobbing operation, and the public will not be asked to subscribe for a single dollar of stock.

When the policy of the American Screw Co. was changed at the annual meeting, and the management, which had been in charge for so many years, stepped out, there was considerable surprise expressed, for this corporation has a large capital stock and the investors are widely scattered. While a change has been anticipated for some time, it was not expected that the men who had been at the head of affairs would sever their connection with the company, even though their policy was not fully carried out.

Added to this change in management, when President Arnold, Superintendent Rogers—who severed his connection with the company yesterday—and other officers and working heads of department stepped out or were discharged, there is also the new screw company which will enter the field as a competitor now in sight.

A representative of the Rogers Co. stated yesterday to the *Journal* man that there was no idea of starting such a company until after the annual meeting of the American Screw Co. It was the action of that meeting which made such a move possible. The old corporation had been running under heavy competition for some time and had preserved a skeleton army of efficient heads of departments through this period. Their policy had been to keep in contact, so that when better times came the works could be started up in full without the necessity of educating men to take charge of the various departments and branches. The new management had let many of these men go who had a valuable knowledge of the screw business. Thus the Rogers Co. find available a large force of experienced workers.

Then there was an excellent opportunity for a comparatively small plant to start up as a competitor in the screw business. There were the men at liberty to manage its affairs and to take advantage of all the knowledge that they had acquired through years of experience, and to the incorporators it looked as if a highly profitable screw business could be built up where all the machinery installed could be used to the best advantage.

During the past few days the incorporators have been looking for a suitable building in the city. They have inspected several, and have taken measurements of one building which may be utilized. They have also looked at the Granger Foundry shop, with an idea of locating the plant there.

Nothing has been settled as yet in regard to the location of the factory, as it will be built where the best advantages are offered, but there is a strong likelihood of its being started in Providence.

In regards to machinery, it is a proverb in the screw business that "every new screw machine has come to stay." For this reason the managers of the proposed Rogers Screw Co. do not wish to build any new machinery unless compelled to do so. It is known full well that there is a congestion in the screw market and much idle machinery. It is hoped that some of this can be purchased.

In fact, at the last meeting of the American Screw Co. there was a movement to empower the directors to sell surplus machinery, if it was found expedient in their judgment. As is well known, the latter corporation has not been running to its full capacity for some time, and has idle machinery, which the Rogers Screw Co. would like to acquire.

Men prominent in the affairs of the American Screw Co. were seen yesterday in relation to the new corporation, and while they admitted that they had knowledge of the application for a charter, they claimed that further than this they knew nothing about the new company, while admitting that it was doubtless an outcome of the change at the annual meeting.

Interested in the Rogers company are Gen. Olney Arnold and Olney Arnold 2d, until a month ago secretary of the American Screw Co.; Charles D. Rogers and Henry R. Rogers, who have been for many years prominent in the latter company; Mr. Rogers having designed most of the machinery in use to-day; and then ex-President Edwin G. Angell, who for a half-century has been at the head of affairs of the American Screw Co., and who has formulated its policy which has made the concern so successful.

Edwin G. Angell was seen at his residence by a *Journal* man yesterday. He is the largest individual stockholder in the American Screw Co. He stated that he was not in the market to dispose of his holdings. About the Rogers Screw Co. he had little to say beyond the fact that he would be interested in it.

Fly-Time Coming.

The time when "the wicked cease from troubling and the weary are at rest," from the fly standpoint, is rapidly drawing to a close. Soon again the optimistic hum of the persistent but unwelcome sharer of our summer joys and sorrows will roost on our perspiring brow and play tag on our bald spot, and the prospect is that our vicious "swat" with the morning's newspaper will continue, as in prior seasons, to reach the enemy's hunting ground behind time. However, there is still "balm in Gilead," as the supply of Bigelow Wire Fly Killers continues unabated. The reason for the effectiveness of this ingenious device is that the strands of fine spring steel wire, of which it is made, allow the air to pass through, instead of creating a draught to blow the fly out of harm's way, as a solid article will do. The fact that it does not crush the fly and will not soil the place where it is killed, adds much to its desirability. A line to J. F. Bigelow, Worcester, Mass., who is the patentee and sole manufacturer, will bring prices and sample. The bulk of these goods are handled through the Hardware trade.

Awards by the Bissell Carpet Sweeper Co.

Lord & Thomas, the newspaper advertising men of Chicago, have gone over many copies of advertisements submitted by the customers of the Bissell Carpet Sweeper Co., and after a careful examination, have awarded the prizes as follows:

First Prize, $50, to the Van Dyk Furn. Co., Paterson, N.J.

Second Prize, $35, to John S. Sprankle & Co., Altoona, Pa.

Third Prize, $25, to James Ashdown, Winnipeg, Man.

Fourth Prize, $15, to G. B. Churchill Co., Galesburg, Ill.

Fifth Prize, $10, to Orlando Simons, Glencoe, Minn.

Sixth Prize, $8, to H. M. Bixby & Co., Salem, Mass.

Seventh Prize, $7, to John Lennox, Colorado Springs, Colo.

Nearly all the public and private buildings in Habana, Cuba, and suburbs, are connected by telephone.—*Ex.*

NEW GOODS AND SPECIALTIES.

Champion Co.'s Water Filter.

The Champion Safety Lock Co., No. 95 Woodland Avenue, Cleveland, Ohio, are marketing the water filter here shown. The filter embodies new and desirable features.

The provision for cleaning is such that the filter can be thoroughly cleaned without taking it apart, and the operation is so simple that it is performed in less than one minute. The filter consists of an outer casing, enclosing a filter tube and an automatic cleaner. The filtering medium is a thick, fine, natural stone tube, impervious even to microscopic particles of solid matter, and to all organic germs. The cleaner consists of a strip of very hard stone, with a metal back, which extends along the entire length of the filter tube and is pressed against it by the action of the automatic cleaner adjuster. In cleaning, the filter

tube is revolved by turning the filtered water outlet around several times, and the cleaner stone pressing against the filter tube causes its entire surface to be thoroughly cleaned. The inlet and flush valves, which are at the bottom, are both open wide to allow what has been cleaned off the filter tube to be flushed out. The accompanying illustrations show a usual and simple manner of attaching these filters. Upon application, the manufacturers would be glad to quote prices and mail their catalogue, which illustrates and describes their line of filters, embracing five styles and fourteen sizes, and, as they say, "meeting the demand for a perfect germ proof filter."

The Lane Store Ladder.

We present herewith a general view and details of Lane Bros. Co.'s Ball Bearing Store Ladder, advertisement of which will be found in another colum of this issue. One of the important features of this equipment lies in the fact that the rail is approximately the same width as the thickness of an ordinary store shelf, and being equipped with adjustable brackets, when the latter are fastened to the uprights and the rails laid in them, neither the rail nor

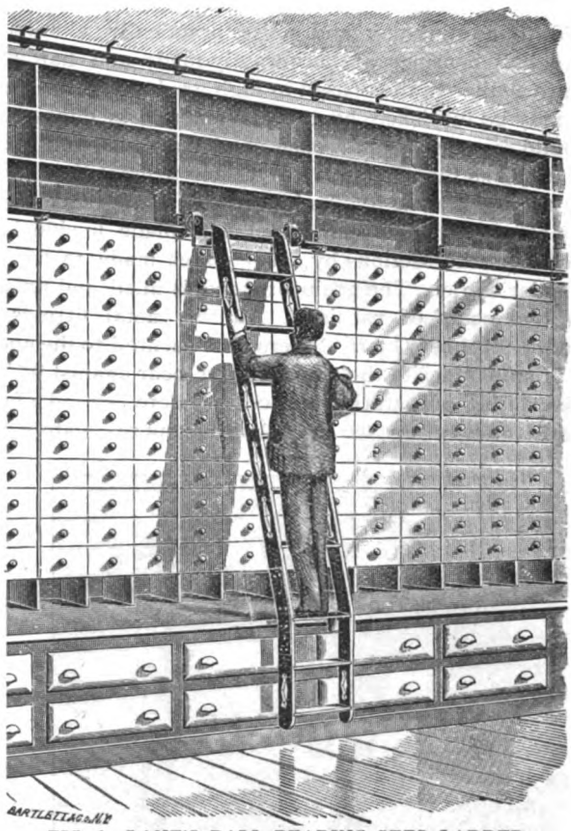

FIG. 1.—LANE'S BALL BEARING STEP LADDER.

the brackets interferes with the utility of the shelf room. The ladder carriage proper is constructed entirely of steel and fitted with ball bearing wheels having a fibre tread. There is no rail necessary on the counter or floor, but rubber guard rollers are secured to the lower part of the ladder in proper position to bear against the edge of the counter ledge. We understand the company sell the track and fixtures separately, or build the ladder to order and furnish the equipment complete, as customers may desire. In further mention of this article, the company say: "A Rolling Step Ladder has become almost a necessity in the modern well appointed store. The safety and convenience it affords in reaching goods is at once apparent. The Lane Ladder may be erected in almost any store without altering the shelving or obstructing the floor or counter in any way. 'Track For Shelving' has movable brackets that are fastened to the uprights wherever they may be, and at such height that the rail when laid in them and fastened,

Digitized by Google

will come directly in front of one of the shelves; thus no available space is occupied. 'Ceiling Track' is furnished for our ladders that can be readily secured overhead if desired. The 'Ladder Carriage' is mounted on ball bearing wheels which have a fibre tread; therefore friction is reduced to a minimum and noise practically eliminated. These ball bearings are accurately made and hardened, and are similar to those used in high grade bicycles. Ladders may be furnished by the customer if he chooses, or, we build to order to suit each particular case, and attach all fixtures so the customer has merely to erect the rail and hang the ladders on it. Ladders built at the factory are made of ash or oak. Where a bend is made in side bars, we connect the sections by steel plates made to fit each particular angle. The grain of wood is filled and finished with two coats of varnish. All the metal fittings are tinned. 'Rubber Guard Rollers' are secured to the underside of step opposite the counter, and bear against it. No track or other preparation is necessary here beyond a fairly smooth and even surface that shall be approximately parallel to the supporting rail." Further information can be obtained by addressing Lane Bros. Co., Poughkeepsie, N.Y.

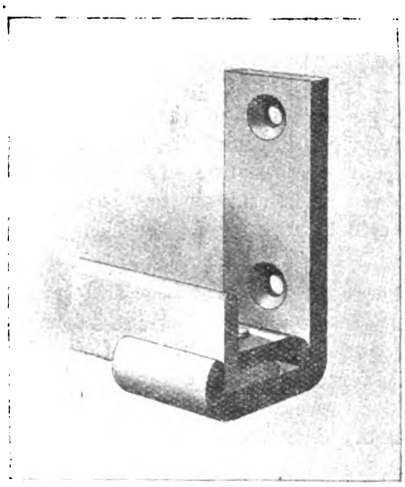

FIG. 2 - TRACK FOR SHELVING.

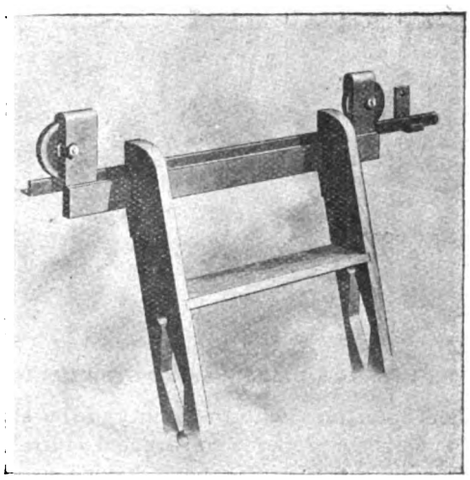

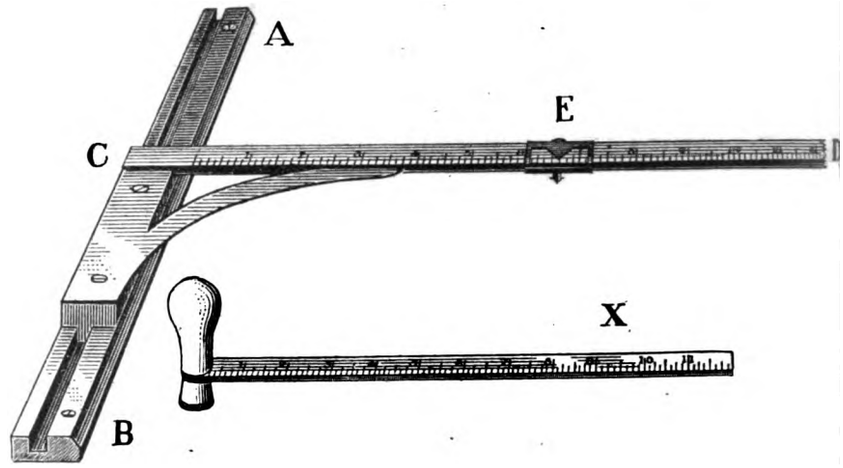

FIG. 3.—LADDER CARRIAGE.

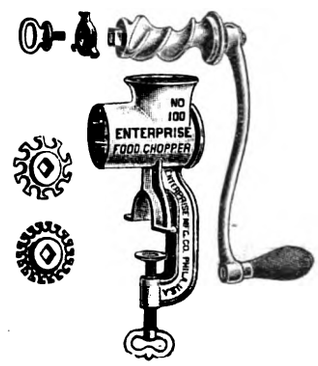

A New Idea in Glass Cutters.

We illustrate herewish the "Accurate" Glass Cutter now being manufactured and put on the market by the Dana Hardware Co., Nos. 22–32 Pearl Street, Boston, Mass. As will be seen from the illustration, the process is reduced to mechanical accuracy. The following claims are made for the device: First—More accurate than cutting with hand cutter and straight edge, as it insures an absolute rectangular cut. Second—It dispenses with the measurements on each end of your light, as you set your cutter right on the measurement you want. Third—Diminishes the risk of breaking, as you do not have to press a straight edge down hard on your glass to keep it from slipping. Fourth—You don't have to wait for the only man in the shop who can cut glass. Anybody can use this tool without previous practice. Fifth—It is a time-saver. If you have many lights of the same size to cut, you have to set it on the mark but once. Sixth—It is portable. It can be carried to a job and set up very readily, as all that is necessary to set it up is a level place and three small screws. Seventh—In connection with the straight cut is an attachment using the same cutter whereby circular cuts can be made. This is something which will appeal to any one knowing the bother of fitting circular-top front door lights, etc. Eighth—Simplicity. Nothing to get out of order. The track comes in three feet lengths, and six wheels are furnished with each cutter. The price is low, compared to the price required for a diamond tool, being listed at $3. Extra wheels are furnished by mail at the rate of eight for twenty-five cents.

The Enterprise Food Chopper.

The latest production of the Enterprise Mfg. Co. of Pa., Philadelphia, Pa., is a Food Chopper No. 100. The claim is made that "its wearing qualities are very superior and it will chop more and do better work than any food chopper on the market." As shown in the illustration, there are three cutting knives, cutting fine, medium or coarse, as may be desired, and when cutting fine, the product is uniformly fine; and when cutting medium, it is actually medium, and when cutting coarse, it is absolutely coarse. In either case pieces or particles are of uniform size and thoroughly chopped. A machine of this kind is especially adapted for family use, and should, therefore, have a very wide field for its sale. All of the goods manufactured by the Enterprise Mfg. Co. are of the very best in their respective lines, and judging by the merits of their other goods, it is fair to presume the Food Chopper will add new laurels to their reputation.

Two New Hooks.

The Withington & Cooley Mfg. Co., Jackson, Mich., have just placed upon the market two new hooks, one of which they call the "Dent," and the other the "Ser-

Digitized by Google

rated.' They have found in recent times considerable demand for a corn hook with the serrated edge blade. To meet this demand they have introduced the two hooks above named. They have fitted one blade to the Acme handle, and of this combination of hook they say: "We believe it, honestly, to be as near perfection as it is possible to obtain. The workmanship is excellent, the ma-

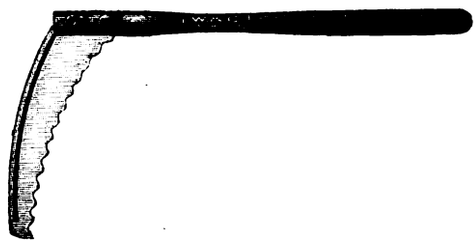

FIG. 1.—SERRATED.

terials the best that we can secure, and the cutting edge absolutely irresistible." They have a method for producing the edge which enables them to put it on the market at a reasonable cost, and this being so, is considerable in its favor. They add: "This hook embodies all the features that any hook can possess. It has the nicest hang of any tool we ever saw, the balance is perfect, the adjustable features will fit any notion the user may have, as well as allowing the hook to close up for convenience in packing. We ribbed this blade as well as the Acme, which enables us to use a light blade and still have all the stiffness of a heavy and clumsy one, and lightness is a great feature in a corn cutter, which requires a rather tedious wrist motion

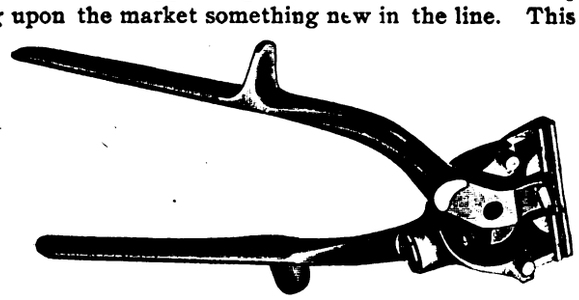

FIG. 2.—DENT.

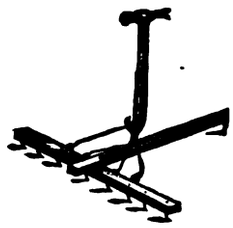
to perform the work of cutting corn. This particular hook may cost a trifle more than the ordinary ones, but it is so substantially and strongly made that it will outlast four or five of the ordinary style. To meet a popular demand we present the serrated hook which we shall offer to the trade at a good margin of profit where their customers are not able to appreciate and pay for the better article. Our complete line now is composed of six different hooks, all at different prices, which entitles us to claim being headquarters for corn hooks."

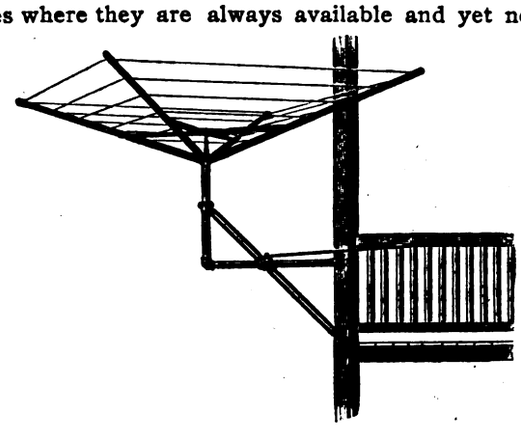
Ball Bearing Clipper.



The Coates Clipper Mfg. Co., Worcester, Mass., are placing upon the market something new in the line. This im-

provement consists of a Ball Bearing Clipper, which, as will be seen from the illustration, almost entirely does away with friction. The balls are held firmly by a hardened steel case retainer. Anothor important improvement in this clipper is the use of a pull-spring which works parallel to the handle and the tension of which can be adjusted to suit.

The Excelsior Carpet Stretcher.



In this connection we show an illustration of the improved Excelsior Carpet Stretcher and Tack Hammer combined, manufactured by Richard W. Montross, Galien, Mich. The machine is compact and complete in every particular, and is practical and efficient. It weighs only one and one-half pounds, and it is so constructed that it can be folded up into a small compass. In operation it can easily be planted in any required position where it will stretch the carpet beautifully and evenly and hold it secure

while the operator detaches the hammer and drives the tacks. This little machine is designed to save labor, time, temper, sore fingers and backaches, and it is a great preventive of profanity. Women appreciate its worth at a glance. Dealers should write the manufacturers for full particulars.

Hill's Balcony and Champion Clothes Dryer.

The popularity of the above lines, manufactured by the Hill Dryer Co., Worcester, Mass., is evidenced by the fact that there are now over one hundred thousand in use. The ease with which the Balcony Dryers adapt themselves to places where they are always available and yet never in

the way, is doubtless one of the secrets by which they have secured and held the favor of the housekeeper. As will be seen from the illustration, their construction permits their being placed where they can be reached without difficulty and where they do not interfere with the balcony or window space. The Champion Dryers are designed for yard use and come complete and ready for setting up. Refined malleable iron castings, galvanized to avoid rust, are used in the construction, while the wood used is of selected stock. Both forms may be folded up and taken in when not in use.

The Vulcan Hardware & Electric Co., S. Wilkening, proprietor, dealers in Hardware, tools and cutlery, have removed from their old location, No. 164 East Eighty-fourth Street, New York, to No. 751 Amsterdam Avenue. They announce that they do mechanical and electrical bell work in all its branches, and that "Yale locks are a specialty."

"Baby is so fond of books!"

"Is she, indeed?"

"Yes, you should see her. She's got so she can snatch a page out with either hand."—*Cleveland Plain Dealer.*

Annual Meeting Hardware Club of New York.

The annual meeting of the Hardware Club of New York was held on March 18th, at the Club rooms, there being a large attendance, and those present showing an unusual interest in the present status and future fortunes of the Club. It may be said here that the annual reports presented by the president, secretary, treasurer and finance committee, show the Club to be in a prosperous condition in every respect, and there were many commendations on the excellent management of by the board of governors which had produced this result.

The president, Peter McCartee, occupied the chair. Thomas F. Keating, the treasurer, read his annual report, and was followed by the secretary, James H. Kennedy, who showed that the membership of the Club at present stood as follows: Resident membership, 573; non-resident membership, 126; total, 699.

Webster R. Walkley, chairman of the finance committee, read a detailed report of the financial condition of the Club, after which the report of the nominating committee was presented. The gentlemen who were proposed for election to the office of governor to serve for the ensuing three years, were all incumbents of the office to which they were named, having served in this capacity from the beginning of the Club, with the exception of Robert Sickels, who was nominated to fill the vacancy caused by the absolute refusal of Peter McCartee to accept the nomination for another term—said nomination having been unanimously tendered him by the committee on nomination. That committee consisted of the following named gentlemen: William G. Smythe, chairman; William P. Mason, Robert Sickels, Thomas H. Taylor and Frederick G. Draper. The names of the gentlemen proposed for governors were as follows, and there being no other ticket in the field, they were declared unanimously elected on closing the polls: George H. Sargent, Robert H. Swayze, Arthur G. Sherman, Edward C. Van Glahn and Robert Sickels. William Bishop and Frank J. Oliver were appointed tellers.

There were two amendments before the Club, one of which was for the increase of the initiation fee from $50 for resident and non-resident members to $100 for resident and $50 for non-resident, and the other was for the charging of but one-half of the six months' dues when the applicant should be elected to membership after the expiration of one-half of the term for which said dues were charged. The first amendment was lost, and the other was carried.

Frederick G. Draper made a few remarks eulogistic of the record made by Peter McCartee as president of the Club, and suggested that some action should be taken to place upon the permanent record an attestation to the appreciation of this service on part of the Club. The president attempted to rule this matter out of order, but was overruled by the Club, and he thereupon called Mr. Keating to the chair. Mr. Draper renewed his suggestion, and on motion of Webster R. Walkley, Frederick G. Draper, Charles Putzel and Frank E. Conover were appointed a committee to prepare resolutions expressive of this feeling on the part of the Club, and the secretary was instructed to place the same upon the permanent records of the Club. The resolutions prepared by the committee in accordance with this direction, are as follows:

Whereas, Mr. Peter McCartee, having declined to accept a renomination on the Board of Governors of the Hardware Club, leaves the presidency after having served more than three years as the chief executive of this Club in a most able, capable and efficient manner; be it, therefore

Resolved, That the members of the Hardware Club, convened at its annual meeting, express to Mr. Peter McCartee, its retiring president, their full and complete appreciation of the very able and efficient services performed by him during his term of office, also for his ever courteous and genial manner alike to members and their guests, and for his untiring energy in placing this Club in the front rank of down-town clubs in Greater New York; and, further

Resolved, That these expressions, upon a unanimous vote, be spread upon the minute book of the Club in recognition of his labors in furtherance of the interests of the Club.

ELECTION OF OFFICERS.

The annual meeting of the board of governors for the election of officers for the ensuing year was held on the evening of Thursday, March 23d, with President Peter McCartee in the chair. The following gentlemen were unanimously elected to the offices named:

President, George H. Sargent.
Vice-President, Edward C. Van Glahn.
Treasurer, Thomas F. Keating.
Secretary, James H. Kennedy.

Mr. Sargent, the president-elect, who is known the world over as the head of the great Hardware house of Sargent & Co., New York and New Haven, has served as vice-president during the past year, and his election will be eminently satisfactory to the members of the club and the entire trade.

Mr. Van Glahn, the new vice-president, is the active partner in the firm of White, Van Glahn & Co., New York, and has been one of the most active and energetic members of the club from its beginning, serving with great efficiency as a member of the house committee, and in other capacities. The treasurer and the secretary are their own successors, Mr. Keating having served in his present capacity from the organization of the club, while he and Mr. Kennedy have both been members of the board of governors from the very beginning.

A SURPRISE PARTY FOR MR. M'CARTEE.

Immediately after the adjournment of the business meeting, President Sargent took ex-president Peter McCartee by the arm, and led him into one of the dining rooms, followed by the other members of the board. Mr. McCartee was totally unprepared for the scene that revealed itself to his vision, in the shape of a great circular table most artistically adorned, while the room was trimmed with plants and flowers in a most artistic manner. The ex-president here discovered that the gathering was not only an annual meeting, but a testimonial from the board of governors to himself. The matter was a total surprise to Mr. McCartee, and the event in its entirety was one of the most successful in a social way ever recorded in the Hardware trade. The arrangements had all been in the hands of Alfred D. Clinch, which was a guarantee, of course, that everything was done in a first-class manner.

A specially prepared programme was found by the plate of each of the gentlemen present, upon which was the following inscription: "Complimentary Dinner to Peter McCartee, president of the Hardware Club of New York, 1895–1899. By the Board of Governors." On the first inner page was found a fine portrait of Mr. McCartee, and upon the next page a very ingenious acrostic, which is here reproduced:

Principle is ever his motto, not expediency.
Everything handsome about him.
Touched nothing that he did not adorn.
Elegant but not ostentatious.
Reputation is more valuable than money.

Much may be made of a Scotchman if he be caught young.
Circumstances are the creatures of men.
An honest man's word is as good as his bond.
Rather be right than be President.
Then he will talk! How he will talk!
Every inch a king.
Everything comes if a man will only wait.

When the time for speech-making had arrived, Mr. Clinch arose, and in a very felicitous manner, and in behalf of the governors, presented to Mr. McCartee an elegant solid silver bowl with ladle, upon which was the following inscription: "Presented to Peter McCartee, President of the Hardware Club of New York, 1895–1899, by the Board of Governors, March 23, 1899."

Mr. McCartee was entirely overcome with this expression of regard, but managed to pull himself together, and made

Digitized by Google

a most happy and appreciative speech. He was followed by the other gentlemen present, all of whom spoke of the retiring president in the highest words of eulogy, all of which were felt to be deserved, and the occasion, all in all, was one which showed not only the high regard in which the retiring president is held, but also the rare feeling of fraternity and good will that prevails among the officers and governors of the Hardware Club of New York.

Sickels & Nutting Co's Catalogue.

Sickels & Nutting Co., No 35 Barclay Street and No. 40 Park Place, New York, have issued their complete catalogue for spring trade, which forms a volume of nearly 300 pages, filled with illustrations of the goods referred to in its pages, which in a commendable compact form, show a large variety of all the goods necessary at the present time to constitute the stock of an up-to-date Hardware store. This includes in addition to a well selected display of shelf and builders' Hardware, a large assortment of agricultural implements, axes and edge tools, and housefurnishing Hardware, which forms one of the most desirable jobbing stocks to be found in this vicinity. Being agents for a number of manufacturers enables them to give bottom prices on large lines of their special products, which makes this catalogue a very desirable one for the dealer to have within reach. It will be forwarded to the trade upon request.

Fifty Dollars Reward.

For the capture and conviction of the person using the name of J. L. Prescott & Co., and signing same to drafts, without authority, we will offer the above reward.

Messrs. J. L. Prescott & Co., manufacturers of Enameline Stove Polish, have been annoyed by a certain person, who represents himself as their salesman, and pretends to take orders for Enameline, and then makes a small purchase, offering a draft for a larger amount, receiving the balance in cash.

To protect our patrons, we respectfully solicit your kind endeavors to notify your trade as quickly as possible to prevent this fraudulent representation.

When remitting to our salesmen, we always send our regular lithographed check, as we never allow our representatives to make drafts on us.

J. L. PRESCOTT & CO.

The Easy Bolt Clipper.

H.K. Porter, No. 66 Beverly Street, Boston, Mass., manufacturer of the "Easy" Bolt Clipper, finding that increasing business makes more commodious quarters necessary, has completed the plans of a new factory. This will consist of a pretentious building of three stories, with inside measurement of 40 feet by 88 feet.

The plans have been prepared with a special view to accommodating the machinery used in the manufacture of this product, and building operations will begin at once. The new premises are expected to be ready for occupancy early in the fall. Mr. Porter reports business during 1898 as excellen , with a decided improvement in the outlook for the present year.

"Dixon's Teacher's Note Book." This is the title of a very interesting and artistic monograph issued by the Jos. Dixon Crucible Co., Jersey City, N. J., the manufacturers of Dixon's American Graphite Pencils. It is needless to say that the work is very artistic in every sense, and the information that is contained therein, taken in connection with the blank pages for the use of the teacher, makes it a most valuable adjunct to any modern schoolroom.

There are in Cuba ten railway companies, with more than 1000 miles of main line and many branches.—*Ex.*

A Deserved Honor for Mr. Fernley.

T. James Fernley, known everywhere as the efficient secretary-treasurer of the National Hardware Association of the United States, has recently been honored in a manner of which any man might be proud. The Philadelphia High School, which is equalled by no institution in that city, save by the University of Pennsylvania, is an institution which is authorized by the State of Pennsylvania to confer degrees, and is practically the city's college, has invited him to a place on their lecture staff, he being one of the two representatives of the business community thus honored. The other gentleman is John H. Converse, president of the famous Baldwin Locomotive Works.

The Philadelphia High School has a department of commerce, the object of which is to fit students for commercial life while they are at the same time obtaining a classical education. Mr. Fernley, by his wide business experience, his culture, education, and general knowledge of men and affairs, is eminently fitted for a position of this character. He is a thinker and a writer, and the lectures which he will deliver in connection with this honorable office will have a practical value, which it would be difficult to overestimate. The Hardware trade will feel honored because of this honor for one of its most prominent representatives.

Annual Meeting Southern Jobbers.

The ninth annual convention of the Southern Hardware Jobbers' Association will be held at Atlantic City, N. J., on the 14th, 15th and 16th of June, 1899. Further particulars as to this gathering will be given at a later date.

The Maltby, Henley Co., No. 20 Warren Street, New York, make announcement, under date of March 1st, that they have sold to the Smith & Hemenway Co., No. 20 Warren Street, New York, their entire Hardware business, good will, trade marks, etc., and have turned over to them all unfilled orders for Hardware. They further announce that the Maltby, Henley Co. will still continue, devoting their entire attention hereafter to the silver-plated ware and kindred lines, and steel tin spoon branch of their business.

The Lavigne Automatic Mfg. Co. has been incorporated in New Jersey, for the purpose of manufacturing automatic machinery of all kinds. The capital stock is $150,000, and the incorporators are: Benjamin Eastwood, of Paterson; John J. Tower, of New York, and William H. Cole, of Jersey City. The officers of the company are: Benjamin Eastwood, president; John J. Tower, vice-president, and William H. Cole, secretary and treasurer.

J. F. Bigelow, Worcester, Mass., announces a decided increase in export of the Bigelow Wire Fly Killer. Although the season is just opening, shipments aggregating fifty gross of these handy weapons of defense against the ubiquitous fly have gone forward, and the indications are that the popularity of this article abroad is steadily increasing.

The Magnolia Metal Co., whose headquarters are at Nos. 266–267 West Street, New York, have removed their Chicago office from the Traders' Building to the Fisher Building, No. 281 Dearborn Street, where they will hereafter be found ready to supply Magnolia Metal to the entire world of the Western States.

Dear Father—wrote the student—please send some money for a new book.

The new book had no leaves, and was easy to carry in an inside pocket.—*Boston Courier.*

Review of the Markets.

Hardware: There is still maintained a satisfactory strength in the conditions governing the general markets; no especial weakness whatever being observed, that would lead a buyer to believe lower prices than those quoted could be obtained by delay. The principal difficulty is to obtain a sufficiency of the goods already ordered, to feel there will be no failure in filling the entire order in due season. Complaints are made that some small concerns are endeavoring to repudiate some early orders, the present quotations on the same goods accepted, only too readily, being some twenty-five per cent. higher. There are some lines of goods that have not undergone any radical changes in prices, through the prevalent fear that prices may be unduly cut, by the jobbing trade using as a base announced prices at which no stock orders had yet been taken. This is a season when the manufacturers, being full of orders, prefer that the retailers' requirements should go toward increasing the sales of the jobbers, especially when the chance of their being attended to promptly is more certain in that direction.

Wire Nails: It would seem as though the manufacturers controlling the output and prices of this staple line, believe the limit of advance in price is not yet reached. Since our previous issue, the American Steel & Wire Co. have made another advance of 15 cents per keg. The prices now quoted the trade are for delivery at ordering destination, freight being added from mill delivery points, Cleveland or Pittsburg. There are, of course, a number of orders for nails, booked at the mills for future delivery, by jobbers in carload lots, and at prices all the way along at the different changes since December 27th. That this state of affairs may affect the jobbing trade at a later date is apprehended, nails usually becoming the keynote of business when the jobbers' travelers set out to compare notes with the retailers of his territory. We quote as follows, f.o.b. Pittsburg or Cleveland, the prices being graded as indicated: To jobbers handling carload lots, $2; less than carload lots, $2.02½. To retailers, in carload lots, $2.05; less than carload lots, $2.15. New York market is indicated in the following quotations: Carload lots on dock, $2.20; small lots from store, $2.40.

Cut Nails: The market for cut nails is strengthened materially by the conditions of the wire market. Prices, while varying between the mills, are stronger and higher than have previously obtained; and the difference being still largely in favor of cut nails as compared with its more active competitor, may be the means of an increased distribution in sections where their increased holding advantages would commend their more extended use. New York prices may be quoted as follows: Car load lots on dock $1.75. Small lots from store $1.85.

Barb Wire: As an advance in price was made since our previous issue, of 15 cents, the present quotations may be quoted as follows, f. o. b. Pittsburg or Cleveland: To jobbers in carload lots, painted, $2.10; galvanized, $2.50; to retailers, carload lots, painted $2.15; galvanized, $2.55; less than carload lots, painted, $2.25; galvanized, $2.65. New York prices, carload lots on dock; four point galvanized, $2.65. Small lots from store $2.75. Painted 40 cents less.

Smooth Wire: Being subject to the same conditions governing advance in prices as other wire products of similar character, the price over previous report has advanced 15 cents, so that the market is now represented by the quotation for plain wire of $1.85 base f.o.b. Cleveland or Pittsburgh to largest buyers, single carloads, $1.90, for plain and $2.30 for galvanized. Less than carloads, $2. f.o.b. Cleveland or Pittsburg, galvanized, $2.40. Notwithstanding the rapidly fluctuating prices that govern this commodity, an unprecedented business is being done, and difficulty is experienced by manufacturers to whom this is necessary material, in obtaining promptly a full supply for their current wants.

Shovels and Spades: The Association of Manufacturers of Shovels, etc., at a recent meeting decided upon an advance of 75 cents per dozen; to take effect at once. This action on their part has strengthened the market perceptibly, and the jobbers are making an effort to obtain the advance wherever possible.

Spring Balances: Under date of March 15th, the following announcement is made:

To the Trade: In consequence of the continued advances in cost of raw material, as well as the extreme low prices at which Spring Balances have been selling, we are compelled to cancel all quotations on these goods.

New prices will be furnished on application.

JOHN CHATILLON & SONS.

The new prices announced by the above firm are as follows:

Class A, Light Straight Balances	discount,	50%
" A1 and A2, Heavy Straight Balances	"	40&10%
" B, Ice Balances.	"	50&10%
" C, Circle Balances	"	50&10%
" D, Balances, with large dials	"	35%
No. 2 Scale Beams	"	50%
No. 1 "	"	40%

Wood Screws: Under date of March 21st, the following advanced prices on Iron Wood Screws have been announced by the manufacturers:

Flat Head Iron	Discounts,	85%
Round Head Iron	"	82½%
Oval Head Iron	"	82½%

Subject to change of the market without notice. Terms, Cash within 30 days. No prices guaranteed.

Binder Twine: The present prices on binder twine are as follows:

White Sisal, 500 feet to pound	9 cents
Standard, 500 feet to pound	9 "
Manila, 600 feet to pound	9¼ "
Pure Manila, 650 feet to pound	10¼ "

Prices are for carload lots, f.o.b. Eastern factories. An advance of ¼ cent per pound is charged in less than carload lots.

Cordage: The present prices on manila and sisal rope are represented by the following:

Manila, 7-16 inch and larger	per pound,	9¼	cents
" ⅜ inch.	"	9¾	"
" ¼ and 5-16 inch.	"	10¼	"
Sisal, 7-16 inch and larger.	"	8¼	"
" ⅜ inch..	"	8¾	"
" ¼ and 5-16 inch.	"	9¼	"
" Lath Yarn.	"	7¾	"

Prices are for carload lots, f.o.b. Eastern factories. For less than carload lots the customary advance of ¼ cent is charged.

Horse and Mule Shoes: The Rhode Island Perkins Horse Shoe Co., Providence, R. I., under date of March 15th, announce the following changes in prices:

To the Trade: The present prices for Horse and Mule Shoes of our manufacture are as follows, viz.:

Perkins Extra Light, Light, Medium and Heavy Pattern Horse Shoes, No. 2 and Larger	per pound,	3	cents
" Long Heel Shoes, No. 2 and Larger	"	3	"
" Favorite Shoes, No 2 and Larger	"	3	"
" Iron Countersunk Shoes, No. 2 and Larger	"	3	"
" Snow, Road or Trotting Shoes, No 2 and Larger.	"	3½	"
All above Shoes No 1 and Smaller, 3¼ cents per pound.			
Perkins Mule Shoes, No. 1 and Larger	per pound,	3	cents
" o and oo Mule Shoes	"	4½	"
" Jack Shoes	"	5½	"
" X. L. Steel Horse Shoes	"	3½	"
" Cow Boy Shoes	"	4	"
" Cow Boy Shoes, Plain	"	3½	"
" Calked Shoes	"	3¾	"
" Calked Mule Shoes	"	4	"
" Thin Steel Countersunk Shoes, No. 1 and Smaller	"	4¼	"
" " " " No. 2 and Larger	"	4	"
All above subject to freight equalization to all points.			
Perkins Light, Medium and Heavy Toe Weight Shoes	per pound,	4¼	cents
" Extra Light and Light Side Weight Shoes	"	6½	"
Goodenough Army and Heavy Patterns	"	3¼	"
Winter Pattern	"	3¾	"

Freight on board cars at Valley Falls, R. I. No freight allowance.

Terms of payment: Cash in thirty days from date of invoice, or two per cent. discount for cash in ten days. Interest at six per cent. to be added to all accounts not paid at maturity. We decline to book orders for future delivery, except at prices ruling at time of shipment. Strikes of operatives or suspension in case of fire will relieve us from prompt fulfillment of contracts. Shoes assorted as required. RHODE ISLAND PERKINS HORSE SHOE CO.

Screen Doors and Window Screens: We have received the following, which indicates the present condition of this industry:

Fenton, Mich., March 13, '99.

Gentlemen: All quotations on Screen Doors and Window Screens are hereby withdrawn.

This action is made necessary by advances in cost of Lumber, Wire Cloth and other materials.

We shall, of course, complete our unfilled contracts, but give this timely notice so that our customers may secure better prices for what they sell beyond the amounts contracted for.

We shall be pleased to submit prices at any time for immediate acceptance. Yours very truly,

THE A. J. PHILLIPS CO.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of March 15th, quote as follows: In lots of less than 5 barrels, 46 cents per gallon; in lots of 5 barrels or more, 45 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw; Calcutta oil, 56 cents per gallon. Above prices are subject to change without notice.

THE PHILADELPHIA TRADE.

Just now, the most pressing need is some bright and warm weather. March is almost at an end, but the cold and wet weather have prevented farming operations to a large extent, and somewhat retarded trade. Perhaps, however, it is just as well that the trade for seasonable goods has been kept back, as there is almost a famine on wire cloth and some other kinds of spring goods, and orders are very difficult to fill and the late season will probably aid both jobbers and manufacturers to fill their orders more satisfactorily.

The steel and iron markets are still in an excited state, and, for sometime, it has not been a question of price but of ability to deliver. Already, we hear of a number of factories having great difficulty in obtaining raw material—in fact, some shut downs are reported in consequence.

Prices, as might be expected, are still advancing, and conservative manufacturers who have, until now, refused to take part in the advance are feeling obliged to fall into line, while, in a number of cases, second advances are being reported. It is generally recognized the price of Hardware has been too low and unremunerative and it looks as if quotations would be considerably higher in the near future.

The demand for general hardware continues good—trade being in excess of the same period last year, with prospects of a very material advance for the next few months.

Collections are fair, and the general increase in wages is bound to have a strong effect on the purchasing power of the community, and, at present the outlook is for a good and lively spring trade. BIDDLE HARDWARE CO.

THE BALTIMORE TRADE.

The spring trade, like the latest spring bonnet, is lovely, and there is a great deal of both in evidence. Collections are on the flood tide, and we might temporarily lead a charmed existence were it not for the aggravations occasioned by certain manufacturers respecting the filling of contracts we have placed with them. Whilst we are satisfied from advices received that in some cases the manufacturer is excusable, in others there is a flagrant disregard of all precedent. One manufacturer in a small town in a neighboring State whose representative accepted, in November last, in writing, or order for 300 rolls of screen wire cloth for the coming season's requirements, and to be specified as wanted, had the nerve to inform us a few days since, when we sent them the first specification applying on contract to be shipped April 1st, that we had no contract with them, that their traveling salesman was not authorized to accept contracts without their approval, and that their output for the season is entirely sold. This communication, besides suggesting an advance in wire cloth, gives the jobber a status of a case that will forcibly remind him of the calibre of the manufacturer in question.

A manufacturer of steel goods is also deserving of censure, as we have positive knowledge of a difference between our quotation and that recently made one of our competitors on the same line, when the manufacturer's letter advises us that we have received the lowest quotation they have made any one, and if the other fellow got a lower price, it was in error. Errors of this nature naturally excite suspicion, and keep the jobbers on the alert to trap the foxy. If it is necessary to purchase a stated quantity to secure the lowest price, it would be only fair to let the jobber

Digitized by Google

know it, as in our opinion all Hardware jobbers who discount their bills, whether traveling five, ten or twenty salesmen, are entitled to the same consideration, and if there is unjust discrimination, harmony will cease to exist and a war in prices is likely to follow.

The manufacturers are fairly tumbling over each other to get into consolidations and trusts, and when their wild dream is realized they put on a saucy air, fire a new-born price at the jobber, and look forward to a day in the near future when they can trot in the class of great magnates—but we are more likely to see in a few years, sitting on a country fence rail, many of these spirits dejected and crestfallen with a long tale of woe and large experience.

H. W. WEBB & SONS.

THE KANSAS CITY TRADE.

We have our usual report to make. Bad weather in some respects, but a big, booming business.

Orders are not individually large, but well assorted and numerous enough to keep us working overtime often.

In truth, the business of Kansas City is outgrowing its clothes; so much so that at times the freight depots are literally swamped with deliveries, and shipments are delayed two and three days. Thus it is that the process of expansion continues—and we are expanding with it.

We are advancing prices conservatively; we are not unduly frightened. We are selling goods in a way to make us very satisfactory profits, but we are not of ourselves checking the outflow, by scaring customers to death with speculative prices.

Our contracts are secured, our expenses are fixed, our greed is limited, our customers are appreciative, and they are not uninformed of the movement and trend of events.

This wild craze that has taken possession of the manufacturing interests of this country is as certainly destined to result in humiliating, disastrous and deplorable effects, in which innocent people will suffer, as did the bursting of any other inflated "boom" of days gone by. True enough many conditions differ now from those that have heretofore obtained; but no other conclusion can be reached in the light of this frantic and insane desire to "consolidate," "combine," "pool," than that an era of feverish speculation has set in, and that form of speculation is to "water stock," sell the shares, take in the "suckers," artificially create values, get rich in a hurry, and let the rest of the world go straight to the devil, or anywhere else.

Let the public who have bought these millions upon millions of shares of "stock," presented by slick and wily stock jobbers, beware of the day of judgment.

The same men who promised great increase in values have got forces to "buck" which are not purchasable, and which are not ever false to their inviolability.

The laws of compensation, distribution, creation, are not excitable, not subject to consolidation and trust methods for a long period of time, and soon or late they commence to react. We are prepared for the reaction. We intend to keep just that way.

"Whom the gods would destroy they first make mad," and the noise of the tumult which is going through the land regarding these legalized plunderers, is not the wind among the branches, but is the ground swell of a mighty disturbance which, when it is ended will have shown some of the power which has been usurped by greed and lust for wealth. Call this writer a "pessimist" if you wish, but keep in view a clear conception of what the past 60 days has developed and then get in a retrospective mood and draw your own conclusions. The creature is never greater than its creator, and restricted outputs, and all other conjurings used to force values above anything natural always did and will yet bring dire disaster to the "promoters."

Near the close of the 14th century when John Wickliff was waging a tremendous warfare against superstition and ignorance, which was retarding the intellectual progress of the world, his persecutors assembled to hurl their anathemas and excommunications against him. Just preceding the assembly an earthquake occurred which the fearless Wickliff afterward used in ridicule—denominating this counsel as "the earthquake council."

Near the close of the 19th century another warfare is raging. Ignorance and superstition are yet extant in the world, but in the United States just now the strife is not between the forces of darkness and light, so much as between rapacious, uncontrolablle lust and greed for wealth, and on the other hand the wage-earners and those who wish to become wage-earners.

Some day the wage-earner, the man who creates wealth, will assemble in council. An earthquake will follow, not precede the council, and the wage earner will shut the door upon a large part of the anatomy of his whilom friend, the unselfish? kind hearted? generous? meek? "trust." No one of sense expects to do away with "trusts." Anyone without much sense ought to know that the trusts will never voluntarily go out of business, but involuntary or otherwise they will some day retire from some things which they now assume, because they dare, not because they are legal or right.

Without having access to his books, the writer will quote from memory as nearly as he can, words from *Longfellow* as he remembers:

"Though the mills of God grind slowly,
Yet they grind exceeding small,
Though He stands and waits with patience
With exactness grinds He all."

We think we may anticipate the same favorable "trade" which we are now experiencing. Local conditions favor it. Collections are only fair, failures very rare. Business transfers are frequent. We have advanced sheet metals with the market, and bar iron we are yet holding at only one advance, whereas two or three have been made to us. As before said, we are not unduly frightened. We have a few goods and we are making money on everything we sell. We will remain near the rear in advances; we will have a less distance to drop. We are selling our share,—we are very willing to part with our goods at our prices. Some wholesalers forget to think. Afterward they think to forget.

Most of us have passed through attacks of both diseases. They are worse than the itch; more abominable than la grippe, and that we shall succeed in striking a happy medium is the wish of H. C. RUSHMORE.

THE CHICAGO TRADE.

Much of our business last month consisted of future orders that our ambitious force of traveling salesmen had sold to customers earlier in the year at old prices before advances had taken place. As the goods went out of our shipping room in large quantities and we looked over the invoices, we could not help but think that Hardware was being sold too cheaply.

However, at the close of February, when we came to foot up our sales, we discovered, even at the low prices, our business for the past month had footed up 50 per cent. more than the sales for February, 1898, and a little over 100 per cent. more than our sales for February, 1897.

The way our business piled up the first four or five days in March indicated that we were about to surpass by a large majority any month since we entered into the Hardware trade, and now that we are selling goods at better prices our salesmen find that it is much easier to make sales and give satisfaction if we can guarantee the retailer our ability to deliver all the goods purchased.

Recent days have witnessed quite a number of changes in our market in the way of advances on cut and wire nails, sheet steel, sheet iron, carriage bolts, rules and many similar lines,

Digitized by Google

We learn that a number of other advances are being contemplated by manufacturers, and from all that we can gather through the traveling salesmen, it seems that the field is ripe for an improvement in that direction, and that consumers and retailers alike are not averse to paying a slightly higher price for shelf and heavy Hardware.

Throughout all sections of the Northwest prospects for business were never better, and, personally, we have never had such bright prospects ahead as at the present time.

One of our best salesmen, enclosing a letter with a very large batch of orders, wrote to us in this wise: "It is a snap to take orders at the present time. I only hope that these good times will continue for nine straight innings."

This quotation from one of our salesmen's letters is an index of the cheerfulness and hopeful feeling of all of our salesmen on the road at the present time.

WELLS & NELLEGAR CO.

THE MINNEAPOLIS TRADE.

Indications for business are very good with us here. We feel confident there will be more building in Minneapolis the coming season than for a number of years past, and people generally are paying the advances without much question. While we do not think at the present time there have been greater advances than might be expected, isn't there a prospect that the market will run away with itself, and much harm result? It seems to us that a very conservative policy should be pursued. We think the trade is generally taking advantage of the situation and are marking up their goods accordingly. Trade so far this year has been very good; much better than for several previous years, and collections generally are very satisfactory.

W. K. MORISON & CO.

THE SAGINAW TRADE.

Business in this part of the country has not started up yet, on account of our backward season. To-day it is snowing hard, the sleighing is good, and it looks more like winter than at any time this year. The country merchants, therefore, are not sending in many orders.

Such great and rapid advances as there have been of late, on iron and other metals, and goods made from same, only come once in a person's lifetime, and the jobbers in this part of the State are inclined to take advantage of the advances, and on that account the business prospects for 1899 are extraordinarily flattering.

There is a beet sugar factory within ten miles of us that went into operation last fall and has had a very profitable business. There are three others within a few miles of our city, which will be completed in time to make sugar from beets next fall. Our lately developed coal fields are turning out quite well, and there are a number of new mines to to be opened in the spring. MORLEY BROS.

THE BOSTON TRADE.

The excitement of January and February still lingers with us, and every mail brings some notification of an advance or withdrawing of existing quotations and will quote "upon application." Manufacturers report plenty of orders on their books, and judging from the delay in receiving goods ordered early in the season, it looks as if it might be some time before shipment would be made promptly and the supply equal the demand.

The opinions regarding the present conditions of the markets are widely at variance, but the more conservative and experienced heads are somewhat doubtful as to the possibility of holding all the advances even through the present year.

There has been an immense demand upon the manufacturers for goods of all kinds, which is partly speculation and partly to cover legitimate wants for seasonable goods. The actual increased demand from the consumer has not yet appeared, and until it does come we do not believe that many of the present advances can hold.

The cold weather is holding trade back somewhat, but there is an active demand for seasonable goods, and prices are being well maintained.

The recent advance in shovels did not come unexpected, and judging from the number of unsolicited orders for these goods, it was even anticipated by the retail trade.

FRYE, PHIPPS & CO.

THE CLEVELAND TRADE.

A large advance on staple goods will seriously interfere with our export trade, which will also stimulate manufacturing, by starting all the idle wheels in the country. How long will the home market absorb this surplus? The speculative feeling has done much to increase the price, but it is not strong enough to maintain the market at even its present advance.

Manufacturers are likely to find an overproduction before the summer of '99 is over. The ore, coal and transportation is abundant, and facilities for manufacturing and oversupply for the home market, and the country will not long submit to a tariff that serves only to enrich the capitalists at the expense of the consumer.

A few of the stronger combinations will make the price for export and another for the home market, but where there is competition, the price must be equal. Where there is no competition, the tariff will be a disgrace.

American made goods must be sold to our own people as low as they are sold for export, or the people will not be long in determining what remedy is needed. Banks and trust companies who are underwriting these combinations, and others who are investing in their stocks and bonds, are likely to be shorn lambs unless the country can be held in bondage by combinations. The reckless purchases being made of mills by some of them indicates a degree of desperation equal to the attempt to rob a train. We shall see whether the public will throw up its hands or fight.

LOCKWOOD-TAYLOR HARDWARE CO.

THE COLUMBUS TRADE.

Trade is excellent, and as far as we know, jobbers are all busy as nailers. We are experiencing the very trouble we anticipated in getting goods promptly. It is next to an impossibility to get steel goods, poultry netting, wire cloth, wagon Hardware and many other goods. A great many retailers gave orders for goods to be shipped April 1st to 15th, and found they wanted them sooner, but it is hard to get shipments. It is the custom of manufacturers to gobble up all the orders they can get, knowing at the time they cannot fill near all of them in time for the season's trade. We think they should refuse orders beyond their capacity to fill. We think there are enough factories in most lines to supply all wants, and no manufacturer has the right to load up on orders he cannot fill to keep some one else from getting business. A dealer writes that he mus

The Walda Sectional Window Weight

is sold only through the Hardware Trade. All inquiries referred to the local dealer. . . .

Square and Round Weights. Hang exactly from the centre. Only 10-inch pockets required. Lock at right angles. Take place of lead weights at one-sixth the cost. Save time and delay by balancing exactly at once.

Weights crated with 100 lbs. in Box; both plainly marked.

The Hardware Dealer requires only five sizes to fill any order. . . .

SEND FOR CIRCULAR.

Barney & Reed Mfg. Co., 85 WATER ST., BOSTON, MASS.

Digitized by Google

have goods at once, as he is losing sales, and gets a letter from the manufacturer saying he expects to ship in a short time, or will ship in two weeks, and trusts it will be entirely satisfactory. He surely knows it will not be satisfactory, as the trade may be practically over by that time, on the article.

We fear goods are getting too high; $13 a ton on iron is a pretty stiff advance; $18 a ton on steel tire is more than the advance in raw material justifies. This is true on a great many other articles. It will be the same old story—prices are bound to seek their level. We never could understand why American manufacturers will put prices clear above their legitimate value, thereby inducing new competition that may be a thorn in their flesh for many years. Their motto seems to be a "feast or famine."

We are having spring weather now. Wheat, grass and robins are looking well. SMITH BROS. HARDWARE CO.

THE DAVENPORT TRADE.

The Iowa Hardware Jobbers' Association held their regular quarterly meeting at Des Moines on the 15th and 16th inst. Peace and harmony prevailed; a resolution was passed naming Des Moines as the place of its next meeting in June. This will make the third meeting in succession of the association at that point, and may give the town some prominence.

The American Steel & Wire Co. have placed the Ellwood woven wire fence between themselves and the jobbers. If this does not keep the aforesaid jobbers away from them, will they try barb wire fencing? Time will tell, and we may not have long to wait.

The Crescent Bridge across the Mississippi is completed, giving us bridge competition which we have not heretofore enjoyed. The newspapers report that the contracts are let for building the new railroad between Davenport and Clinton. We hope the reports are true. The ice departed on its regular annual tour to the Sunny South last Sunday and the sound of the steamboat whistles is again heard.

The last Congress appropriated funds for manufacturing small arms at the arsenal here.

Pearl buttons are not Hardware, but a new factory starting here, making three that we have in all, suggests increased sales of files. By the way, some of your readers may not know that this is the centre of the pearl button industry of this country. It was stated at a recent meeting of the Davenport Business Men's Association that this industry had brought to this locality a million and a half dollars during the last four years, and that eighty per cent. of the pearl buttons used in the United States are now made here. Only a few years ago these goods were all imported.

The stocks of Hardware in stores have been accumulating, and the increase in sales over previous years may not be so great in the future as they have been during December, January and February, although March will show a marked gain over last week.

SICKELS, PRESTON & NUTTING CO.

THE PITTSBURG TRADE.

Only those who can remember the days of 1861 have any precedent for the present rapid advance in the value of Hardware. The merchant of that day had only to hold on to his goods and keep marking them up for a year or two to get rich. Whether that plan will hold good now, no one can tell certainly, but not many will have the nerve to try it. People have had such an experience of the enormous produding capacity of our manufacturers, under the reign of low prices, that it will be hard to convince them that anything more than a moderate advance can be maintained.

The sudden rise in raw material, pig iron and billets, is of course the basis of advance in heavy Hardware and conditions in our own country and Europe are such that these prices will hold for the rest of this year certainly; how much longer it is hard to say, but Hardware must be higher when iron, copper, tin, etc., which enter into it remain at present prices.

There are general conditions which however affect the situation. The enforced economies of the past six years used up all the tools and supplies in the hands of farmers and mechanics. The enormous crops of the past three years sold at good prices have put money into the hands of the farming community and started them to buying. This started the shops and mills; and wages are advanced, adding enormously to the purchasing power of the army of employees. Confidence has been fully restored and capital has come out of its hiding places in such quantity as was not thought to exist. All this means prosperity, and prosperity means good prices, so that for a year or two at least we may expect prices to remain at a higher level.

Jobbing trade is good, especially in manufacturing districts. Country towns have been stuck in the mud for a week or two, but a few days' bright weather will cure that. St. Patrick's day, proverbially stormy, has been bright and pleasant and spring weather from this time on will bring a rush of trade, LOGAN-GREGG HARDWARE CO.

THE OMAHA TRADE.

Cold, raw, unpleasant weather has had a tendeney to limit the volume of business to an extent and curtail what would otherwise be an unusually active trade. But in spite of this fact, the indications are that below the bad weather is an active trade only waiting for an opportunity to spring into an activity that will tax the facilities of both jobbers and manufacturers to the largest extent to take care of it. The scarcity of goods is already a noticeable feature and without doubt will be even more marked as the spring advances. When the purchasing power of the community is low every inducement that may be offered in the way of prices, etc., apparently has little inducement to stimulate any unusual activity in trade, but when the people have the ability to buy, the disposition usually follows along with it and no advance in prices, provided it is a reasonable one, appears to have any effect at all in keeping back the volume of business. It might be further considered that the stocks carried by the retail dealers are larger than the average, many purchases being made in anticipation of still higher prices and the same theory applies to purchases from the manufacturers. Under the circumstances it is not surprising that the volume of business is noticeably large and the difficulty in procuring goods more of a feature than the ability to make disposition of them.

Collections are better than might be expected with the condition of the roads and the weather, and when spring opens up, undoubtedly the demand for season goods will be very largely in excess of the ability of the manufacturer and jobbers to supply, and this year, at least, the party who places his orders early and gets his goods in advance of his needs will have an advantage over his slower competitor that will be worth having.

RECTOR & WILHELMY CO.

SMOKELESS POWDER FOR RIFLES, REVOLVERS, SHOTGUNS.

Laflin & Rand smokeless powder is manufactured under what is known as the colloid process. This consists in having the explosive agents incorporated in a gellatin substance which dries into a semi-transparent mass that is hard and absolutely waterproof. This powder is not granulated and screened, but is cut into exact sizes by revolving knives. The result of this system of manufacture is that every grain contains the same amount of explosive and exerts the same bursting power. The manufacturers guarantee the powder to be absolutely smokeless, to be high in velocity and low in breech pressure, and to be wholly unaffected by heat or cold, dryness or dampness. If you are interested in smokeless powder call at this office or write for information.

Water Power in Switzerland.

Switzerland has for many years been noted for its extensive use of water power, but in the last few years there has been a notable increase in the number of power plants, as well as in their character. The introduction of electric transmission has made it possible to use many streams which previously were unavailable, and the demonstration of the practicability of using electric motors in the place of steam locomotives for mountain roads has opened a new field for hydraulic and electrical industry.

There are many small streams, furnishing only a few cubic feet of water per second, which in a mountainous country can be tapped several hundred feet above the point where a power house can be conveniently built, and a cheap pipe line is all that is necessary to direct this energy upon the buckets of a Pelton impulse wheel or a Girard turbine, converting nearly all the power into a form most readily applicable to the generation of electricity.

Instead of the puffing, jerking locomotive so well known to all who have made the ascents of the Swiss mountain roads, the smoothly running motor will form a most acceptable substitute, and the weight of the descending water will practically act as a counterpoise to that of the ascending train.

There is not the demand in this country for mountain climbing roads that there is in the favored land of tourists, but there is no reason why many minor streams should not be pressed into the service of man in other ways. We have many such sources of power in mountainous regions not too far from points of utilization to be neglected, and instead of searching for enormous water rights and organizing great development companies, some time and energy might well be spent in harnessing the mountain streams of America and setting them to work in the same effective manner as has been done with those of Switzerland.—*The Engineer.*

The Origin of Metal Currency.

In the early ages of mankind, all commerce was conducted by means of barter. The tradesman exchanged his cattle for goods, and the merchant his goods for food to eat. But such a status of affairs could not continue long and the necessities of mankind led to the substitution of a medium of exchange, or representative of value. The precious metals, from their intrinsic worth. as well as their portable character, naturally suggested themselves for this purpose. At first, however, they were used in bars, without stamp or coinage, and were necessarily weighed and assayed at every transfer. But the inconvenience of this method soon became apparent, and the expedient was soon hit upon of establishing the weight and authenticating the value by a mark or symbol. Soon after, that the needs of trade might be further met, the bars were made of various sizes. Finally, to still further impress the character of a legalized currency on the gold, silver, bronze or copper employed, appropriate shapes were selected, the circular form being that most generally adopted.

It was not always, however, that money was made round. Our British ancestors, prior to the invasion of Julius Caesar, employed rings, sometimes singly, but oftener made into a chain. Large quantities of this species of coin have been unearthed in England, Ireland, Scotland and Wales. The smallest piece of money of this description which has been discovered is a gold ring weighing half a pennyweight. But others containing three times this weight, and up to a pound Troy, have also been dug up, thus proving that the rings were not intended for ornaments, but for currency.

Even among the Romans, circular coins were not in use until the time of Servius Tullius, and in Great Britain they were not employed until some time after the Caesarian conquest.

Of all ancient nations, the Greeks produced the most beautiful coins, those of the Romans not being particularly attractive until a late period in their history.

The method of stamping the piece of money was simple. Usually, the blow which made the impression was struck by a hammer, and, at first, the die was cut in the face of the instrument itself. So late as two centuries ago, the coining of money, even in England, was conducted after a rude fashion, and many a Spanish coin, still in evidence, bears decisive proof of uncouth coinage.

Even now, at the close of the great Nineteenth Century, a century which marks greater advance in the arts and sciences than any preceding, a large amount of the coin of Europe is disgraceful to art, and is frequently basely alloyed. The exceptions are the coins of England, France, Belgium and Prussia.

Some of the finest coins and medals ever made were those issued by the Emperor Napoleon. The worst executed coins, among civilized nations, are those of Mexico and the South American States.

Money, according to the encyclopedia, is a word derived from the temple of Jupiter, *moneta*, where a metallic currency was first struck by the ancients. Cash comes from the French word *caisse*, a coffer or chest in which money is kept. The word pecuniary is derived from *pecus*, the Latin word signifying a flock or herd of animals, these constituting, in the earlier ages, the equivalents of money. —*Michigan Tradesman.*

A "HARDWARE JOBDERS'" NUMDER.

OUR ANNIVERSARY ISSUE OF APRIL 10, 1899, WILL BE DEDICATED TO THE

HARDWARE JOBBERS OF AMERICA.

It will be Handsome, Artistic, Timely, of Permanent Value, and will go into the hands of the Jobbers of the World.

On April 10, 1898, the Eighth Anniversary of the founding of *Hardware*, we published the largest, handsomest and most artistic number that was ever presented by anybody, anywhere, to the Hardware trade.

It was devoted to the Hardware Associations of America; was read by everybody; went into every corner of the globe; was laid away for preservation and future reference by the majority of its readers; and won golden words of commendation from the trade.

This great number is to be duplicated on our Ninth Anniversary of April 10, 1899.

The special branch of the trade to which it will be devoted may be learned from the following title, which will appear upon the cover of that issue:

"HARDWARE JOBBERS' NUMBER."

This seems to us to be the most timely subject that can be chosen, now that the questions touching upon the jobbing trade are being so generally discussed, and so many points continually raised as to the exact status of the jobber before the trade; the extent of his influence; his proper sphere of endeavor; his relation to the manufacturers on the one hand, and to the retailers on the other; his restrictions, and the temptations that beset him in securing trade; and various other points of vital importance that touch upon his very existence, and relate to his status in the future. All these questions, and many more that will readily present themselves, will be fully discussed by men competent to speak for the trade, and who have given serious attention to the themes upon which they have promised to write. Among the many subjects which will be discussed, the following may be named:

"The Hardware Jobber: Has he a Business Future? Is he here to Stay?"

"The Present and Future of the National Hardware Association."

"The Ethics of the Jobbing Business."

"The Hardware Jobber as a Man and Brother."

"The Jobber from the Manufacturer's Standpoint."

"The Manufacturer from the Jobber's Standpoint."

"The Jobber from the Retailer's Standpoint."

"The Retailer from the Jobber's Standpoint."

"The Western Jobber."

"The Eastern Jobber."

"The Southern Jobber."

"The Northern Jobber."

"The Central Jobber."

"The Pacific Coast Jobber.

"The Canadian Jobber."

"The Past of the National Hardware Association."

"Other Hardware Jobbers' Associations."

"The Package and Cartage Question."

"Restrictions as to Jobbing Territory.

"How Does the Jobber's Future Look to a Man in the Corner?"

"Syndicate Buying."

"Fraternity in the Jobbing Trade."

Etc., etc., etc., etc., etc.

In the preparation of our anniversary number of last year, we received the cordial assistance and support of the trade everywhere, and the congratulations which were showered upon *Hardware* for its successful venture into this practically new field, were an ample compensation for the labor and expense involved.

We have already received sufficient assurance that this second endeavor upon the part of *Hardware* will be most earnestly appreciated and endorsed by the trade. We should be pleased to hear from our friends everywhere with such advice, suggestions or information as they can offer for the successful realization of the purpose we have in view.

HARDWARE PUBLISHING CO., No. 143 Chambers St., New York.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Grand Rapids, Mich.—The Hardware Supply Co. has been incorporated; to manufacture Hardware specialties. Authorized capital, $10,000. Paid in, $7500. Incorporators: C. L. Frost, F. S. Frost and C. D. Harrington.

Ironton, Ohio.—The Marting Iron & Steel Co. has organized by electing the following officers and directors: President and general manager, H. A. Marting; secretary and treasurer, T. J. Gilbert; superintendent of works, E. J. Bird, Sr. Directors: H. A. Marting, A. H. Mittendorf and W. A. Murdock, of Ironton, and J. H. King, R.M. Gilbert and T. J. Gilbert, of Columbus. The company is capitalized at $140,000, paid in, and has a capacity of nearly 400 tons daily.

Jersey City, N. J.—Articles of incorporation have been filed by the Whitney Safety Fire Arms Co., No. 645 Grove Street. The capital stock is placed at $500,000. The incorporators are: A. C. De Merritt, of Hackensack; C. F. Bussler, W. H. Whitney and W. A. Kissam, all of New York.

New Haven, Conn.—The Booth & Law Varnish Co. has been organized in this city with a capital of $18,000, all paid in.

New York, N. Y.—The Bayonne Knife Co. has been incorporated. Capital, $20,000. Frank B. Morgan, of Gowanda; C. D. Garretson and S. R. Clarke, of New York City, and J. V. D. Garretson, of Bayonne, N. J.

Port Huron, Mich.—Carleton & Cole have organized a stock company to manufacture farming implements. The capital is $20,000 and all of the stock has been subscribed for. New buildings will be erected on Court Street.

Providence, R. I.—The Heaton Patents Co.; patented articles and Hardware specialties. Authorized capital, $100,000. Incorporators: W. V. Lawton, A. G. Pierce, C. J. Arthur.

Rochester, N. Y.—The Wilfred Eames Mfg. Co. has been incorporated; to manufacture grinders. Capital, $10,000. Directors: Wilfred Eames, Marion Goodale and A. H. McCall.

Toledo, Ohio.—The Toledo White Lead Co. has been incorporated under the laws of Michigan, with Charles E. Sumner, E. McCleary, J. Landgraff, Jr., of Toledo, and S. Carsly, of Kendallville, Ind., as incorporators. The capital stock of the company is $25,000, with $16,000 subscribed and paid in. The company is successor to the business of the Toledo White Lead & Oil Co., which has been in the hands of a receiver.

Trenton, N. J.—The Durable Wire Rope Co. has been incorporated, with a capital stock of $250,000.

Trenton, N. J.—Articles of incorporation have been filed with the Secretary of State for the Artificial Rubber Co., with an authorized capital of $1,000,000. The company is authorized to manufacture and deal in artificial rubber and rubber substitutes. The incorporators are: Charles F. Lamb, William E. Sharpe and Thomas P. Curley.

Trenton, N. J.—The Moses, Swann & McLewee Co.; to manufacture lamps, glassware, etc. Capital, $100,000. Incorporators: Arthur H. Moses, Walter Moses, Frederick Swann and Wm. S. McLewee.

Changes and Improvements.

Bowling Green, Ohio.—D. E. and Edward Waltz, who have been identified with the American Foundry & Machine Co. for several years, have concluded to branch out for themselves, and accordingly will erect a new machine works here, and expect to be ready for business within a month. Their line of work will be principally oil field repairs.

Chicago, Ill.—The McCormick Harvesting Co. have begun the construction of a four-story brick knife shop, 63x163 feet, in connection with their plant at Western and Blue Island Avenues. The building is to cost $50,000. A new building for the woodwork department, which will cost much more than the knife shop, is soon to be erected, and the company is considering the desirability of adding a twine factory during the summer.

Knoxville, Tenn.—The Harriman Plow & Handle Co. will enlarge their plant.

Milton, Pa.—The F. A. Godcharles Nail Works Co. have concluded to rebuild their plant recently destroyed by fire. It is one of the largest nail factories in Central Pennsylvania. The Borough Council have agreed to exempt the company from local taxes for the term of five years. The majority of men who were thrown out of work by the disaster have been given steady employment ever since at the Waterbury Nail Factory. The Lewisburg Nail Works have been purchased and will be added to the plant here.

Rockwood, Tenn.—The Roane Iron Co. will build an iron furnace, with a capacity of 150 tons daily, and at a cost of $200,000. The company has one furnace in operation at this place. The demand for Southern iron is so great that the company decided to build another furnace, and open extensive coal mines near Rockwood.

Shelton, Conn.—Goodwin & Knitz, manufacturers of brass fittings, have positively decided to remove their business to Winsted. The final arrangements were made, when A. B. Gaylord, of the Winsted Hosiery Co., and J. G. Woodruff, of the Gilbert Clock Co., waited upon the concern and transferred to them the $8000 which were needed to increase the company's plant there, and cover the expense of removal.

St. Albans, Vt.—E. N. Quiren and F. L. Pippin have rented the factory of the old Bethel Mfg. Co., and will manufacture knife sharpeners and other novelties.

Recent Fires.

Mount Joy, Pa.—The works of the Grey Iron Casting Co., one of the largest concerns of the kind in the county, have been destroyed by fire. The blaze was of unknown origin and spread rapidly to all of the departments, and there was no chance to save the building. The plant employed 130 men and the loss was $65,000, which is partly covered by insurance. The company manufactured shelf Hardware and iron novelties.

Miscellaneous.

Ansonia, Conn.—The Coe Brass Mfg. Co., who also have a plant at Torrington, have determined to increase their capital to $1,000,000, it is understood, for the purpose of enlarging their plant.

Bellaire, Ohio.—The Stewart Enamel Co. have decided to increase their capital stock to $100,000. The company will probably erect an additional building for the manufacture of various specialties in enameled ware. W. C. Stewart, Jr., is president of the company.

Indianapolis, Ind.—The Keyless Lock Co., of this city, have been awarded the contract to furnish postoffice supplies for the postoffices at Havana and Manila.

Lynchburg, Va.—The stockholders of the Lynchburg Hardware Mfg. Co., at a meeting held in the People's National Bank recently, elected the following directors: H. E. McWane, William Hurt, J. D. Horsley, George P. Watkins, J. F. Slaughter, Jr., E. L. Bell and J. G. Payne. Subsequently the directors held a meeting and elected the following officers: President, H. E. McWane; secretary and treasurer, J. G. Payne; manager, Mr. Whiting. As is doubtless well known, this company includes the Lynchburg Brass Works and the Norwich Lock Works, of Roanoke.

Mansfield, Ohio.—At a meeting of the Aultman-Taylor Co., for the election of directors, the officers of the previous year were re-elected. The directors are: E. A. Harter, Henry W. Harter, J. E. Brown, George Brinkerhoff and Isaac Harter. The officers are: President, E. A. Harter; vice-president, Henry W. Harter; secretary and treasurer, J. E. Brown.

Pittsburg, Pa.—At the annual meeting of the American Axe & Tool Co., the old board, with Charles W. Hubbard, Jr., of Pittsburg, at its head, was re-elected.

Troy, N. Y.—The Fuller & Warren Stove Co. have elected trustees as follows: Walter P. Warren, C. W. Tillinghast, Robert H. Thompson, Walter P. Thompson and William Henry Warren. The trustees organized by electing: President, Walter P. Thompson; vice-president, William Henry Warren; treasurer, Joseph Mackey; secretary, R. S. Wood.

Trenton, N. J.—The American Saw Co. have elected the following directors: C. Upman Ely, John E. Bowles, John S. Frothingham, A. W. Kellogg, Dexter A. Loomis, R. C. Jenkinson, Adam Hill and A. A. Healey.

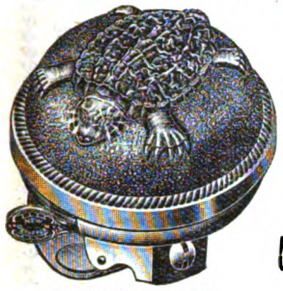
Recent Embarrassments.

Amsterdam, N. Y.—Barkhuff & Conover are reported to have failed.

Recent Fires.

Detroit, Mich.—H. M. Snyder has been burned out.

A New Wonder.



The newest wonder in American engineering has just been inaugurated at Houghton, Mich., viz., the Red Jacket shaft of the Calumet and Hecla—the greatest mining shaft in the entire world. It is 4900 feet deep, and, compared with it, the deep silver mines of the Comstock lode in Nevada or the wonderful mines of Austria, worked for many centuries past, are but shallow pits. There are six compartments, each equal in size to an ordinary mining shaft, four of these being used for hoisting rock or lowering timber; one is used for the ladder ways and the sixth and last compartment carries the wires and pipes for telephones, light, power, water and compressed air. The underground workings of the shaft are laid out with mathematical accuracy, the undeviating course of the copper bearing lode allowing work to be planned thousands of feet ahead of the mineral picks. The great pumps which free the mine of water are operated interchangeably by compressed air and electricity. The power drills which cut the holes for the dynamite cartridges are run by compressed air alone, and there are more than 300 of these drills, each doing the work of a dozen men, working both day and night, in the Calumet and Hecla mine.—*Exchange.*

"Fwat is th' matter with your face?"

"Oi wor thrown from me carriage, but it tuk th' condoochtor and motorman, both of thim, to do it."—*Indianapolis Journal.*

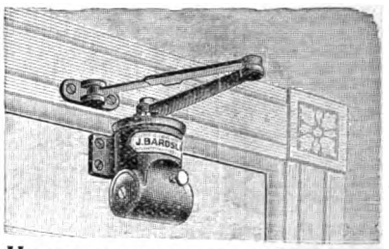
"EVERYTHING IS COMING UP."
BUSINESS IS BETTER AND THERE WILL BE
A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.



Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

Diamond Hardware Co.,

624 Atlantic Ave., Boston, Mass.

THE "BARDSLEY"
Oil Door Check and Spring

HAS new and improved features. Is free from packing friction; the checking power can be released when the door is near the closing point; more oil can be added when needed without taking it from the door and it can be readily taken apart with the aid of a screw-driver when repairs are necessary.

AN exceptional opportunity to buy a Hardware stock of about $10,000, in a city in Massachusetts of over 64 000 inhabitants Satisfactory reasons given for selling. Address BIGELOW & DOWSE CO., Boston, Mass.

EXCELLENT opportunity to buy out an up-to-date Hardware store with a fairly moderate capital. Address "EXCELDENT," care HARDWARE Publishing Co., No. 143 Chambers Street, New York.

FINE opportunity to purchase an old-established stand within ten miles of Boston; 38 foot frontage, rear entrance. Stock well selected of builders' and shelf Hardware. Fair bicycle trade and good opportunity for adding bicycle repairs. Owners moving away reason for selling Address "UNUSUAL OPPORTUNITY," Box 167, Boston, Mass.

HARDWARE, coal and lumber business in a town of 3000 population. No other Hardware store or lumber yard within ten miles. Inventory January 1, 1890, $10,000. A rare chance to right party. Address J. C. SENDEL, Weatherly, Pa.

A NICE, clean stock of Hardware, located in one of the largest and most thriving towns in New England, is offered for sale on account of the owner's poor health. The business has been established twenty years; is in the best location in the town, and in a thrifty condition. The stock will invoice at about $10,000. To a party with the cash it offers a splendid opportunity. Address A., care HARDWARE, No 143 Chambers Street, New York.

A COMPLETE stock of Hardware, saddlery, stoves and tinware. Business well established in a live town and prosperous country. Address A. B. C., care HARDWARE, No. 143 Chambers Street, New York.

A COMPLETE stock of Hardware, stoves and tinware, paints, oils, plumbing and tinning, steam and hot water heating; water works now going on, can have the tapping of mains. Established ten years and no opposition. Right party can make $1500 per year over expenses. Nearest Hardware, ten miles in a thriving town in Pennsylvania. Will sell property if wanted or will rent reasonable. Reason for selling, going to retire from business. Address Box 92, care HARDWARE, No. 143 Chambers Street, New York.

HARDWARE business on Pacific Avenue, Tacoma. Stock inventories $20 000. Manager recently deceased and owners desire to sell. Business established in present location ten years ago. Address THE SYNDICATE CO, No. 503 California Building Tacoma, Washington.

File Factory for Sale.

ON Saturday, April 1, 1899, the plant of the late McClellan File Co. will be sold at the Saginaw County Court House, by the Circuit Court Commissioner, to satisfy mortgages about one-third the value of the plant, which will be sold entire, comprising real estate, buildings and all machinery. The factory has a capacity of 500 dozen files per day, and is one of the most thoroughly equipped file plants in the country. Plenty of cheap fuel. An elegant opportunity on a small capital to manufacture files for the trade, or to operate it as a re-cutting factory. For further particulars, address GEO. J. LITTLE, Saginaw, Mich., for mortgagees.

Patent for Sale.

ICE SCRAPER or Shredder Patent for sale Best and cheapest hand device yet made. Address "PATENTEE," care HARDWARE, No. 143 Chambers Street, New York.

Agency Wanted.

A PARTY with many years' experience on the road, and who has a first-class agency for the United States, would like to add one or two more lines, or would join with another who has good agencies. Address B., care HARDWARE, No. 143 Chambers Street, New York.

EXPERIENCED Hardwareman desires to represent manufacturers or jobbing houses of Hardware and house-furnishing, or anything in the building line. Have a very good standing among contractors and building fraternity of Cleveland, Ohio, and vicinity. Address CHAS L. HEISER, care the Builders' Exchange, Cleveland, Ohio.

MANUFACTURERS' AGENT, with well located store in machinery district in New York, would like to hear from manufacturers wanting a reliable representative; have an established trade and years of experience. Address GEO. W. CHURCH, No. 183 Greenwich Street, New York.

COMPETENT cutlery man, residence, Colorado; twenty years in business, four years road work, wants agency for first-class cutlery firm or manufacturer in territory west of the Mississippi. Address G. A G., care HARDWARE, No. 143 Chambers Street, New York.

Foreign Agency Wanted.

A GENTLEMAN with large experience and with good connection in all the principal towns in Newfoundland, is prepared to undertake additional agency in Hardware trade; good testimonials and references from firms represented. Address GEO. B. PARSONS, P. O. Box 331, St. Johns, Newfoundland.

English Agency Wanted.

A GENTLEMAN who has been in the Hardware and cutlery line in England for twenty-five years wishes to represent American houses in light iron and steel line, patented novelties, etc., or the sole sale for England on his own account. Address Box 96, care HARDWARE, No. 143 Chambers Street, New York.

Agency Offered.

WE would like to hear immediately from a few live Hardwaremen who would like to be sole representatives in their towns, of a concern that is in the market for business, and have a line made for "men now on earth"—a modern line THAT CAN BE SOLD to your customers. Address "Box 88," care HARDWARE, No. 143 Chambers Street, New York.

WANTED agents to handle a patented, labor saving device of universal sale; investigation solicited by men who desire quick returns from a legitimate, profitable business. Address (C) BURR MFG. CO Cleveland, O., 823 Society for Savings.

Attention, Salesmen!

SALESMEN on uncovered ground can add hose, tires and full rubber line. Free samples. Cash commissions Protected ground. One salesman earned $3900 in 1898. MINERALIZED RUBBER CO., New York.

Attention, Manufacturers!

FIRMS contemplating going into the enamelling business or wishing a new formula to enable them to add to their present lines in one or two coated ware, are invited to correspond. Highest references. "EXPERIENCED ENAMELLER," care HARDWARE, No. 143 Chambers Street, New York.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Pearce's Improved Cahoon Patent Broadcast SEED SOWER

Is as much superior to any other device for sowing grain as the modern electric light is better than a tallow candle. The **CAHOON** is not the lowest priced seed sower, but taking into consideration the durability of the machine, the ease with which it is operated, and the quality of its work, it is the cheapest. Pays for itself every day that it is used. Sows all kinds of grain and cleaned grass seed; does five times as much work as can be done by hand with two-thirds the amount of seed, and does it better than it can be done in any other way.

Dealers who handle the **CAHOON** make a profit and a satisfied customer at the same time. They stay sold. A prominent Hardware dealer in the South wrote us under date of February 13, '99: "We are not handling any other broadcast seeder similar to yours. Tried this some years ago and got enough of it."

Retail dealers supplied at factory prices promptly by our wholesale agents at all principal distributing points. . . . . .

NEW YORK OFFICE, 10 WARREN STREET.

GOODELL COMPANY, - ANTRIM, N. H.

CELEBRATED **"HEINISCH"** SHEARS.

Judge Townsend of United States Court has just granted an accounting and

INJUNCTION

against H. Boker & Co. of New York City restraining them from using the name **HEINISCH** or **H. C. HEINISCH** on shears in any way which will interfere with our trade name.

We respectfully inform the trade of our determination to protect our rights and all persons found selling shears bearing any imitation of our Trade-name will be held strictly accountable for their acts.

Very Respectfully,

NEW YORK OFFICE: 90 Chambers St.

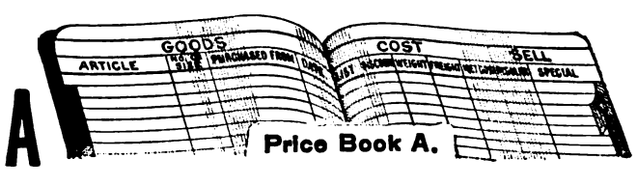
"USEFUL AS AN ADVERTISING MEDIUM."

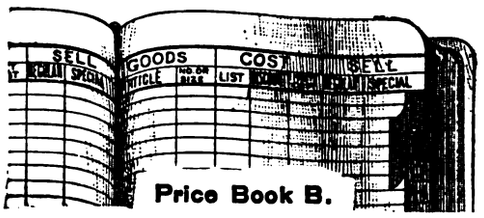


Smith & Egge Mfg. Co., Bridgeport, Conn. [*Traps, Locks, Chains, Pulleys, etc.*]: We have found your paper very useful as an advertising medium.

Digitized by Google

HARDWARE PRICE BOOKS.

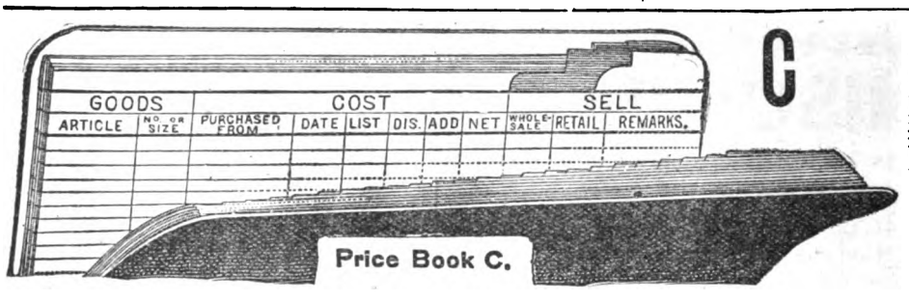
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. *Size of page, 4 x 7 inches.*

FOUR EDITIONS:



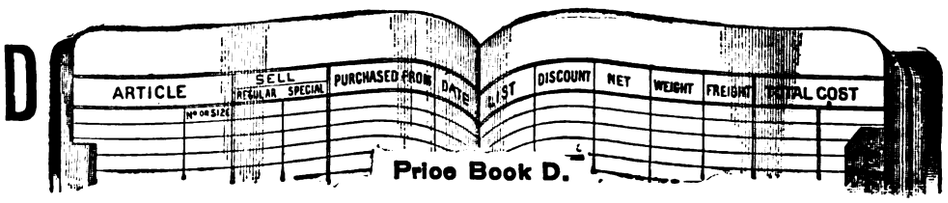
A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. *Page, 4 x 7 inches.*

FOUR EDITIONS:

B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. *Page, 4½ x 7¼ inches.*



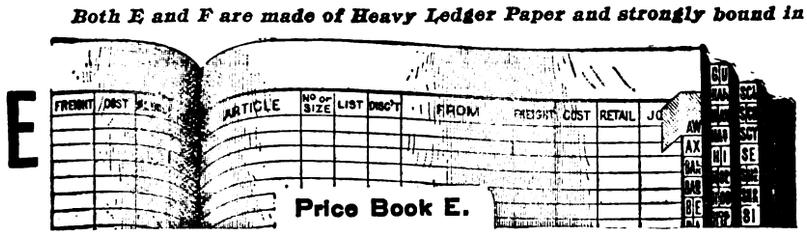
FOUR EDITIONS:

C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. *Page, 5¼ x 8 inches.*

FOUR EDITIONS:

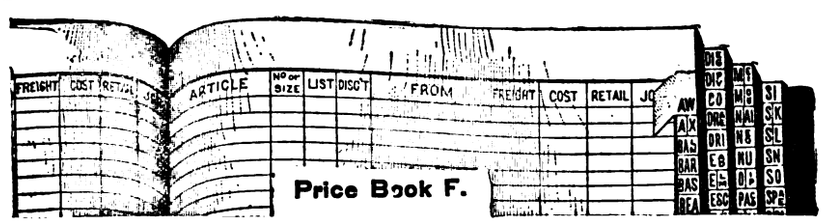
D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2.50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to AU For Chisels, turn to CHI For Iron, turn to IRO
" Parers, Apple " PAR " Cutlery, " CUT " Irons, " IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

AD GU SCI
AN HAM SCR
AU HAN SCY
AW HAT SE
AX HI SHE

Fac Simile of Indexing.

Price Book E—350 pages, 7 x 10 inches, canvas tab indexing. Price, $5.00.

AD DIE MF SI

TO THE DEALER

a saving of time without loss of profit.

A case of **EVER READY** Hoops and Clamps supplies the dealer with an article in compact, easy selling shape, and to his customer a hoop quickly applied to any size tub without use of special tools; makes a better finished, stronger job than by old methods. **EVER READY** Hoops fit when applied. No hammering required. **Adjustable to any size tub—no rivets.**

Send for descriptive circular.
